# 1 · Platform overview & architecture

PMC Managers is a global e-procurement platform: buyers publish tenders, verified suppliers bid with sealed envelopes, an evaluation committee opens, checks and awards, and payments move through escrow — every step recorded in a tamper-evident audit ledger.

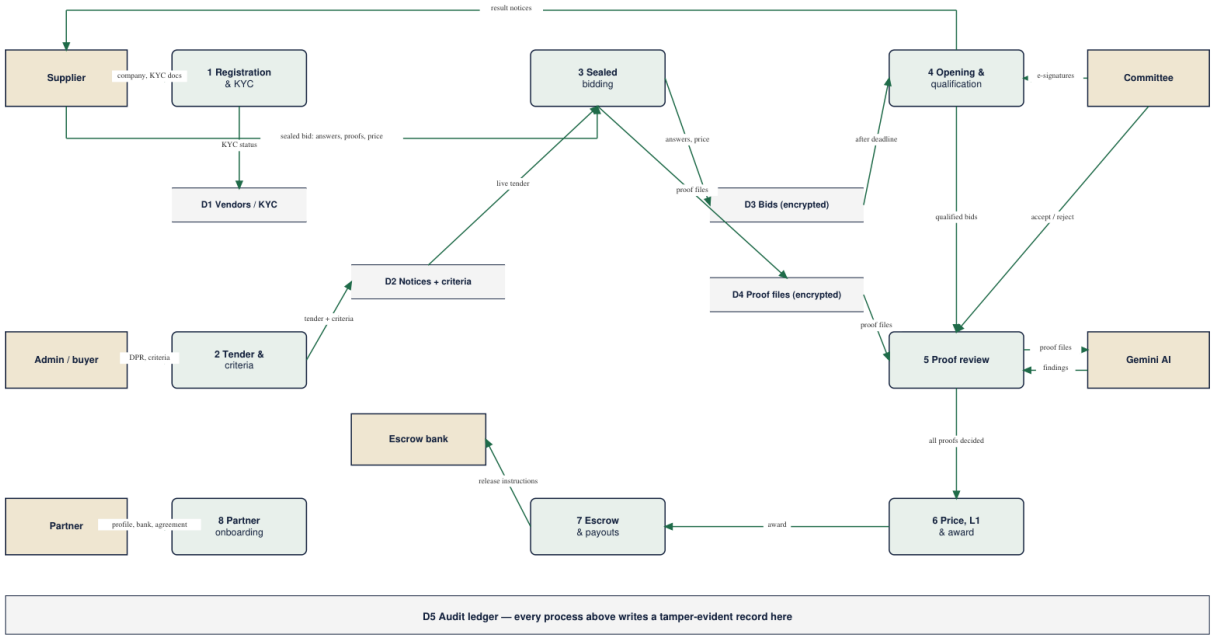

## Portals

| Portal | Address | Who |
|---|---|---|
| Public website | / , /tenders, /notices | Anyone |
| Supplier portal | /vendor | Registered suppliers |
| Admin console | /admin/e | PMC admins and reviewers |
| Staff portal | /staff | Committee, escrow, legal, accounting, certifier |
| Partner portal | /partner/me | Partners who onboard suppliers |
| Escrow portal | /login?role=escrow | Escrow institutions |

## Architecture

React single-page app (served from S3 + CloudFront) → FastAPI backend (Docker on AWS Elastic Beanstalk, all routes under /api) → MongoDB. Bid answers, prices and uploaded bid files are encrypted at rest and only decrypted after the committee signs each opening. AI features (DPR tender drafting, criteria reading, proof reading) use Gemini through the platform's AI key. Email goes through the managed email service. Scheduled jobs (reminders, statements, digests) run from the platform scheduler.

**PMC platform — data flow (level 1)**

- External entities (beige), processes (green), data stores (grey). Arrows show what data moves.
- Proof files are sent to the AI only after the technical opening, for qualified bids only.
- Emails (result notices, reminders) are sent by the email service from processes 4 and 8.

# 2 · Roles at a glance

| Role | Main jobs | Where |
|---|---|---|
| Supplier | Register, KYC, bid with criteria proofs, consortium, results, payouts | Supplier portal |
| Admin | Tenders, criteria, publishing, suppliers, partners, settings | Admin console |
| Reviewer | Approves supplier-prepared tenders; edits criteria master | Admin console |
| Committee member | Signs openings, reviews proofs (all must agree), doubts, scores, awards | Bidding ops / Staff portal |
| Certifier / Legal / Accounting | Sequential bid clearances before award | Staff portal |
| Escrow agent | EMD, dual-signed releases, payouts | Staff portal / Escrow |
| Partner | Onboards suppliers, earns commission | Partner portal |
| Auditor | Reads the audit ledger and reports | Admin console |

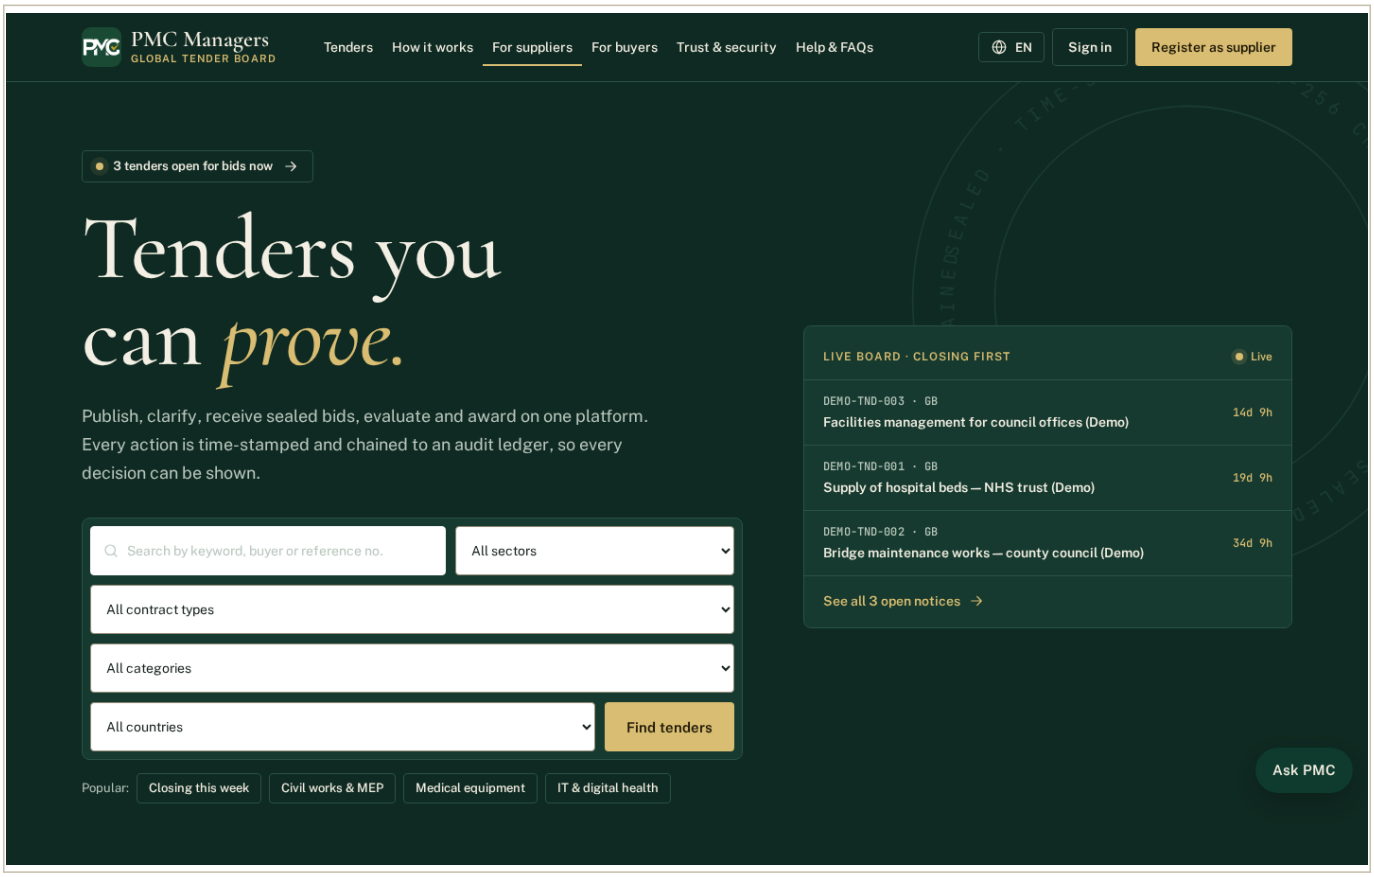

# 3 · Security, audit & data protection

1. Sign-in by role with email + password (session cookie + CSRF token on every change).
2. Role-based access: the admin console only admits admin and reviewer; other staff use the staff portal.
3. Sealed bidding: answers, price and bid files are encrypted; nobody (including admins) can open them before the committee signs.
4. Audit ledger: every action is chained with SHA-256; 'Verify chain' re-checks every link.
5. Soft deletion: records are archived, not erased, unless a narrowly scoped deletion is explicitly requested.
6. AI sees proof files only after technical opening and only for qualified bids; AI only flags — people decide.

# 4 · Public website — screen tour

## Home page

Screen: /

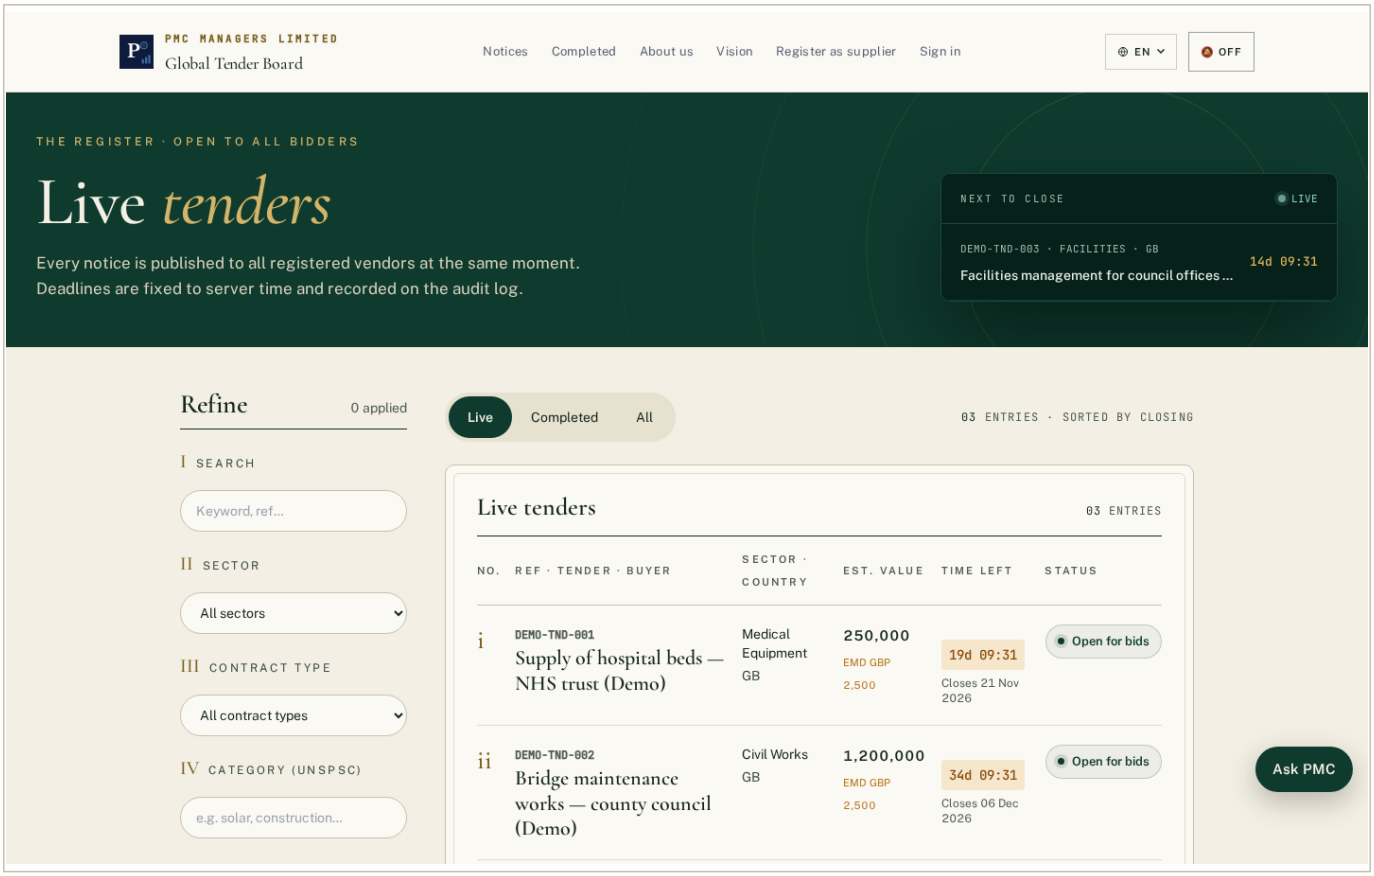

The public front door of PMC Managers. Visitors see what the platform does, the latest live tenders and the main ways in: Find tenders, Register as a supplier and Sign in.

**Main actions**

- Browse live tenders
- Register as a supplier
- Sign in to your portal

# Public tender board

Screen: `/tenders`

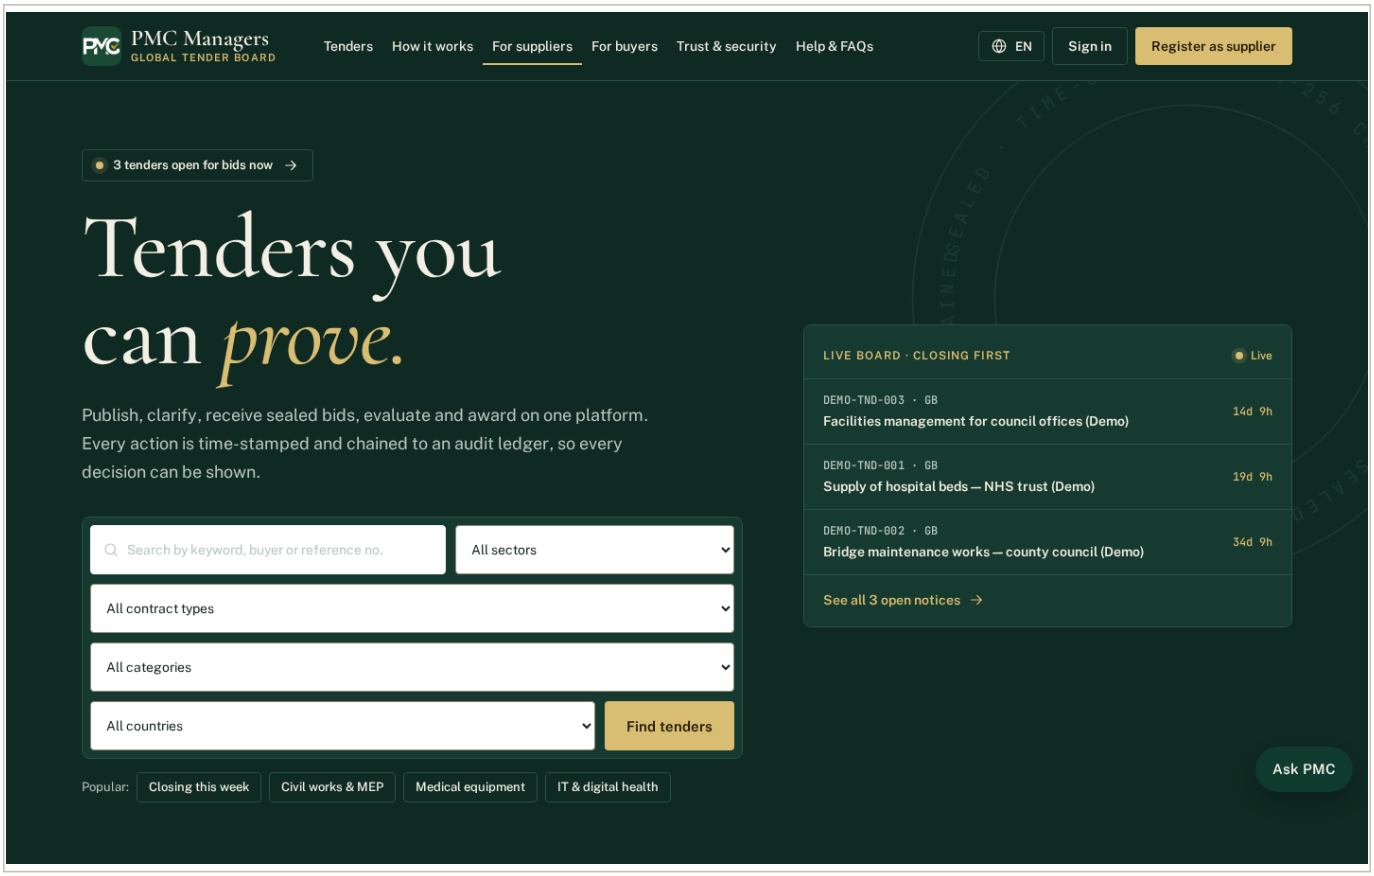

Every published tender with its reference, buyer, category, country and closing date. Anyone can search and filter; bidding needs a verified supplier account.

