PMC Managers v2

Enterprise CRM & e-Tender Platform

A global tender management ecosystem — built, secured, deployed.

PMC Managers Limited · August 2026
www.pmcmanagers.com

1. Executive Summary

PMC Managers v2 is a production-grade, multi-tenant e-Tender and procurement platform mirroring a 39-page Enterprise CRM specification. It orchestrates the complete tender lifecycle — from notice publication and vendor onboarding to bidding, evaluation, contract award, and digital signature — under a single white-labeled product live at **www.pmcmanagers.com**.

> *Deployed on AWS with hardened security, DocuSign eSignature, Stripe payments, and an AI Audit Copilot for real-time compliance review.*

2. The Problem We Solve

- Public and private tenders are fragmented across PDFs, emails, and spreadsheets — cycle times of 60–120 days.
- Vendor onboarding is manual and paper-heavy, blocking SME access.
- Bid evaluation lacks auditability — compliance and legal risk.
- Cross-border tenders need multi-currency payments, KYC, and digital signatures — no incumbent bundles all three.

3. Our Solution

PMC Managers v2 collapses the entire tender pipeline into one role-aware portal with dynamic Approval Matrices, joint-signature escrow, and an AI compliance copilot.

- Three role experiences: Admin, Vendor, Staff.
- Full lifecycle: Notice Board → Registration → Bidding → BOQ → Evaluation → Award → eSignature.
- Revenue built in: Product Catalog, Stripe checkout, Quote pipeline, Subscriptions.
- White-labeled, multi-tenant — ready for franchise deployment.

4. Core Modules

Module	Function
Notice Board	Publish public tenders, RFPs, and RFQs
Vendor Registration	KYC-driven onboarding with document upload
Package Tracker	Real-time status of every tender package
Bidding Management	EMD payment, bid submission, envelope opening
BOQ Builder	Bill-of-Quantities with UNSPSC classification
Evaluation & Contracts	Committee scoring, award, PO
Vendor Intelligence	Performance scoring and risk analytics
Template Builder	Reusable Tender / RFP / RFQ templates
Joint-Signature Escrow	Multi-party sign-off for high-value awards
AI Audit Copilot	LLM-powered clause and compliance review

5. Technology & Architecture

Layer	Technology
Frontend	React (SPA), Tailwind, Shadcn UI
Backend	FastAPI (Python), async I/O
Database	MongoDB Atlas (managed)
Compute	AWS Elastic Beanstalk (Docker)
CDN & Static	AWS S3 + CloudFront
DNS & SSL	Route 53 + ACM
AI Layer	LLM Copilot for audit & clause extraction
Auth	JWT + CSRF double-submit cookies

6. Third-Party Integrations

Service	Purpose	Status
DocuSign	eSignature (JWT + Connect Webhook, HMAC)	Live
Stripe	Payments, subscriptions, catalog	Live
AI Copilot	Tender audit & clause analysis	Live
KYC provider	Vendor identity verification	Pluggable
Resend	Transactional email	Configured
Firebase / APNs	Push notifications	Pluggable
Zoom / Jitsi	Pre-bid meetings	Ready
PayPal / Kaspi	Regional payments	Pluggable

7. Security & Compliance

- HTTPS end-to-end via ACM certificates on CloudFront and EB.
- CSRF double-submit cookie on every state-changing route.
- DocuSign Connect webhooks verified with HMAC signatures.
- Password rotation flow and admin change-password API in place.
- MongoDB Atlas with IP allow-lists, TLS, and encryption-at-rest.
- Git history purged of vendor branding for IP-clean investor review.

8. Production Deployment

The platform is live at **https://www.pmcmanagers.com** on a fully owned AWS footprint under the pmcmanagers.com domain. Every layer — compute, storage, DNS, and certificates — is under direct customer control.

Component	Value
Live URL	https://www.pmcmanagers.com
Frontend	AWS S3 + CloudFront (SPA)
Backend	AWS Elastic Beanstalk (Docker)

Component	Value
Database	MongoDB Atlas (managed)
Domain / SSL	Route 53 + ACM (auto-renew)

9. Engineering Effort Snapshot

Dimension	Delivered
Distinct modules	10+ core enterprise modules
User roles	3 (Admin, Vendor, Staff) with granular RBAC
Backend API surface	60+ REST endpoints under /api/v1
Frontend components	80+ React components + Shadcn UI kit
Third-party integrations	8 live or plug-ready
Deployment environments	Preview + Production (AWS)
Documentation	39-page spec + PRD + Anchor + Manuals
Security controls	CSRF, JWT, HMAC webhooks, TLS, IP allow-list

10. Monetization Model

- Vendor subscriptions (tiered) — recurring MRR via Stripe.
- Transaction fee on EMD deposits and awarded contracts.
- Enterprise white-label licenses for governments and franchisees.
- Value-added services: KYC packs, AI audit reports, template library.

11. Roadmap

Priority	Item
P1	UNSPSC picker in BOQ Builder & Vendor Registration
P2	Investor Analytics Dashboard (live KPI board)
P2	PayPal & Kaspi Pay live-mode activation

Priority	Item
P2	Firebase / APNs push notifications
P2	Live KYC provider onboarding
P3	Mobile companion app (React Native)

12. The Ask

We invite investment to accelerate go-to-market, activate live regional payment rails, and scale into government and enterprise procurement. The product is built, deployed, and revenue-ready — the runway ahead is distribution.
