1 · Welcome — PMC staff & admin duties

This manual is for PMC's own people: administrators, reviewers, committee members, certifiers, legal, accounting, escrow agents and auditors. It covers the admin console, the staff portal, the day-to-day approval queues and the policies that govern them.

Daily queues to check

Queue	Where	What to do
Supplier registrations / KYC	Admin → Registrations / Vendors	Review documents, approve or ask for changes
Buyer applications & self-registrations	Admin → Growth → Buyer applications	Approve (only confirmed emails), reject, add a buyer directly, resend sign-ins
Buyer team invites	Same tab → Team invites	Approve or reject each colleague
Marketplace listings	Admin → Marketplace	Approve / reject one by one or in bulk; fee and waivers
Supplier-added categories	Admin → Masters → Category review	Approve, rename or merge
Seller payouts	Admin → Marketplace → Orders	Pay the net amount and mark seller paid
Tender openings & awards	Staff portal / Bidding ops	Sign openings, decide proofs, clear awards

Staff and admin accounts are separate from buyer accounts. A buyer-organisation admin can never use PMC staff pages.

2 · Platform overview & architecture

PMC Managers is a global e-procurement platform: buyers publish tenders, verified suppliers bid with sealed envelopes, an evaluation committee opens, checks and awards, and payments move through escrow — every step recorded in a tamper-evident audit ledger.

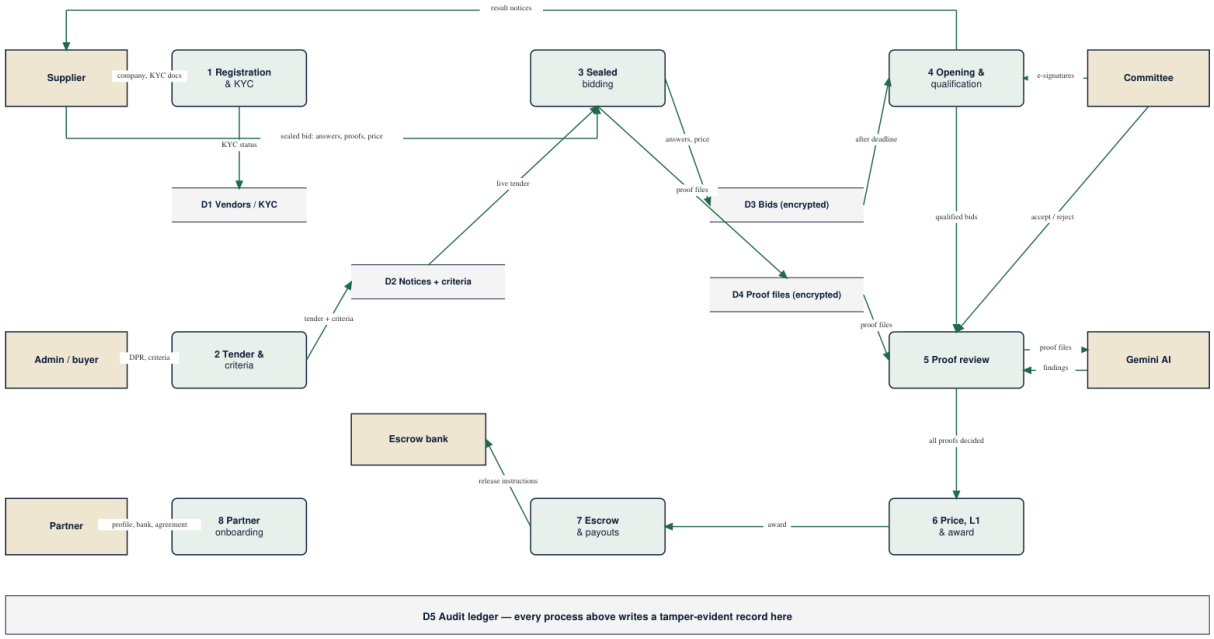

Portals

Portal	Address	Who
Public website	/ , /tenders, /notices	Anyone
Supplier portal	/vendor	Registered suppliers
Admin console	/admin/e	PMC admins and reviewers
Staff portal	/staff	Committee, escrow, legal, accounting, certifier
Partner portal	/partner/me	Partners who onboard suppliers
Escrow portal	/login?role=escrow	Escrow institutions

Architecture

React single-page app (served from S3 + CloudFront) → FastAPI backend (Docker on AWS Elastic Beanstalk, all routes under /api) → MongoDB. Bid answers, prices and uploaded bid files are encrypted at rest and only decrypted after the committee signs each opening. AI features (DPR tender drafting, criteria reading, proof reading) use Gemini through the platform's AI key. Email goes through the managed email service. Scheduled jobs (reminders, statements, digests) run from the platform scheduler.

PMC platform — data flow (level 1)

- External entities (beige), processes (green), data stores (grey). Arrows show what data moves.
- Proof files are sent to the AI only after the technical opening, for qualified bids only.
- Emails (result notices, reminders) are sent by the email service from processes 4 and 8.

3 · Roles at a glance

Role	Main jobs	Where
Supplier	Register, KYC, bid with criteria proofs, consortium, results, payouts	Supplier portal
Admin	Tenders, criteria, publishing, suppliers, partners, settings	Admin console
Reviewer	Approves supplier-prepared tenders; edits criteria master	Admin console
Committee member	Signs openings, reviews proofs (all must agree), doubts, scores, awards	Bidding ops / Staff portal
Certifier / Legal / Accounting	Sequential bid clearances before award	Staff portal
Escrow agent	EMD, dual-signed releases, payouts	Staff portal / Escrow
Partner	Onboards suppliers, earns commission	Partner portal
Auditor	Reads the audit ledger and reports	Admin console

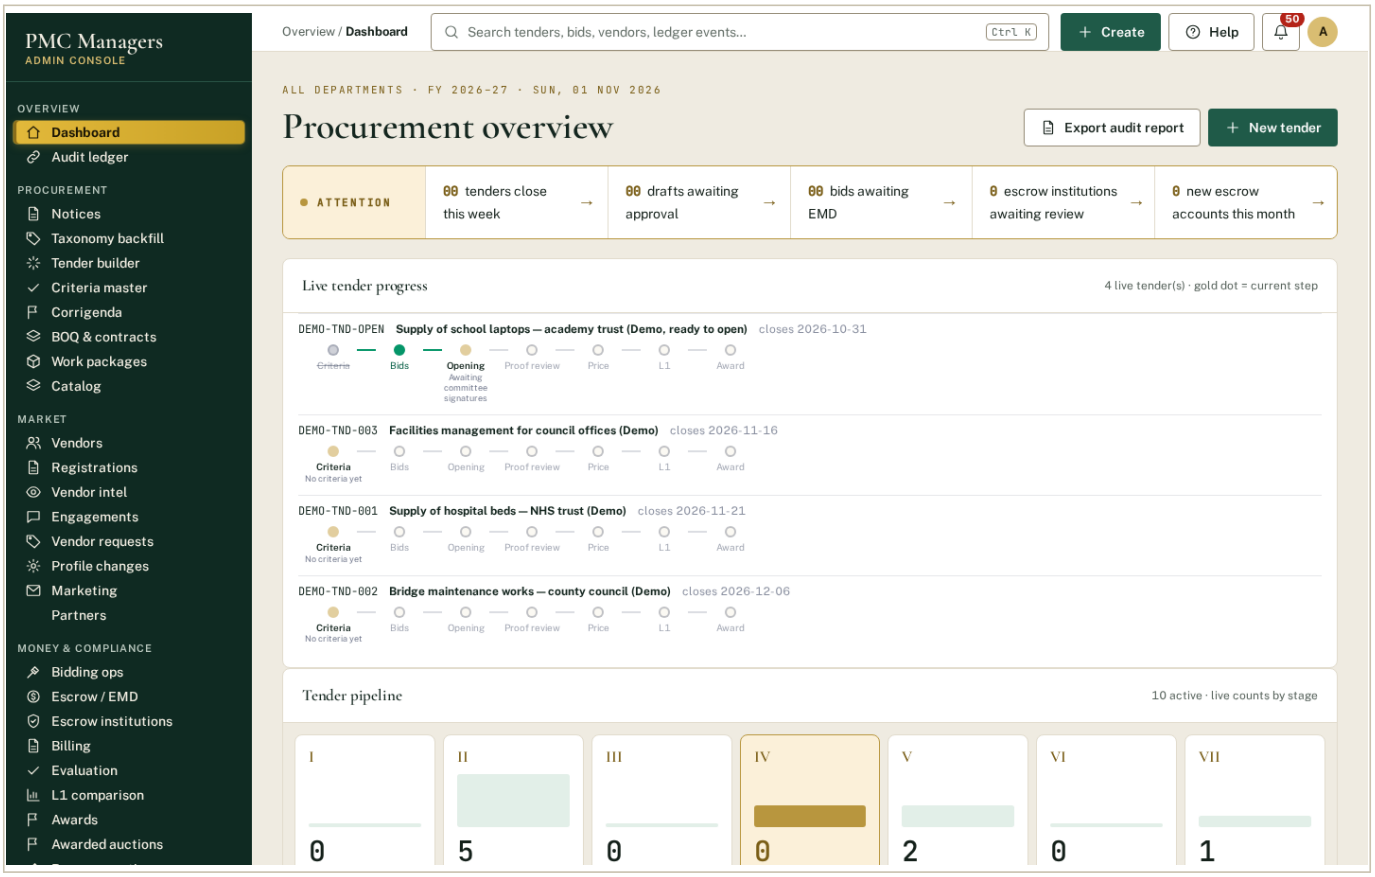

4 · Security, audit & data protection

1. Sign-in by role with email + password (session cookie + CSRF token on every change).
2. Role-based access: the admin console only admits admin and reviewer; other staff use the staff portal.
3. Sealed bidding: answers, price and bid files are encrypted; nobody (including admins) can open them before the committee signs.
4. Audit ledger: every action is chained with SHA-256; 'Verify chain' re-checks every link.
5. Soft deletion: records are archived, not erased, unless a narrowly scoped deletion is explicitly requested.
6. AI sees proof files only after technical opening and only for qualified bids; AI only flags — people decide.

5 · Admin console — screen tour

Admin dashboard

Screen: `/admin/e/dashboard`

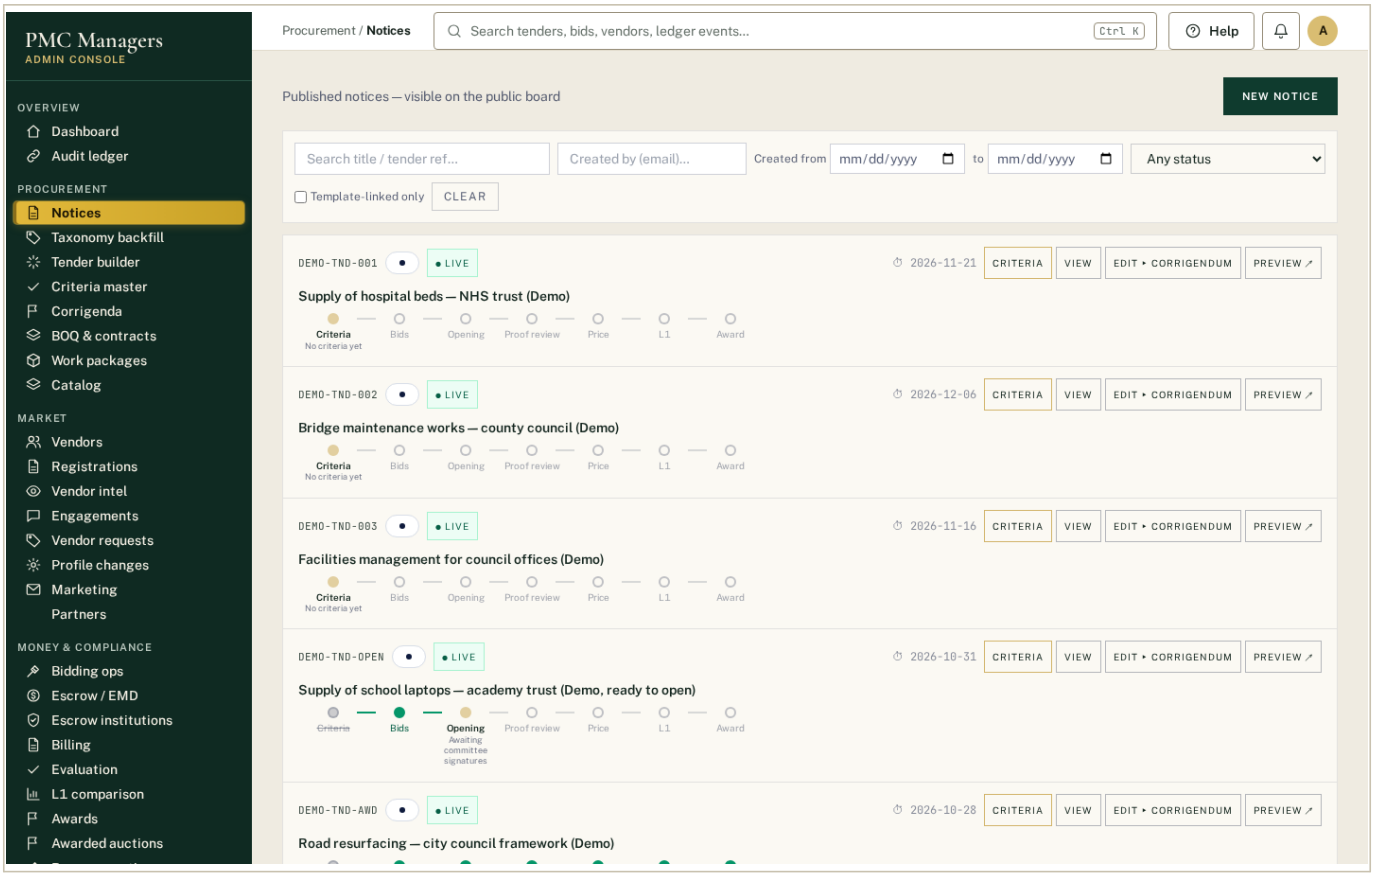

The control room. Attention cards show tenders closing this week, drafts awaiting approval and bids awaiting EMD. 'Live tender progress' shows every live tender's stage line (criteria, bids, opening, proof review, price, L1, award) so stalled tenders stand out.

Main actions

- Click an attention card to jump to the list
- Open a tender from Live tender progress
- Create a new tender

Notices

Screen: `/admin/e/notices`

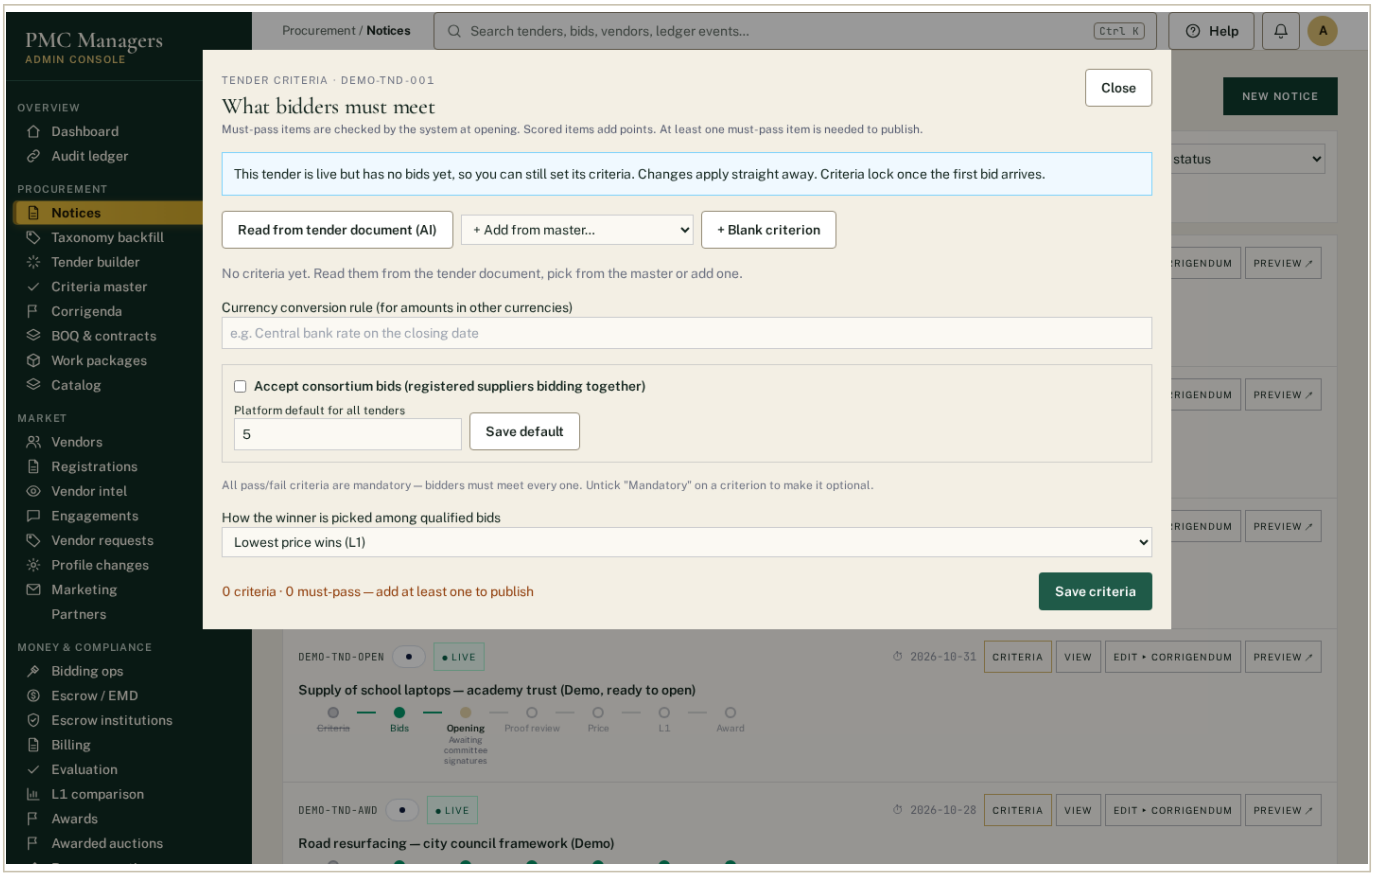

All tenders (draft and live). Each row has the progress tracker, Criteria, View, Edit/Corrigendum and Preview. Draft rows show the 'Ready to publish?' checklist (document, dates, a must-pass criterion) with its own Publish button.

Main actions

- New notice (the Criteria window opens after Create)
- Criteria: set what bidders must meet
- Publish once the checklist is all ticked

Criteria window

Screen: `/admin/e/notices`

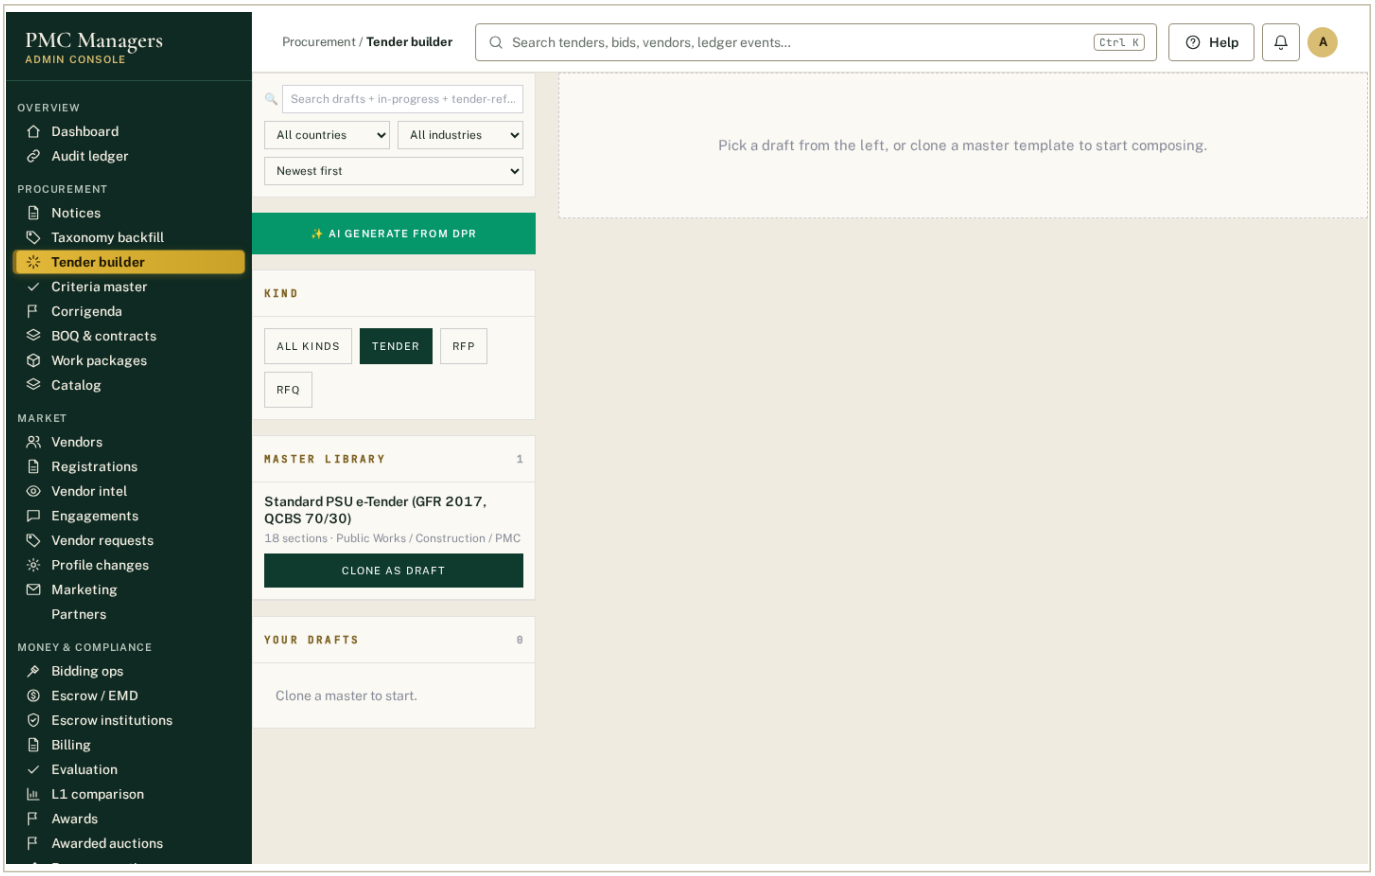

Sets the tender's criteria. Add from the Criteria master or a whole set, read them from the tender document with AI, or add your own. Each criterion is pass/fail or scored, Mandatory or optional, with proof required or not. Also set the minimum optional criteria, consortium rules and how the winner is picked (L1 or weighted).

Main actions

- + Add from master / a criteria set
- Tick Mandatory or leave optional
- Set 'at least N optional criteria'
- Choose L1 or weighted
- Save criteria

Tender builder

Screen: `/admin/e/tender-builder`

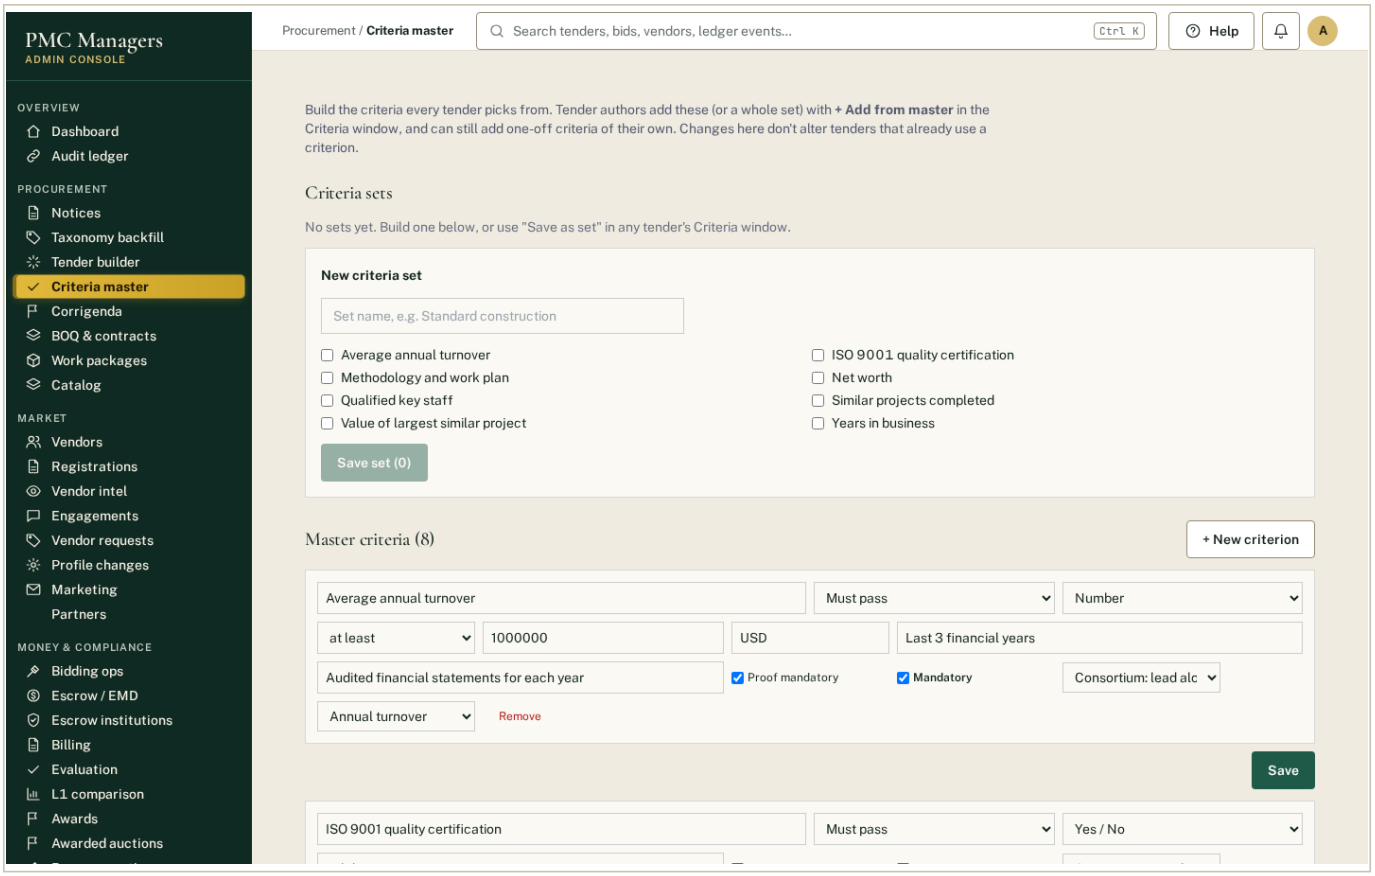

Builds the tender document. Clone a master template or use 'AI generate from DPR' to draft a tender from a project report. Drafts have a Criteria button and 'Create notice' to turn the draft into a notice (criteria come across).