**Main actions**

- Search by keyword or reference
- Filter by category, country and closing date
- Open a tender to read the documents

## Notice board

Screen: `/notices`

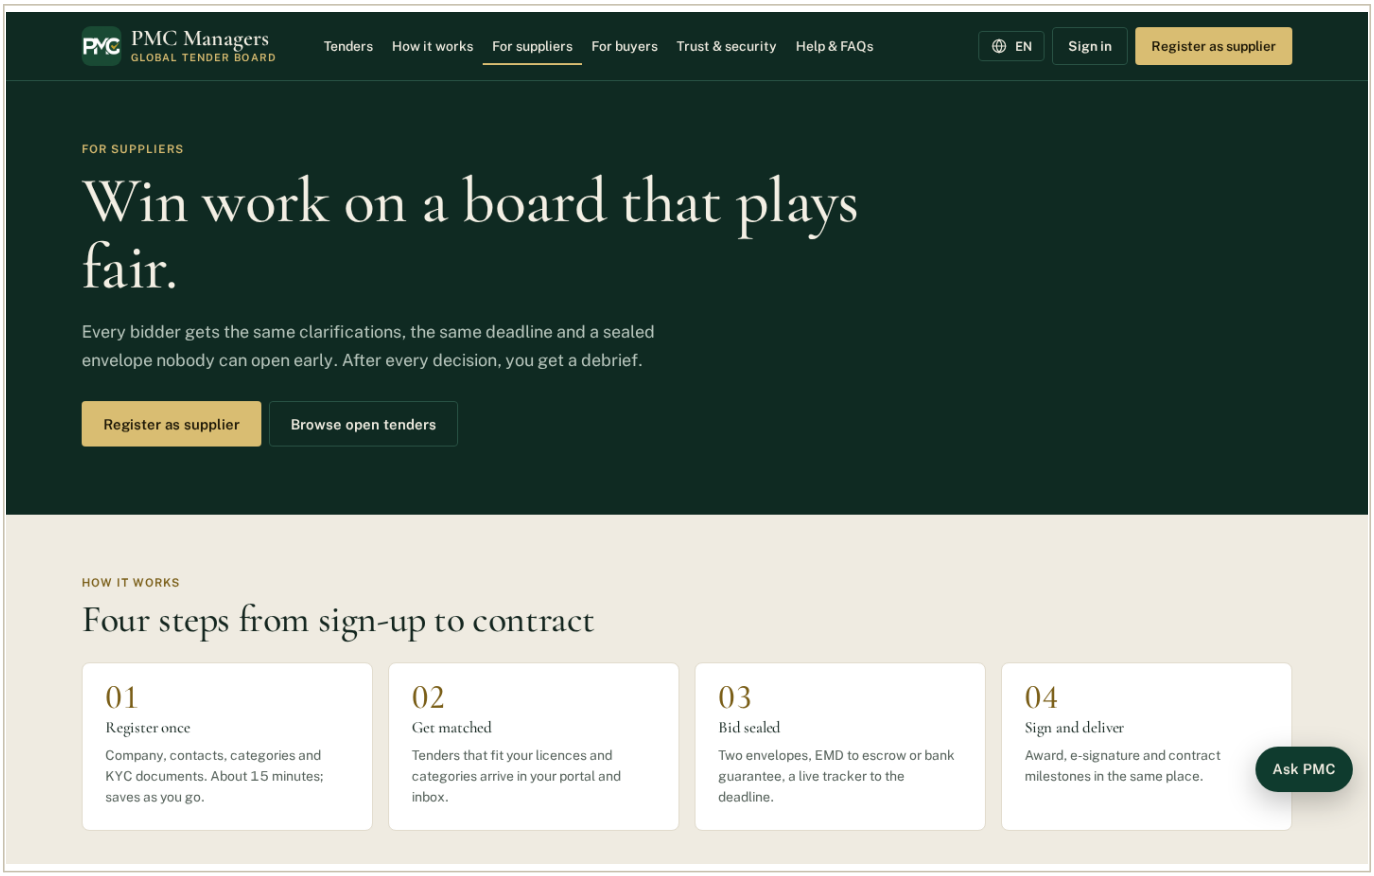

Published notices and corrigenda in date order, so suppliers can see changes to live tenders.

**Main actions**

- Read a notice
- See corrigenda issued against a tender

## For suppliers

Screen: `/suppliers`

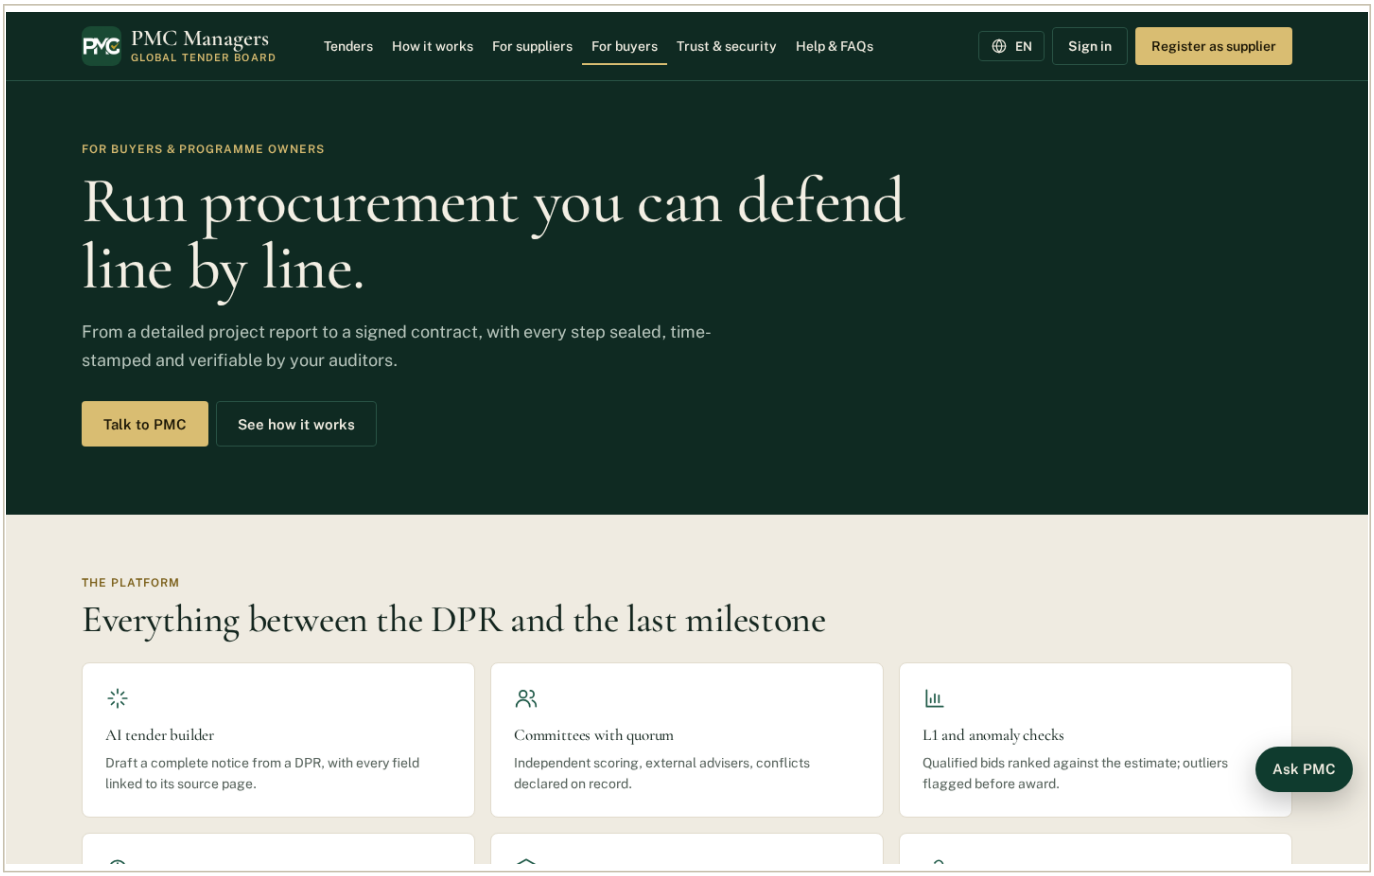

Explains how suppliers register, get verified, find tenders, bid with sealed envelopes and get paid through escrow.

**Main actions**

- Start supplier registration

## For buyers

Screen: `/buyers`

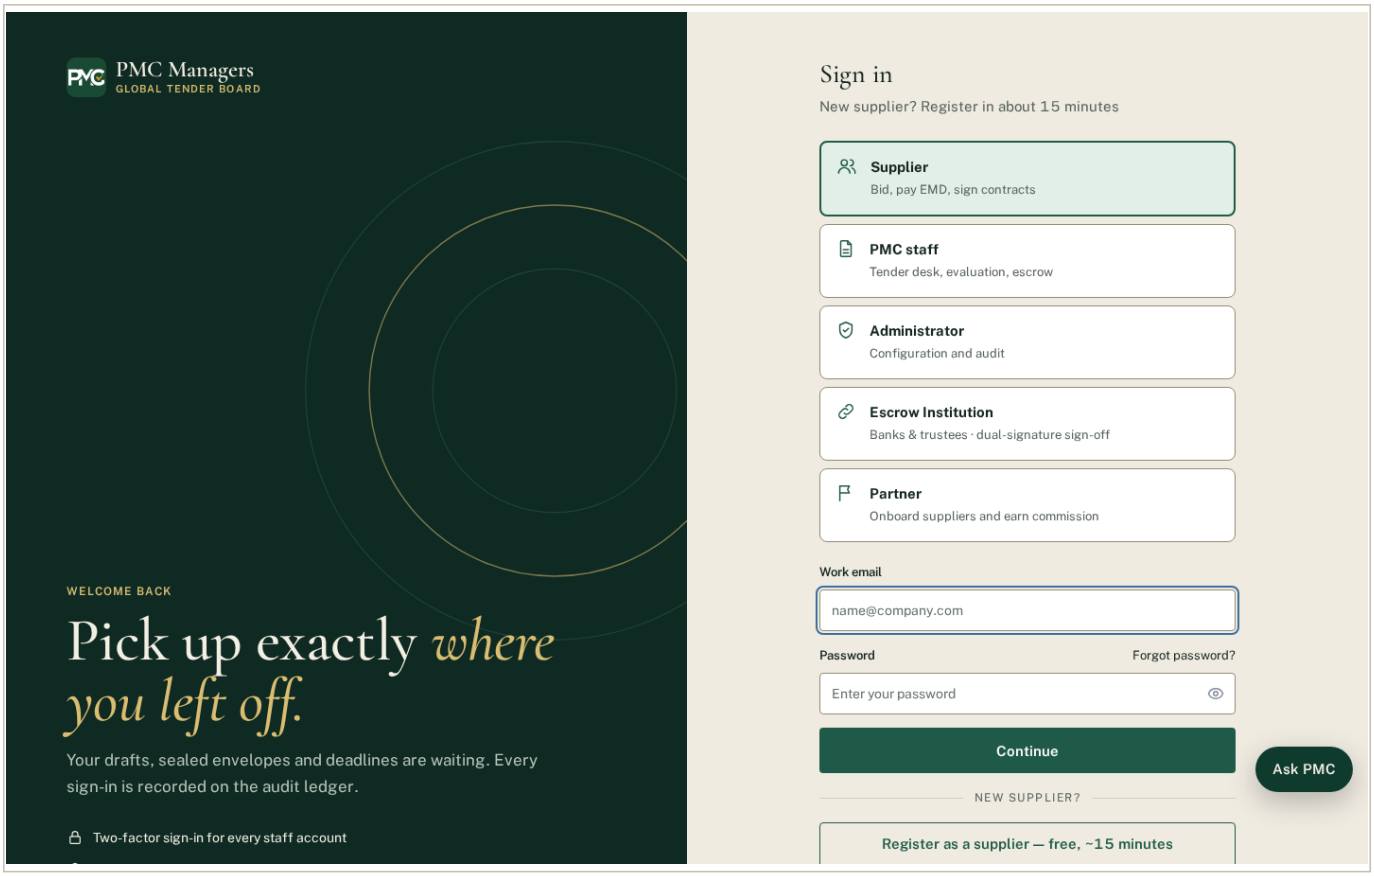

Explains how buyers publish tenders, set criteria, run sealed openings and award with a full audit trail.

**Main actions**

- Contact PMC to start buying

## Sign in

Screen: `/login`

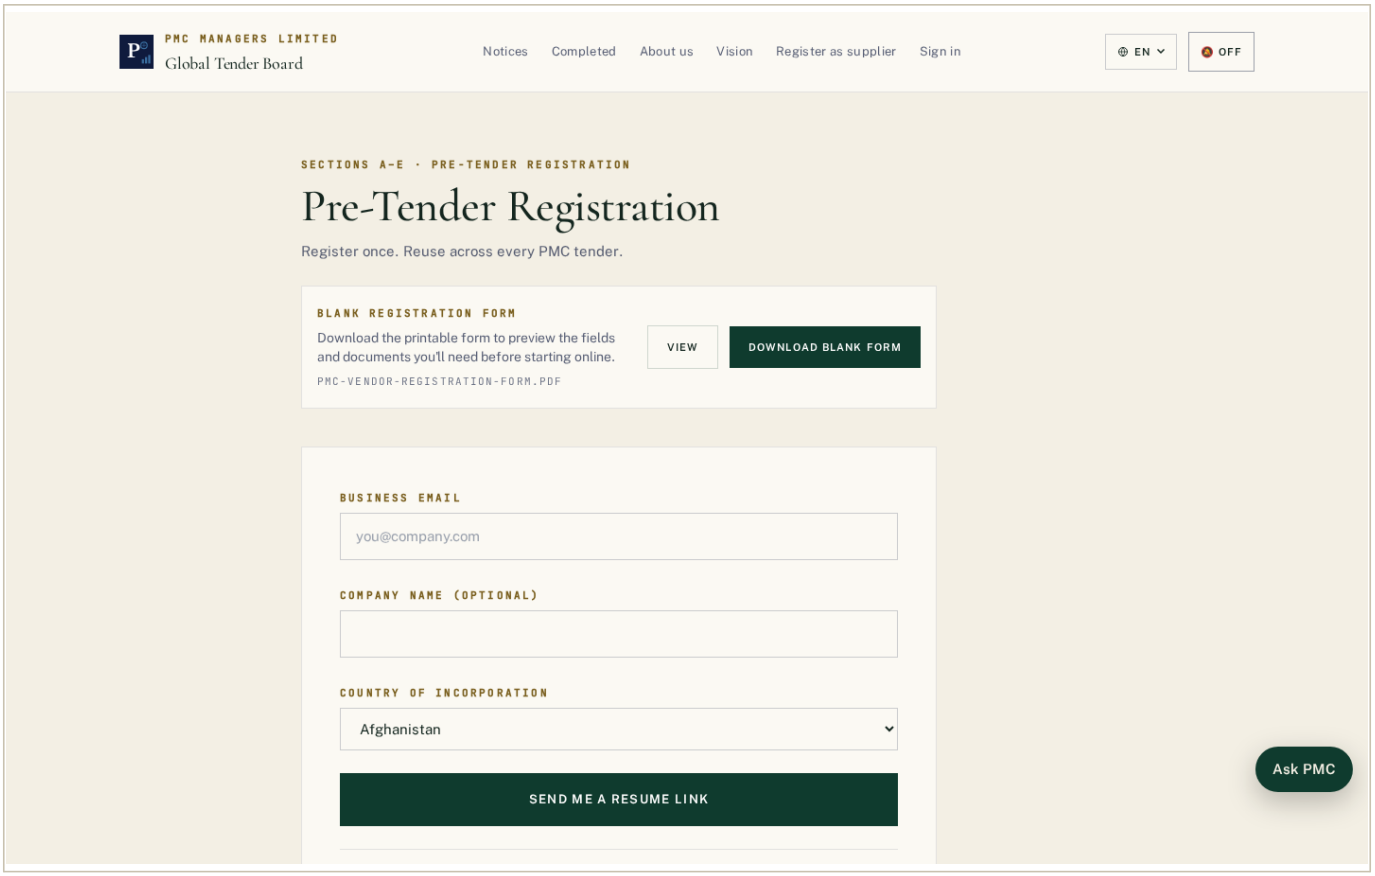

One sign-in page for every user. Choose your role first: Supplier, PMC staff, Admin, Escrow institution or Partner. Each role opens its own portal.

**Main actions**

- Choose your role
- Enter email and password
- Use Forgot password if needed

## Supplier registration

Screen: `/register`

New suppliers create an account with company details. After email verification they complete KYC; PMC checks it before the supplier can bid.

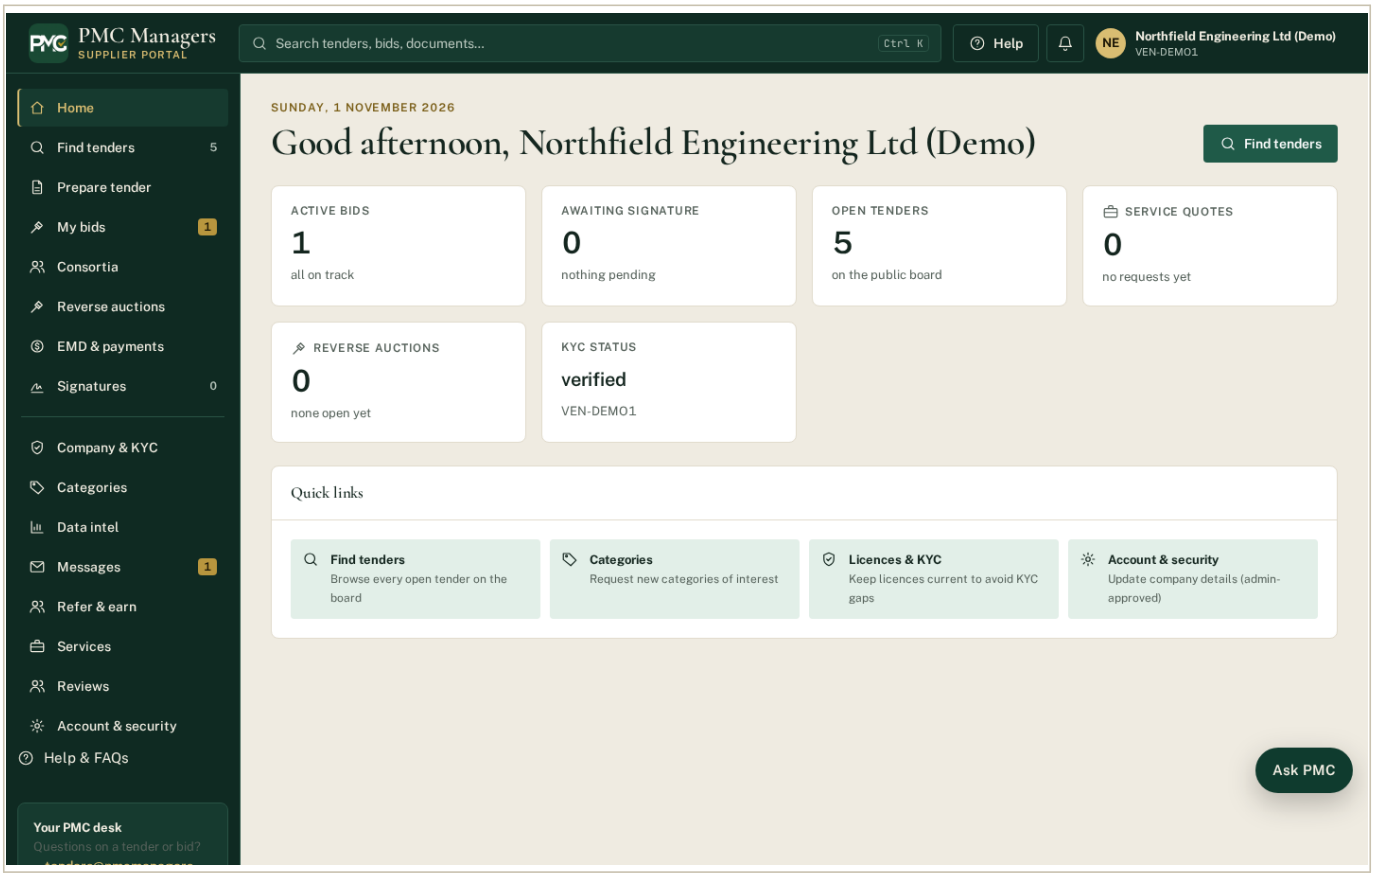

**Main actions**

- Enter company and contact details
- Verify email
- Complete KYC in the supplier portal

# 5 · Supplier portal — screen tour

## Supplier dashboard

Screen: `/vendor`

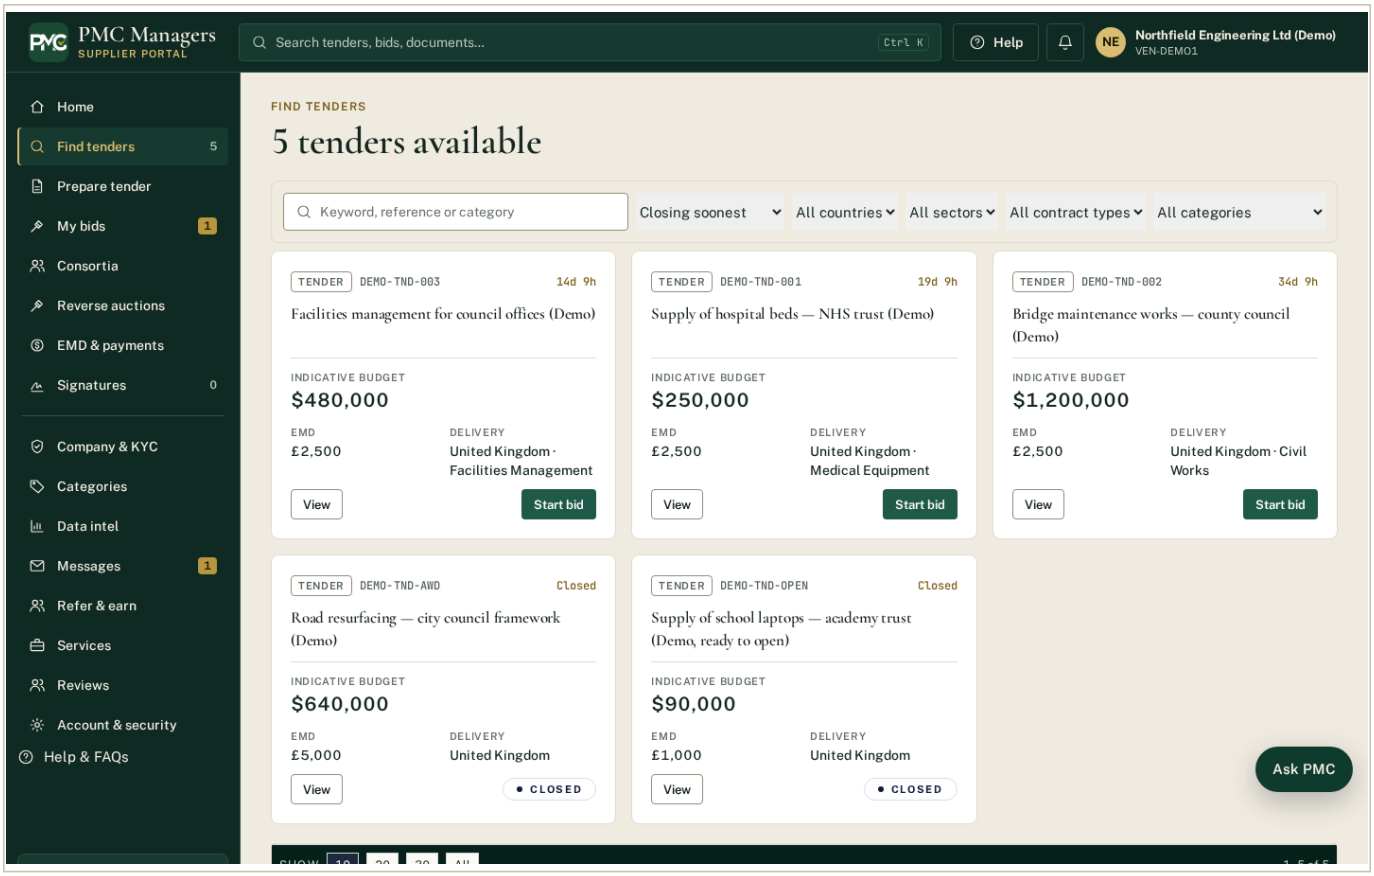

The supplier's home: matching tenders, open bids, notices and messages.

**Main actions**

- Find tenders
- Continue a bid

# Tenders for you

Screen: `/vendor/tenders`

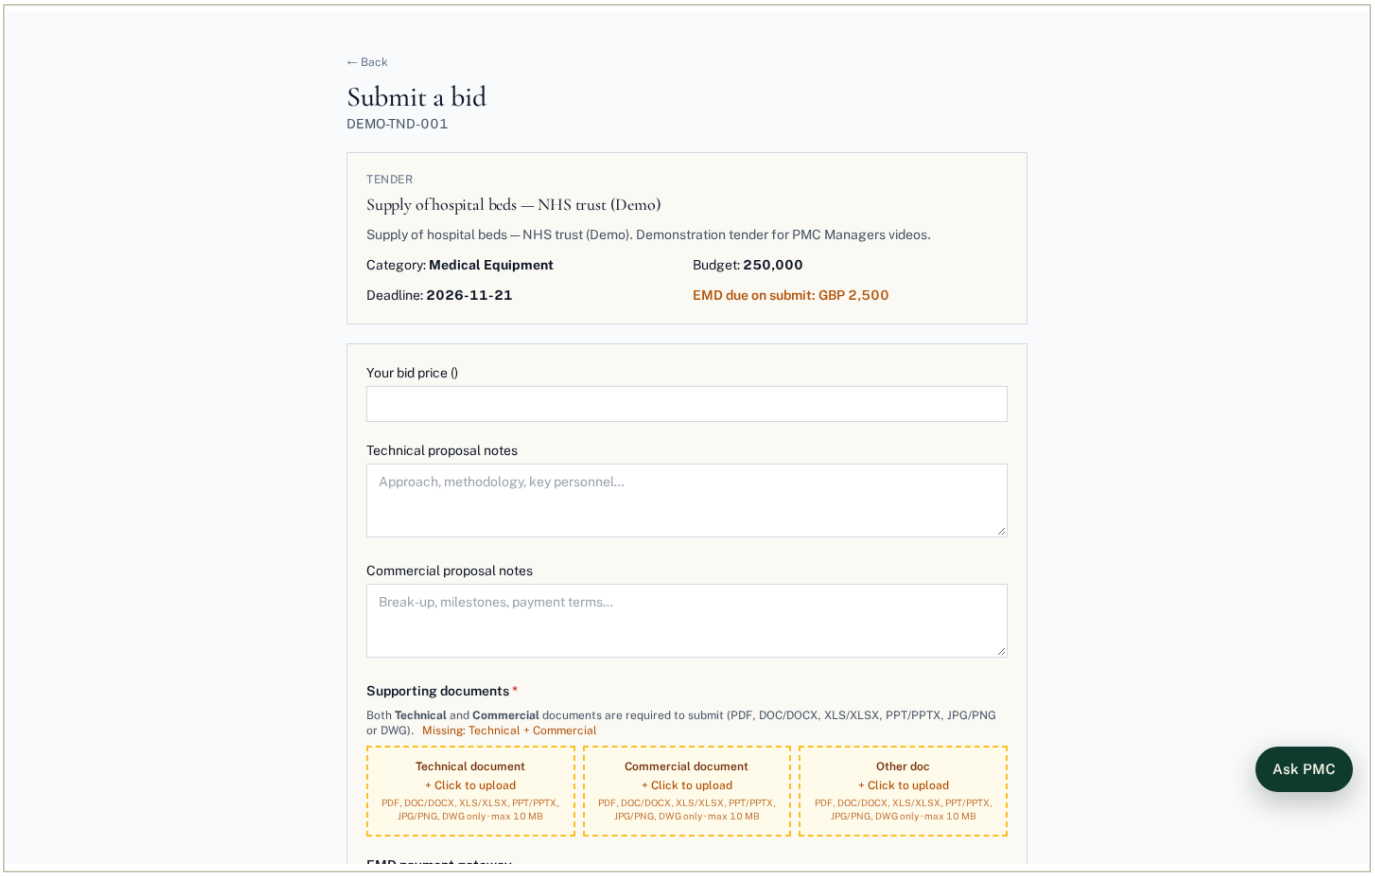

Tenders matching the supplier's categories, with closing dates.

**Main actions**

- Open a tender
- Start a bid

# Prepare a bid

Screen: `/vendor/bid/new/DEMO-TND-001`

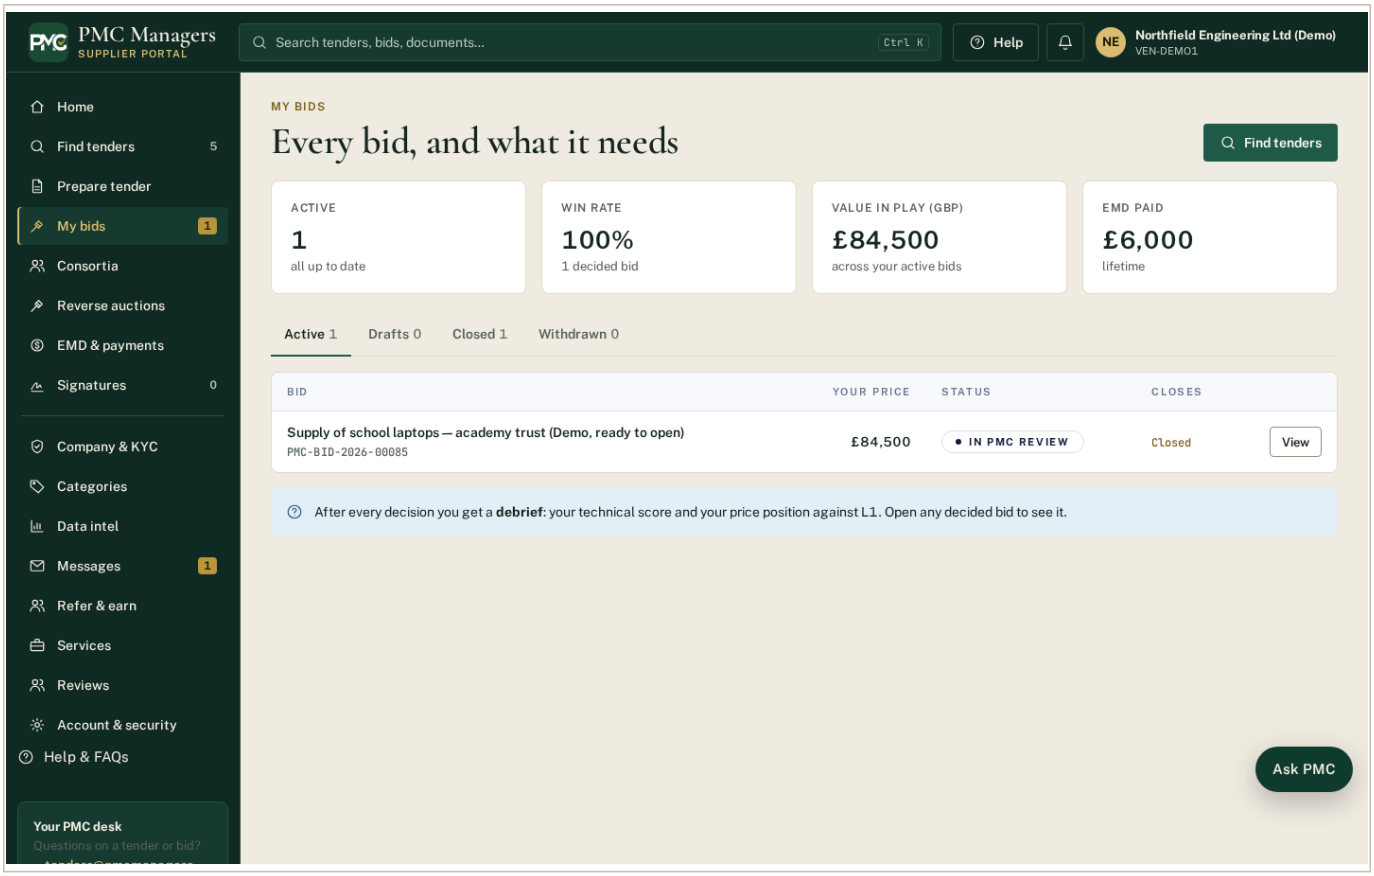

The bid form: technical documents, the Criteria section (each item marked Mandatory or Optional, with the rule for optional criteria), proofs, price and EMD. Everything is sealed when submitted.