Main actions

- AI generate from DPR
- Clone a master template
- Criteria
- Create notice

Criteria master

Screen: `/admin/e/criteria-master`

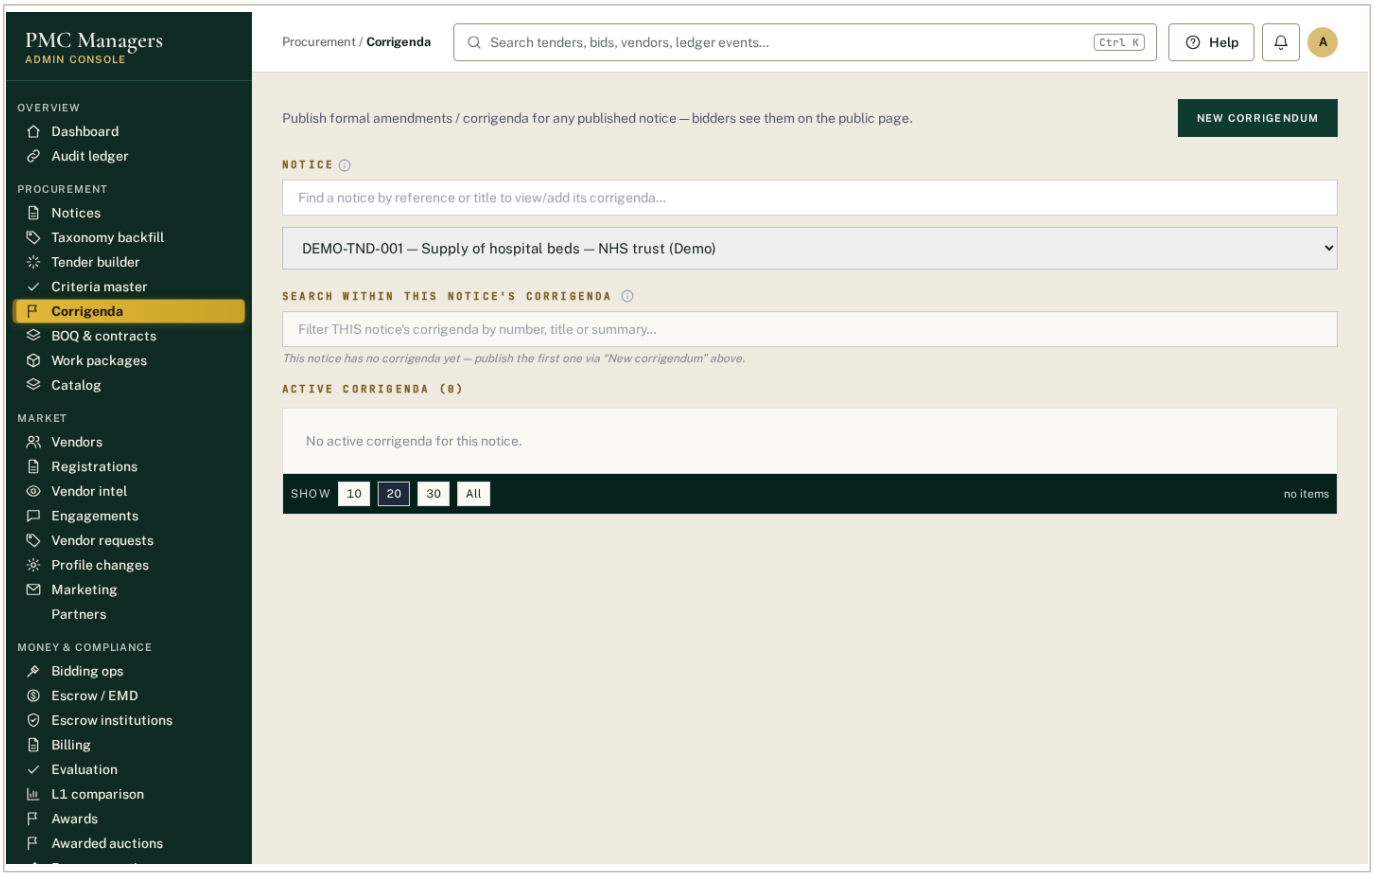

The library every tender picks criteria from. Build master criteria and named sets such as 'Standard construction'. Admins and reviewers can edit; removing archives (nothing is deleted).

Main actions

- + New criterion
- Build a criteria set
- Remove (archive) a criterion or set

Corrigenda

Screen: `/admin/e/corrigenda`

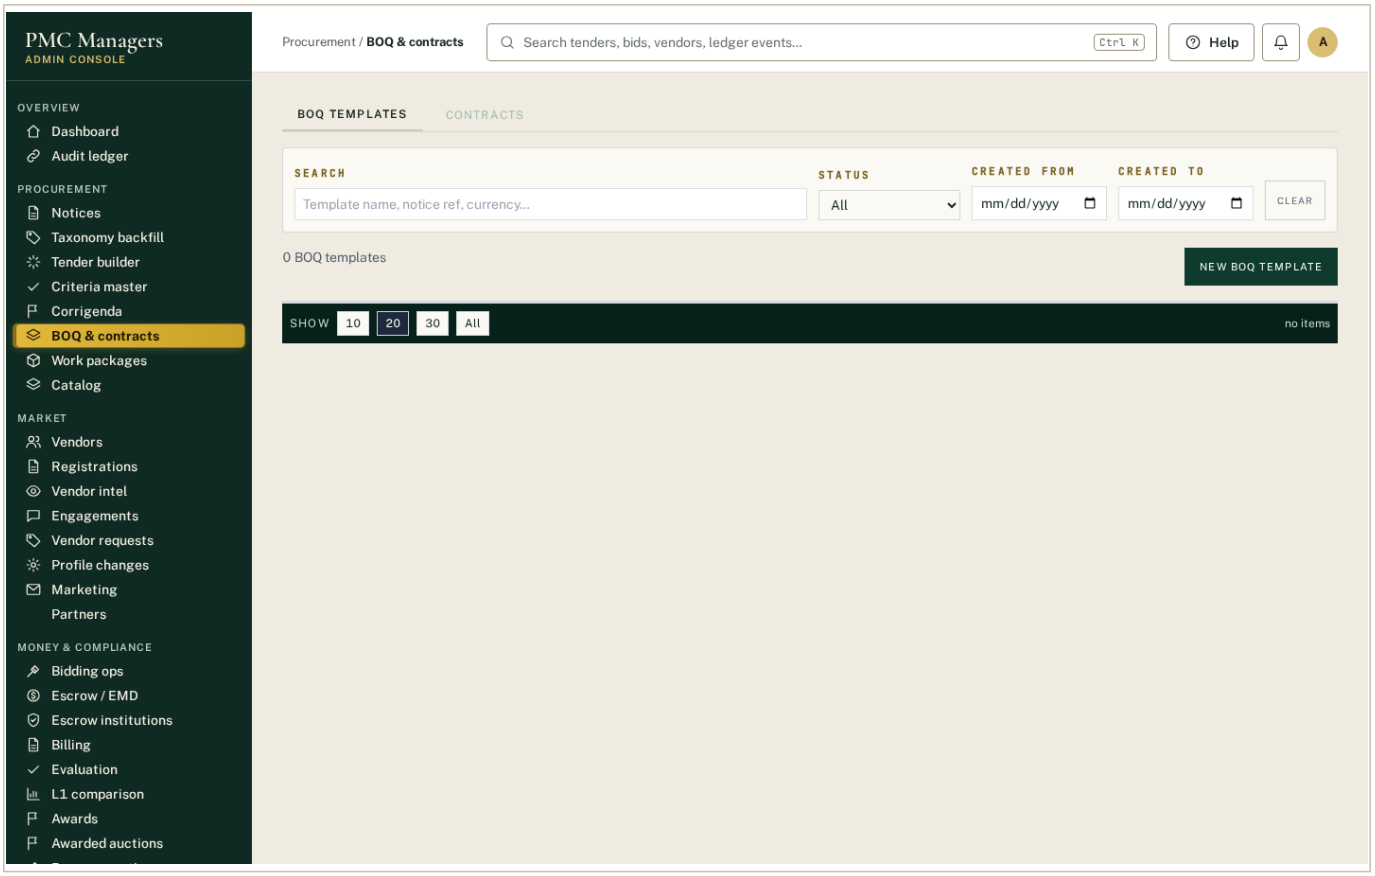

Changes to live tenders. Each corrigendum is dated, described and sent to every bidder and follower.

Main actions

- Issue a corrigendum
- See the history per tender

BOQ & contracts

Screen: `/admin/e/boq`

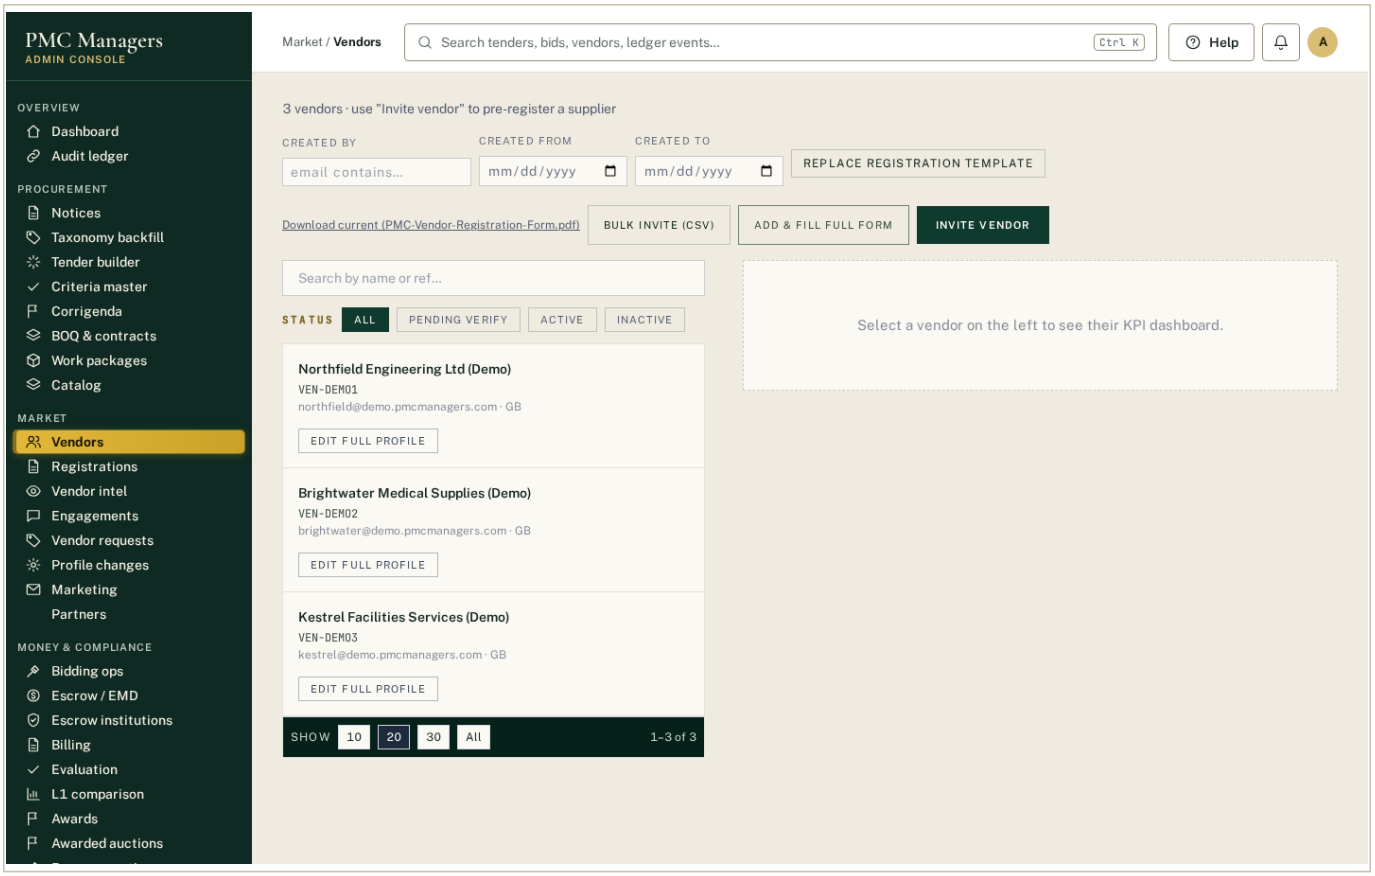

Bills of quantities and contract documents linked to tenders.

Main actions

- Upload or edit a BOQ
- Attach contract documents

Vendors

Screen: `/admin/e/vendors`

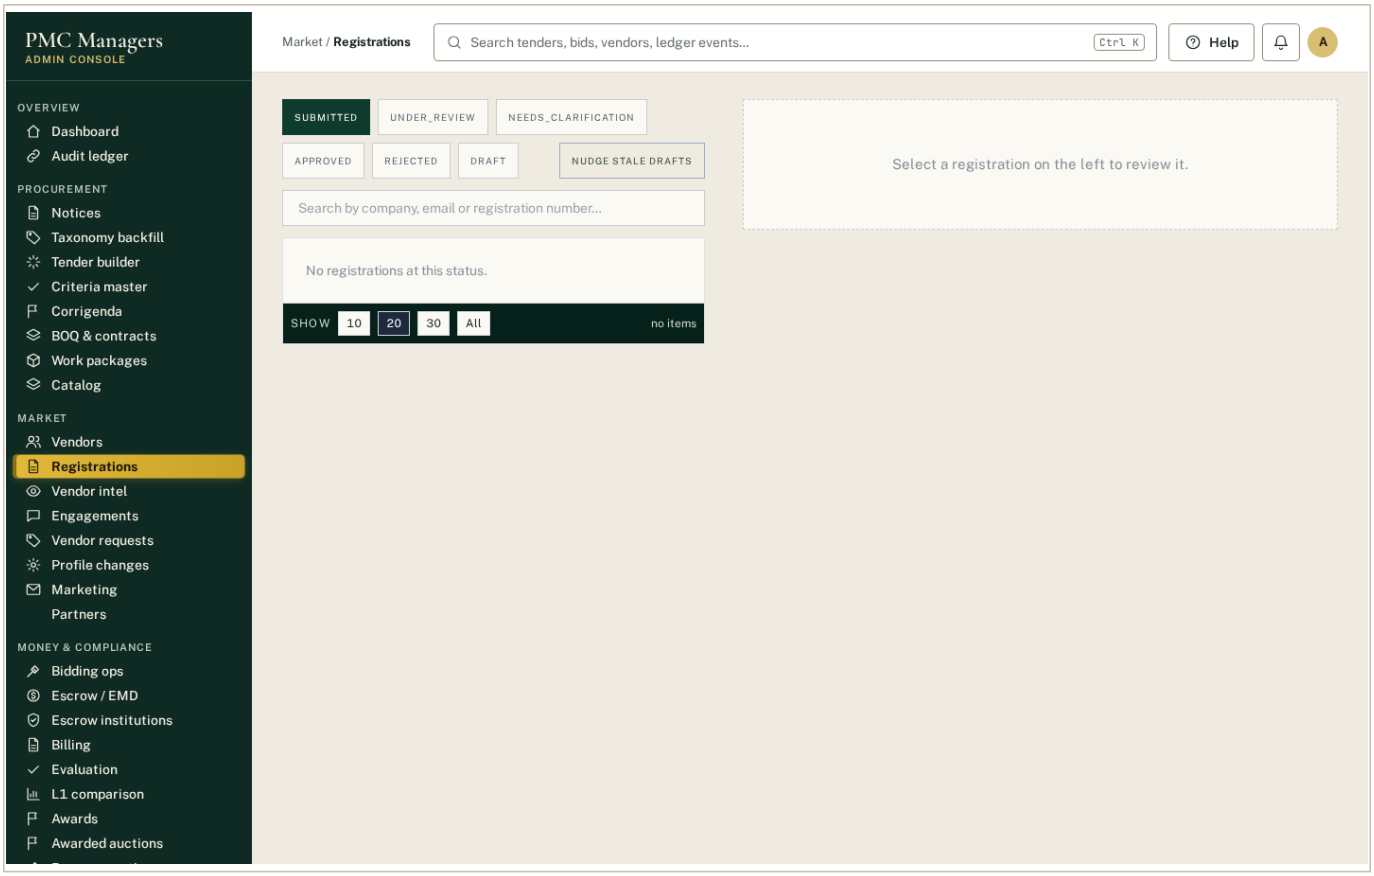

Every registered supplier with KYC status, categories and activity.

Main actions

- Open a supplier profile
- Check KYC status

Registrations

Screen: `/admin/e/registrations`

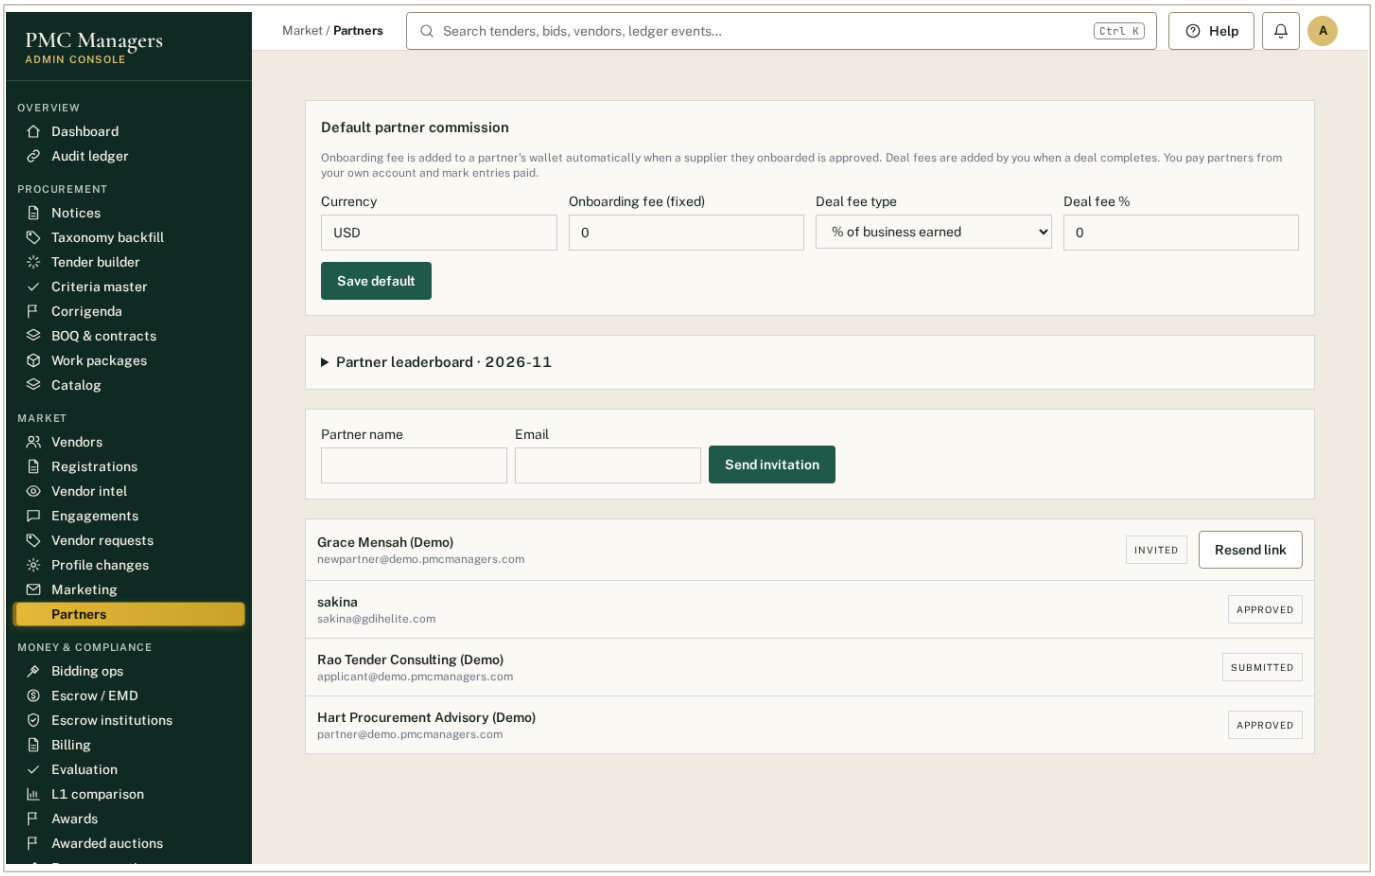

New supplier registrations waiting for KYC review. Approve, ask for clarification or reject with a reason.

Main actions

- Review documents
- Approve / request changes / reject

Partners

Screen: `/admin/e/partners`

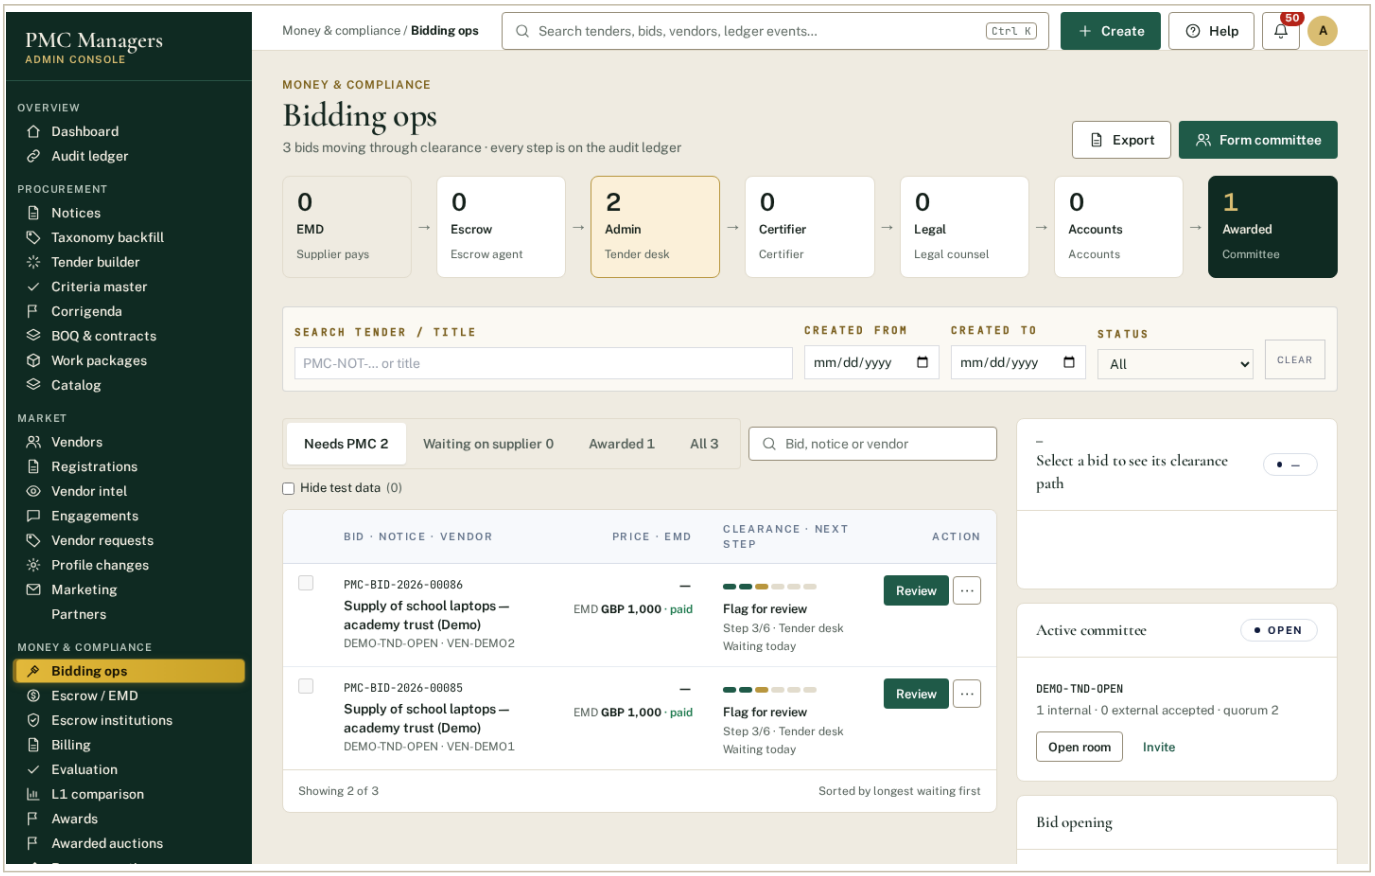

Partners who onboard suppliers and earn commission. Unfinished profiles show 'N of 4 sections complete'. Edit details opens the full 5-section form; resend the invite link; approve.

Main actions

- Invite a partner
- Edit details
- Resend link
- Approve

Bidding ops

Screen: `/admin/e/bidding`

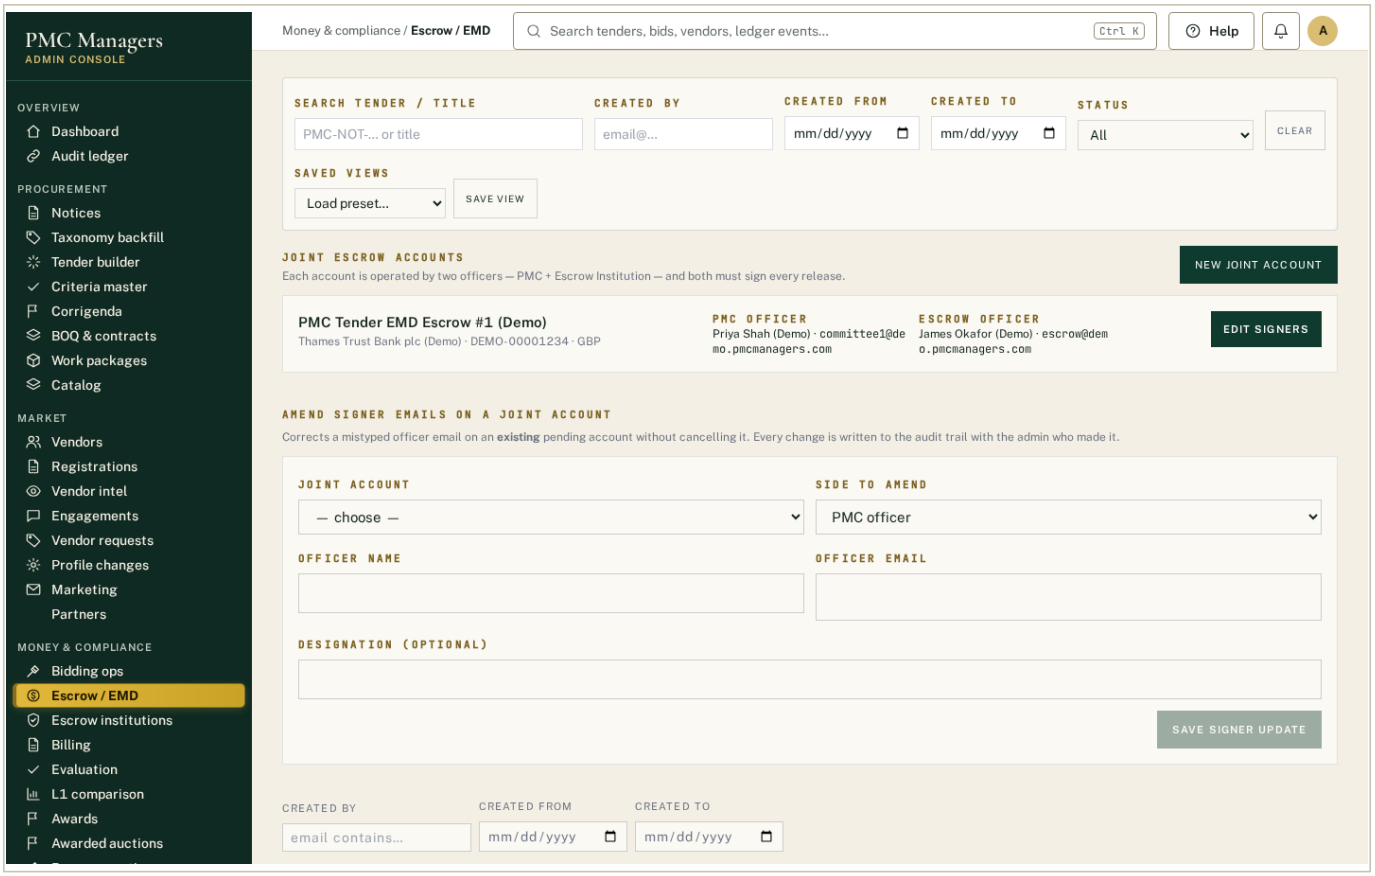

Runs the bid opening. Each tender with a committee shows the opening card: who has signed, blockers, technical opening, the system qualification check with AI proof findings and committee accept/reject, price opening, the automatic L1 ranking and 'Award to L1'.