**Main actions**

- Answer every mandatory criterion and attach proofs
- Enter price
- Submit (sealed)

# My bids

Screen: `/vendor/mybids`

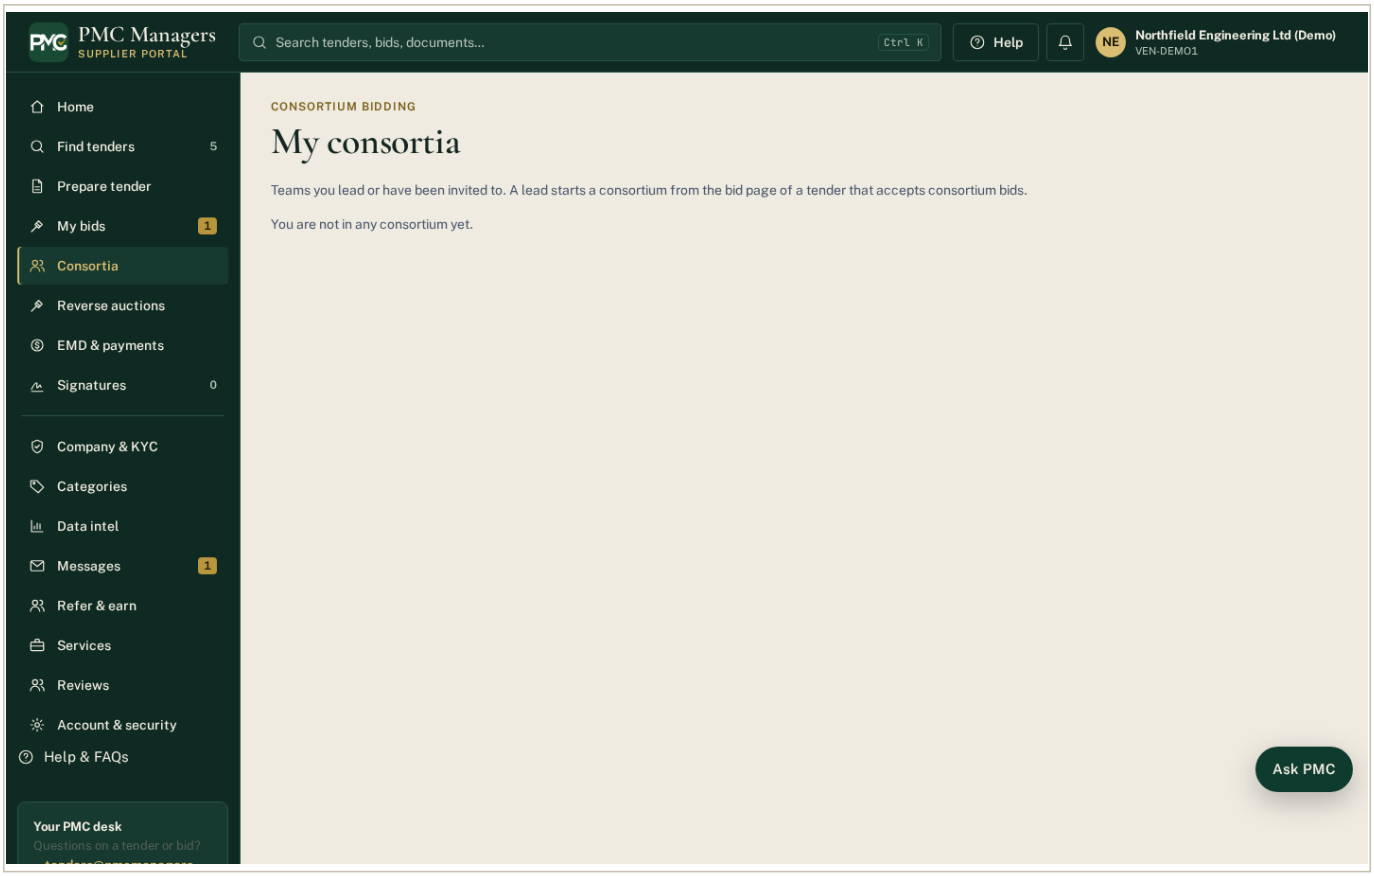

All of the supplier's bids with status, criteria result notices and award documents.

**Main actions**

- Open a bid workspace
- Read your result notice

# Consortia

Screen: `/vendor/consortia`

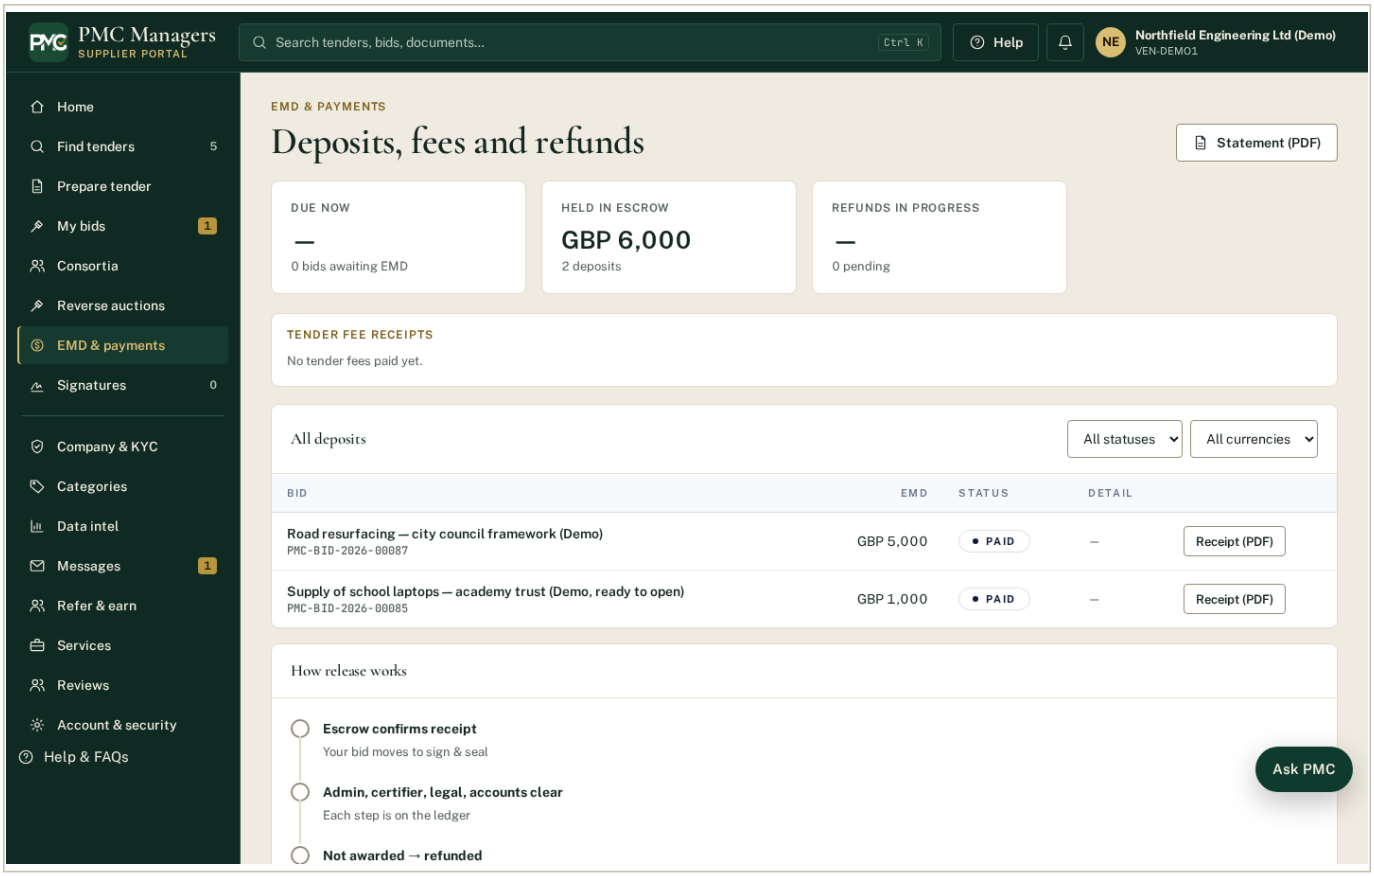

Consortium invitations, teams, shares, agreement signatures and member payouts.

**Main actions**

- Accept / decline an invitation
- Sign the agreement
- See your payout and bank reference

# EMD & payments

Screen: `/vendor/emd`

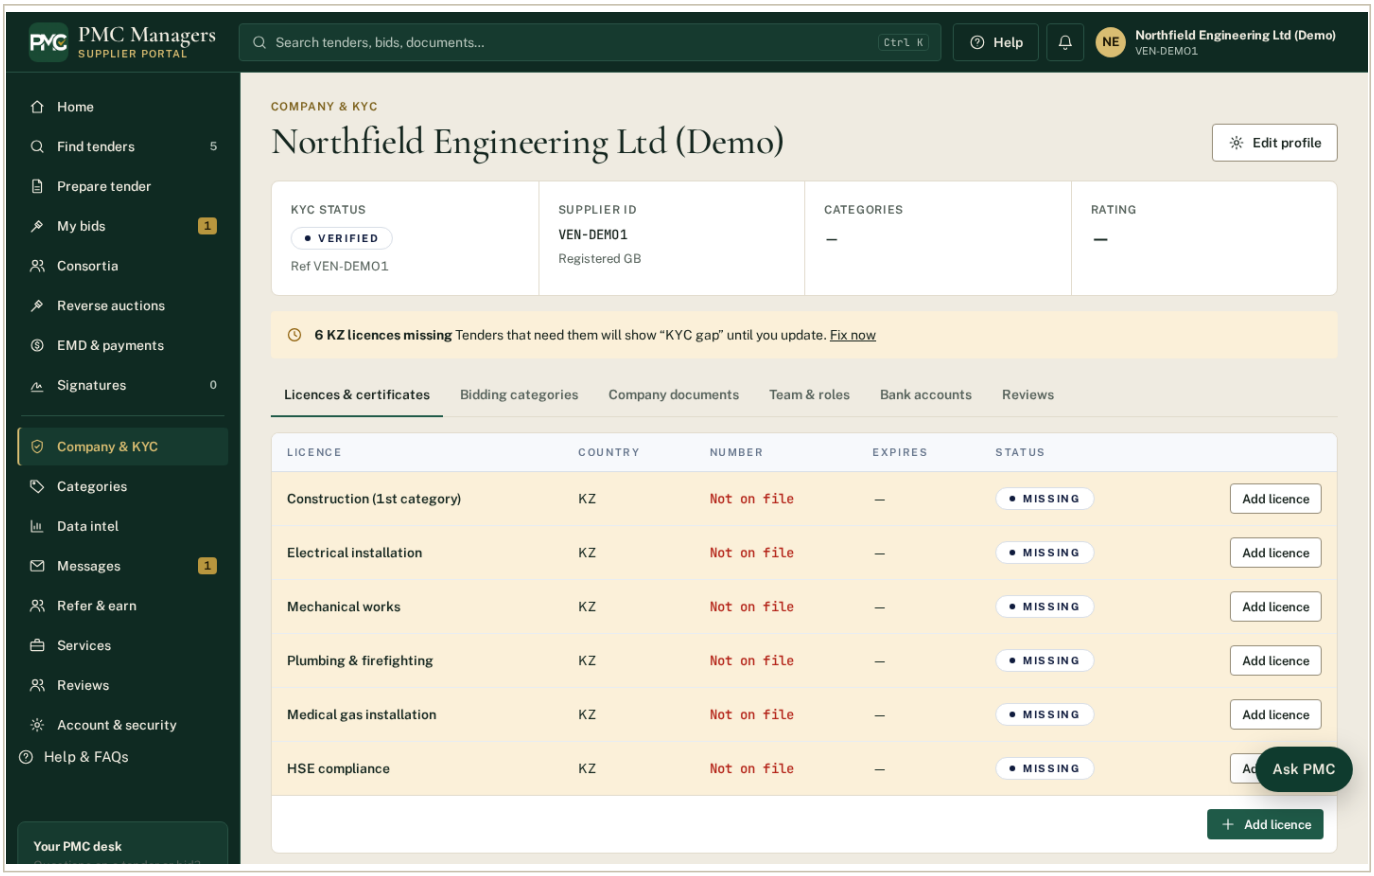

Bid deposits paid into escrow and refunds.