Main actions

- Committee members approve opening
- Review proofs (accept / reject with comment)
- Raise / resolve a doubt
- Download proof check report
- Award to L1

Escrow / EMD

Screen: `/admin/e/escrow`

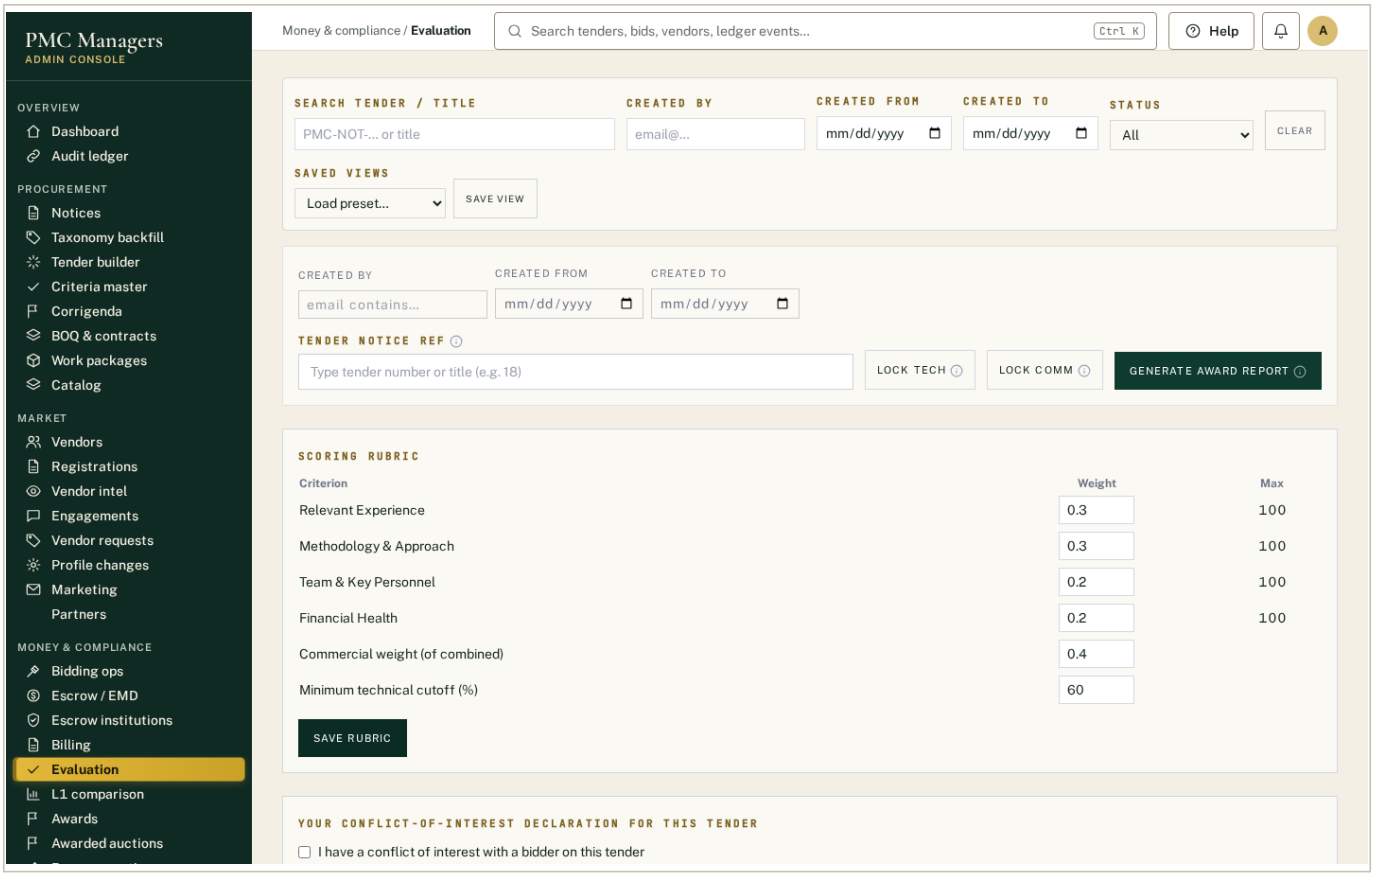

Bid deposits (EMD) and award payments held in escrow, with dual-signed releases and consortium payment instructions.

Main actions

- Confirm EMD received
- Release with two signatures
- Record consortium member payouts and bank references

Evaluation

Screen: `/admin/e/evaluation`

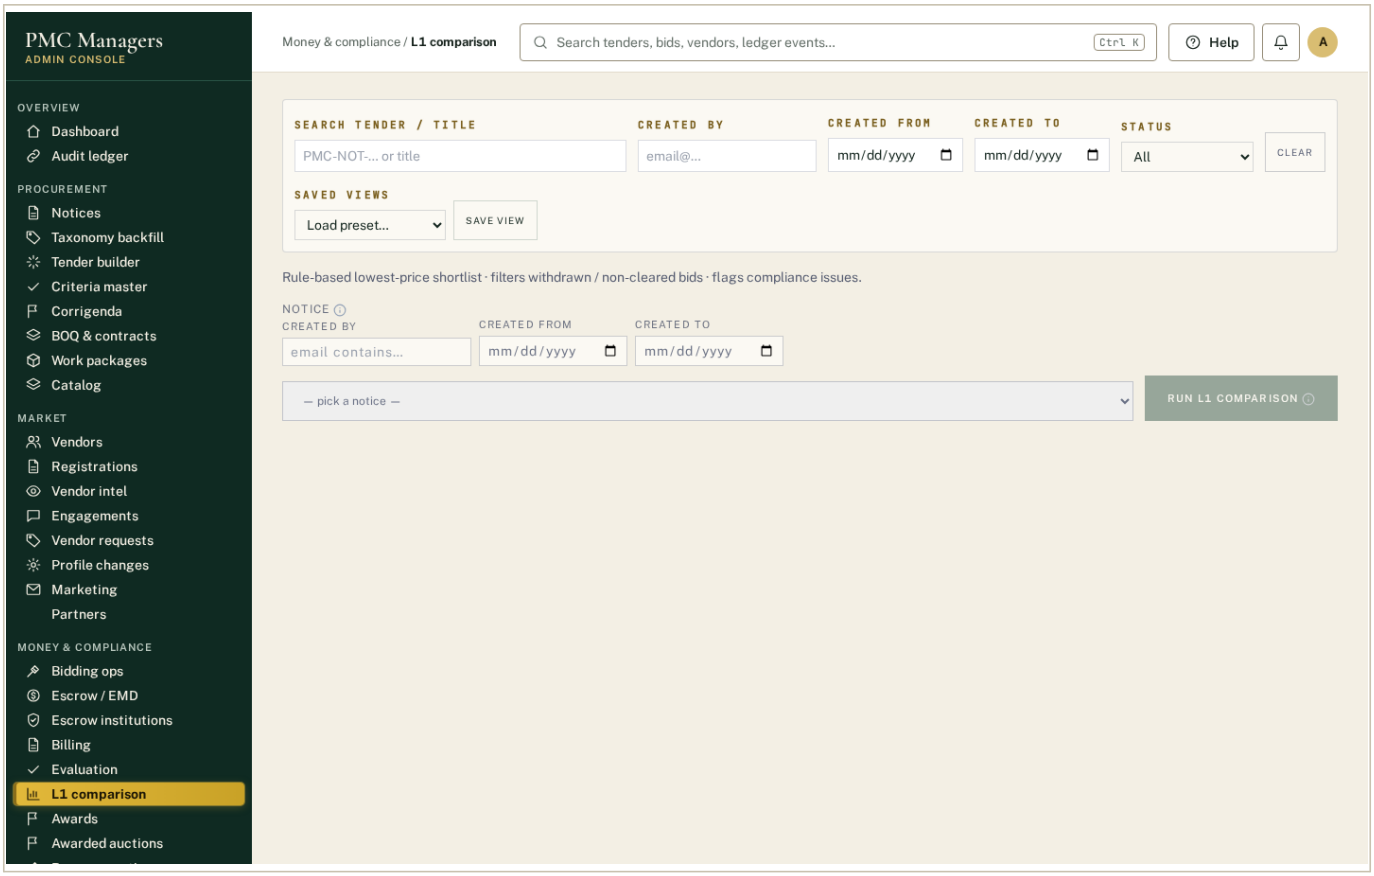

Committee scoring rubric and the Award recommendation report, which follows the tender's rule (L1 or weighted).

Main actions

- Score bids
- Open the award recommendation report

L1 comparison

Screen: `/admin/e/l1-award`

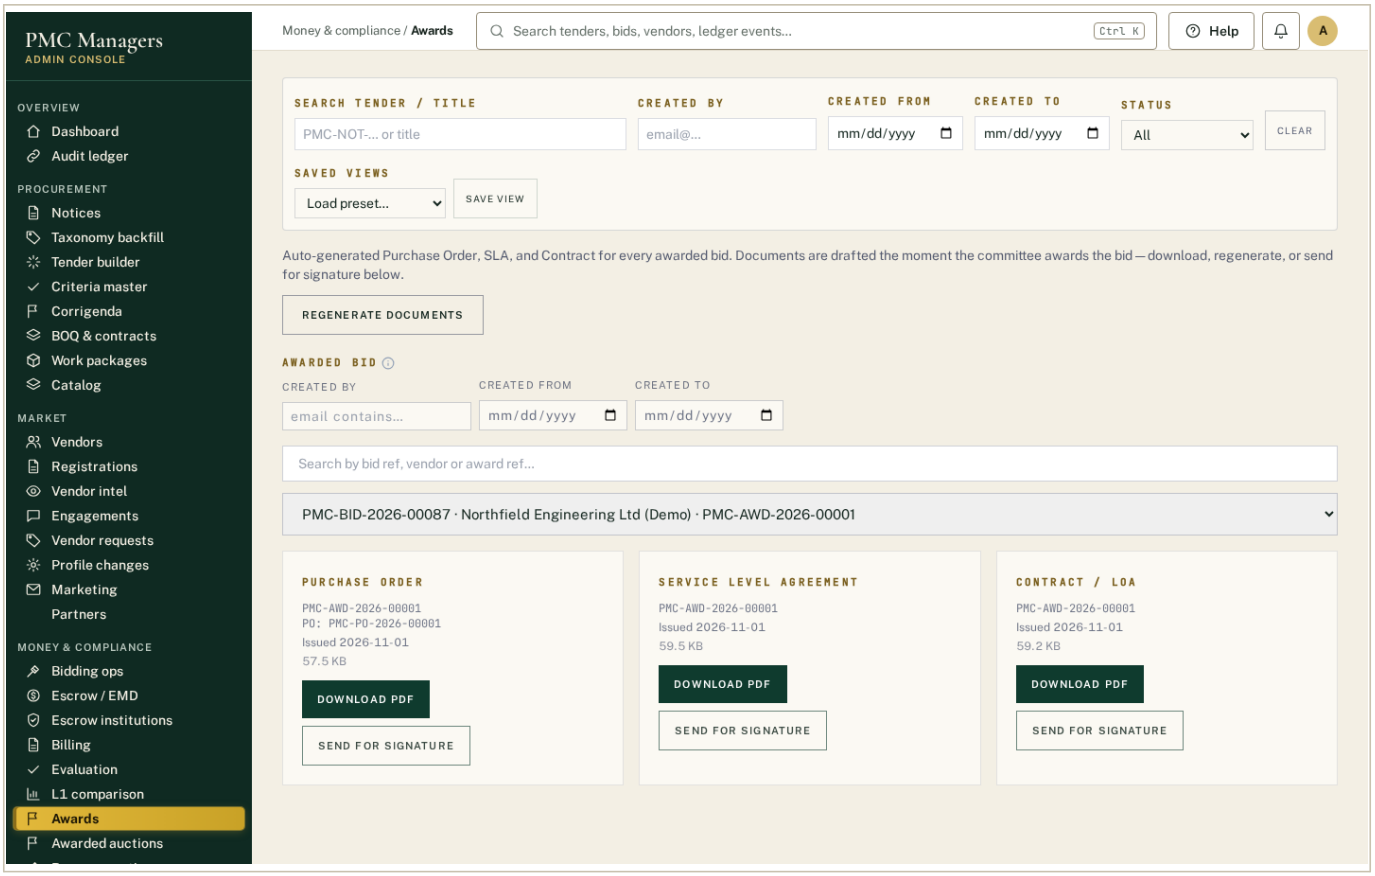

Ranks qualified bids by price (L1, L2, L3) with compliance flags. Runs automatically after price opening and can be re-run here.

Main actions

- Run L1 for a tender
- Check compliance flags

Awards

Screen: `/admin/e/awards`

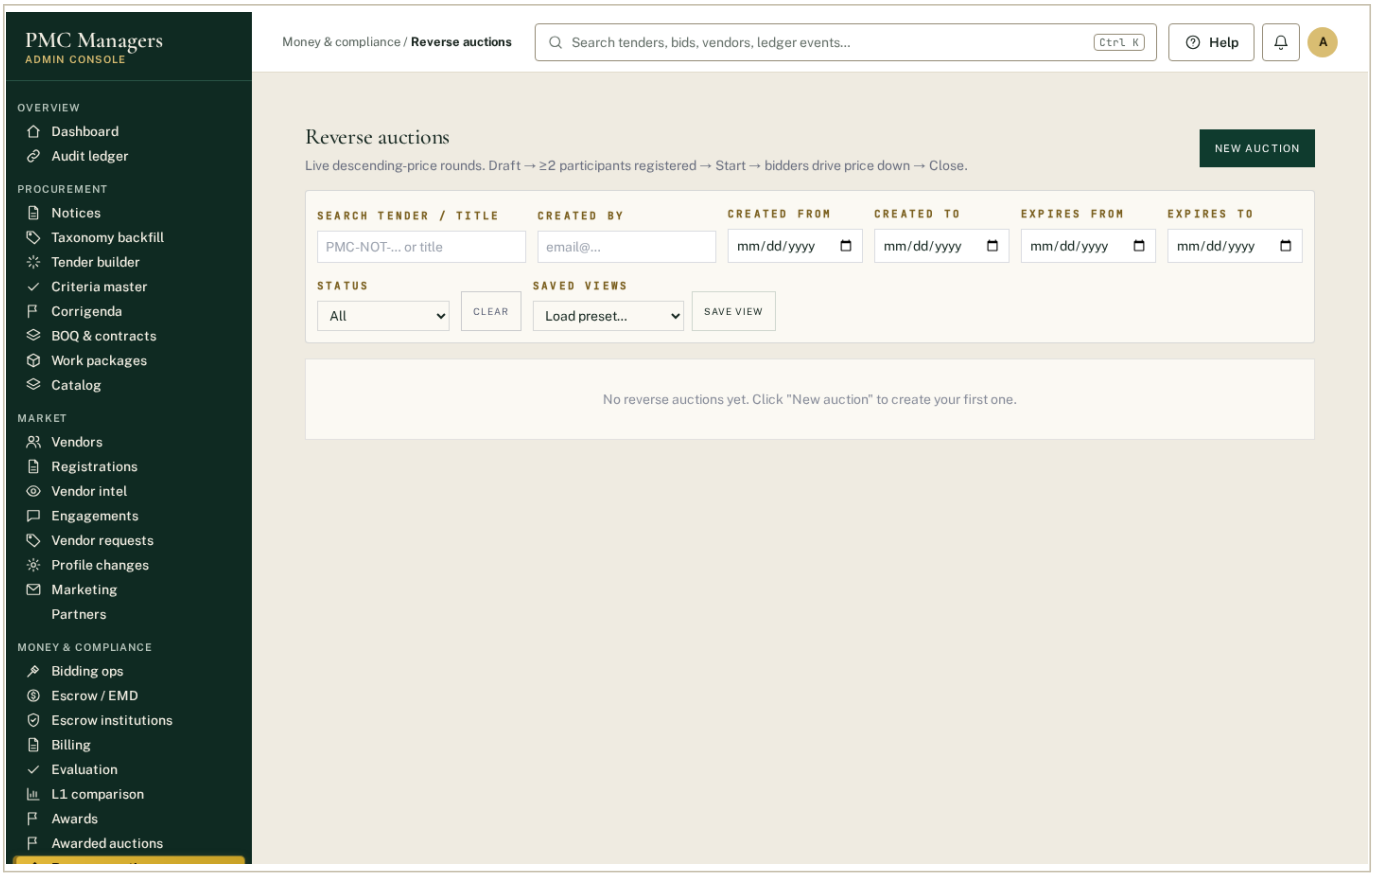

Awarded bids with award letters, contracts and signatures.

Main actions

- Open award letter / contract
- Track signatures

Reverse auctions

Screen: `/admin/e/auctions`

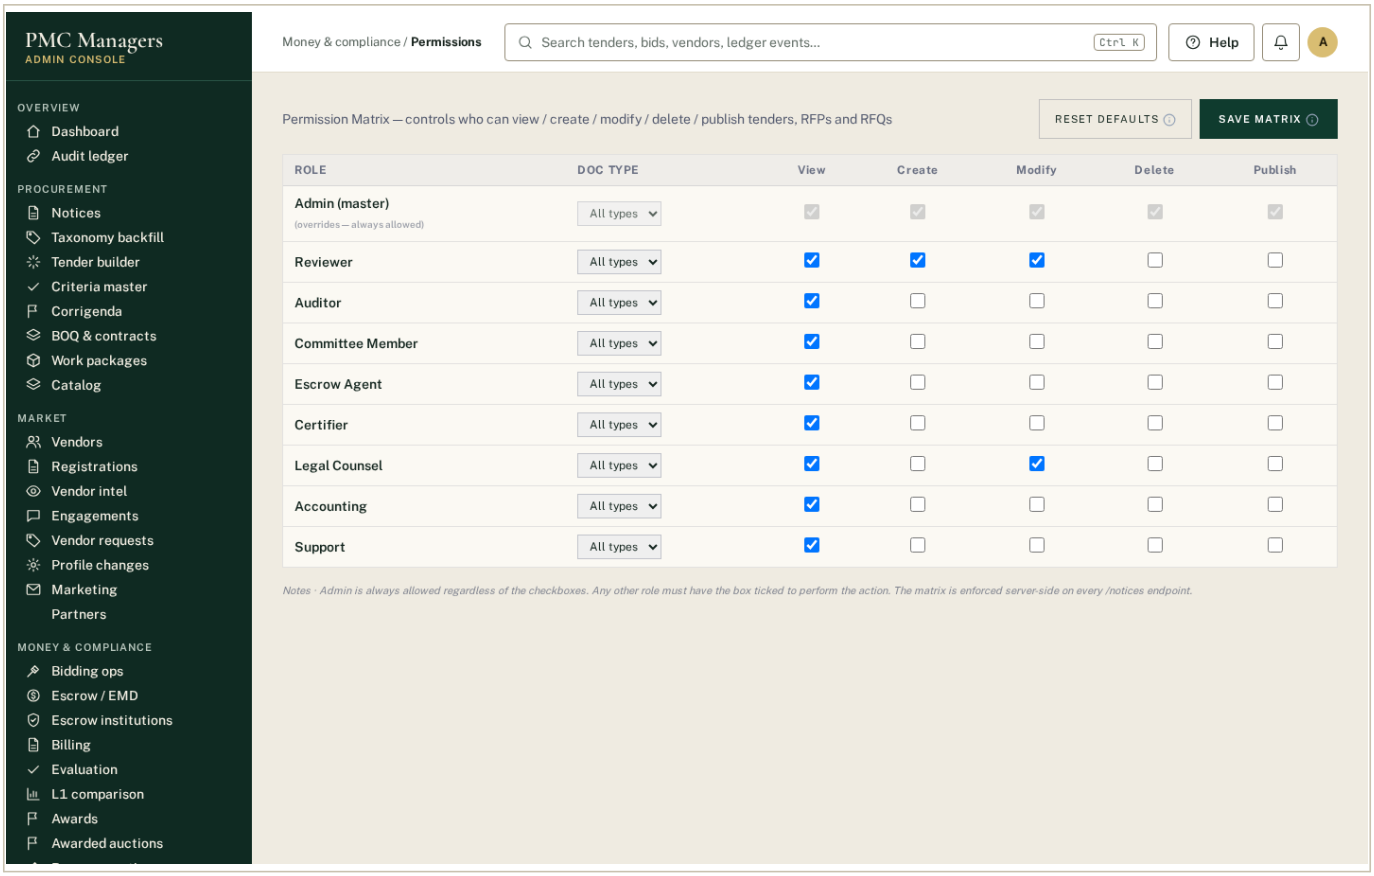

Live reverse auctions where invited suppliers bid prices down within a time window.

Main actions

- Create an auction
- Invite suppliers
- Watch live bids

Permissions

Screen: `/admin/e/permissions`

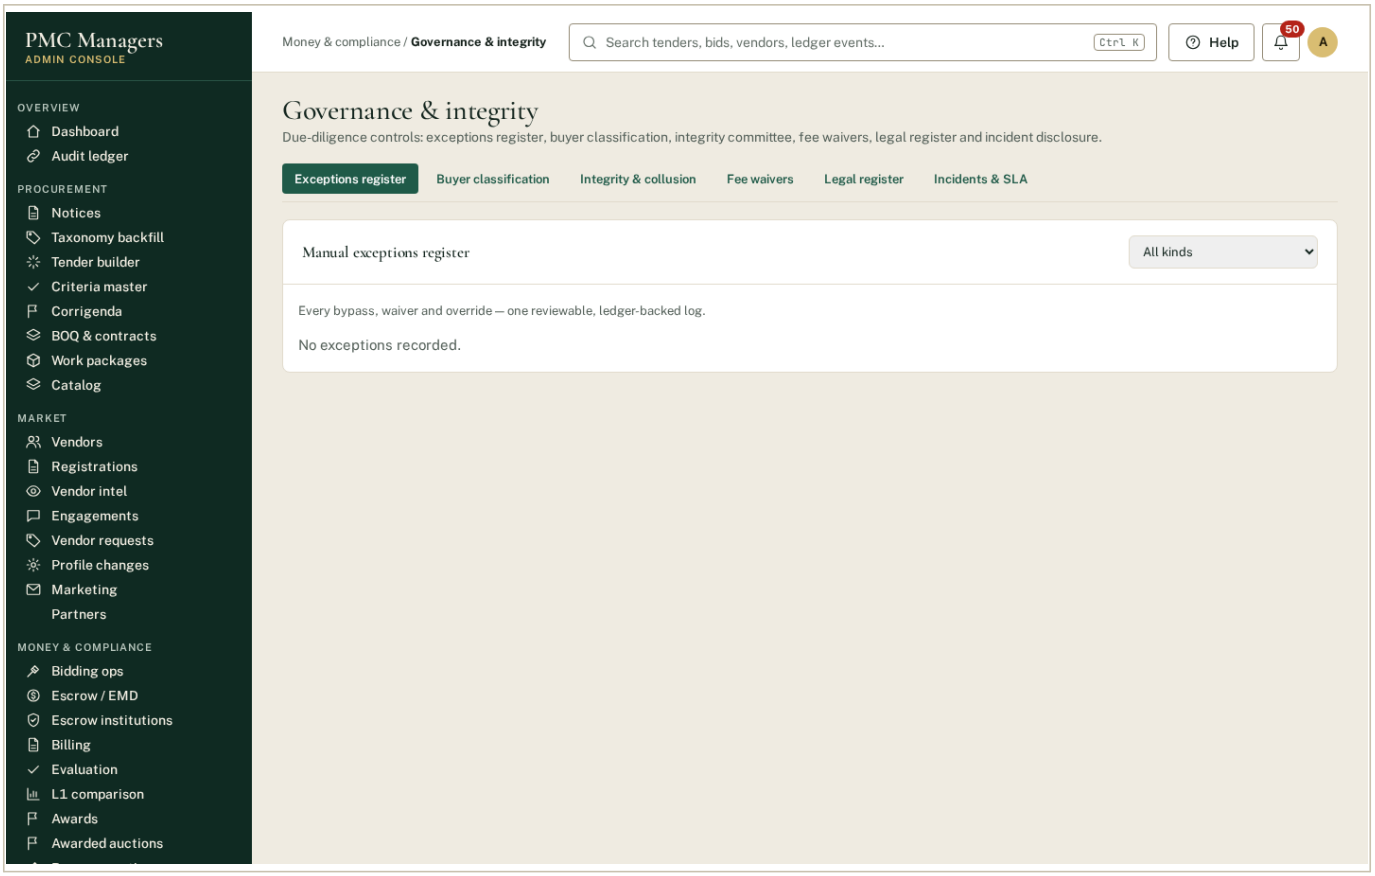

Who can do what. Roles and the approval matrix that decides each bid's sign-off order.

Main actions

- Edit role permissions
- Reset to defaults

Governance & integrity

Screen: `/admin/e/governance`

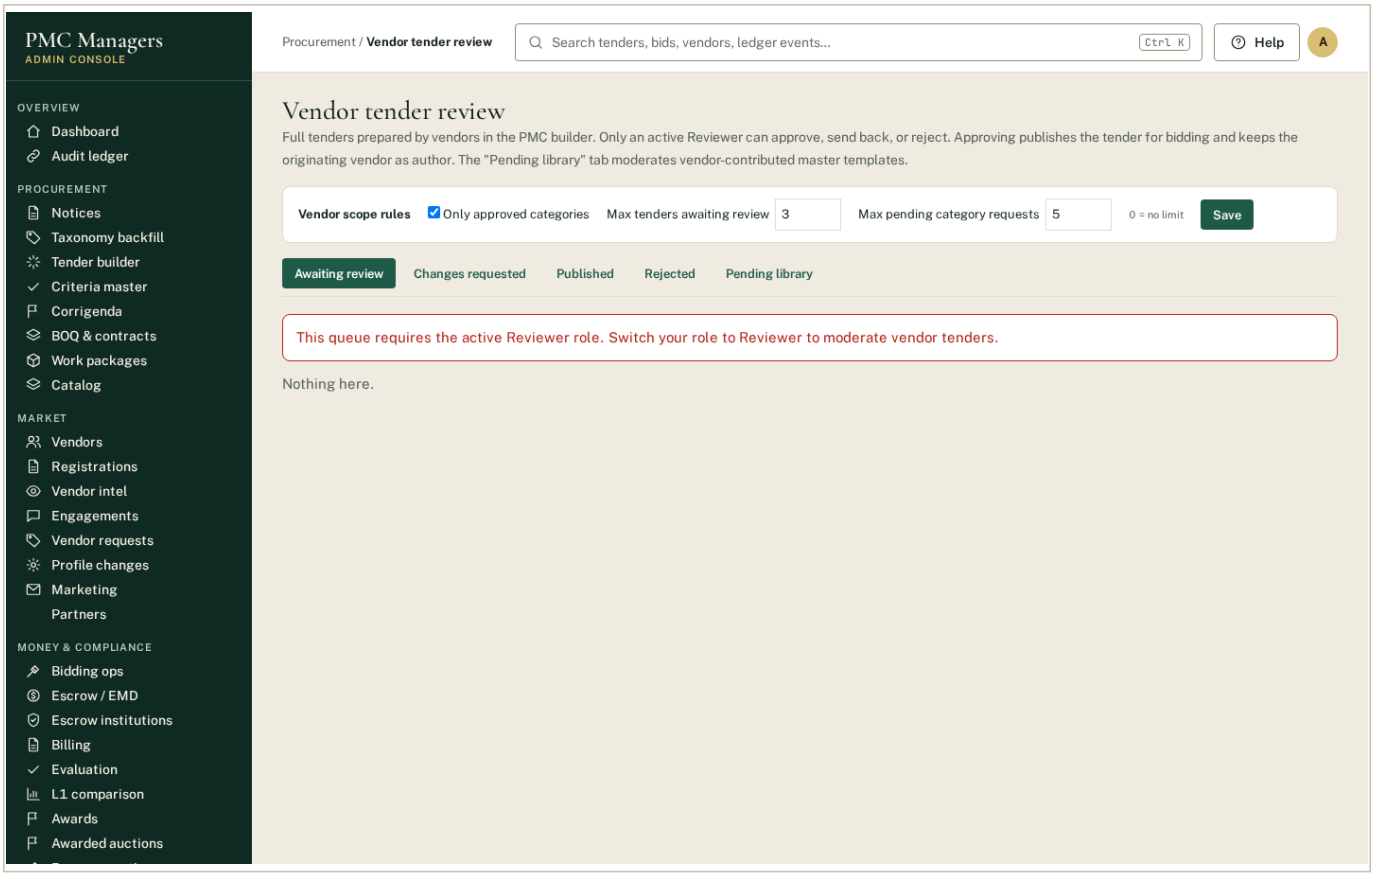

Committees, conflict-of-interest declarations and integrity checks.

Main actions

- Form a committee
- Review declarations

Tender review

Screen: `/admin/e/tender-review`

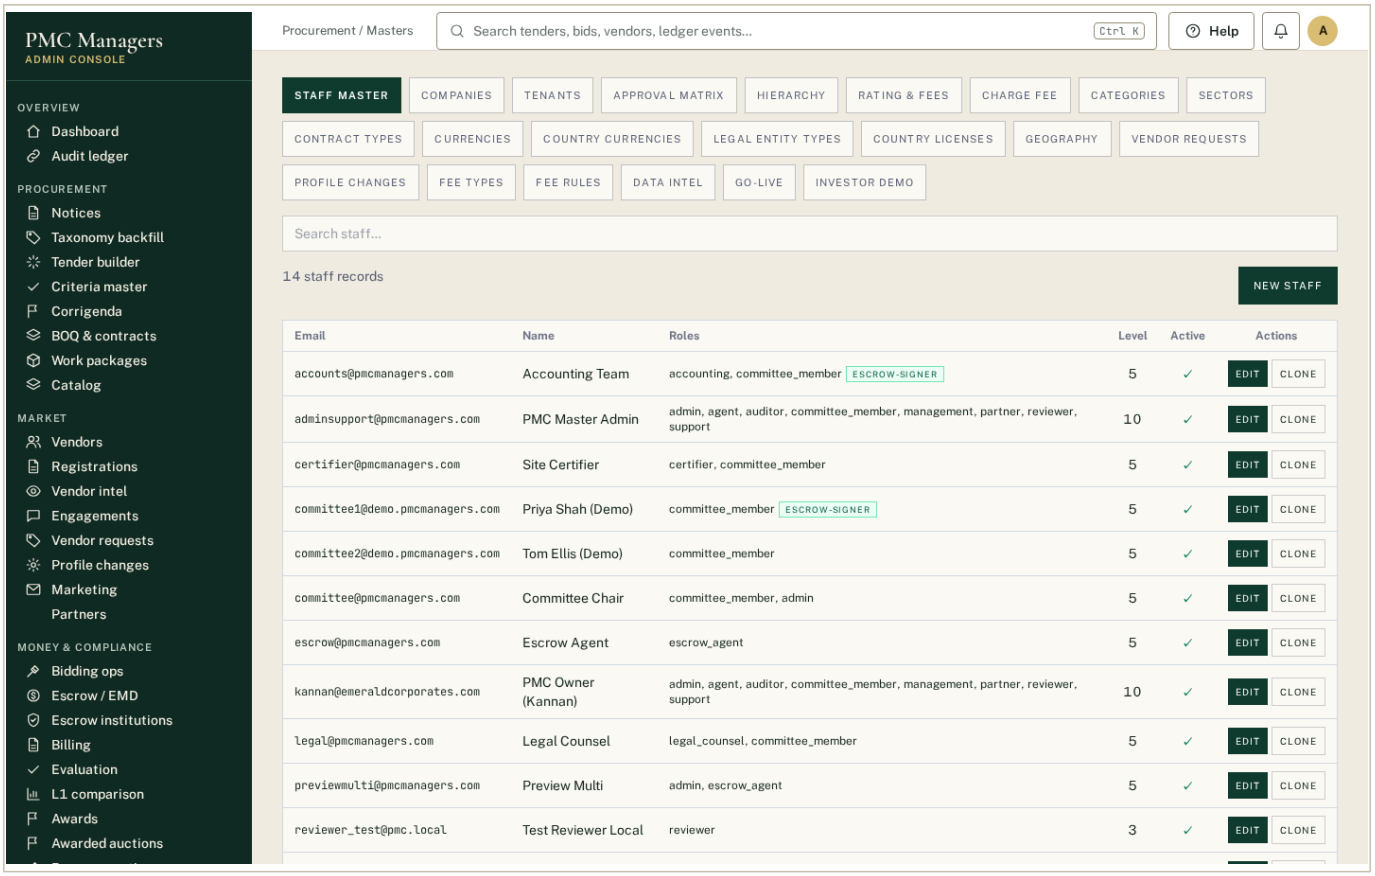

Reviewers approve tenders prepared by suppliers before they can be published.

Main actions

• Approve or send back a supplier-prepared tender

Masters

Screen: `/admin/e/masters`

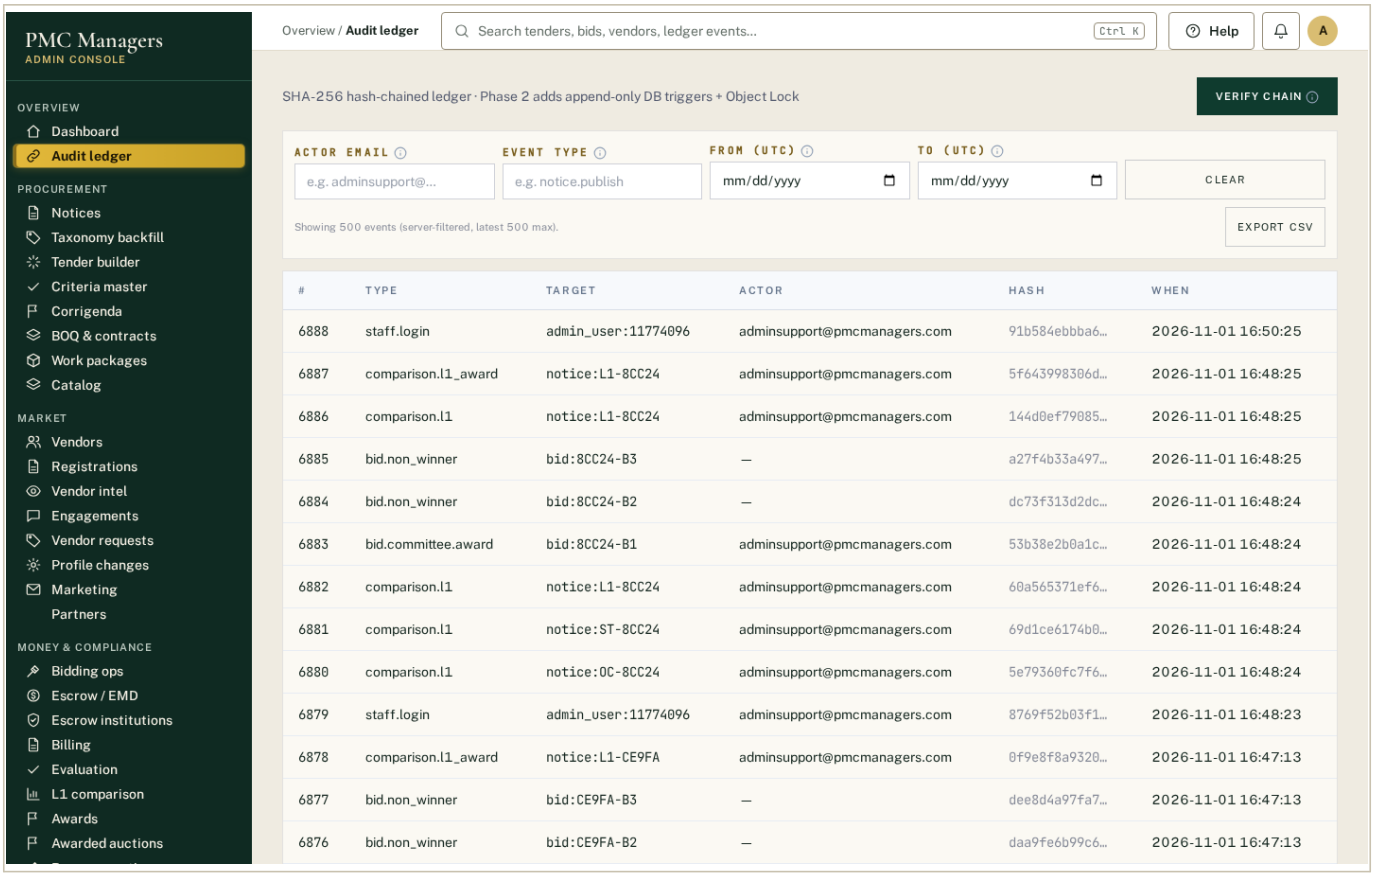

Reference data: staff accounts, categories, countries, currencies and other lists used across the platform.

Main actions

- Add staff
- Edit categories

Audit ledger

Screen: `/admin/e/audit`

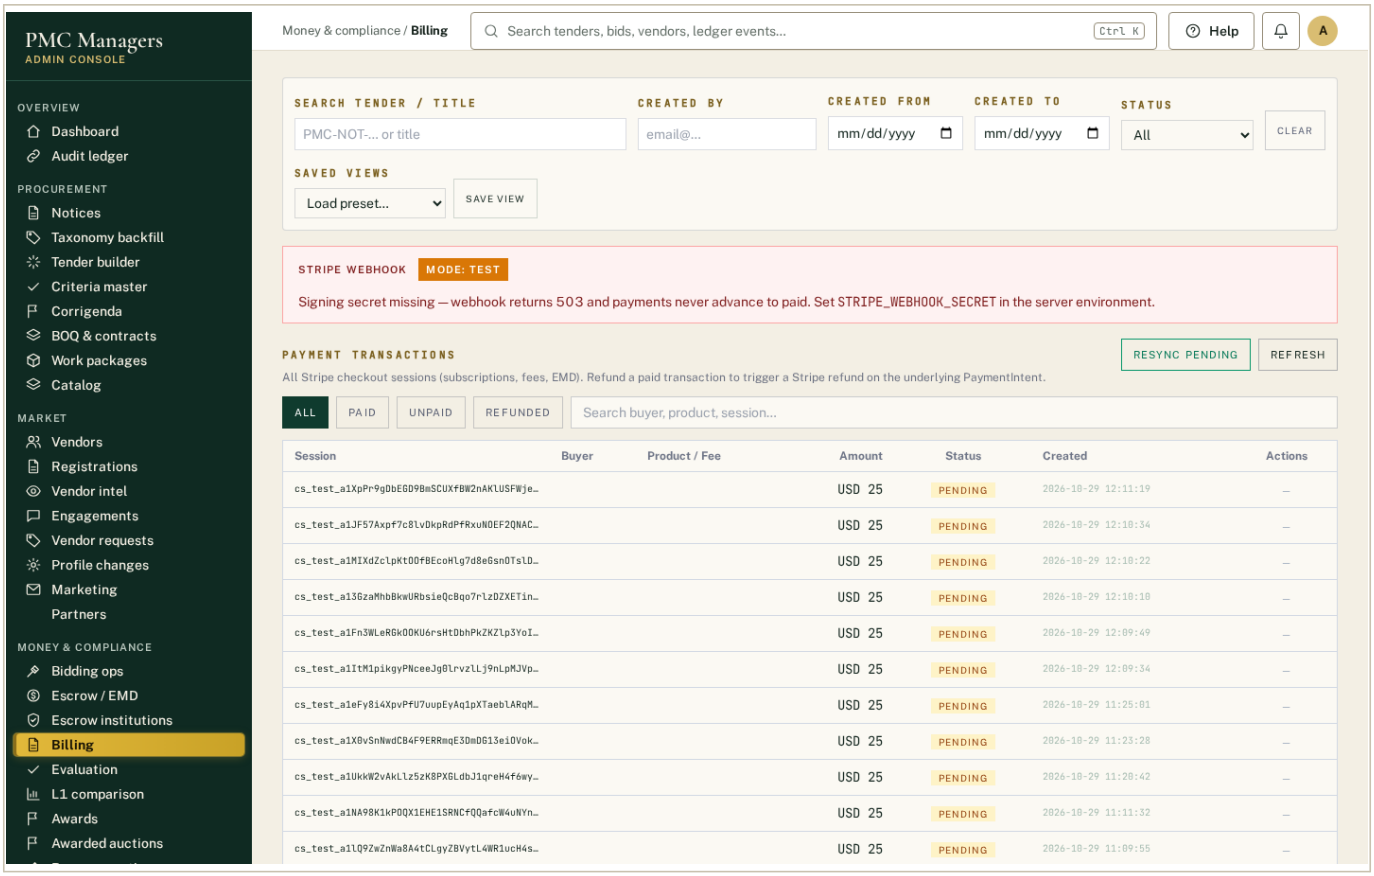

Every action is recorded in a tamper-evident chain. Verify chain re-checks every link.

Main actions

- Search events
- Verify chain
- Export

Billing

Screen: `/admin/e/billing`

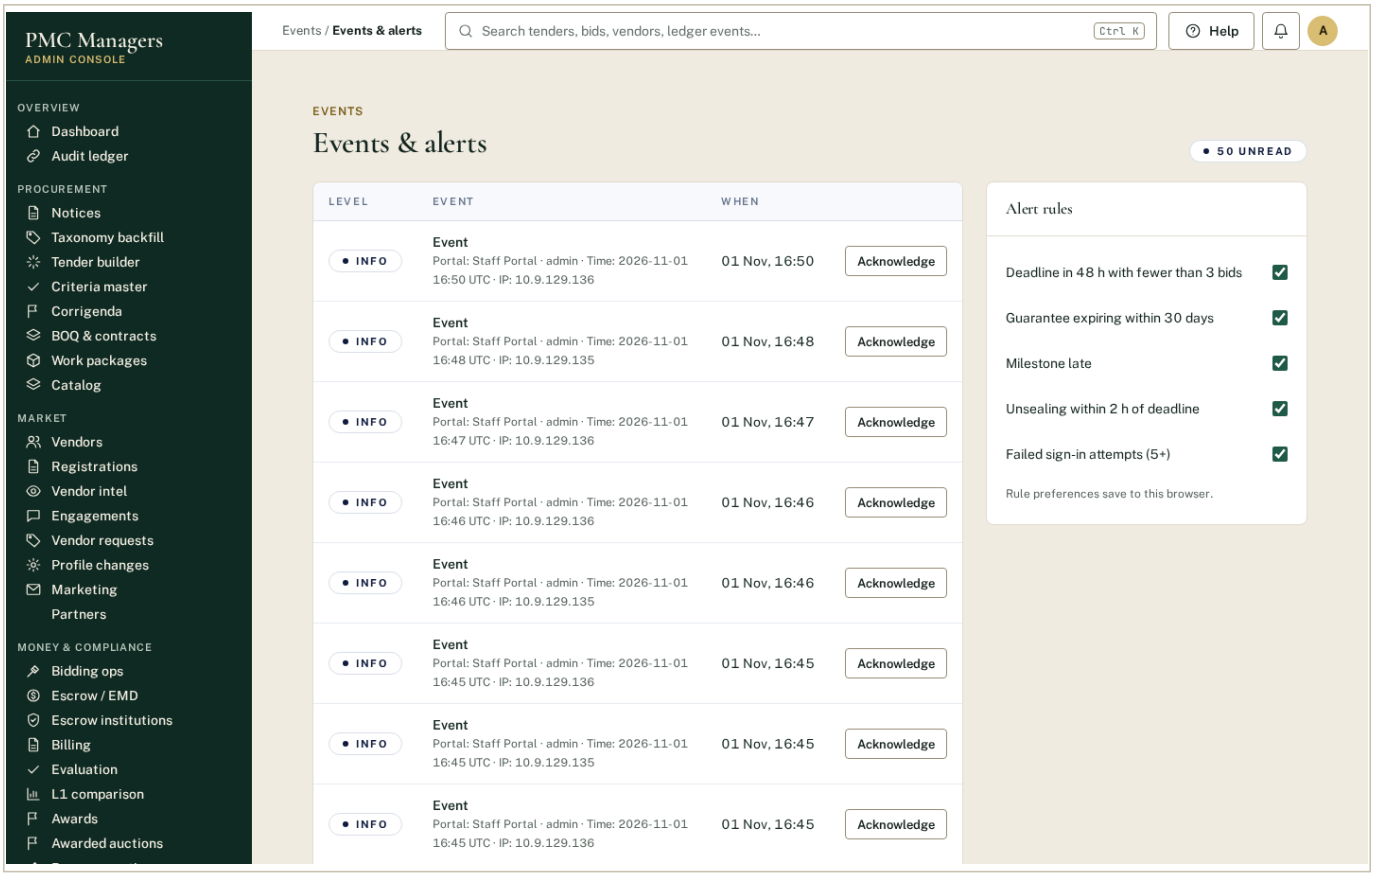

Hosting fees, subscriptions and invoices.

Main actions

- View invoices
- Check payment status

Events & alerts

Screen: `/admin/e/events`

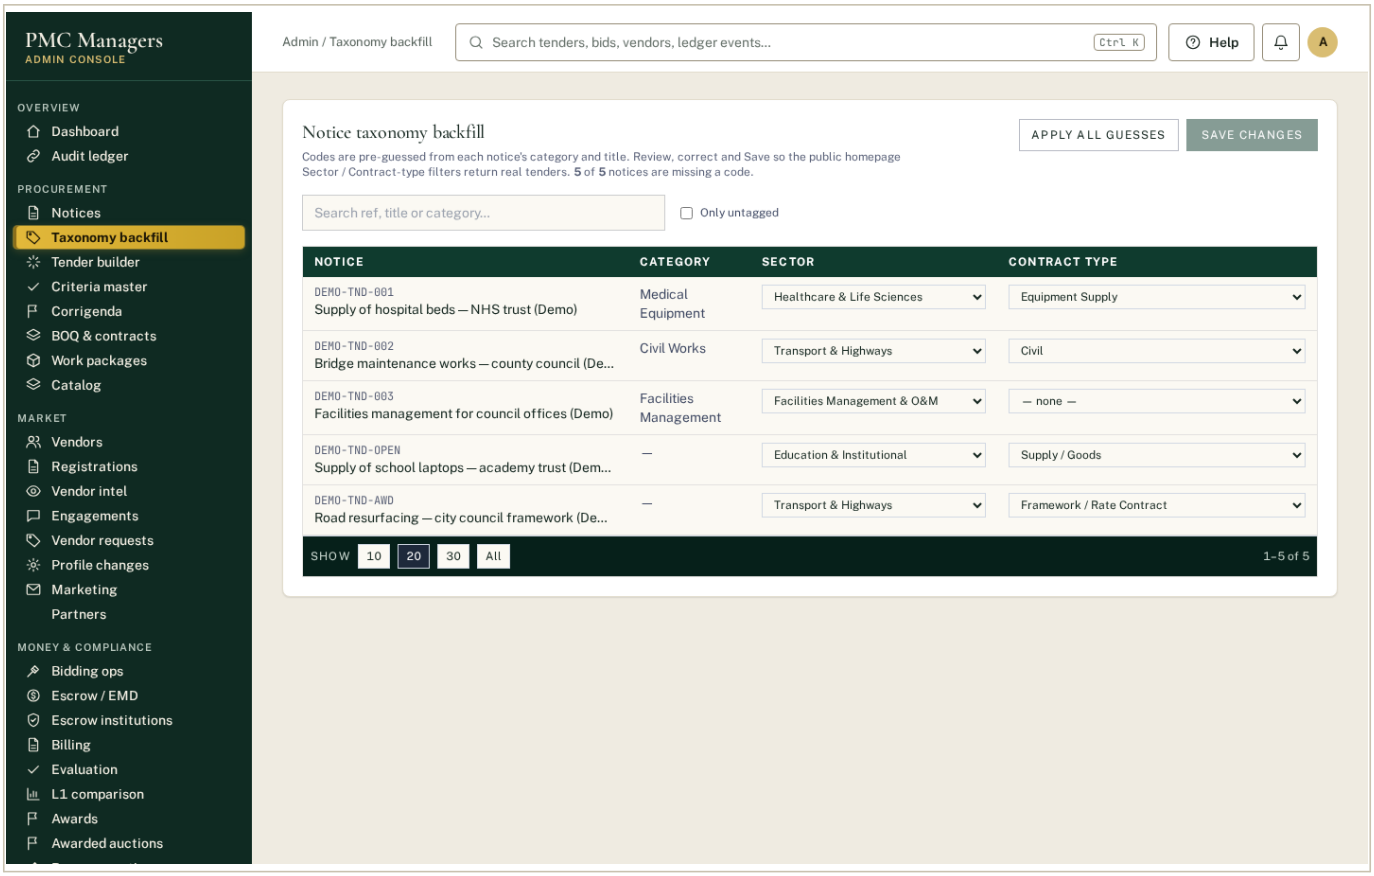

System events and alerts, including scheduled jobs and email delivery.

Main actions

- Review alerts

Taxonomy backfill

Screen: `/admin/e/taxonomy-backfill`

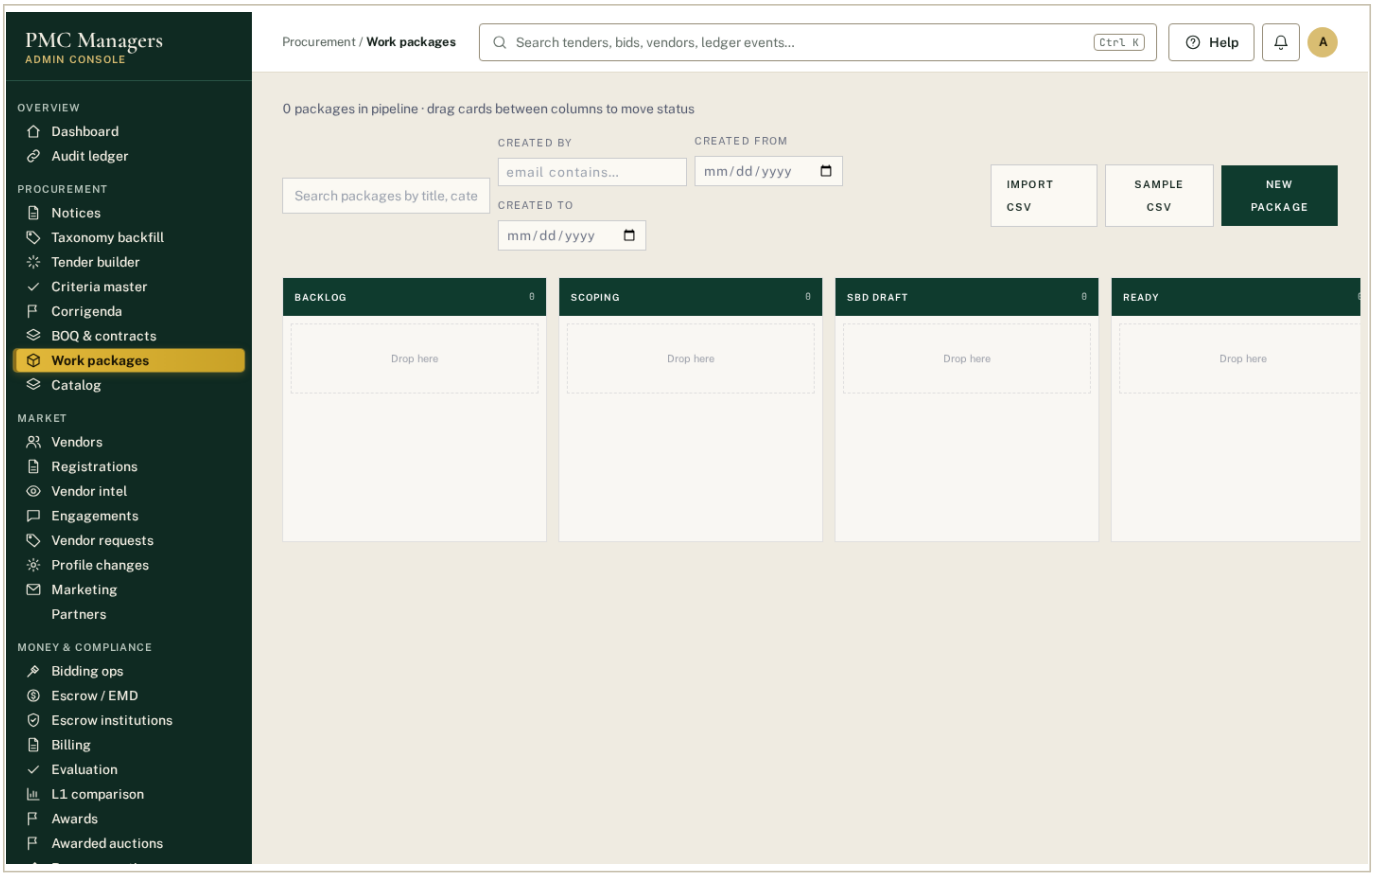

Assigns standard product/service categories (UNSPSC) to older tenders and suppliers so matching and search work everywhere.

Main actions

- Run a backfill
- Review suggested categories

Work packages

Screen: `/admin/e/work-packages`

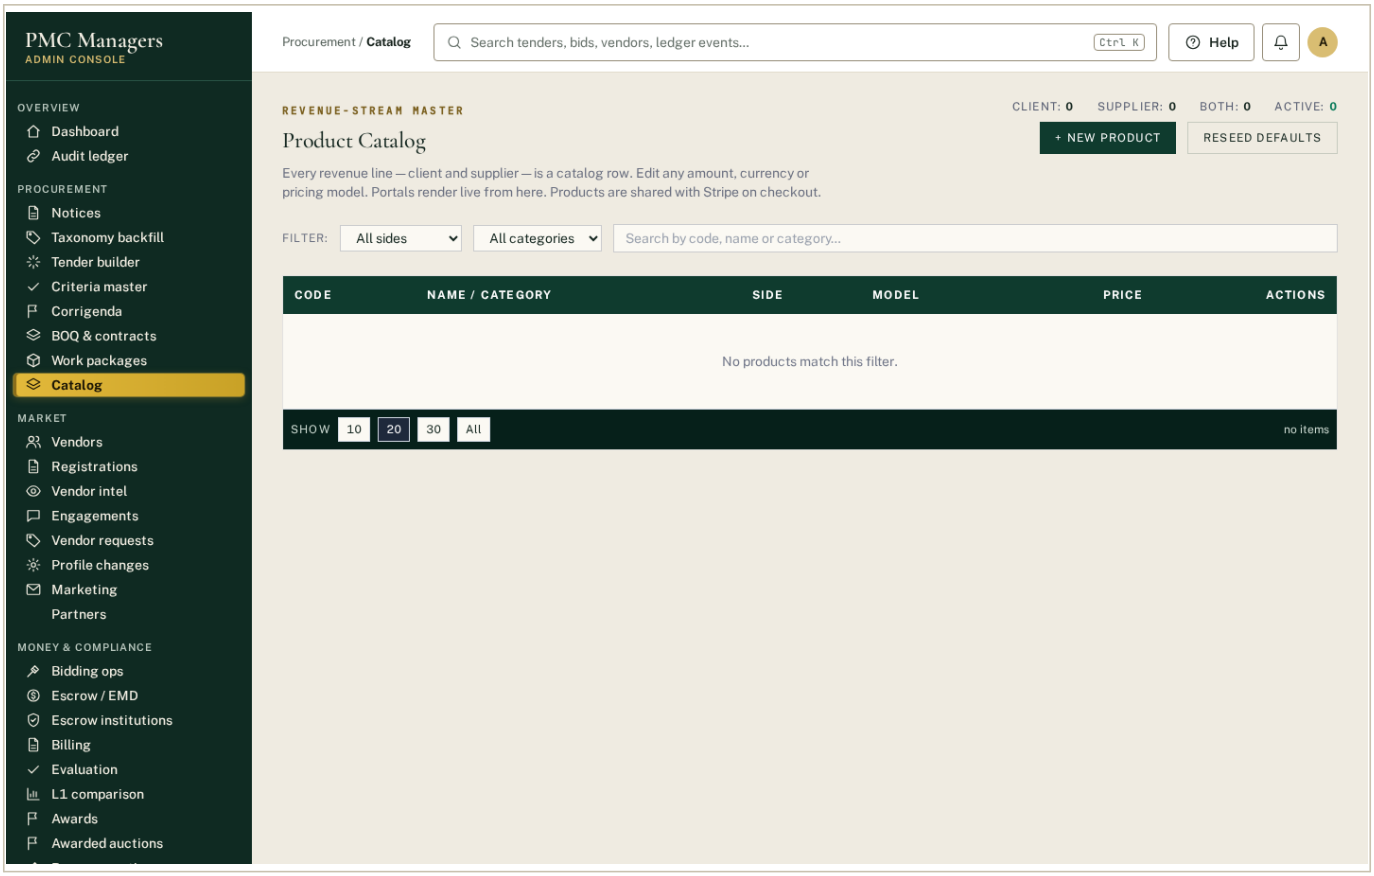

Splits large programmes into packages that can each be tendered separately.