**Main actions**

- Pay EMD
- Track refunds

# Company profile & KYC

Screen: `/vendor/company`

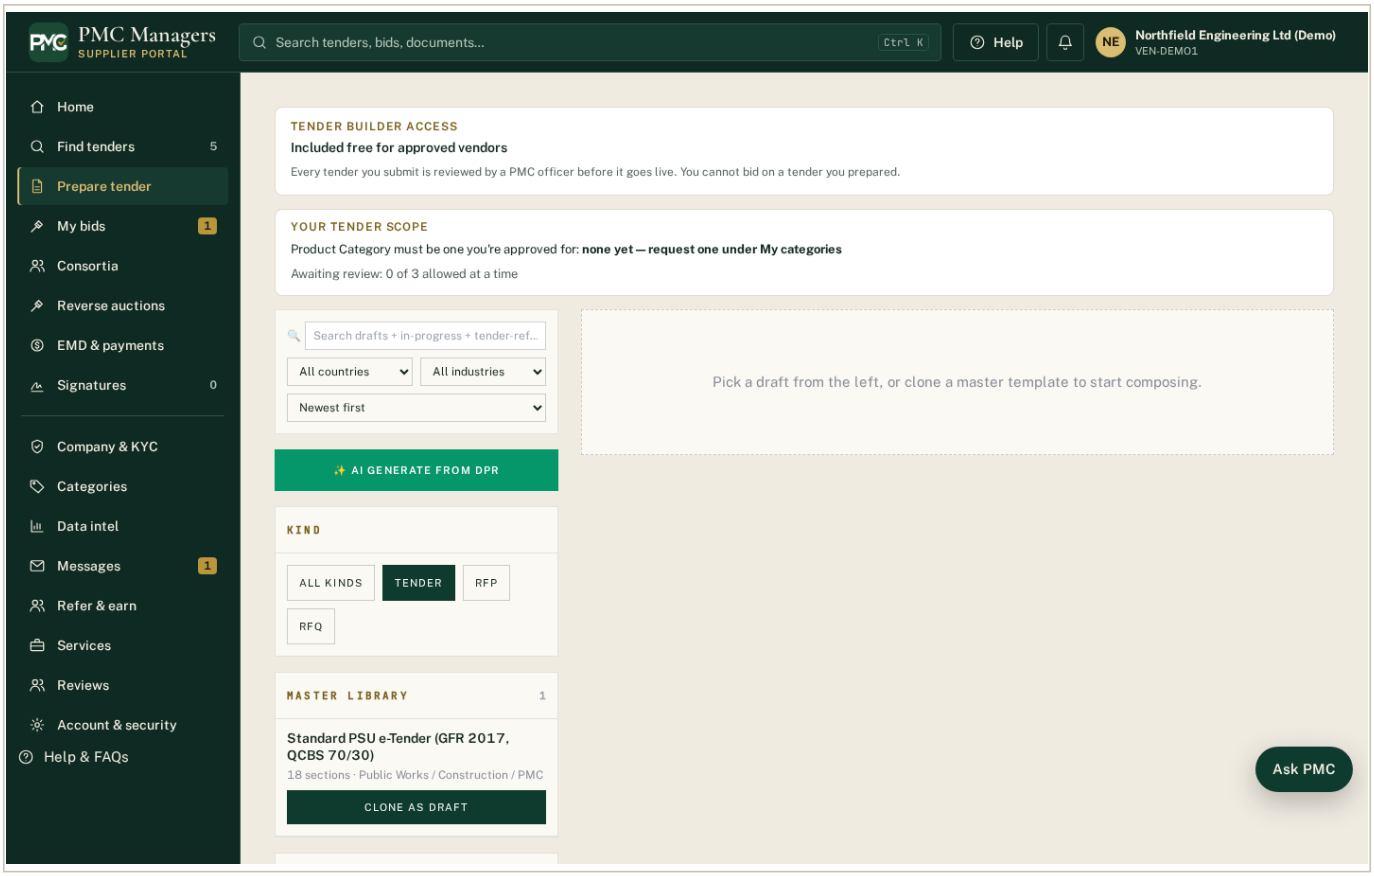

Company details, documents and KYC. Some figures here (like turnover) pre-fill criteria answers.

**Main actions**

- Update details (changes are reviewed)
- Upload KYC documents

# Prepare tender (supplier)

Screen: `/vendor/tender-builder`

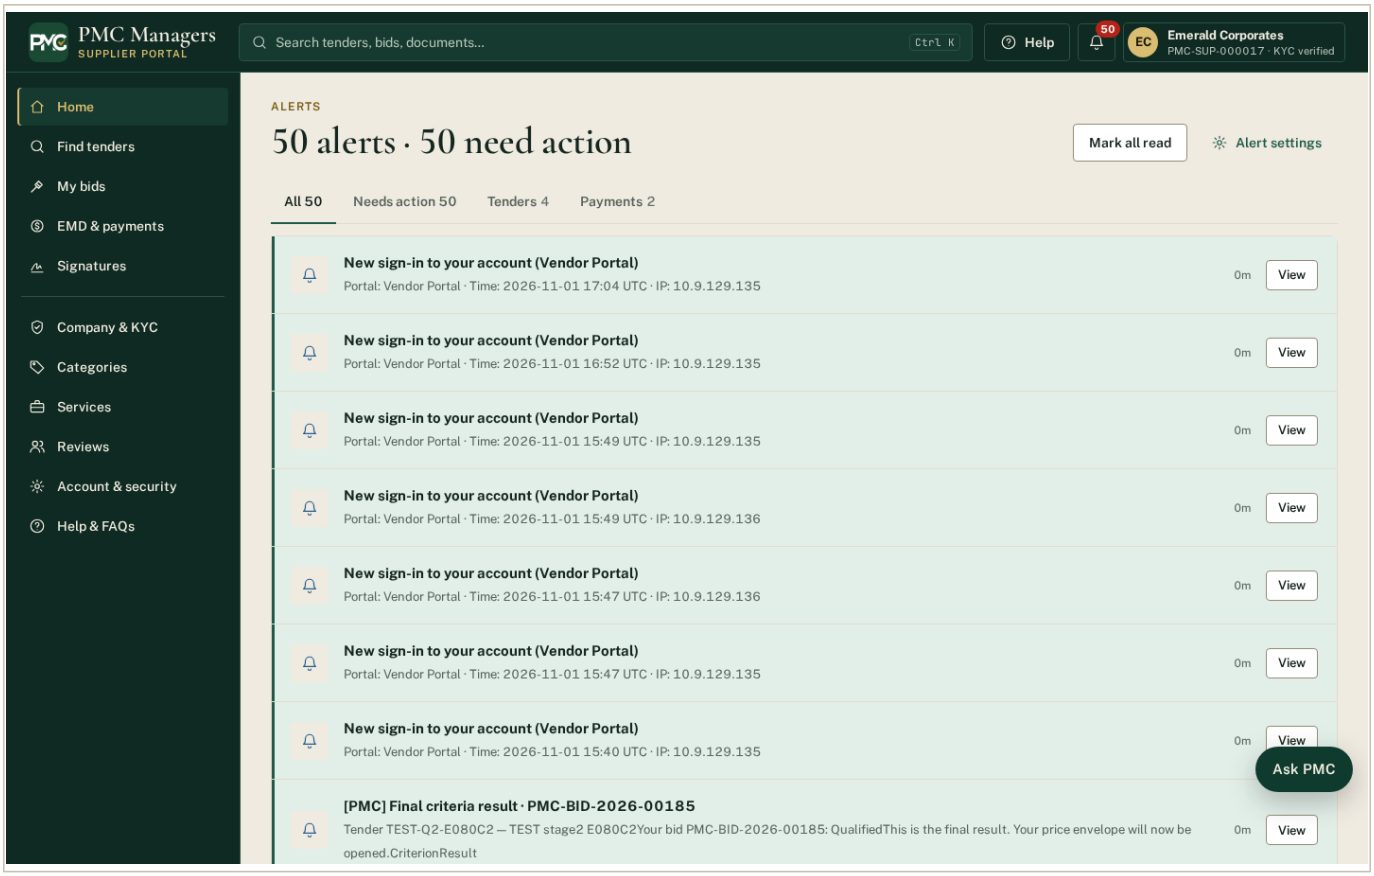

Verified suppliers can prepare tenders for buyers; they go to PMC review before publishing.

**Main actions**

- Build a tender
- Set criteria
- Submit for review

# Alerts

Screen: `/vendor/alerts`

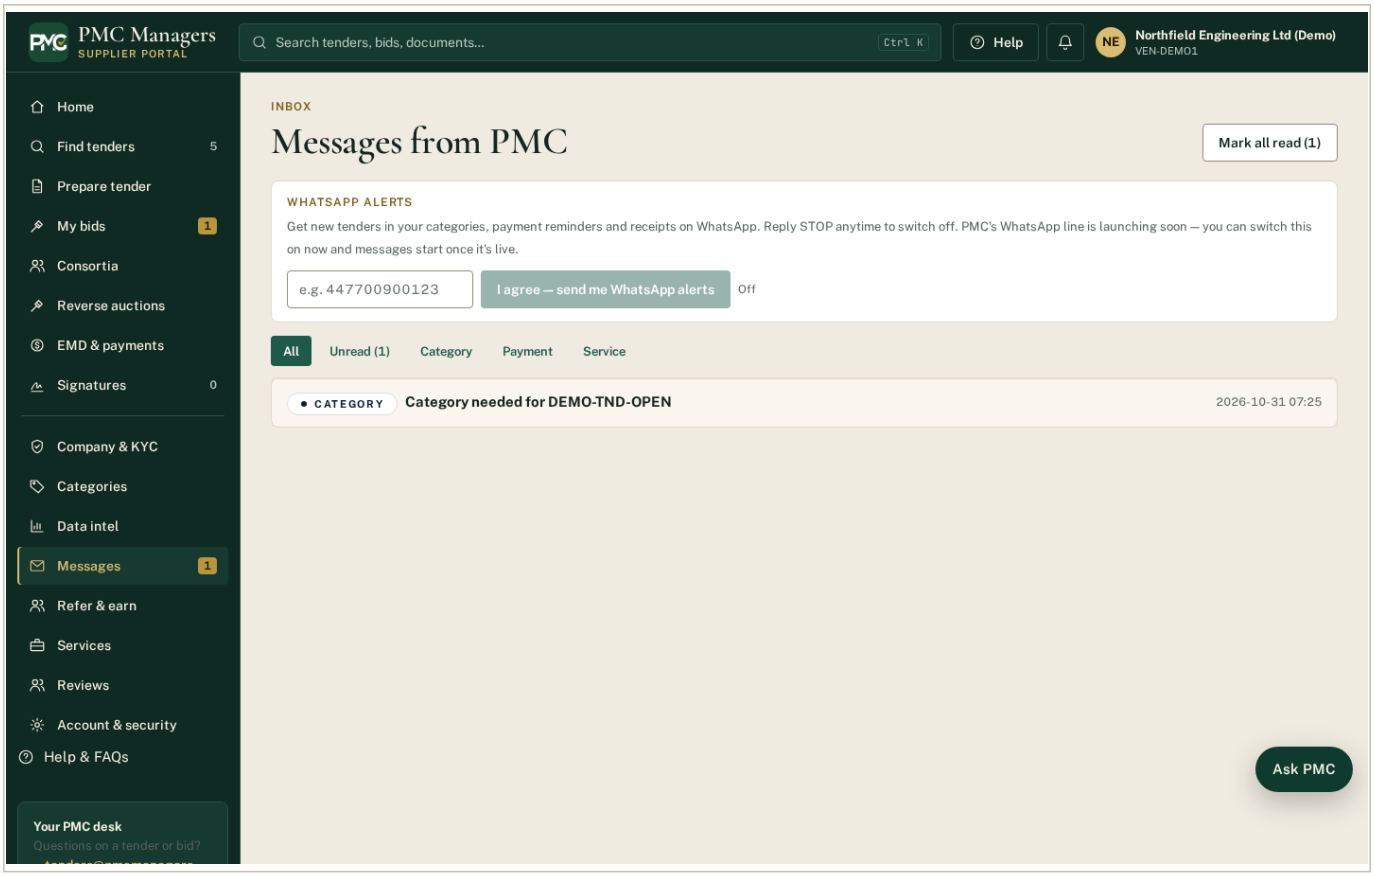

Tender alerts and notifications for the supplier's categories.

**Main actions**

- Mark as read
- Open the tender

# Messages

Screen: `/vendor/messages`

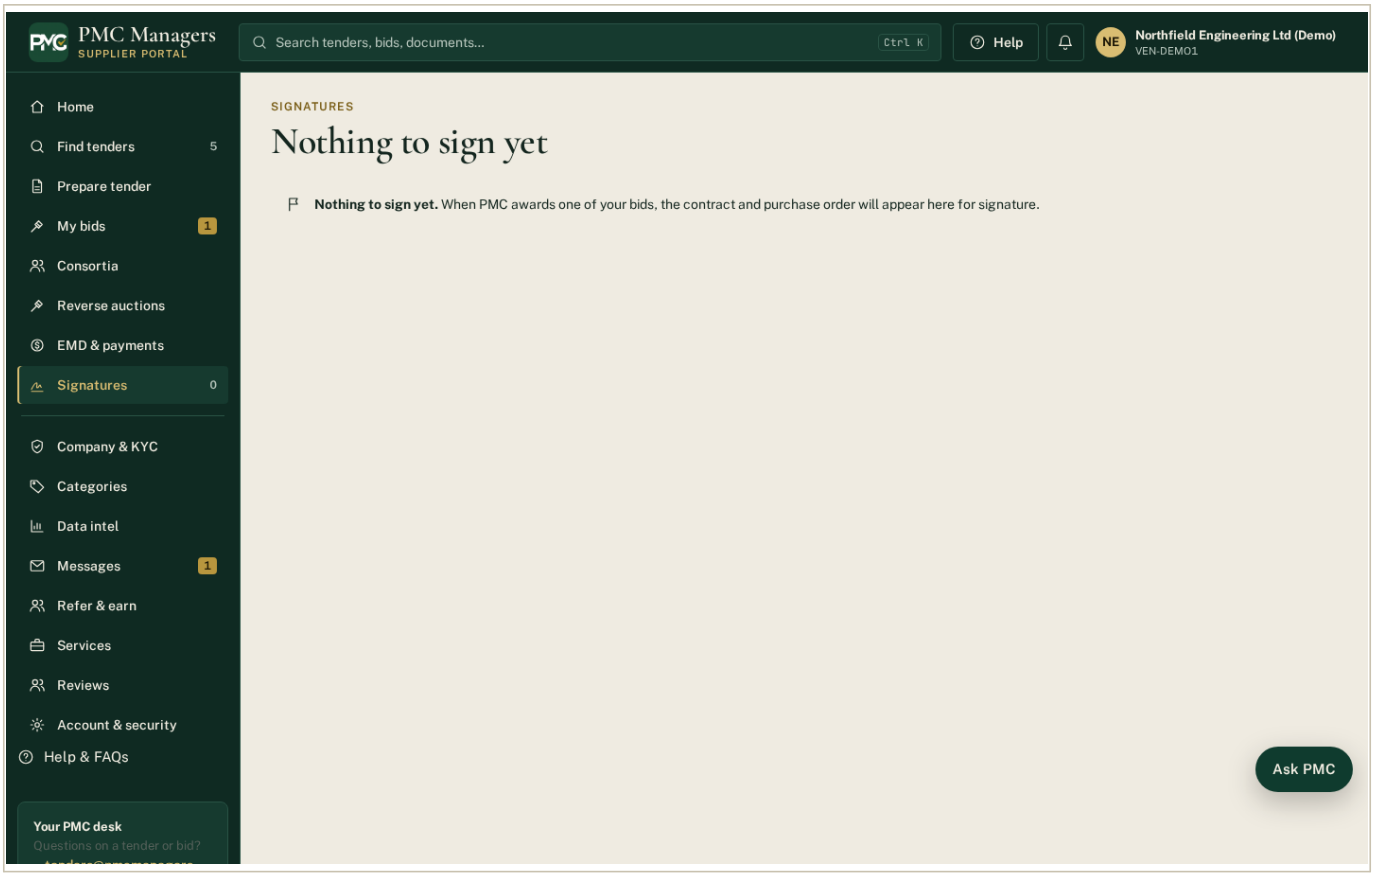

Messages with PMC and buyers, including clarifications.