Main actions

- Create a package
- Link it to a tender

Catalog

Screen: `/admin/e/catalog`

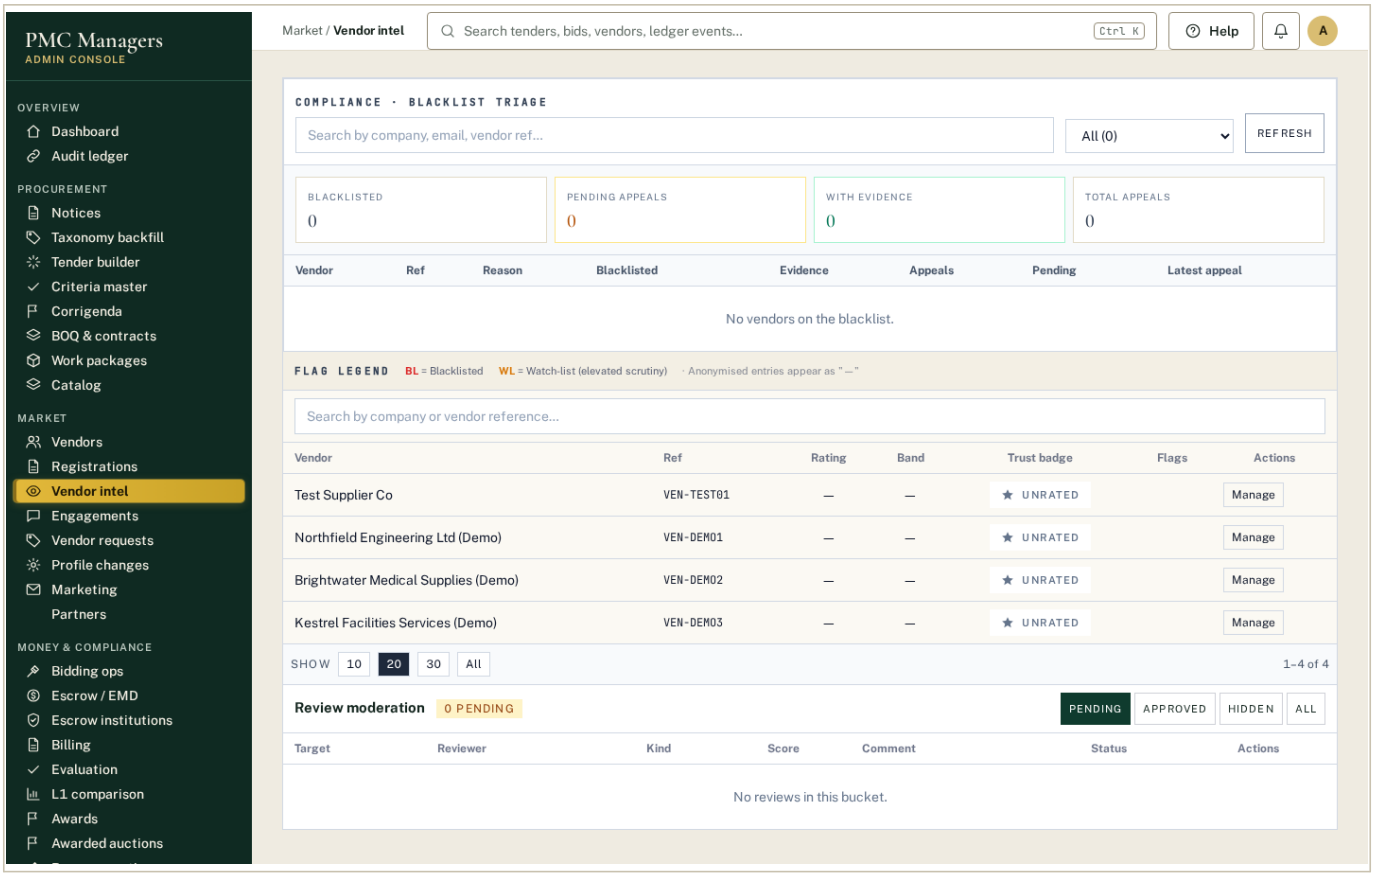

Product and service catalogue used for quick quotes and BOQ lines.

Main actions

- Add catalogue items
- Edit prices

Vendor intel

Screen: `/admin/e/vendor-intel`

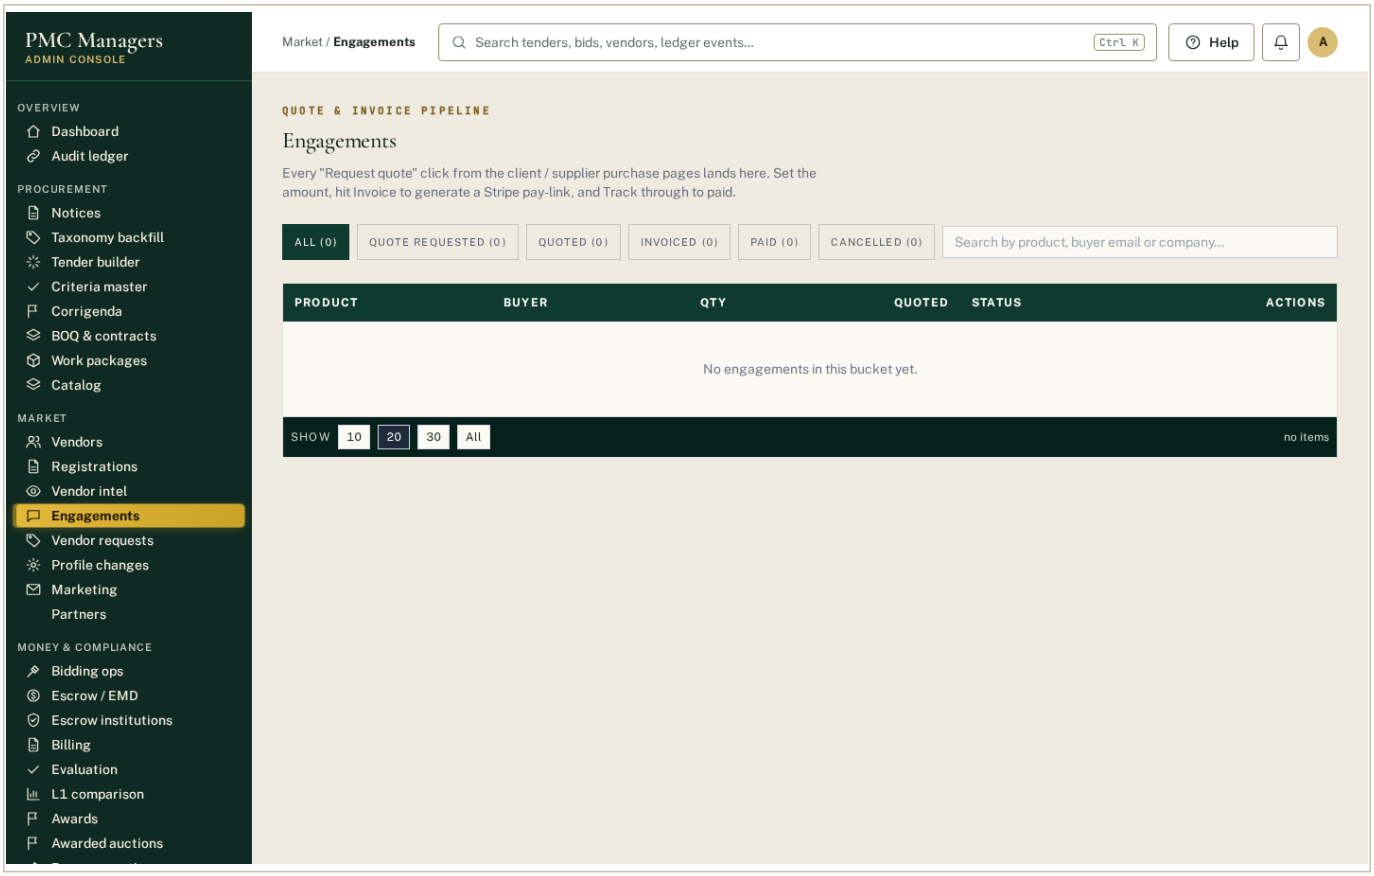

Supplier risk and performance signals: reviews, appeals, debarment checks and history.

Main actions

- Review a supplier's signals
- Handle an appeal

Engagements

Screen: `/admin/e/engagements`

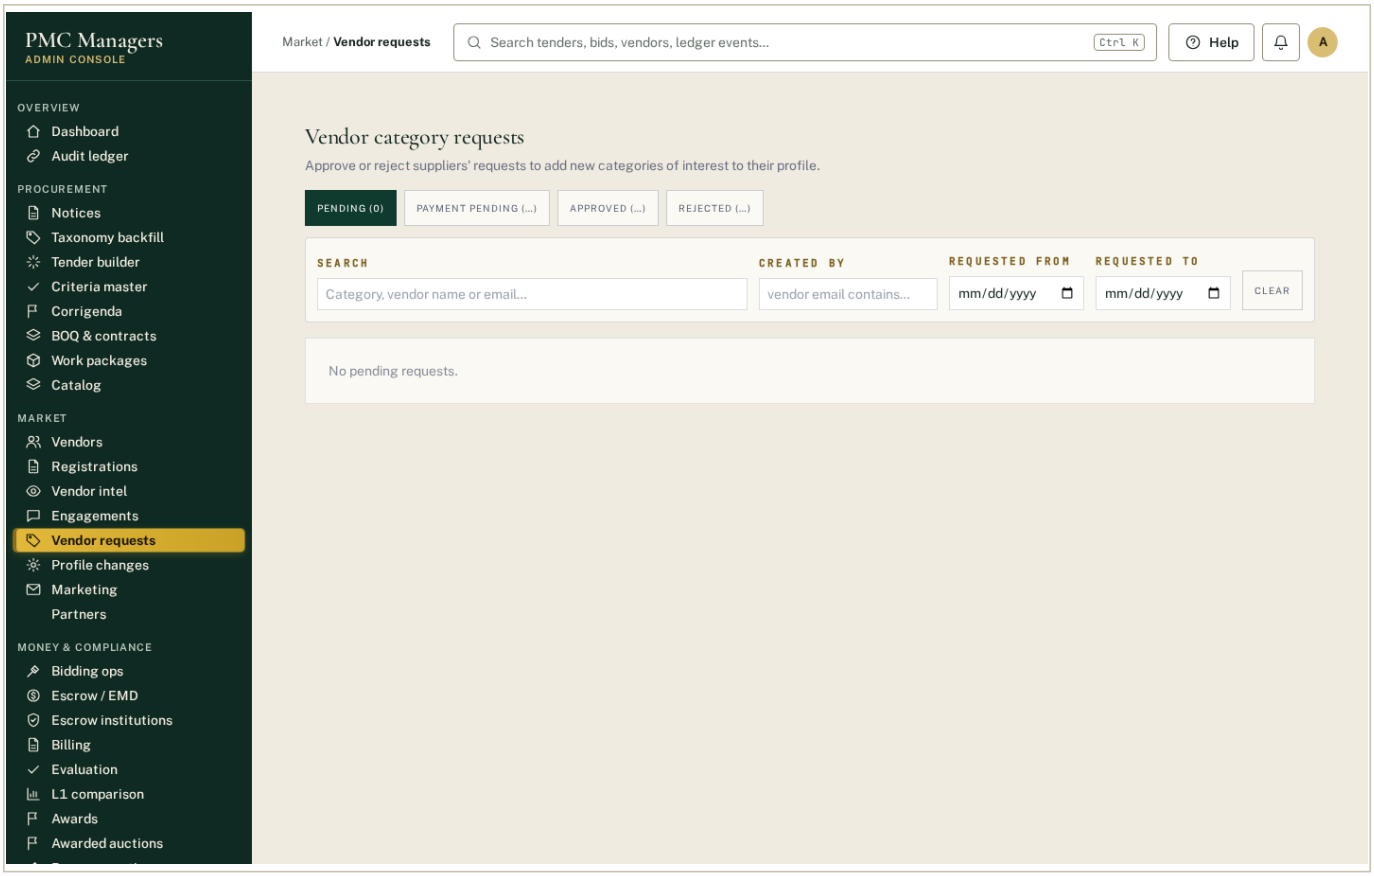

Service engagements and quote requests between buyers and suppliers.

Main actions

- Track an engagement

Vendor requests

Screen: `/admin/e/vendor-requests`

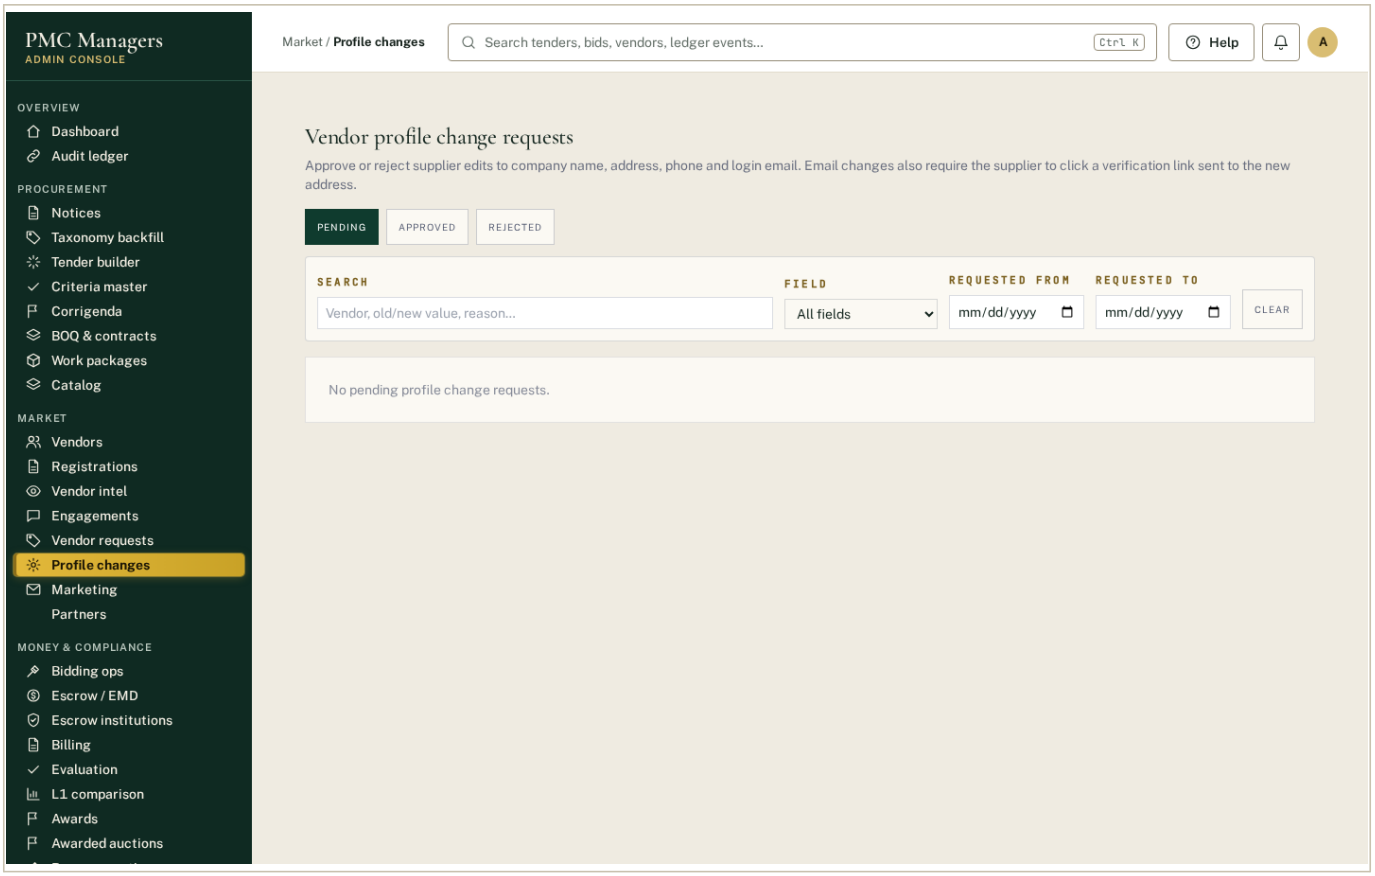

Requests raised by suppliers (category additions, help, corrections) waiting for PMC action.

Main actions

• Respond to a request

Profile changes

Screen: `/admin/e/profile-changes`

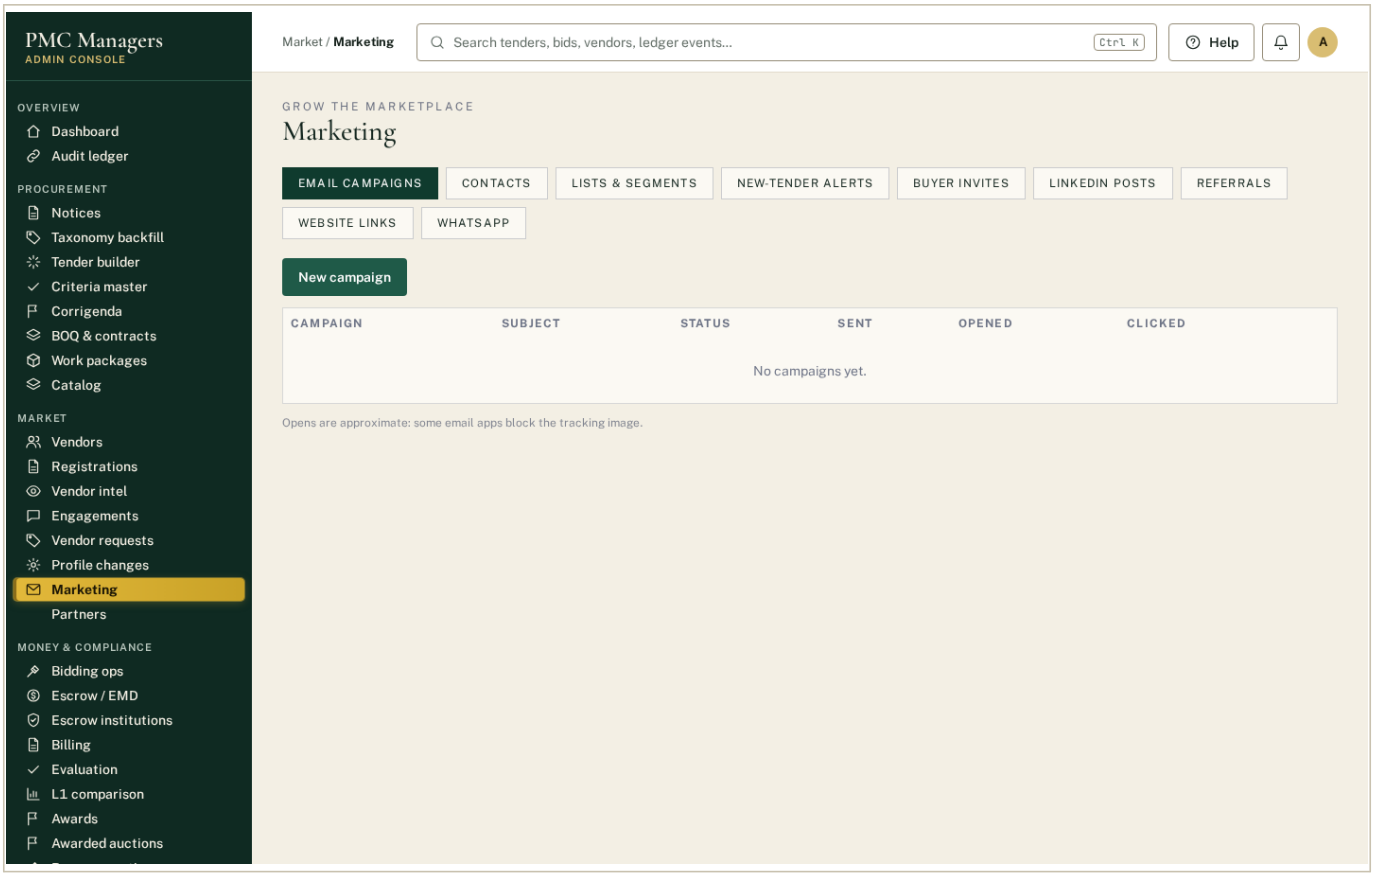

Supplier profile changes (bank, address, directors) that need approval before they take effect.

Main actions

• Approve or reject a change

Marketing

Screen: `/admin/e/marketing`

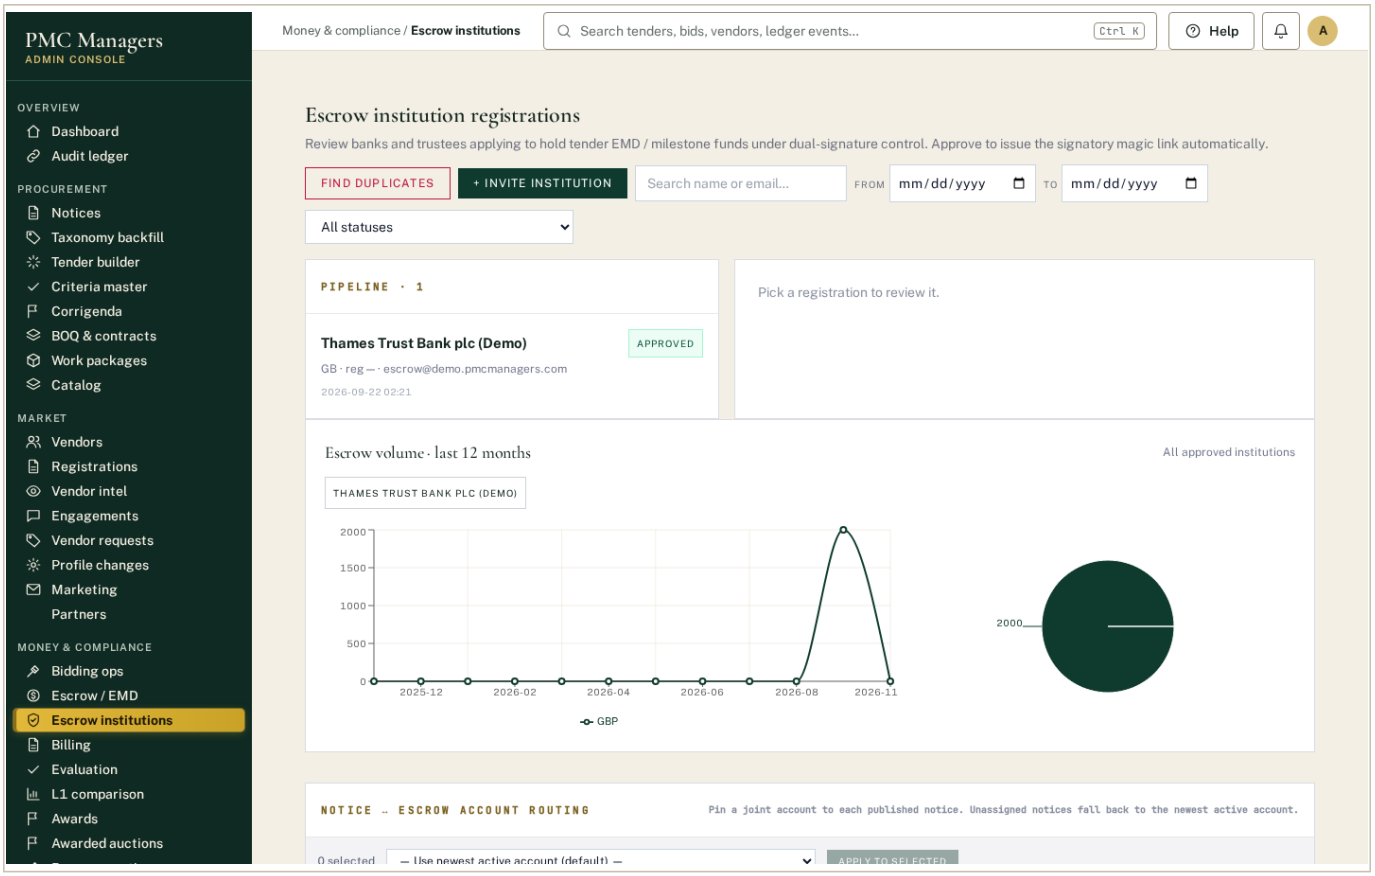

Campaigns, digests and WhatsApp/email outreach to suppliers.

Main actions

- Send a campaign
- View the WhatsApp inbox

Escrow institutions

Screen: `/admin/e/escrow-institutions`

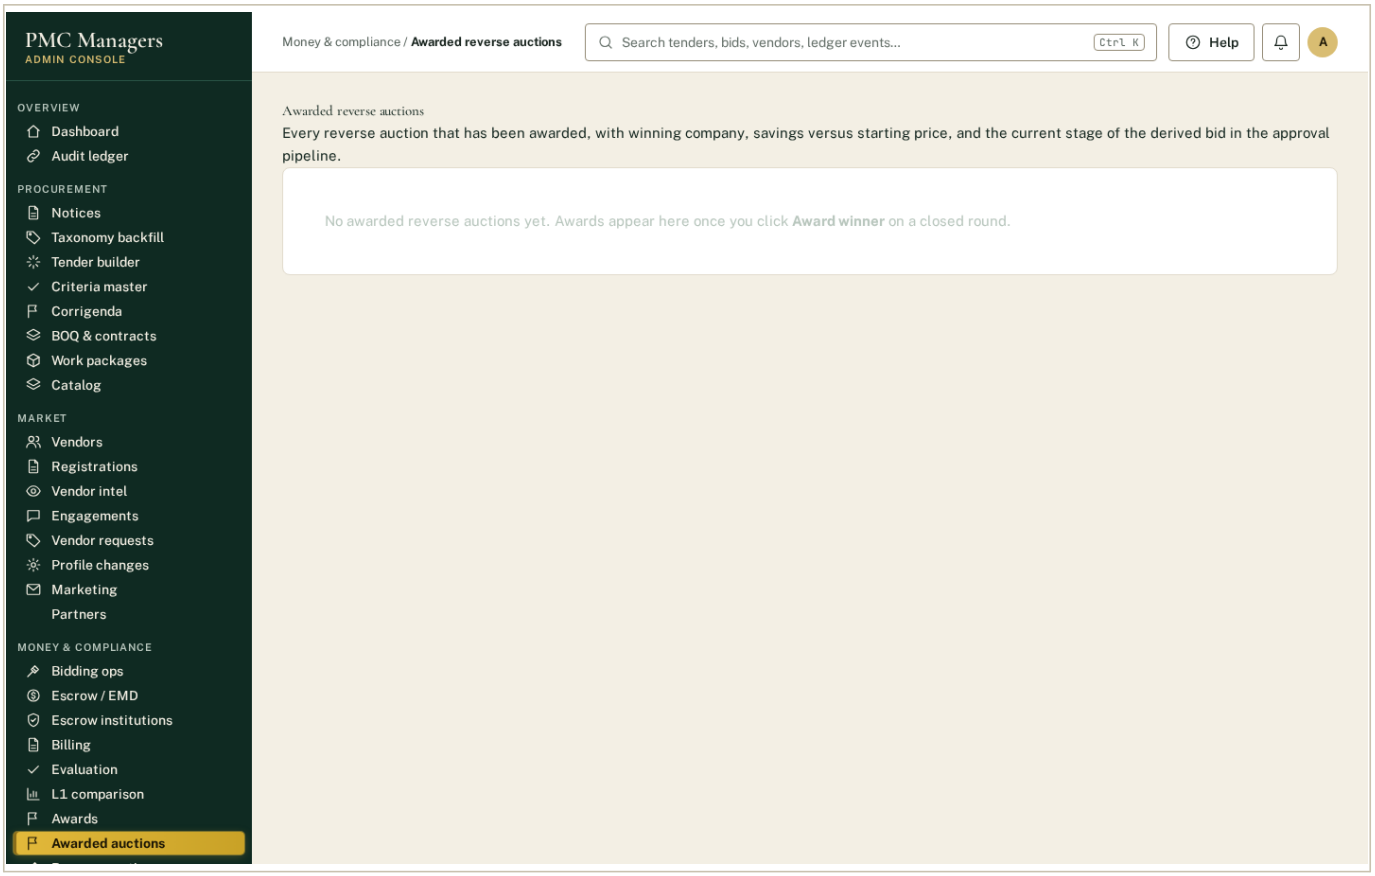

Banks and escrow providers onboarded to hold EMDs and award payments.

Main actions

- Approve an institution
- View accounts

Awarded auctions

Screen: `/admin/e/awarded-auctions`

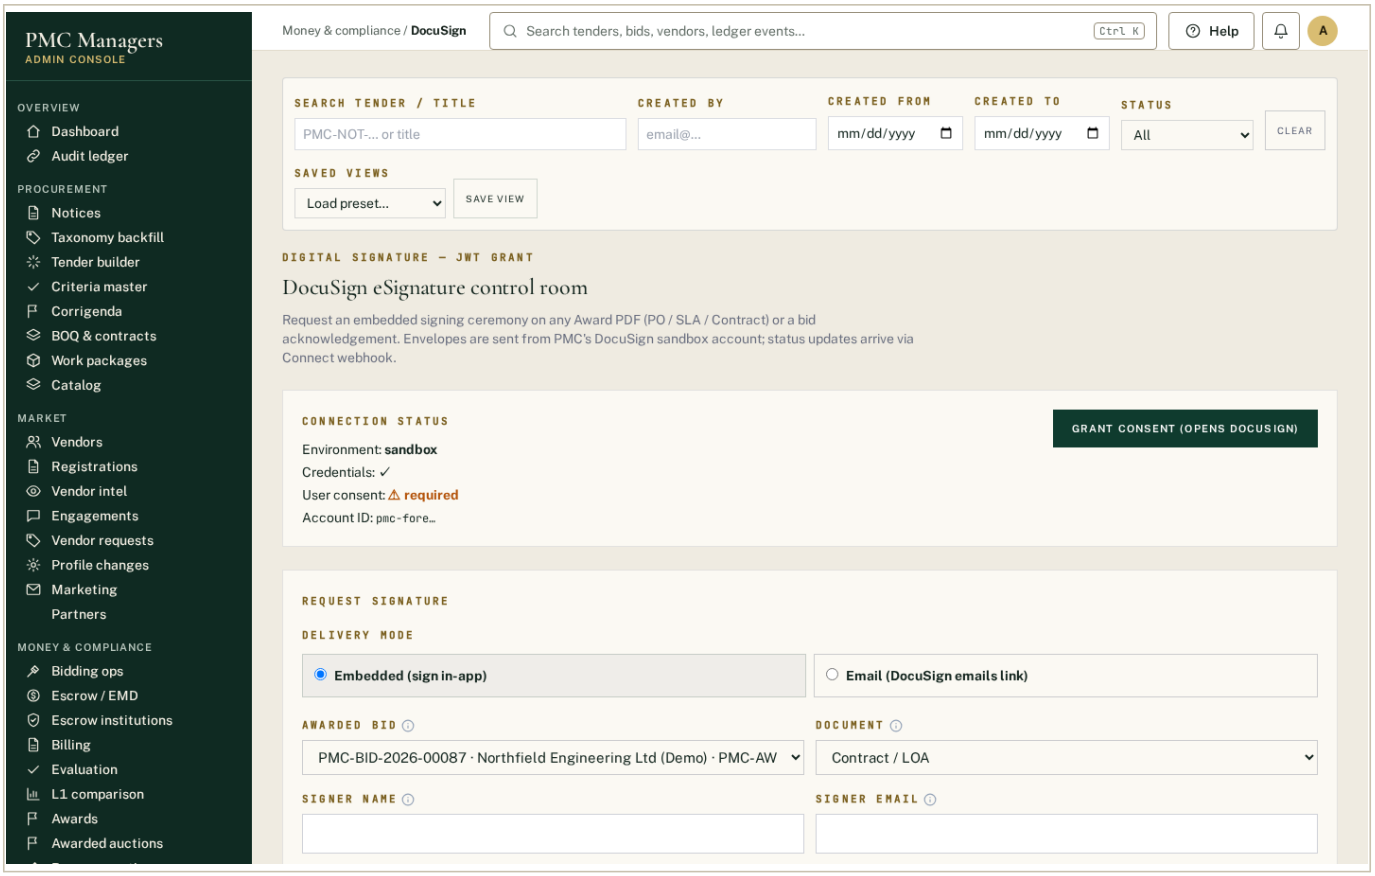

Results of completed reverse auctions and the resulting awards.

Main actions

- Open an awarded auction

DocuSign

Screen: `/admin/e/docusign`

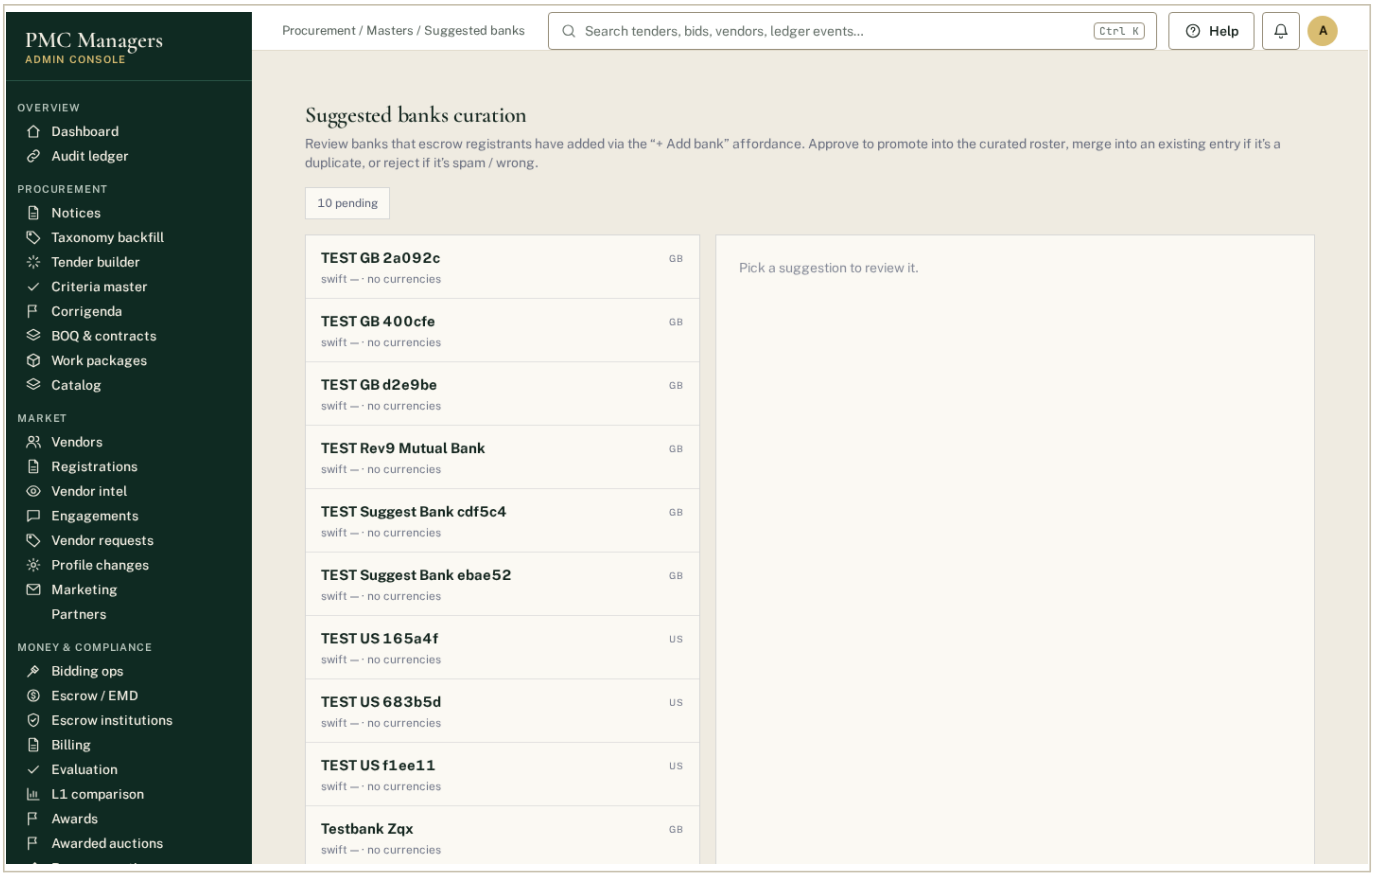

Electronic signature envelopes for award letters and contracts.

Main actions

- Track envelope status

Suggested banks

Screen: `/admin/e/suggested-banks`

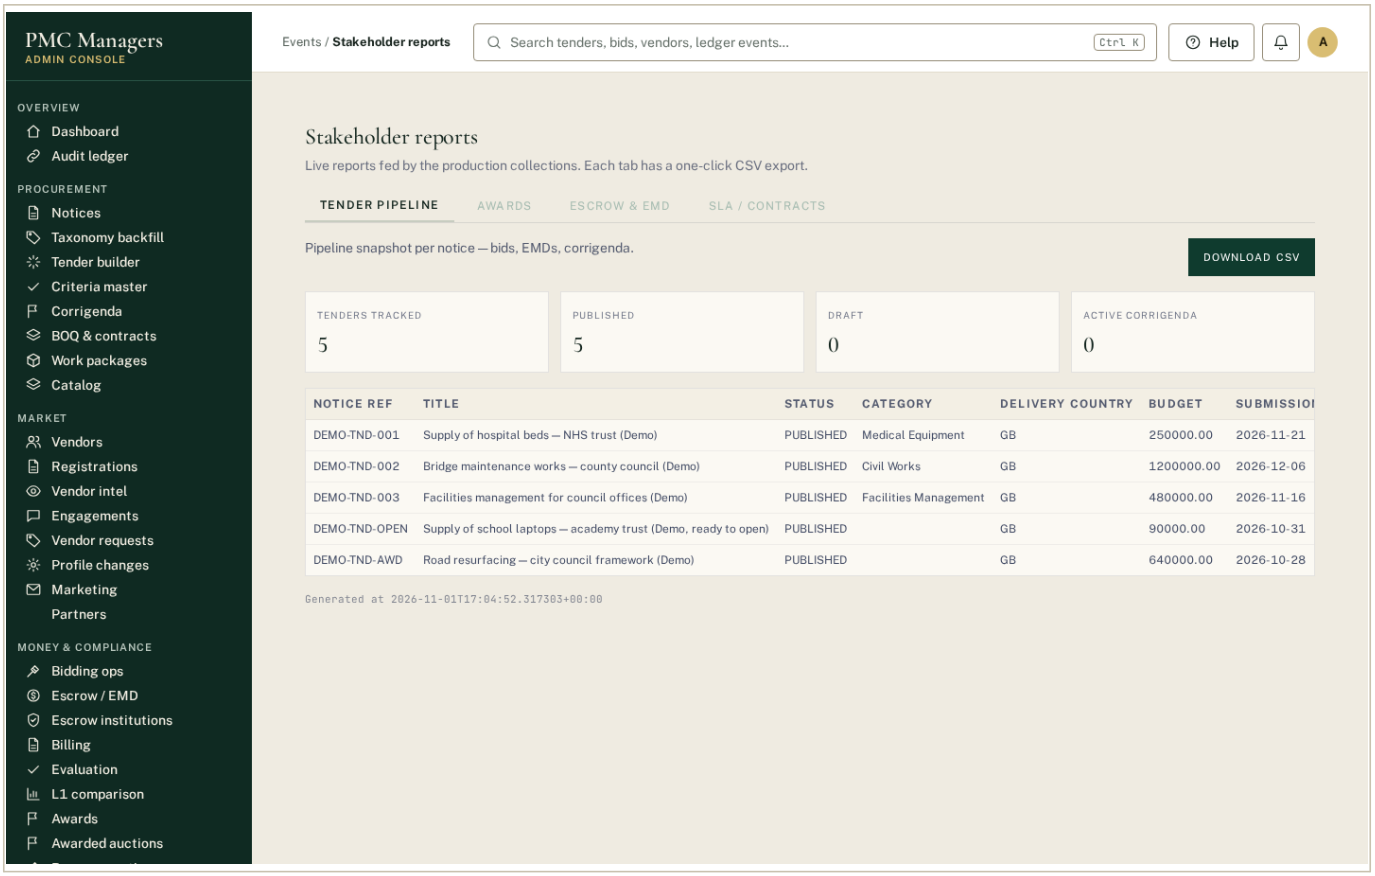

Banks suggested by users to be added as escrow institutions.

Main actions

- Review a suggestion

Stakeholder reports

Screen: `/admin/e/stakeholder-reports`

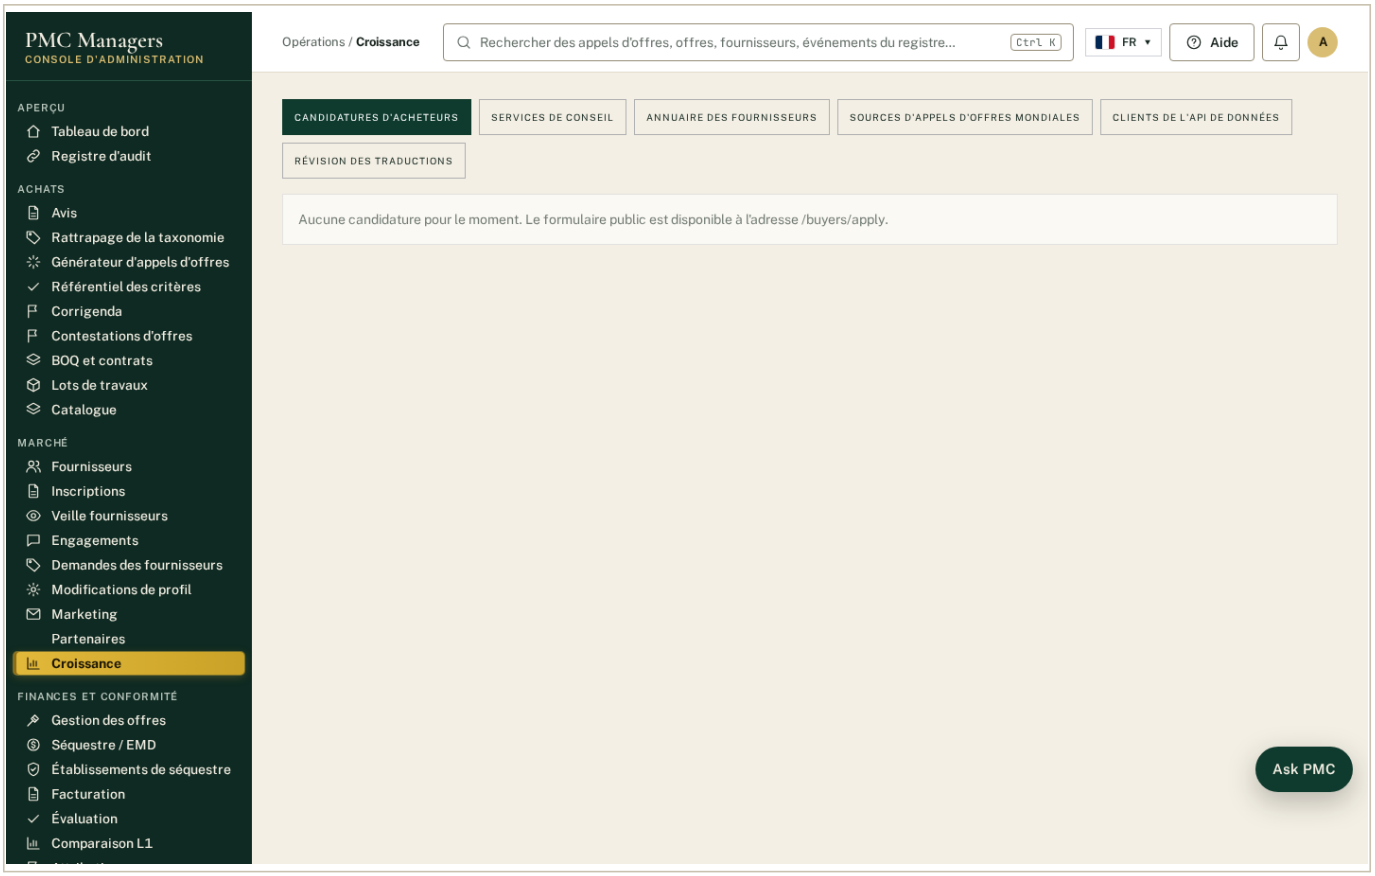

Board and sponsor reports: tender volumes, savings, timelines and compliance.

Main actions

- Generate a report
- Download PDF

Growth tools

Screen: `/admin/e/growth`

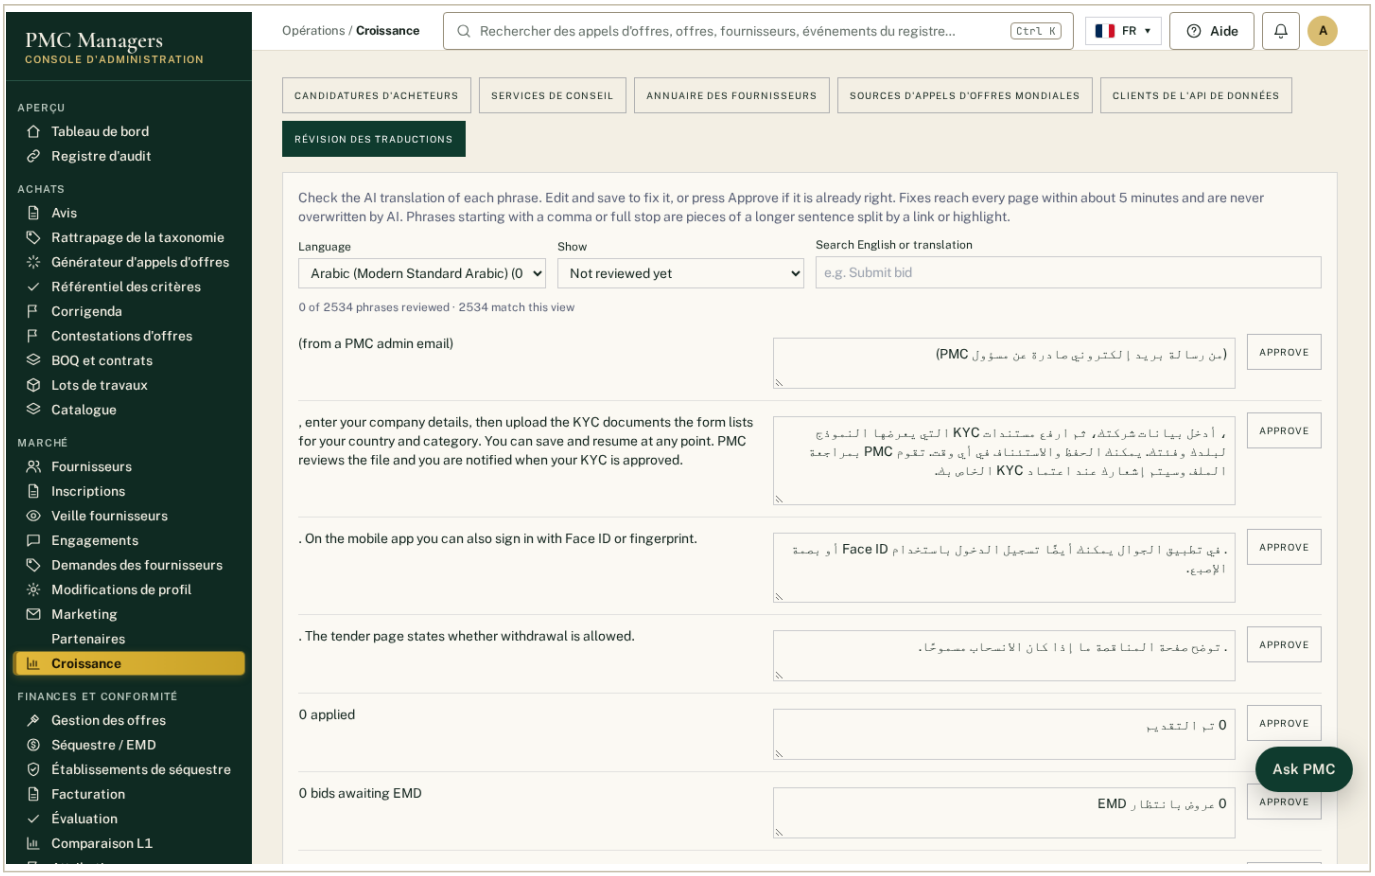

Buyer applications, consultancy services, supplier directory, global tender sources and Data API clients in one screen.

Main actions

- Approve or reject buyer applications
- Feature a supplier
- Fetch tenders from a source
- Create a Data API key

Translation review

Screen: `/admin/e/growth?tab=translations`

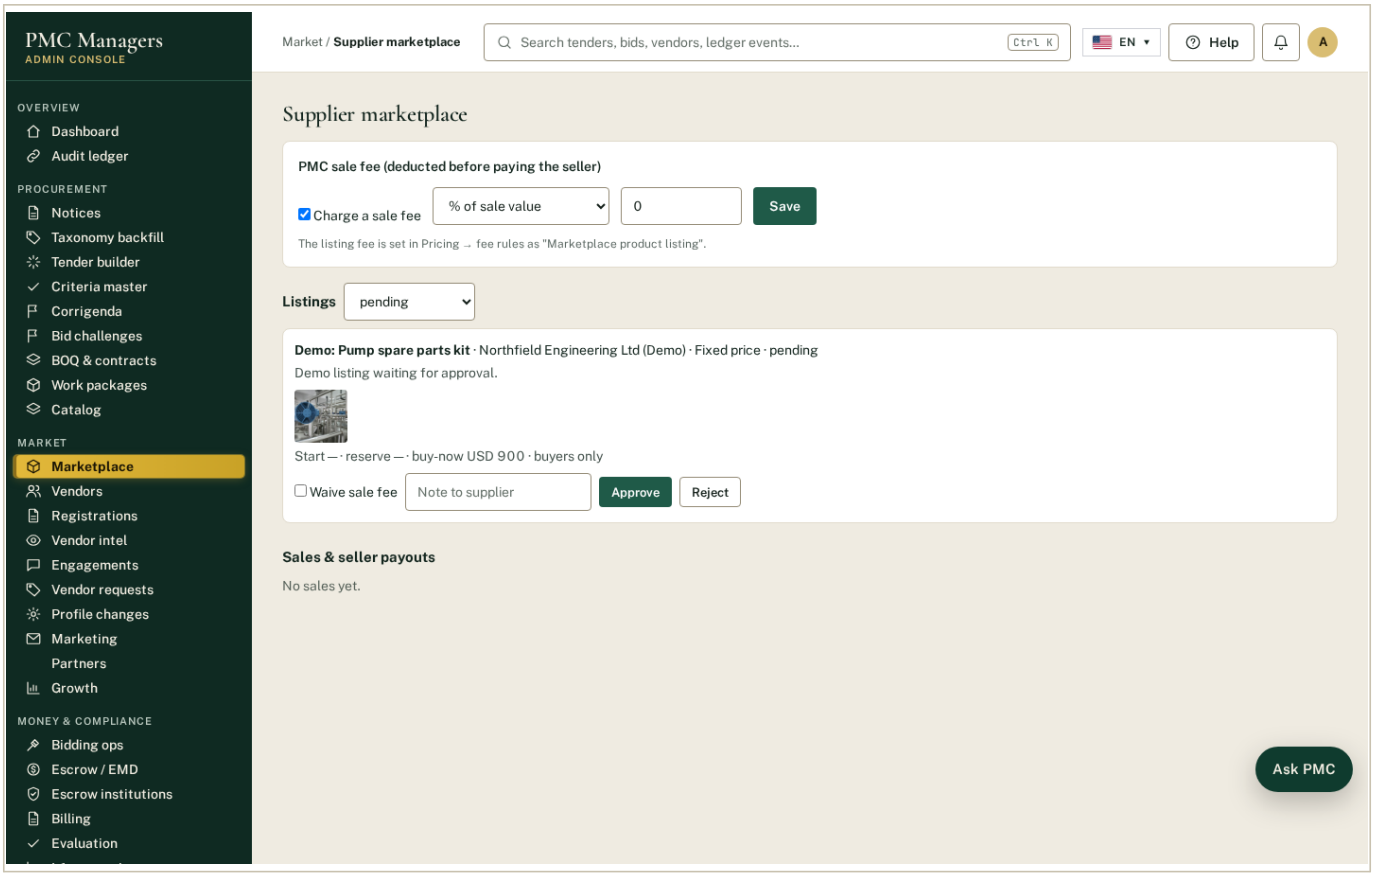

Native speakers check the AI translations used across the portal. Approve correct phrases or save a fix; reviewed phrases are never overwritten by AI.