**Main actions**

- Reply to a message

# Signatures

Screen: `/vendor/signatures`

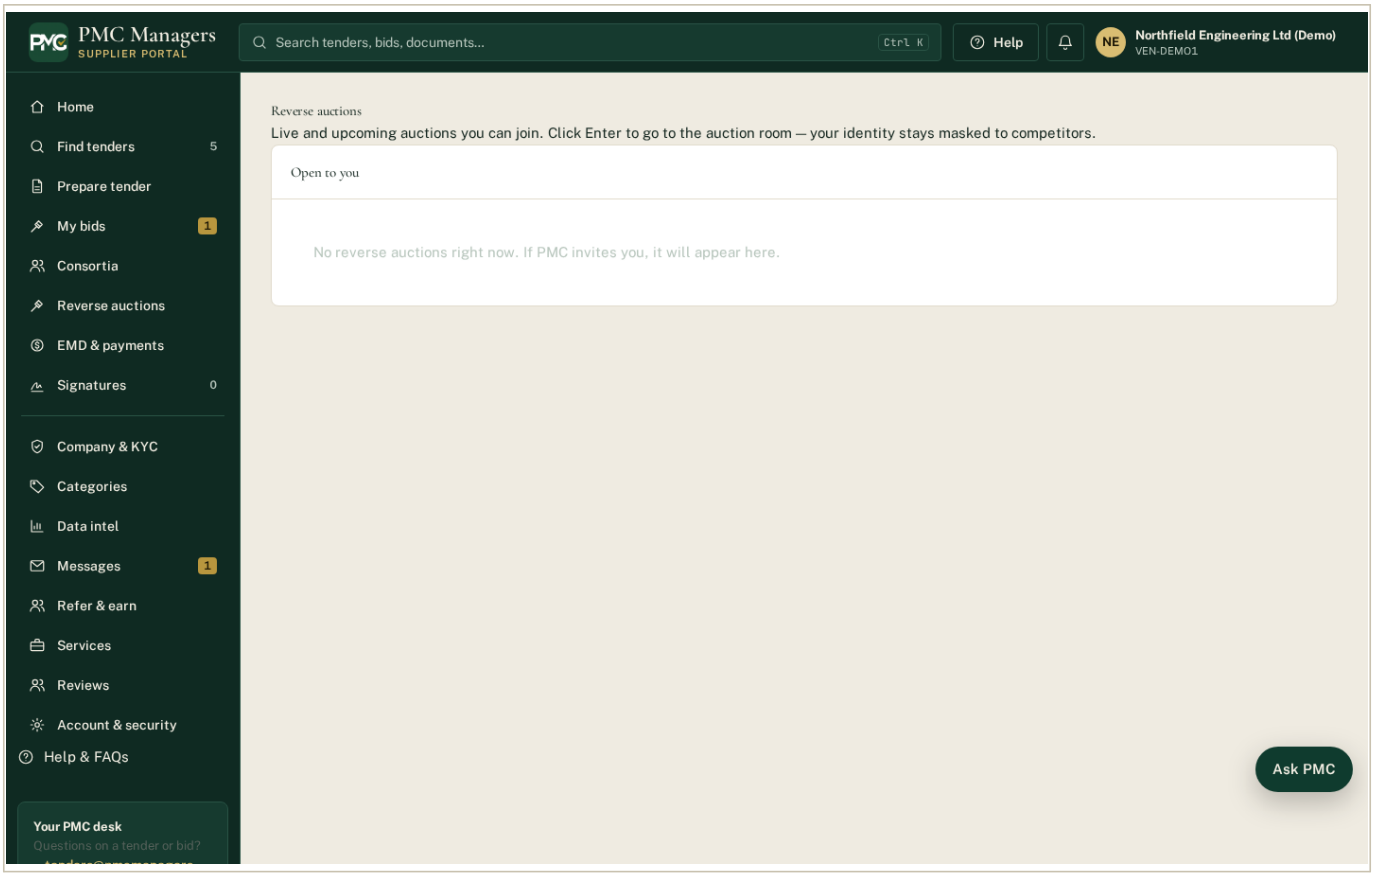

Documents waiting for the supplier's e-signature (agreements, contracts).

**Main actions**

- Sign a document

# Reverse auctions

Screen: `/vendor/auctions`

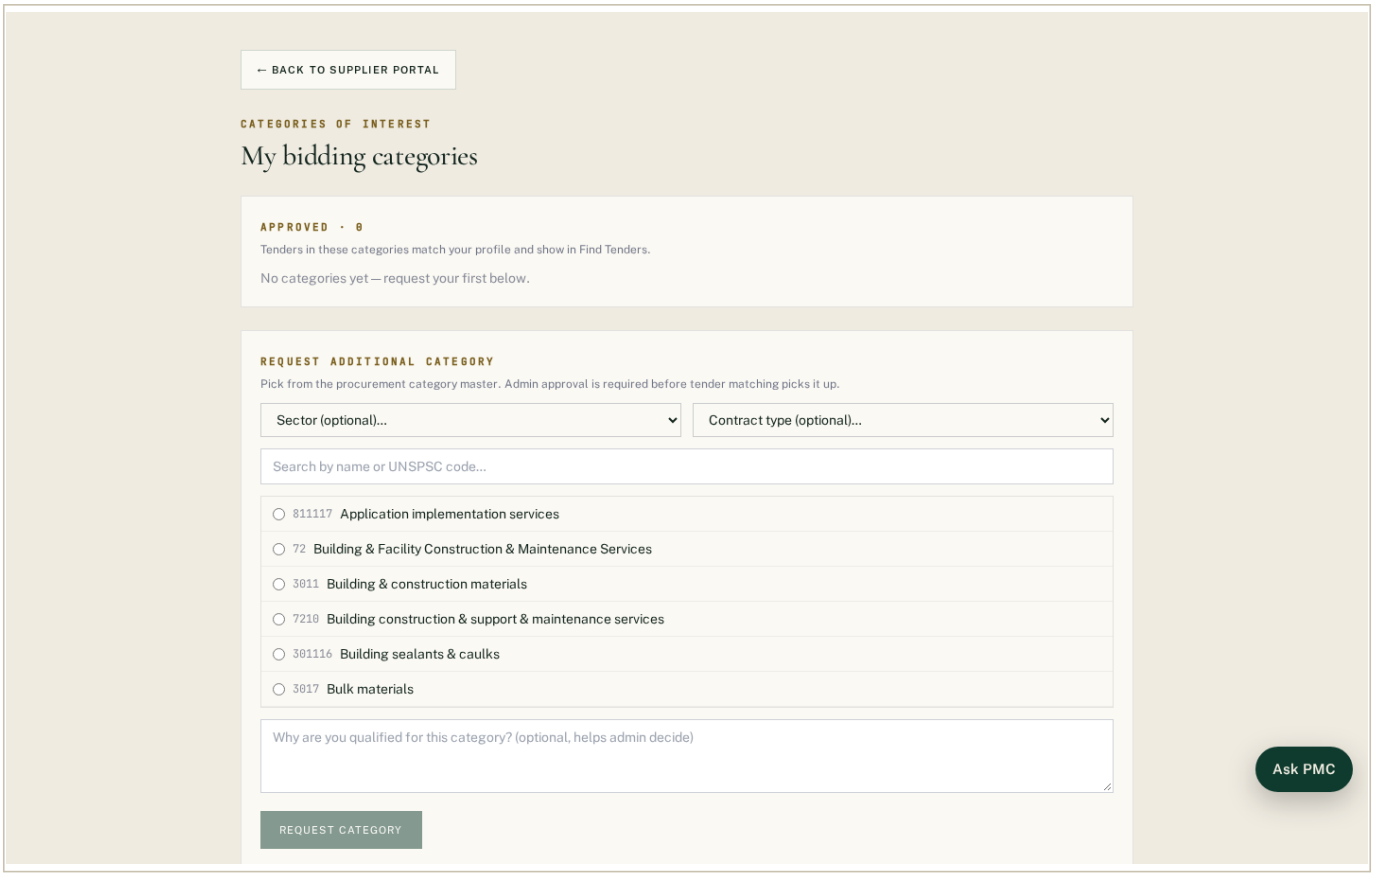

Auctions the supplier is invited to, with live bidding.

**Main actions**

- Join an auction
- Place a lower bid

# Categories

Screen: `/vendor/categories`

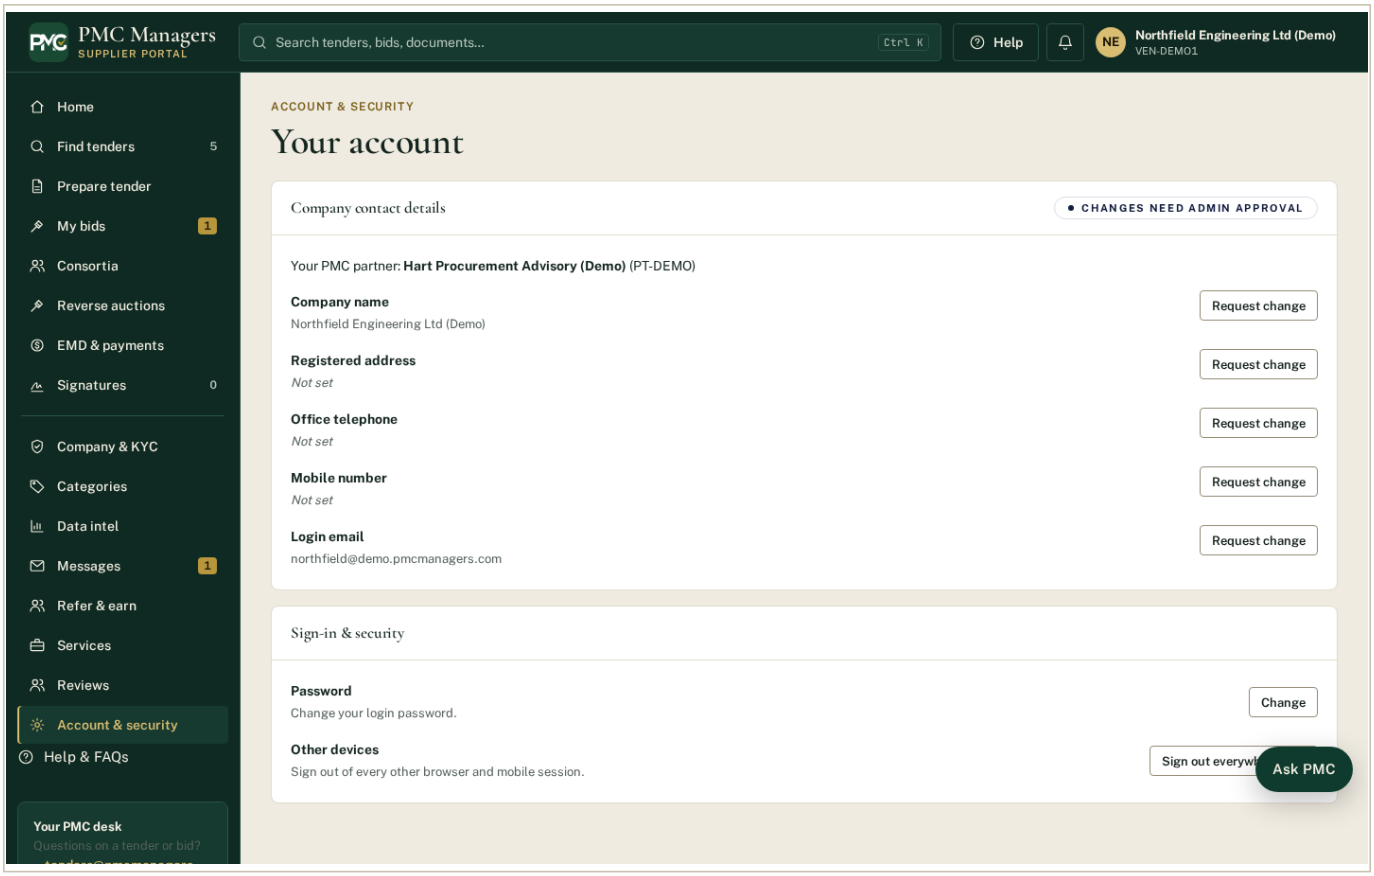

The categories the supplier works in; drives tender matching and alerts.

**Main actions**

• Request a new category

# Account & security

Screen: `/vendor/account`

Login email, password, phone and security settings.