Main actions

- Approve a translation
- Save a fix

Marketplace approvals

Screen: `/admin/e/market`

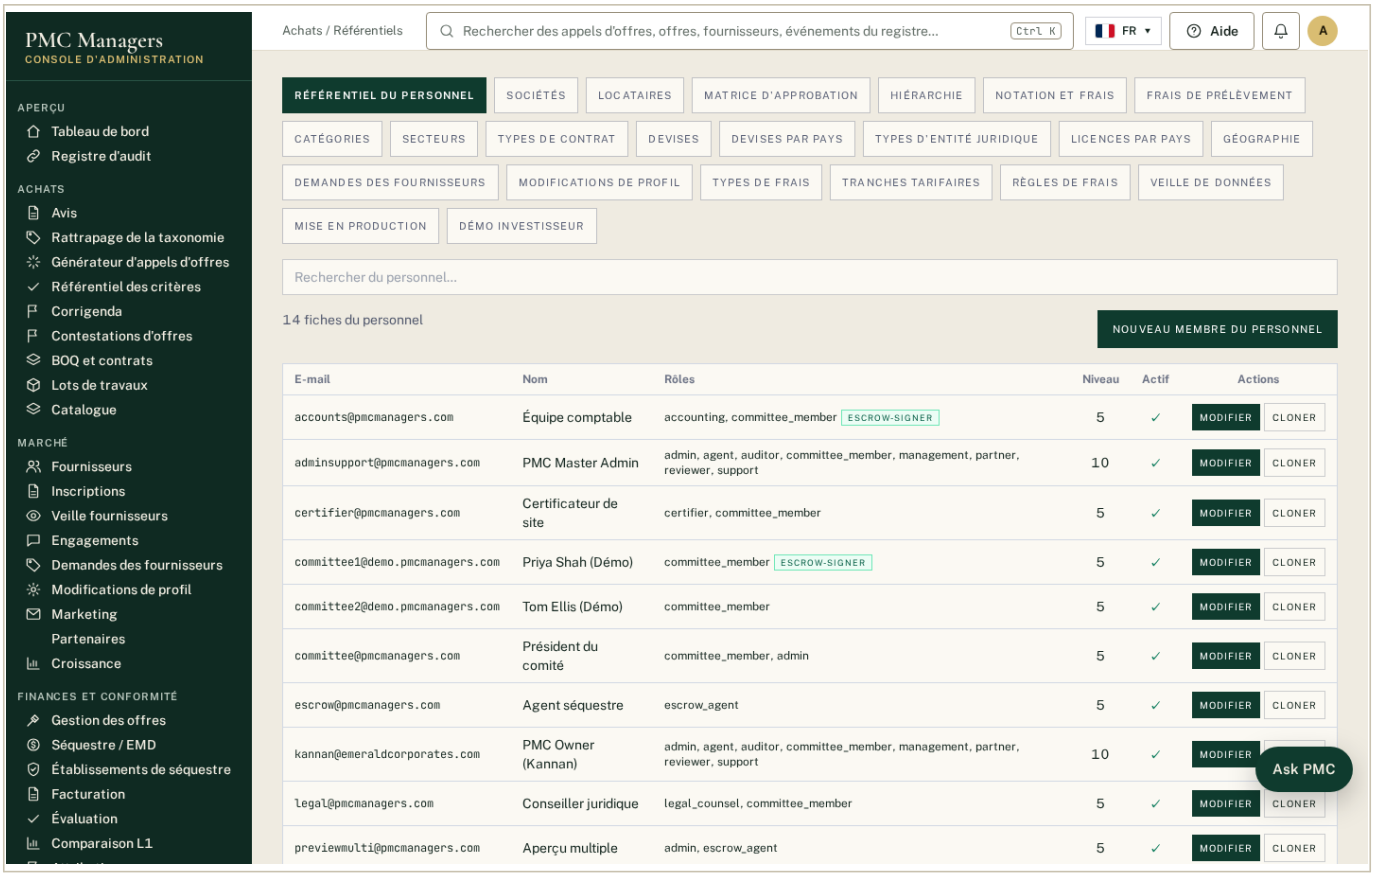

Every supplier listing is approved here before buyers see it. Set the PMC sale fee, waive it for a listing, and record seller payouts.

Main actions

- Approve or reject a listing
- Set the sale fee
- Mark seller paid

Masters and fee rules

Screen: `/admin/e/masters`

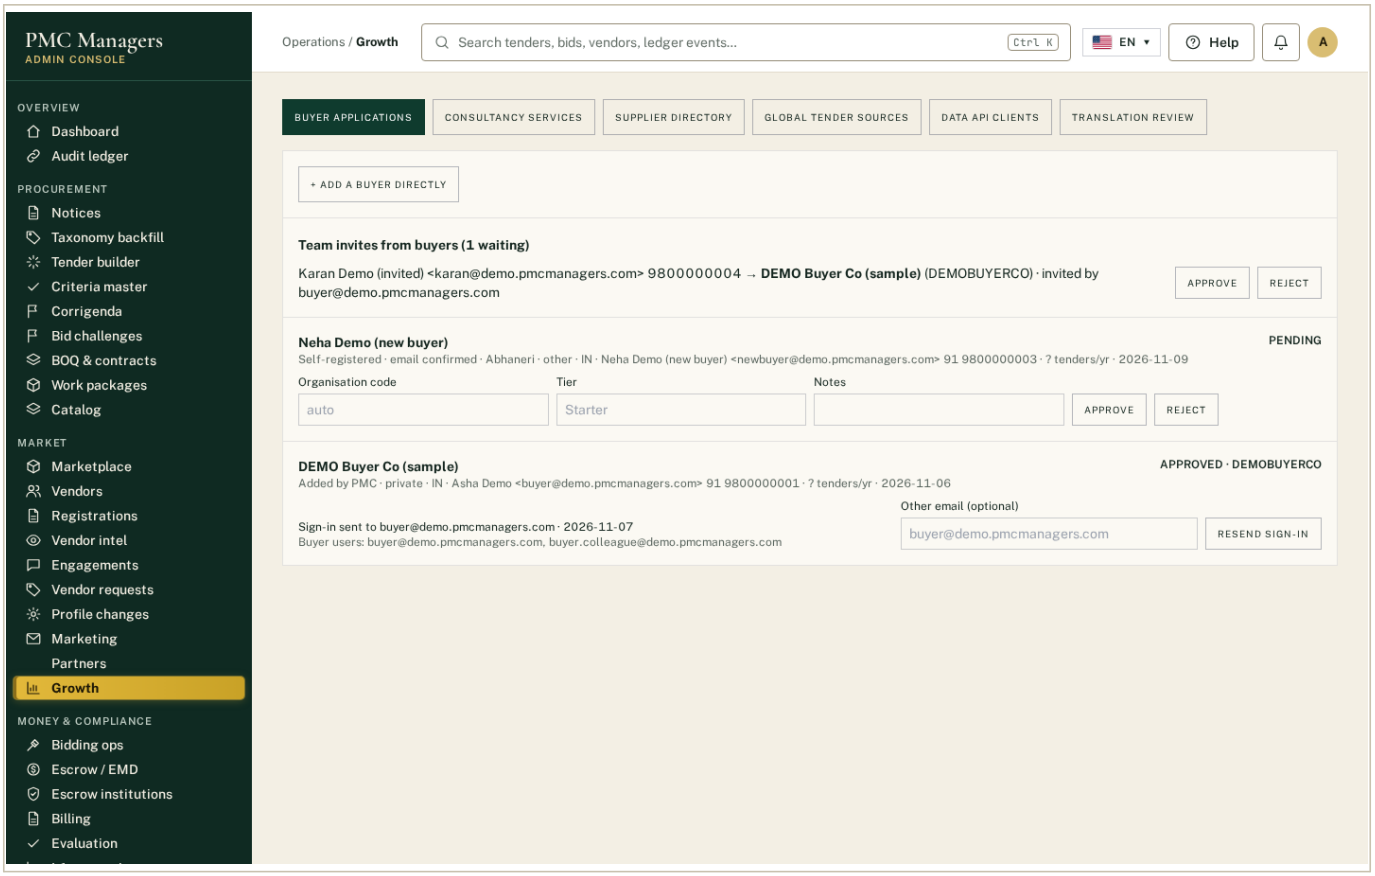

Master lists, including pricing bands (country groups), tier names and fee rules for publishing, bids, awards, AI tools, featured listings and the Data API.

Main actions

- Edit a pricing band
- Change a fee or set it to waived

Buyer applications, direct add & team invites

Screen: `/admin/e/growth?tab=buyers`

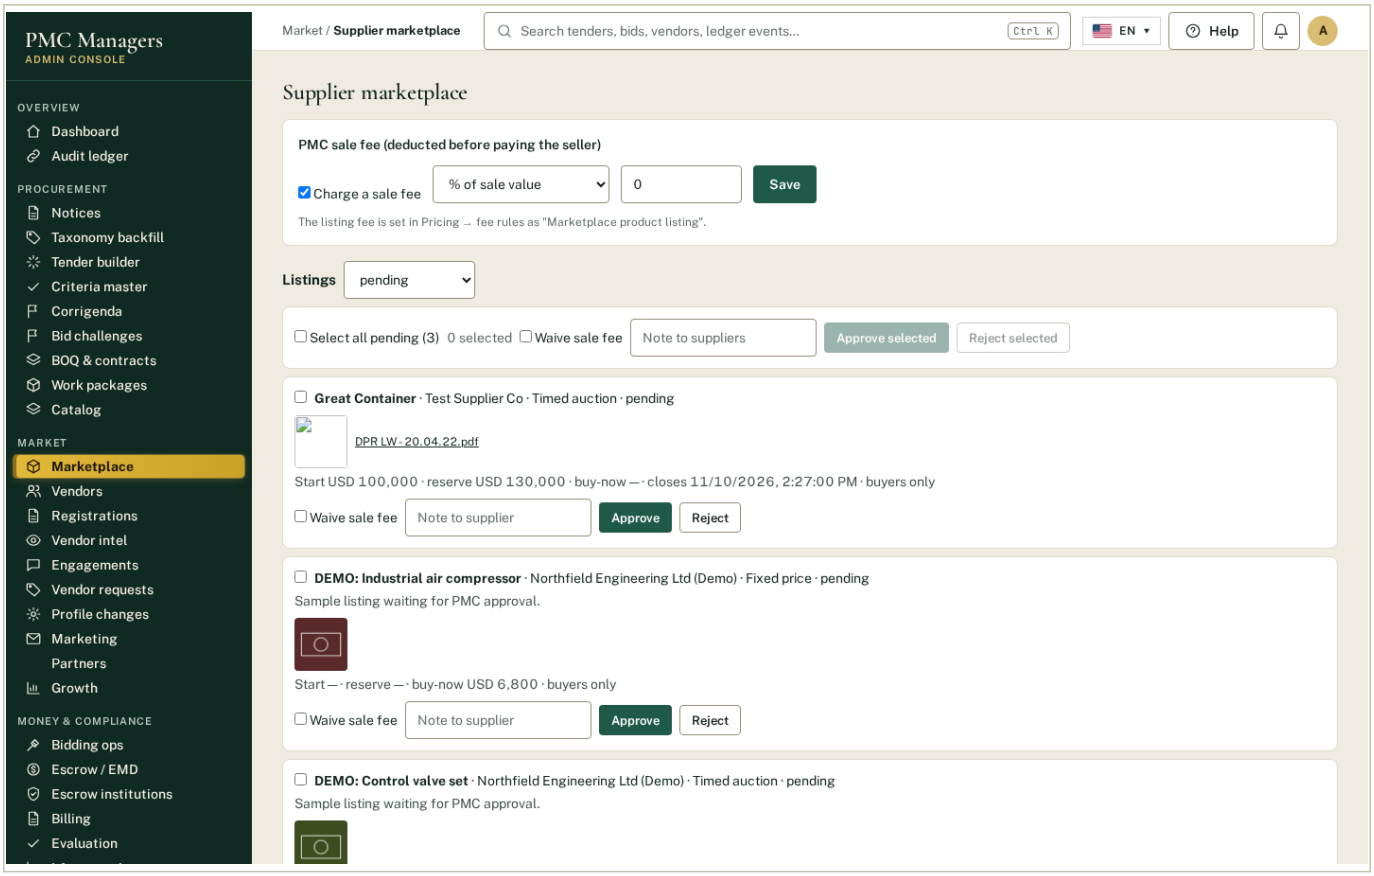

Approve self-registered buyers (after email confirmation) and applications; add a buyer directly (sign-in emailed); approve team invites from buyer organisations; send or resend buyer sign-ins.

Main actions

- Approve / reject
- + Add a buyer directly
- Approve team invite
- Send sign-in

Marketplace approvals (bulk)

Screen: `/admin/e/market`

Pending supplier listings can be ticked and approved or rejected together, with one note and an optional fee waiver.

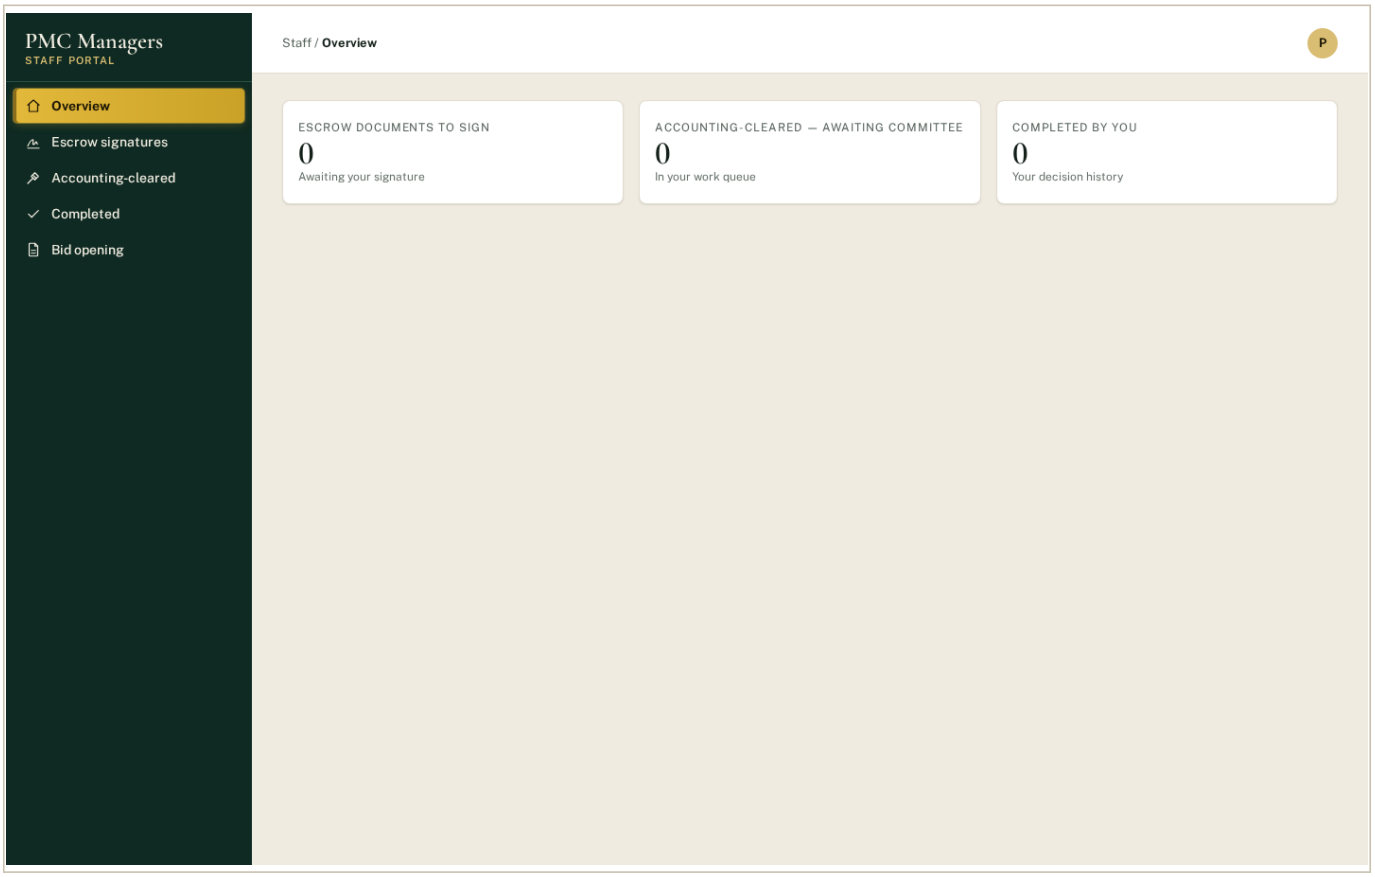

Main actions

- Select all
- Approve selected
- Reject selected

6 · Staff portal — screen tour

Staff portal (committee)

Screen: `/staff`

Committee members and other staff see their tasks: tenders to open, proofs to review, bids to sign off and award.

Main actions

- Approve an opening
- Accept / reject proofs
- Award

7 · Deep-dive: Tender builder & AI DPR

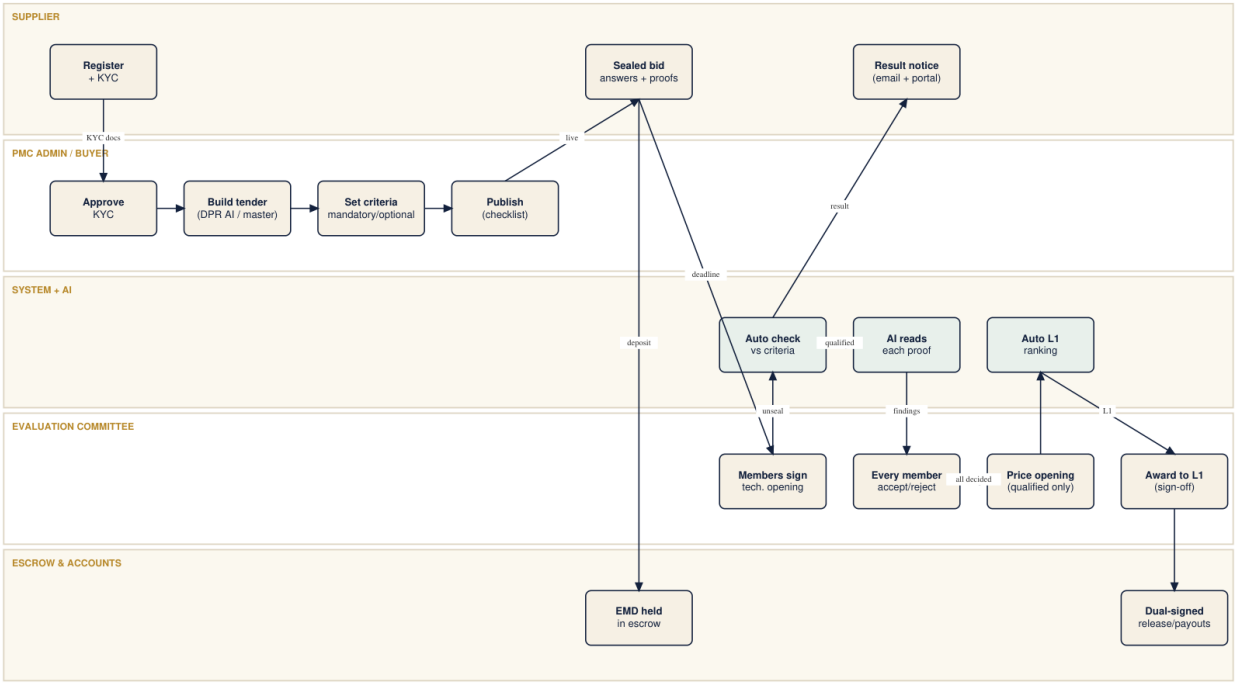

1. Tender builder › AI generate from DPR: pick country, a master template (or 'build a brand-new master'), upload up to 3 DPRs (PDF/DOCX/TXT, max 100 MB each).
2. Analyze runs in the background; each file shows progress, extracted headings and missing categories.
3. Create AI-drafted tenders, review every section, then use Criteria and Create notice.

If upload fails with 'status code 413' on AWS, the backend bundle was deployed without the .platform/nginx upload-size setting — redeploy the full backend ZIP (see chapter 13).

8 · Deep-dive: Criteria, sealed bids, opening & AI proof review

1. Criteria come from the Criteria master or saved sets, AI-read from the tender document, or one-off. Each is pass/fail or scored, Mandatory or optional, with proof required or not.
2. Rule: a bid qualifies if it meets every mandatory criterion and at least N of the optional ones (blank = all).
3. Publish needs: main document, future deadline, at least one must-pass criterion (checklist on the draft row). Live tenders without bids can still change criteria.
4. Suppliers must answer mandatory items with proofs; everything is sealed on submit.
5. After the deadline every committee member signs the technical opening; the system checks every bid and emails result notices.
6. AI reads each must-pass proof of qualified bids: Matches / Does not match / Unclear + figure found.
7. Every member accepts or rejects each proof (comment to reject). Mandatory rejection disqualifies; optional rejection disqualifies only below the minimum.
8. Doubts can be raised and resolved with notes. Download the proof check report (PDF) for the file.

PMC tender lifecycle — process flow

• Lanes show who acts. Green boxes are automatic (system or AI). Bids stay sealed until the committee signs each opening.

• A bid qualifies if it meets every mandatory criterion and at least the minimum number of optional criteria; the AI only flags proofs, the committee decides (all must accept).

• Price opening is blocked until every proof is decided; L1 runs automatically; award needs certifier, legal and accounting clearance.

PMC Managers · PMC tender lifecycle — process flow

Page 1

9 · Deep-dive: Price opening, L1, award & escrow

1. Price opening is blocked until every proof is decided; only qualified bids' prices open.
2. L1 ranking runs automatically and shows on the opening card.
3. Award to L1 (committee member, one click + note) requires certifier, legal and accounting clearance on the L1 bid. Weighted tenders use the Award recommendation report.
4. On award: award letter and contract are generated; the winner is emailed 'Congratulations — your bid is awarded'; every other bidder is emailed that the tender went to another supplier, why (criteria failed, disqualified with the committee's note, or their L-rank and the awarded price) and their EMD refund date.
5. Escrow releases need two signatures; consortium awards create per-member payment instructions with bank references and a downloadable payout report.

10 · Partners, reminders & tracking

1. Admin invites a partner; partner completes Profile, Banking, Documents, Agreement (progress bar 'N of 4').
2. Reminder emails go 3 and 7 days after joining if unfinished (daily 09:00 London).
3. Every tender shows a progress line (Criteria → Bids → Opening → Proof review → Price → L1 → Award) on Notices and on the dashboard.

11 · Troubleshooting playbook

Symptom	Likely cause	Fix
Upload fails: status code 413	Web server body limit on AWS	Redeploy full backend ZIP with .platform
AWS health 'Degraded'	Failing health checks or 5xx	EB › Health › causes; check /health and logs
Old screens after deploy	CloudFront cache	Invalidate /*
Emails not arriving	Email key missing/invalid	Update the email secret and redeploy
Price opening blocked	Proof review or doubt pending	Decide every proof / resolve doubts
Award to L1 refused	L1 bid not cleared	Complete certifier, legal, accounting clearances
Supplier can't submit	Mandatory criterion or proof missing	Answer all mandatory items

12 · Sample workflow — one tender end to end

1. Admin drafts 'Hospital beds supply' from a DPR and adds 3 mandatory + 2 optional criteria (at least 1 optional), L1.
2. Checklist all ticked → Publish.
3. Three suppliers bid; one misses a mandatory proof and cannot submit until fixed.
4. Deadline passes; committee signs; 2 bids qualify, 1 fails (turnover below 500,000) and is notified.
5. AI flags a mismatch on one proof; one member rejects with a comment → that bid is disqualified.
6. Price opening; L1 = remaining bid; clearances done; Award to L1; letters and emails go out; EMDs of others scheduled for refund.

13 · Procurement policy: criteria & qualification

Purpose. Make sure every tender is judged by clear, published criteria applied the same way to every bidder.

Rule	What it means
Published criteria only	Bids are judged only on the criteria shown in the tender. Criteria come from the Criteria master or are added by the tender author and saved before publishing.
Mandatory vs optional	The tender author marks each pass/fail criterion Mandatory (must be met) or optional and sets the minimum number of optional criteria a bidder must meet (blank = all).
At least one must-pass	A tender cannot be published without at least one must-pass criterion (publish checklist).
Changing criteria	Allowed on a live tender only while it has no bids; once a bid arrives criteria lock. Any other change is a corrigendum sent to all bidders.
System decides pass/fail	At technical opening the system compares every answer with the rule. Nobody can override a pass/fail directly; the committee can only raise a logged doubt and decide it.
Consortium rules	Each criterion says whether the lead, the combined members or every member must meet it.

14 · Proof review policy (AI + committee)

Purpose. Check that the documents bidders attach actually support what they declared.

Rule	What it means
Sealed until opening	Proof files are encrypted on upload and cannot be opened by anyone before the committee signs the technical opening.
AI reads, people decide	For qualified bids the AI reads each must-pass proof and records Matches / Does not match / Unclear with the figure found. The AI never passes or fails a bid.
Unanimous acceptance	Every committee member must accept a proof for it to stand. One rejection (with a written comment) fails that proof.
Effect of a rejection	Mandatory proof rejected → bid disqualified. Optional proof rejected → disqualified only if the bid falls below the minimum optional criteria.
Unreadable files	Word/Excel or unreadable scans are marked 'check by hand'; the committee must still open and decide them.
Price opening gate	Price envelopes cannot be opened until every proof on every qualified bid is decided and every doubt resolved.
Record	The proof check report (PDF) is downloaded and kept on the tender file.

15 · Evaluation & award policy (L1 / weighted)

Purpose. Award fairly and transparently to the right bidder.

Rule	What it means
Method set in advance	Each tender states before publishing whether the winner is the lowest compliant price (L1) or weighted technical + price marks.
Only qualified bids ranked	Only bids that passed criteria and proof review have prices opened and are ranked.
Automatic L1	L1 ranking runs automatically at price opening; compliance flags (e.g. suspiciously low, above budget) are shown for the committee.
Clearances before award	The winning bid must have certifier, legal and accounting clearance before award.
Award to L1	A committee member awards with one click and a note; the action is recorded in the audit ledger.
Notices to bidders	The winner is congratulated; every other bidder is told why they were not selected (criteria failed, disqualified with the committee's note, or their L-rank and the awarded price) and their EMD refund date.

16 · Code of ethics & conflict of interest

Purpose. Protect the integrity of every tender.

Rule	What it means
Declare conflicts	Committee members declare any interest in a bidder before signing an opening; a conflicted member steps aside.
No contact during evaluation	Committee members do not discuss a live tender with bidders; clarifications go through the platform's messages.
Gifts	No gifts or hospitality from bidders during a tender.
Confidentiality	Bid contents, scores and committee comments are confidential until the award notice.
Reporting	Concerns are raised to the PMC integrity officer; retaliation is prohibited.

17 · Data protection, retention & deletion

Purpose. Handle personal and commercial data lawfully and securely.

Rule	What it means
Minimum data	Collect only what tendering, KYC and payments need.
Encryption	Bid answers, prices and bid files are encrypted at rest; access is by role.
Soft deletion	Records are archived, not erased, to keep the audit trail. Narrow, explicit deletion only on a verified request.
AI processing	Only proof files of qualified bids are sent to the AI, after technical opening, to read the figures.
Secrets	API keys and passwords live only in the server's secret settings — never in documents, chat, email or Git. If one leaks, revoke and replace it immediately.
Retention	Tender records and audit ledger kept for the period required by the buyer's regulations (typically 7 years).

18 · Incident response

Purpose. Act quickly and consistently when something goes wrong.

Step	Owner	Action
1 Detect	Anyone	Report via the help desk or integrity email; note time and screen.
2 Contain	PMC admin	Suspend affected accounts or tender; revoke leaked keys at the provider and replace them in AWS.
3 Assess	PMC admin + IT	Use the audit ledger to see what happened and who was affected.
4 Notify	PMC lead	Tell affected buyers/suppliers; regulators where required (e.g. 72 hours for personal data breaches).
5 Recover	IT	Redeploy clean bundles, verify chain, re-open the tender if needed.
6 Learn	PMC lead	Write a short review and update this manual.

19 · Complaints, appeals & escalation

Purpose. Give bidders a clear route to question a decision.

Stage	Who	Time
Clarification	Bidder asks via messages; PMC replies	3 working days
Complaint	Bidder writes to PMC within 5 days of the result notice	Acknowledged in 2 days
Review	PMC officer not involved in the tender reviews the record (proof check report, audit ledger)	10 working days
Appeal	Buyer's appeal body or vendor-intel appeal process	As per buyer rules

20 · RACI matrix

Purpose. Who does what in each tender step.