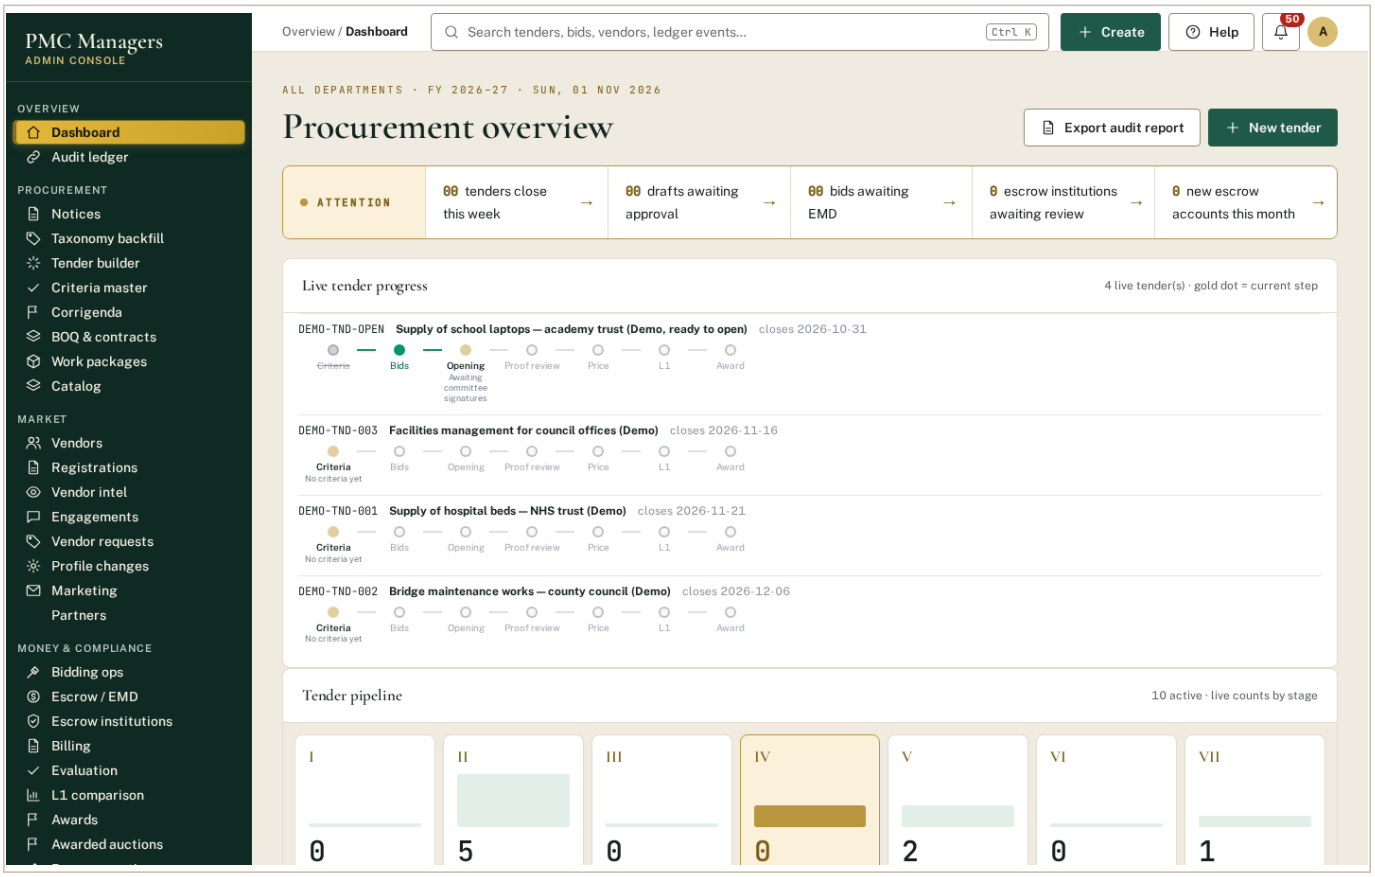

**Main actions**

- Change password
- Update contact details

# 6 · Admin console — screen tour

## Admin dashboard

Screen: `/admin/e/dashboard`

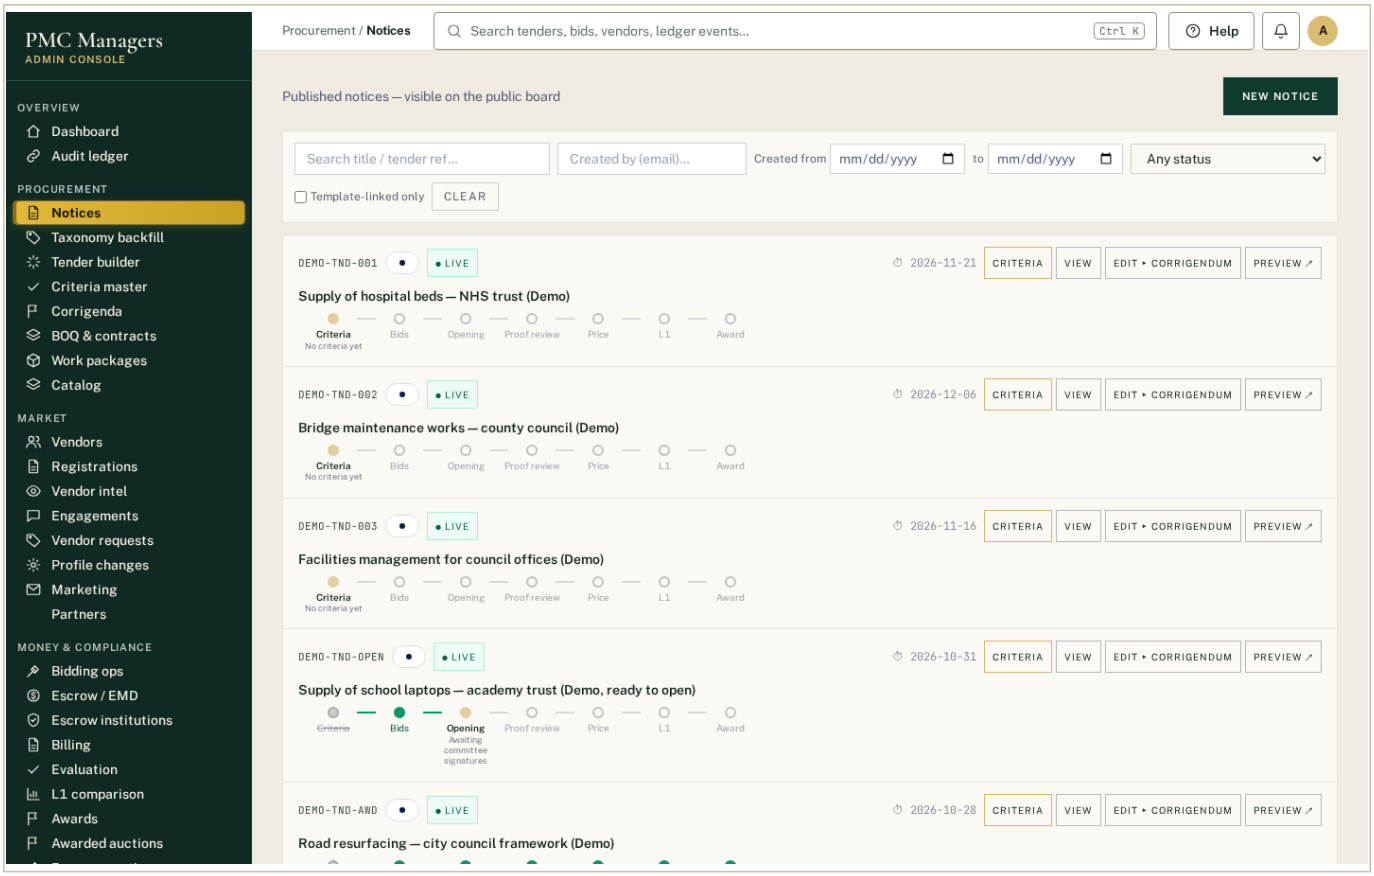

The control room. Attention cards show tenders closing this week, drafts awaiting approval and bids awaiting EMD. 'Live tender progress' shows every live tender's stage line (criteria, bids, opening, proof review, price, L1, award) so stalled tenders stand out.

**Main actions**

- Click an attention card to jump to the list
- Open a tender from Live tender progress
- Create a new tender

# Notices

Screen: `/admin/e/notices`

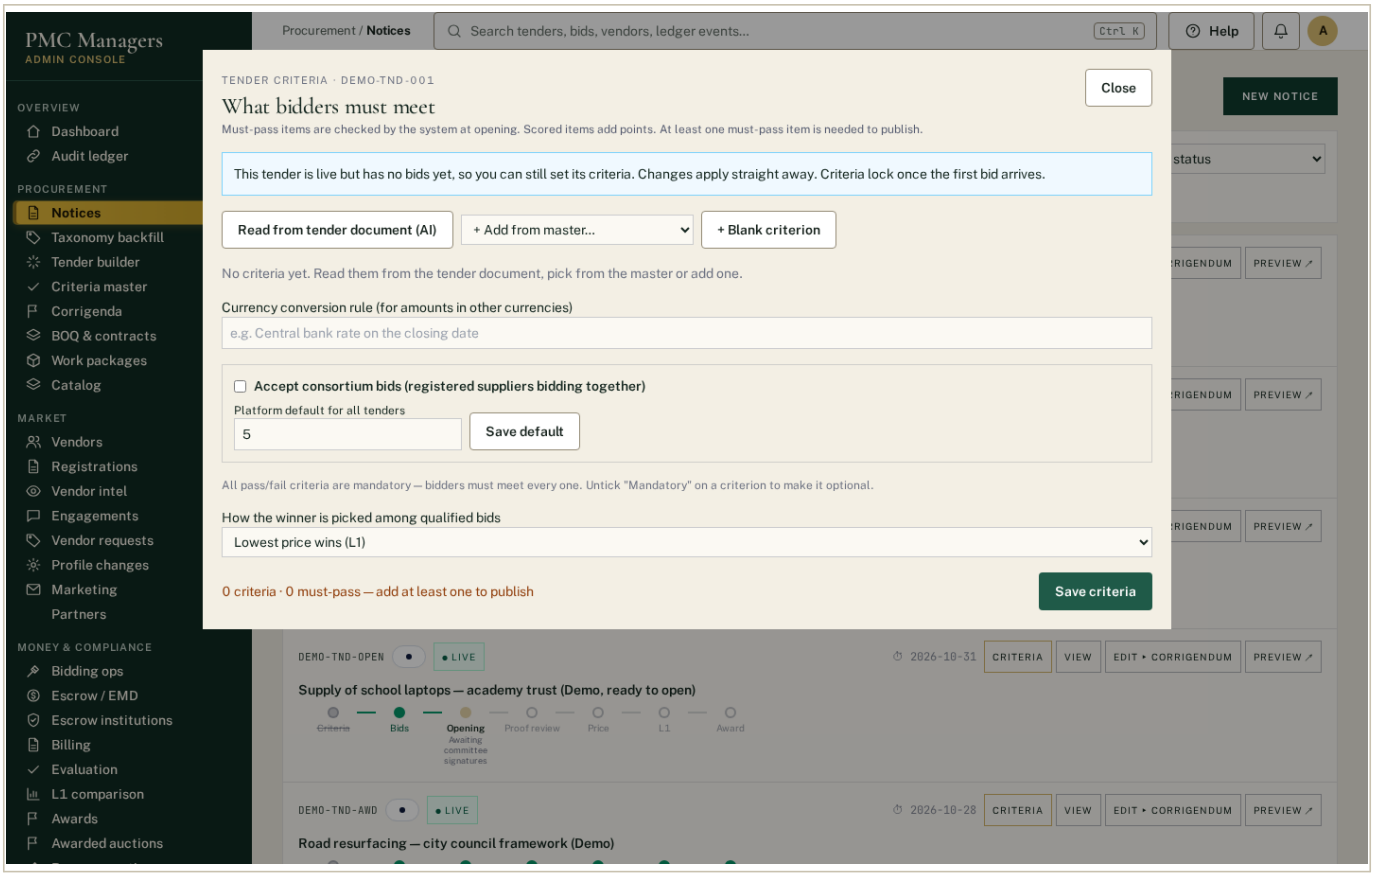

All tenders (draft and live). Each row has the progress tracker, Criteria, View, Edit/Corrigendum and Preview. Draft rows show the 'Ready to publish?' checklist (document, dates, a must-pass criterion) with its own Publish button.

**Main actions**

- New notice (the Criteria window opens after Create)
- Criteria: set what bidders must meet
- Publish once the checklist is all ticked

# Criteria window

Screen: `/admin/e/notices`

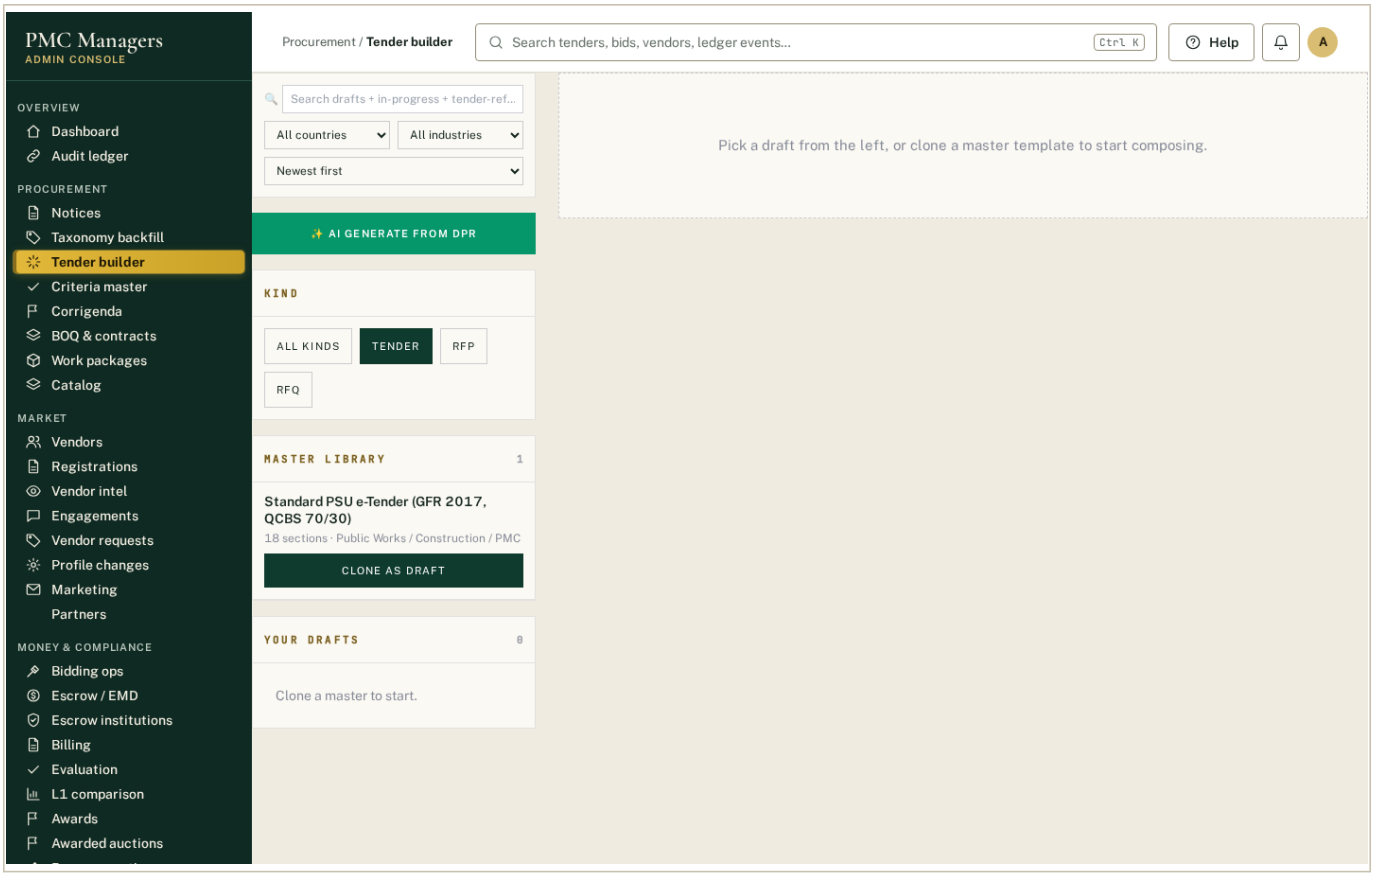

Sets the tender's criteria. Add from the Criteria master or a whole set, read them from the tender document with AI, or add your own. Each criterion is pass/fail or scored, Mandatory or optional, with proof required or not. Also set the minimum optional criteria, consortium rules and how the winner is picked (L1 or weighted).

**Main actions**

- + Add from master / a criteria set
- Tick Mandatory or leave optional
- Set 'at least N optional criteria'
- Choose L1 or weighted
- Save criteria

# Tender builder

Screen: `/admin/e/tender-builder`

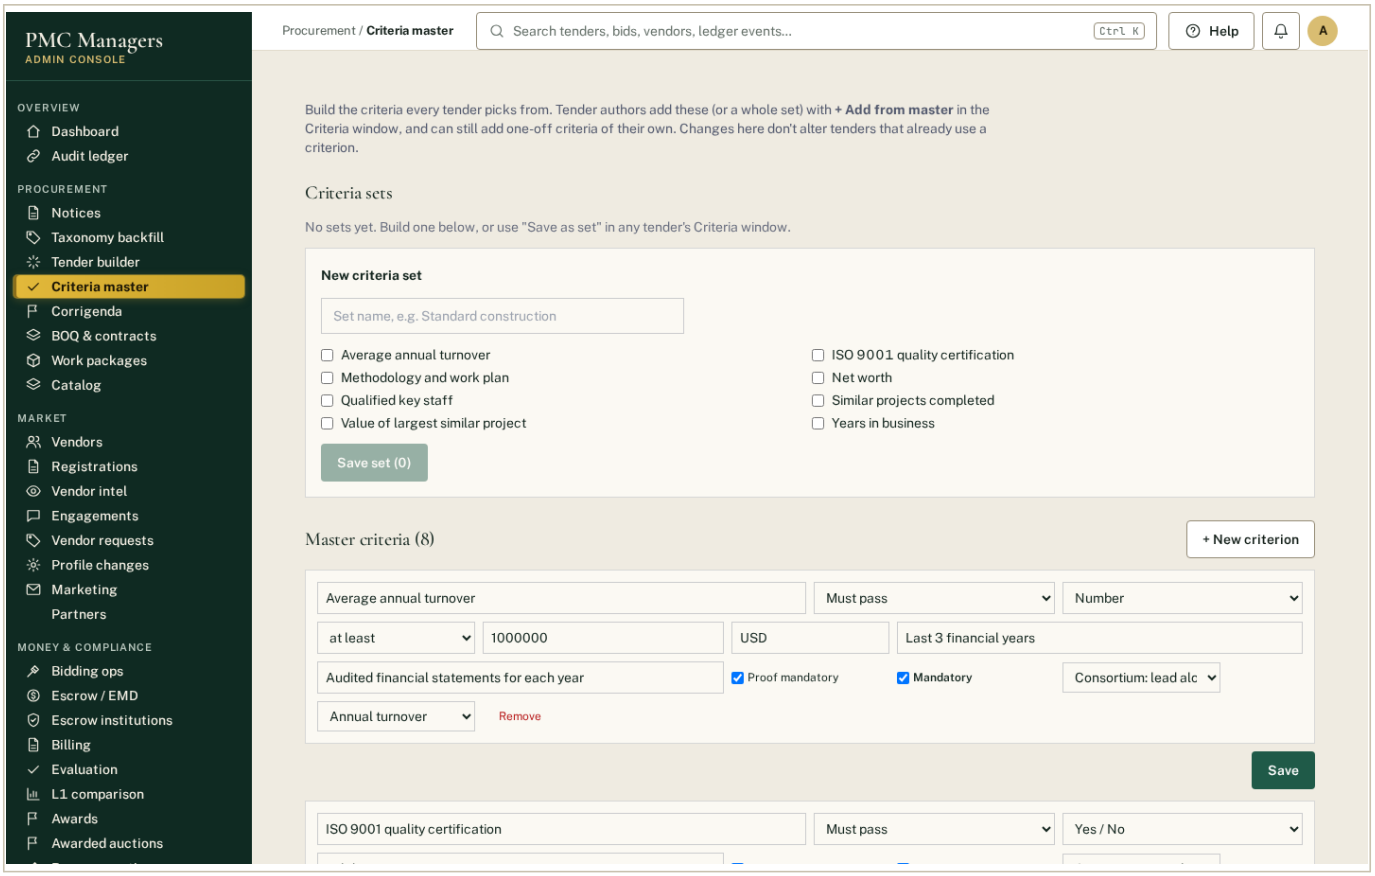

Builds the tender document. Clone a master template or use 'AI generate from DPR' to draft a tender from a project report. Drafts have a Criteria button and 'Create notice' to turn the draft into a notice (criteria come across).