Activity	Responsible / Accountable	Consulted / Informed
Build tender & criteria	Admin (R), Buyer (A)	Reviewer (C)
Publish	Admin (R/A)	Suppliers (I)
Technical opening	Committee (R), Chair (A)	Suppliers (I)
Proof review	Every committee member (R), Chair (A)	AI (C)
Price opening & L1	Committee (R/A)	Accounting (I)
Clearances	Certifier, Legal, Accounting (R)	Committee (I)
Award	Committee member (R), Chair (A)	All bidders (I)
Escrow release	Two escrow signatories (R/A)	Accounts (I)

21 · Templates

Committee minutes — technical opening

```
Tender: _____ Date/time: _____ Chair: _____
Members present and conflict declarations: _____
Bids received: __ Qualified by system: __ Not qualified: __
Proof review decisions (attach proof check report): _____
Doubts raised and resolution: _____
Signatures: _____
```

Proof rejection comment

```
Criterion: _____ Bid: _____
What the document shows: _____ What was declared: _____
Reason for rejection: _____
```

Award notice (L1)

```
Tender _____ has been awarded to _____ at _____ (lowest compliant price).
Ranking of qualified bids: L1 _____, L2 _____, L3 _____
Bids not qualified and reasons: _____
EMD refunds due by: _____
```

Corrigendum

```
Tender: _____ Corrigendum no.: _____ Date: _____
What changes: _____ New deadline (if any): _____
Reason: _____
```

Clarification reply

```
Question received: _____ From: (kept anonymous)
Answer (shared with all bidders): _____
```

22 · Service levels

Purpose. Target response times.

Item	Target
Supplier KYC review	2 working days
Tender review (supplier-prepared)	3 working days
Clarification answer	3 working days
Proof review after technical opening	5 working days
Award after price opening	10 working days
EMD refund to losing bidders	14 days after award
Partner approval	3 working days

23 · What's new: fees, growth tools & languages

This chapter covers the features added in the latest releases. Each one also has a help guide and a video in the Help Centre.

Pricing bands & fee rules

1. Countries are grouped into pricing bands. Band names, tier names and the fee for each band are edited in **Masters → Fee rules**; nothing is fixed in code.
2. Before a tender is published, an admin opens **Fees** on the notice and ticks **Charge** or **Waive** for each fee. Publishing is blocked until the fees are confirmed.
3. The award fee rate is set per band (for example 0.30% today, any other rate or waived tomorrow). At publishing the admin also chooses who pays it: the buyer or the supplier.
4. When the award is completed, a Stripe payment link is sent automatically to the payer and is shown to admin accounts for follow-up.
5. Supplier bid fees: for each new supplier the admin decides whether extra categories are charged or waived.
6. Waivers can be approved by the Master Admin, an Admin or a Reviewer. Every decision is audit-logged.

Supplier AI tools & saved alerts

1. **AI tender tools**: a supplier uploads any tender document (or picks a PMC tender) and gets a summary of eligibility, turnover, experience, EMD, fees, key dates and required documents.
2. **Bid readiness check**: compares the tender with the company profile and lists missing documents and disqualification risks.
3. Both are charged per use; the price, or a waiver, is set by the admin in Fee rules.
4. **Saved alerts**: suppliers save keywords, countries, value range and buyers and get matching PMC and global tenders instantly, daily or weekly.

Growth tools (admin → Growth)

Tab	What it does
Buyer applications	Organisations apply at /buyers/apply; approve to create the organisation code, or reject.
Consultancy services	Create the services shown on /consultancy and track each request.
Supplier directory	Feature a supplier for premium visibility in /suppliers/directory.
Global tender sources	Turn sources on or off and fetch tenders (World Bank, EU TED, and a pipe ready for a licensed paid provider).
Data API clients	Issue API keys with daily limits so outside businesses can read tender data.
Translation review	Native speakers approve or correct the AI translations.

Languages

1. The whole portal (public site, supplier portal, admin and staff portals) is available in 14 languages: English, Russian, Kazakh, Simplified Chinese, Traditional Chinese, Spanish, French, German, Hindi, Malay, Bahasa Indonesia, Korean, Japanese and Arabic (right-to-left).
2. The flag button at the top of every page (bottom-left on phones) changes the language. Everything on screen is translated, including tender titles and descriptions.
3. Public pages have their own address per language, for example /fr/buyers, so search engines show the site in each language.
4. Ask PMC answers in the chosen language, help videos have a voice-over in each language, and this manual is published in all 14 languages.
5. Translations are made by AI and checked by native speakers in **Growth → Translation review**. Reviewed phrases are never overwritten by AI.

24 · What's new: Supplier Marketplace & AI catalogue import

Suppliers can now sell products directly to verified buyers without running a tender. Every listing is approved by PMC first. Each part below also has a help guide and a video in the Help Centre.

Ways to sell

Sale method	How it works
Timed auction	Starting price, optional hidden reserve, minimum bid step and closing time. The highest bid at closing wins.
Best offer	Buyers send offers until a deadline; the supplier accepts the one they want.
Fixed price	Buy now at the price the supplier sets.

A supplier can switch on any mix of the three for each product and chooses whether only verified buyer organisations, or any verified account, may take part.

Supplier: add products (Sell products)

1. Open **Sell products** and click **Add a product**. Enter the details, click **Upload photos** (up to 12) and **Attach spec sheet** for PDF datasheets (up to 6).
2. Tick the sale methods and prices, check what you will receive after the PMC fee, then click **Submit for approval**.

Supplier: import a catalogue with AI

1. Click **Import from a catalogue with AI** and choose a PDF catalogue, brochure or a JPG/PNG photo of a page (up to 25 MB; the first 30 pages are read).
2. AI reads the file in 1 to 3 minutes and lists every product with its photo, a description, category, unit and specifications. Photos are taken from the PDF, or cut out of the page when the page is a scan or photo.
3. For each product the supplier decides: keep it or untick it; use the AI description (and edit it) or **Write my own**; add the specifications or not; which photos to keep, add or upload; and whether to attach the catalogue PDF as a spec sheet.
4. **Create draft listing(s)** saves the chosen products as drafts marked *set price & how to sell*. A draft cannot be submitted until the supplier opens **Edit** and sets the sale method and price.
5. AI only uses facts in the document; it never adds prices or certifications. Reading a catalogue is free unless an admin sets a fee for **AI catalogue reading** in Pricing; a failed reading is never charged.

Admin: approvals, fees and payouts (Marketplace)

1. Every listing waits in **Admin** → **Marketplace**. Check the photos, spec sheets and prices, then **Approve** or **Reject** with a note.
2. The PMC **sale fee** is a percentage or a fixed amount, or switched off. It can be waived for one listing when approving it. The listing fee is set in **Pricing** → **fee rules** → **Marketplace product listing**.
3. The buyer pays PMC through a secure Stripe link from **My bids & purchases**. The order shows the PMC fee and the seller's bank details; the admin pays the balance and clicks **Mark seller paid** with the transfer reference. Automatic split payouts are not switched on.

Buyers: the public Marketplace

1. **Marketplace** in the top menu lists approved products with photos, spec sheets, price or current bid and closing time.
2. Verified buyers bid, send an offer or click **Buy now**; purchases are paid from **My bids & purchases** by **Pay securely**.
3. In the iPhone app the buy and pay buttons are hidden; buyers pay on the website.

25 · What's new: Buyer portal, watchlist & buyer teams

Buyers now have their own portal at **/buyer**, laid out like the supplier portal: left sidebar, top header with a notification bell and avatar menu, and a footer. Only verified buyers can bid or buy.

Becoming a buyer

Route	Steps	Who approves
Register free	Sign in page → Buyer organisation → Register as a buyer — free. Name, email, mobile, country and city are required (from the masters); state, address, ZIP and organisation are optional. Confirm the email link (3 days).	PMC admin in Growth → Buyer applications (only after the email is confirmed)
Apply as an organisation	/buyers/apply form for tender-issuing organisations.	PMC admin; approval emails a 7-day set-password link
Added by PMC	Admin → Growth → Buyer applications → + Add a buyer directly.	Approved at once; sign-in emailed

Buyer portal pages

Page	What the buyer sees
Dashboard	Tiles: active bids & offers, to pay, in delivery, won, unread notifications; latest activity
Watchlist	Products saved with ■ Save; reminder about an hour before a watched auction closes
Bids & auctions	Status of every bid (Leading, Outbid, Won, Lost) and offer (Open, Accepted, Declined)
Purchases & deliveries	Pay securely, delivery status set by the seller, I received it
Payments & refunds	Payments made and any refunds or payouts back to the buyer
Notifications	Bell list; important events are also emailed
My team	Main buyer invites colleagues (PMC approves each) and removes them (immediate)
Profile & security	Masters-backed profile, photo, change password; forgot password via the sign-in page

Notifications sent to buyers

1. Outbid on an auction.
2. About an hour before a watched auction closes (scheduler every 15 minutes).
3. Auction won, offer accepted or order placed — pay now.
4. Payment received.
5. Order dispatched / delivered (supplier marks it in Sell products → sales).
6. Account verified by PMC.

Security rules

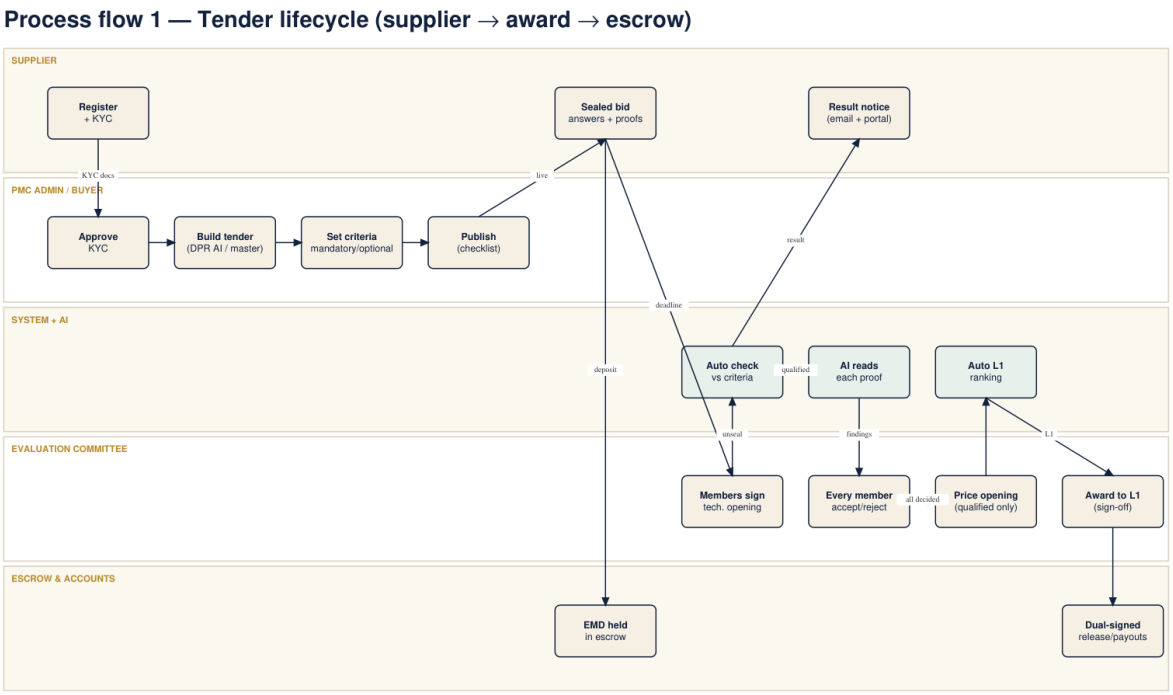

1. Buyer sign-ins can never open PMC admin or staff pages; buyer-organisation admins are not PMC staff.
2. A colleague only gets access after PMC approves the invite; removing a colleague ends every open session.
3. A buyer sees only their own bids, orders, notifications and organisation members.
4. Unconfirmed emails cannot sign in; unverified buyers can browse but not bid or buy.

Sample data in the screenshots is labelled DEMO and is not real business data.

26 · Process flow & data flow diagrams

The same diagrams are in the separate **PMC Process & Data Flow Diagrams** PDF. Process flows show who acts and in which order; data flows show what information moves between people, processes and data stores (grey).

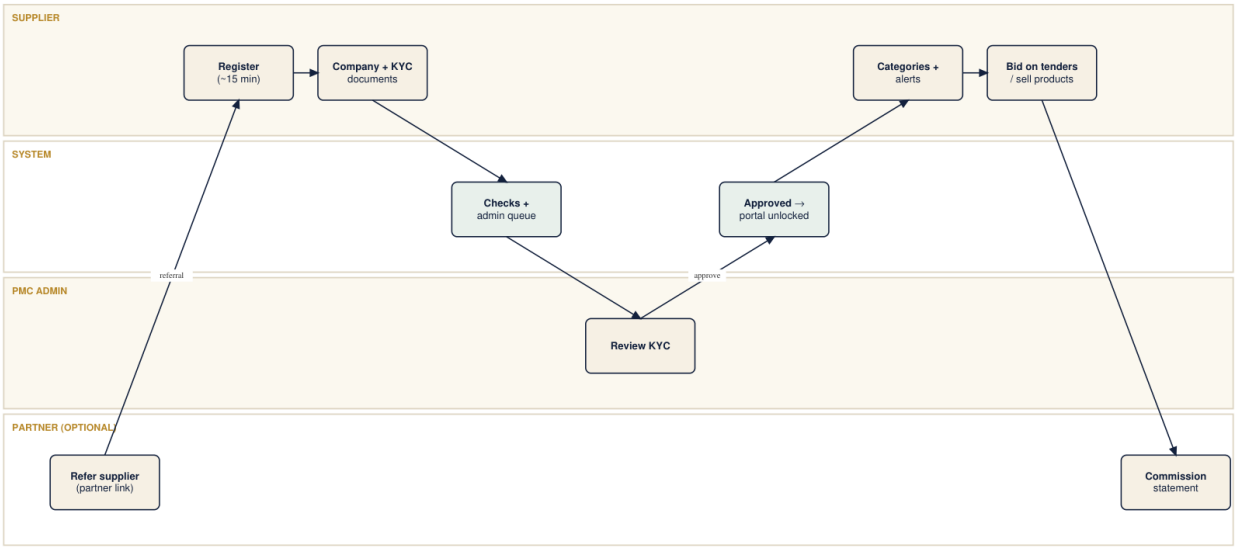

Process flow 1 — Tender lifecycle

- Lanes show who acts. Green boxes are automatic (system or AI). Bids stay sealed until the committee signs each opening.
- A bid qualifies if it meets every mandatory criterion and the minimum number of optional ones; AI only flags proofs, the committee decides.
- Price opening waits until every proof is decided; L1 runs automatically; award needs certifier, legal and accounting clearance.

Process flow 2 — Supplier onboarding

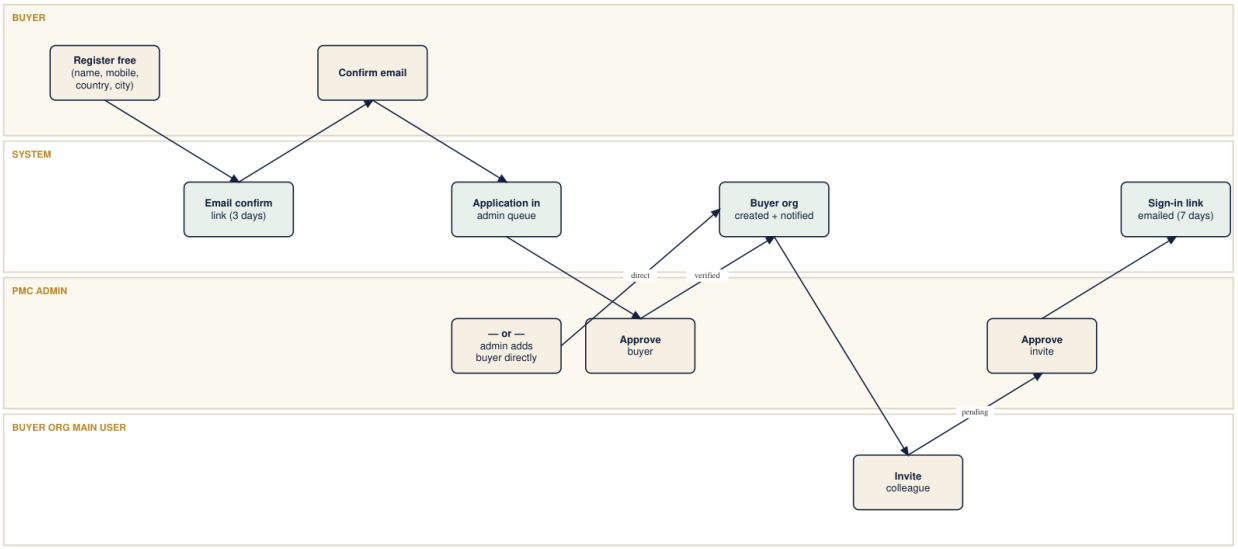

Process flow 2 — Supplier onboarding

- Suppliers register free in about 15 minutes; KYC is reviewed by PMC before bidding or selling unlocks.
- Partners earn commission on suppliers they refer.

Process flow 3 — Buyer onboarding & team

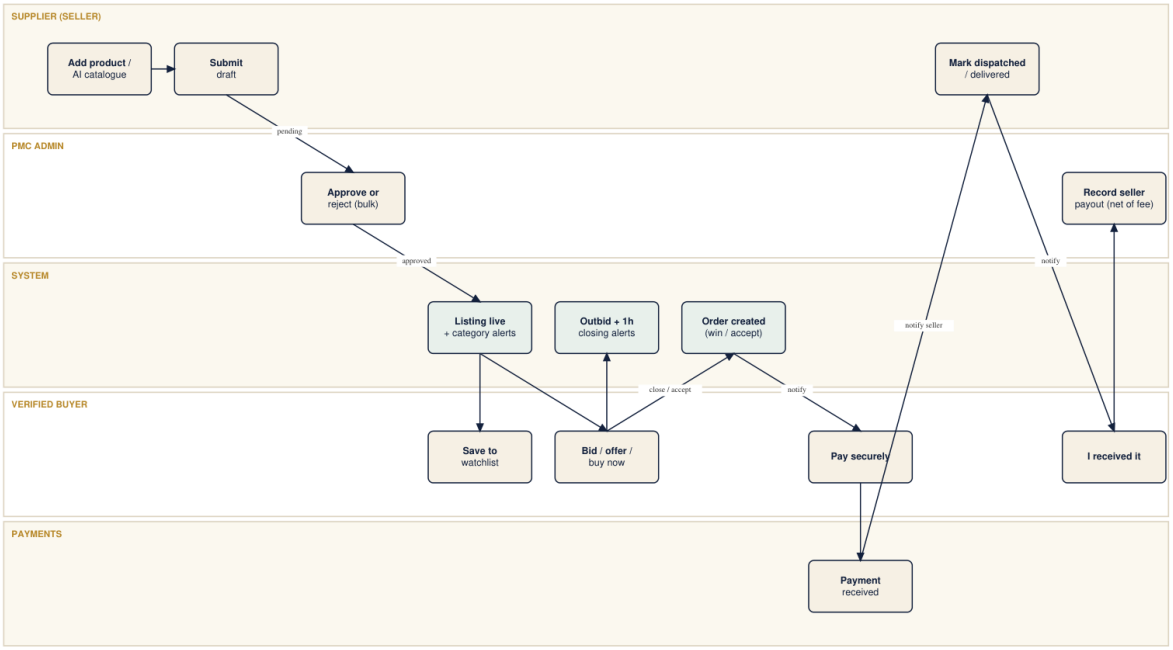

Process flow 3 — Buyer onboarding & team

- Self-registered buyers confirm their email, then PMC approves; only verified buyers can bid or buy.
- PMC can also add a buyer directly (sign-in emailed). Colleagues invited by the main buyer need PMC approval; removal is immediate.

Process flow 4 — Supplier marketplace

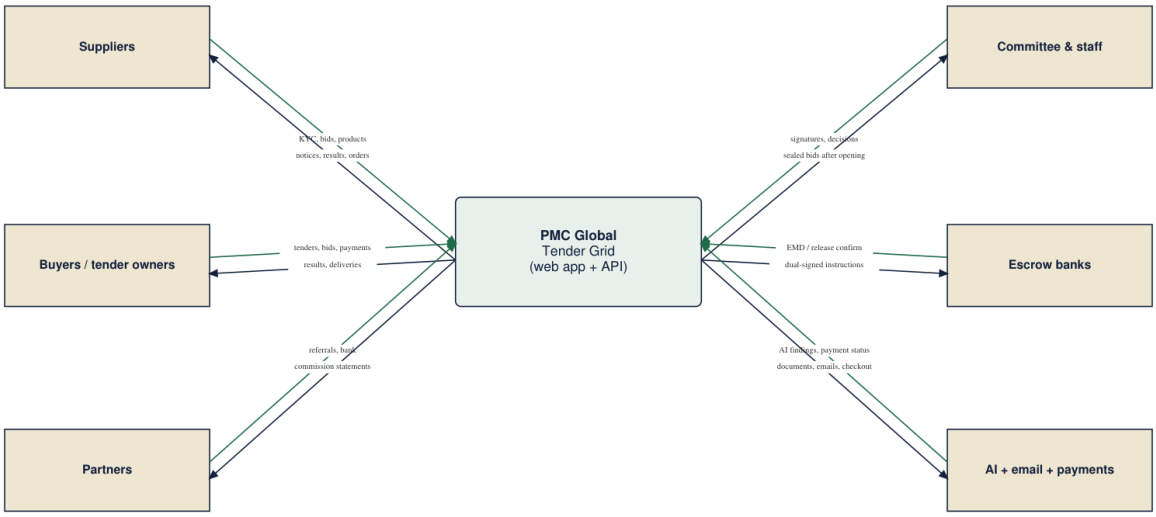

Process flow 4 — Supplier marketplace (list → approve → sell → deliver → payout)

- Every listing is approved by PMC (one by one or in bulk). Sale modes: timed auction, best offer by deadline, fixed price.
- Buyers get outbid alerts and a reminder about an hour before a watched auction closes. PMC pays the seller net of the sale fee.

Data flow — Level 0 (context)

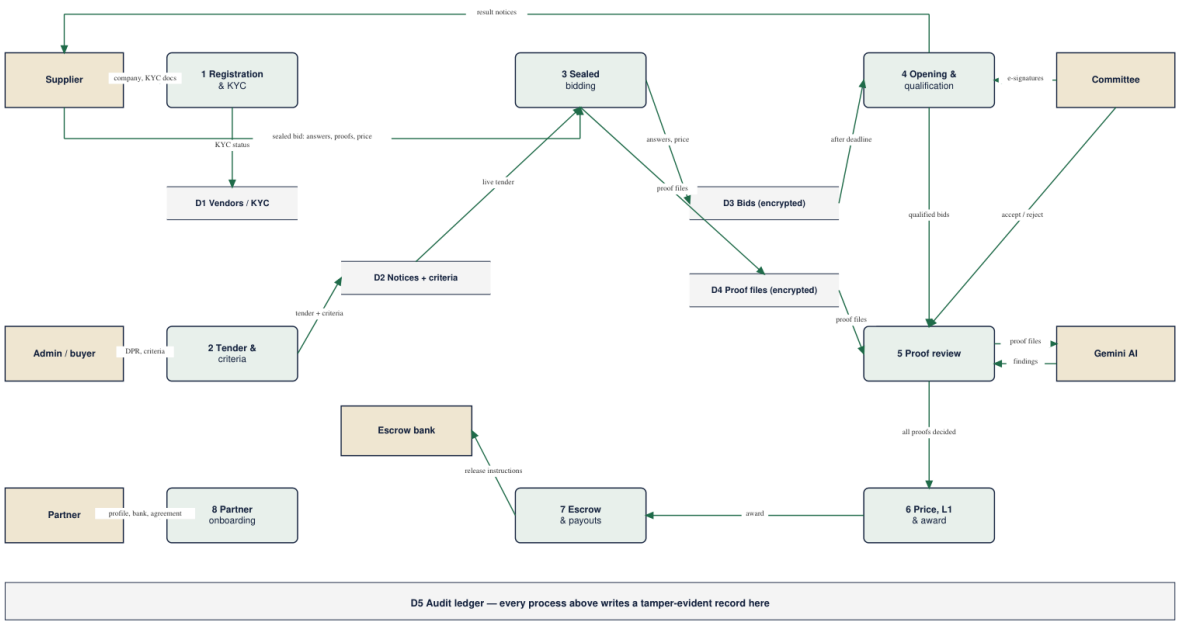

Data flow — Level 0 (context)

• One system, six groups of outside parties. Green arrows: data in; navy arrows: data out.

Data flow — Level 1: tendering

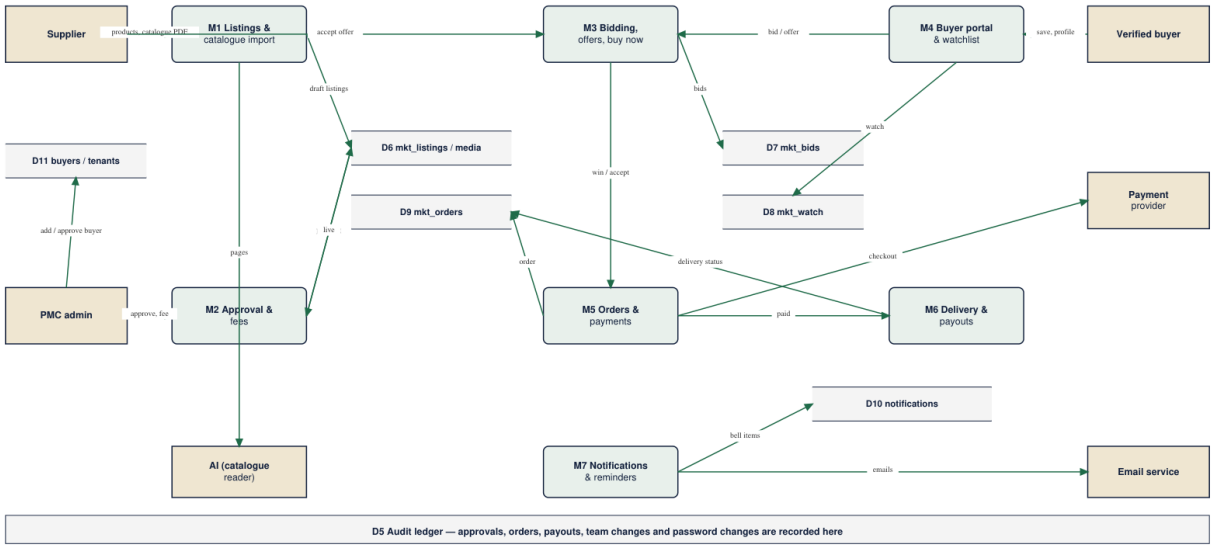

Data flow — Level 1: tendering

- External entities (beige), processes (green), data stores (grey).
- Proof files go to the AI only after the technical opening, for qualified bids only.

Data flow — Level 1: marketplace & buyer portal

Data flow — Level 1: marketplace & buyer portal

- Catalogue pages go to the AI only to propose product drafts; the supplier chooses what to keep.
- Card details are handled by the payment provider; PMC stores only the order and payment status.

27 · Glossary

Term	Meaning
DPR	Detailed project report used to draft a tender
EMD	Earnest money deposit held in escrow with a bid
L1	Lowest compliant price among qualified bids
Mandatory criterion	Must be met by every bidder
Optional criterion	Counts toward the minimum number the tender sets
Proof review	AI finding + unanimous committee decision on each proof
Corrigendum	Formal change to a live tender sent to every bidder
Consortium	Registered suppliers bidding together
Sealed bid	Encrypted until the committee signs the opening