**Main actions**

- AI generate from DPR
- Clone a master template
- Criteria
- Create notice

# Criteria master

Screen: `/admin/e/criteria-master`

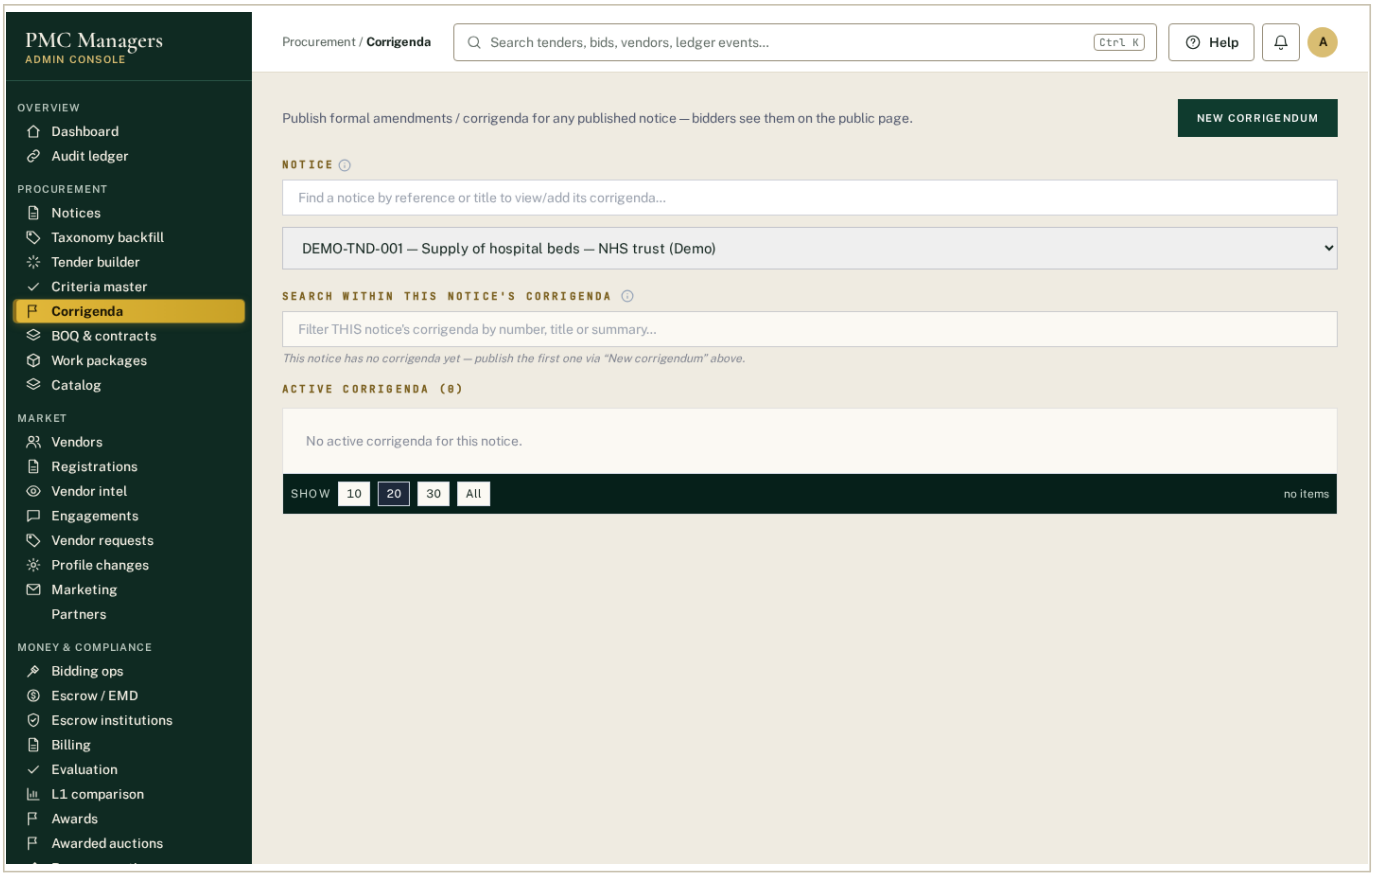

The library every tender picks criteria from. Build master criteria and named sets such as 'Standard construction'. Admins and reviewers can edit; removing archives (nothing is deleted).

**Main actions**

- + New criterion
- Build a criteria set
- Remove (archive) a criterion or set

# Corrigenda

Screen: `/admin/e/corrigenda`

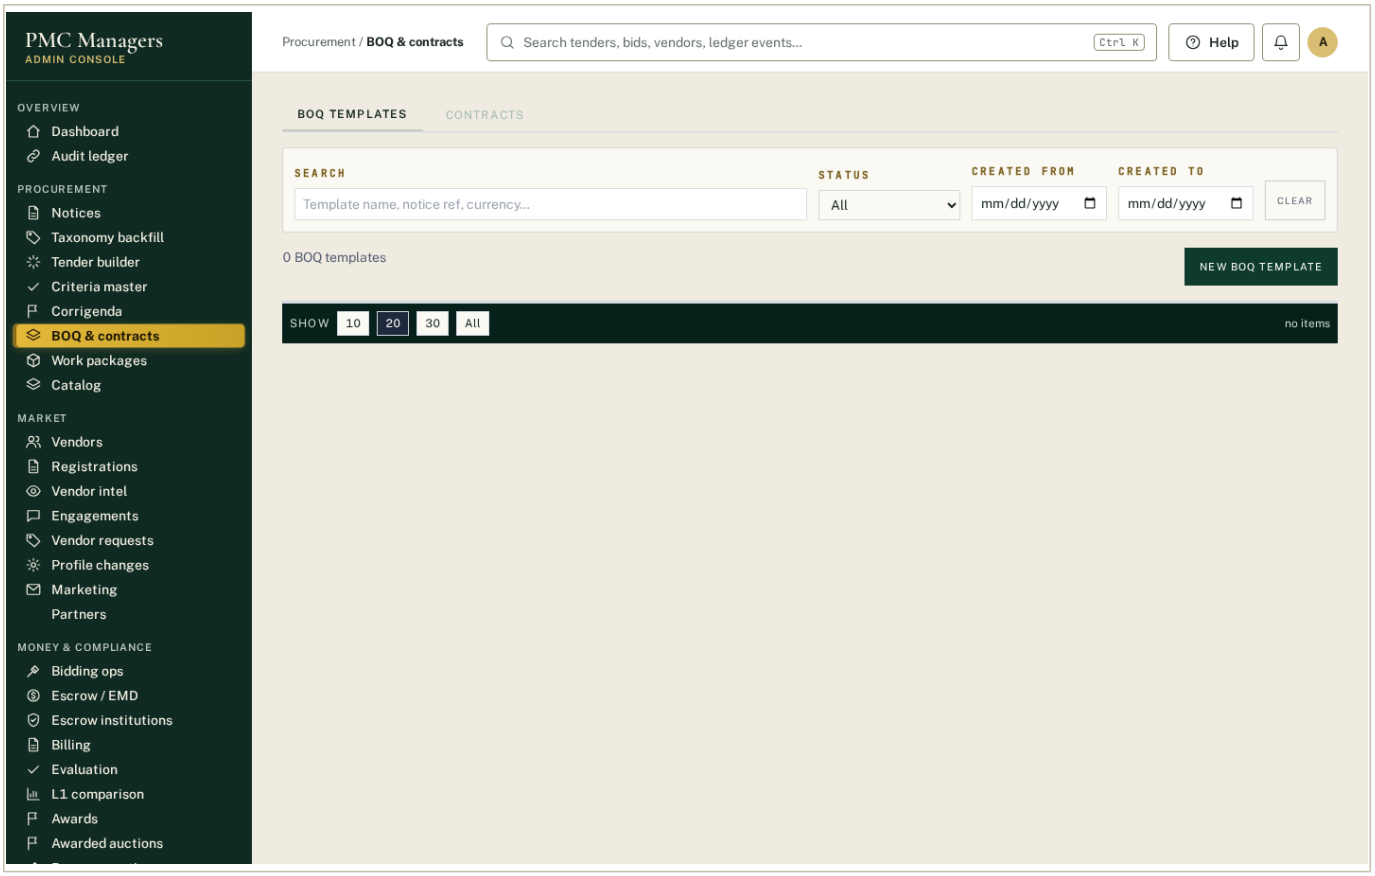

Changes to live tenders. Each corrigendum is dated, described and sent to every bidder and follower.

**Main actions**

- Issue a corrigendum
- See the history per tender

# BOQ & contracts

Screen: `/admin/e/boq`

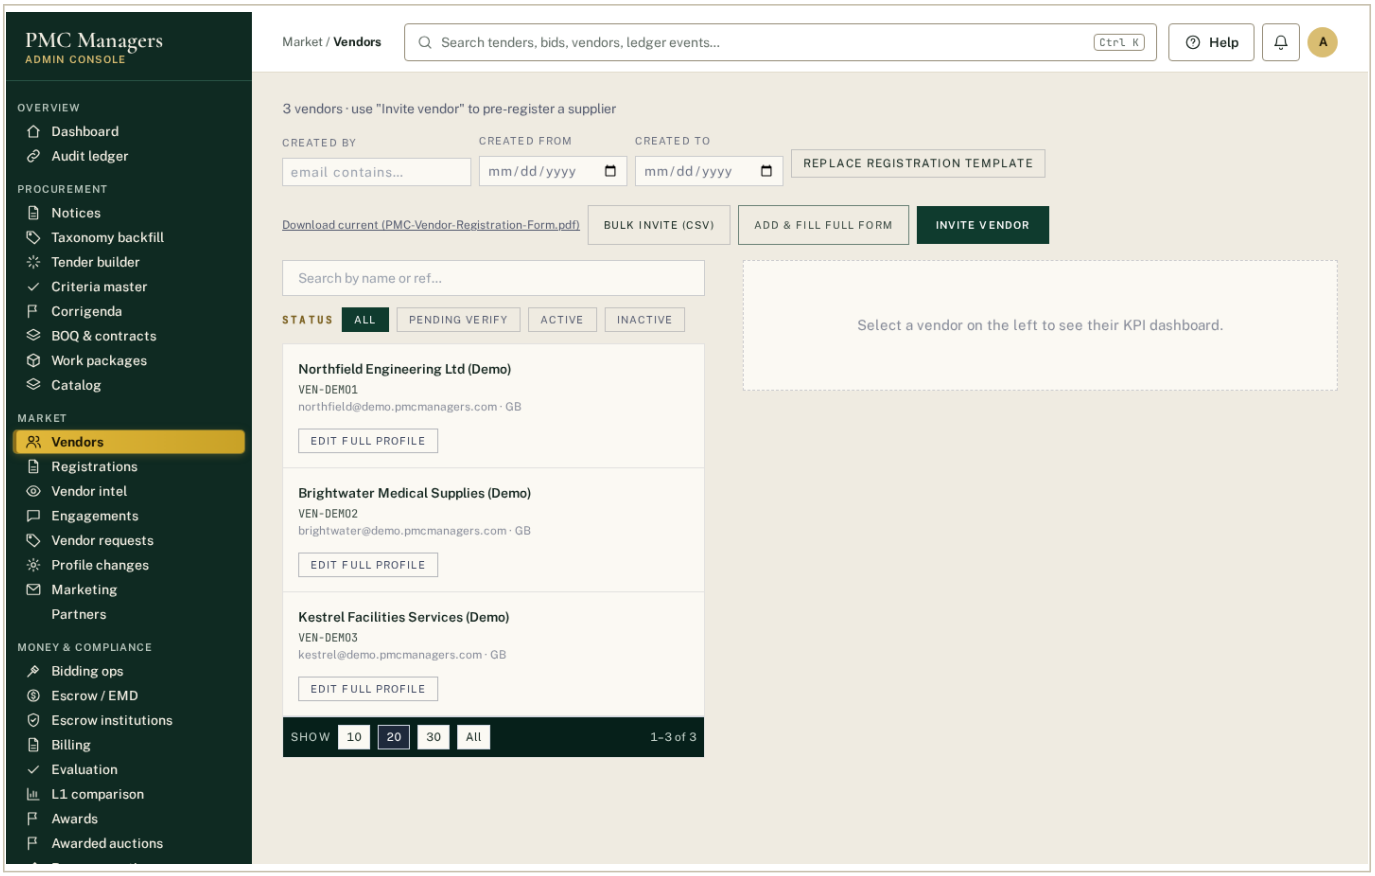

Bills of quantities and contract documents linked to tenders.

**Main actions**

- Upload or edit a BOQ
- Attach contract documents

# Vendors

Screen: `/admin/e/vendors`

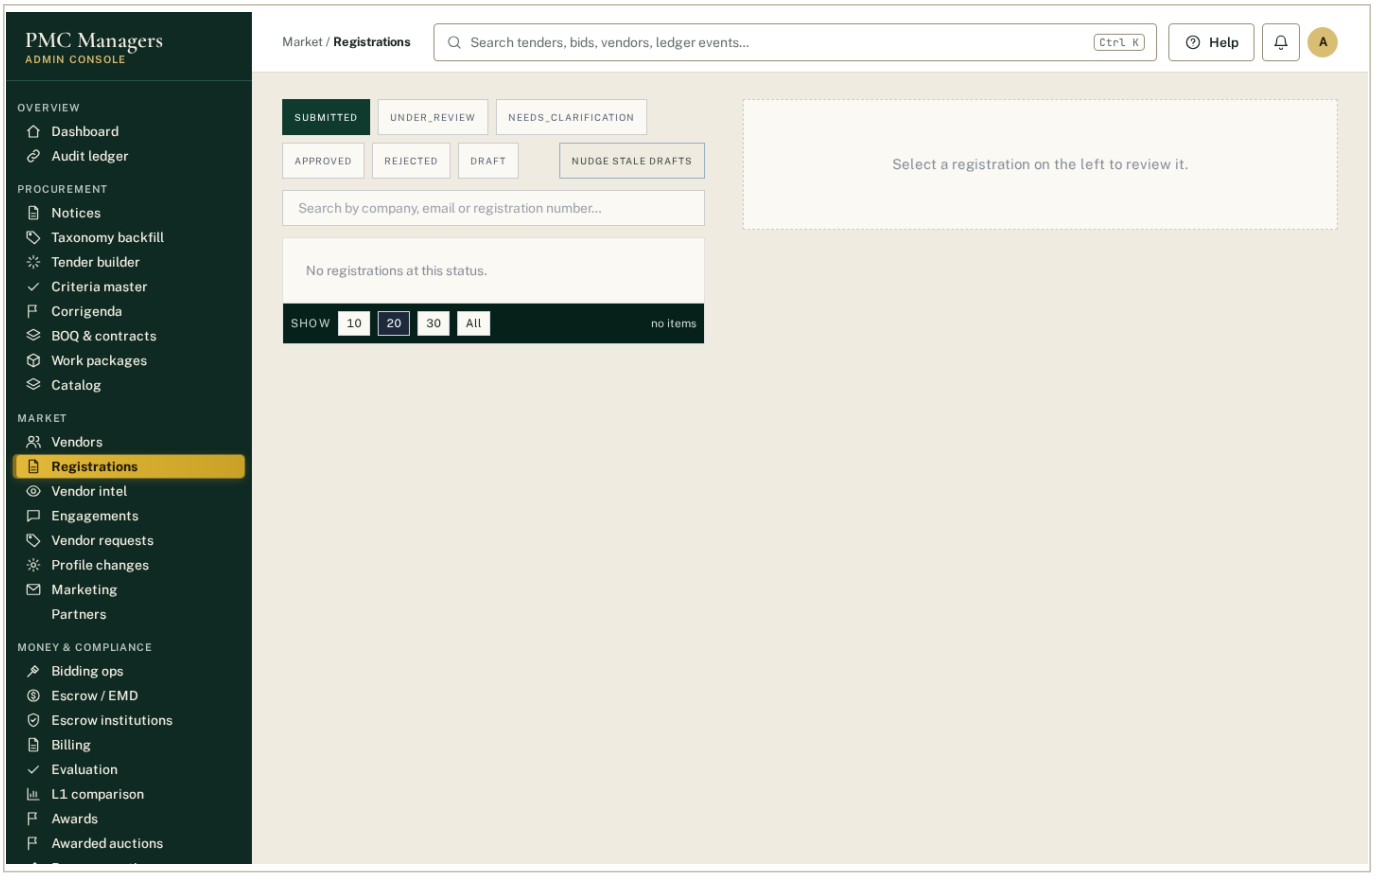

Every registered supplier with KYC status, categories and activity.

**Main actions**

- Open a supplier profile
- Check KYC status

# Registrations

Screen: `/admin/e/registrations`

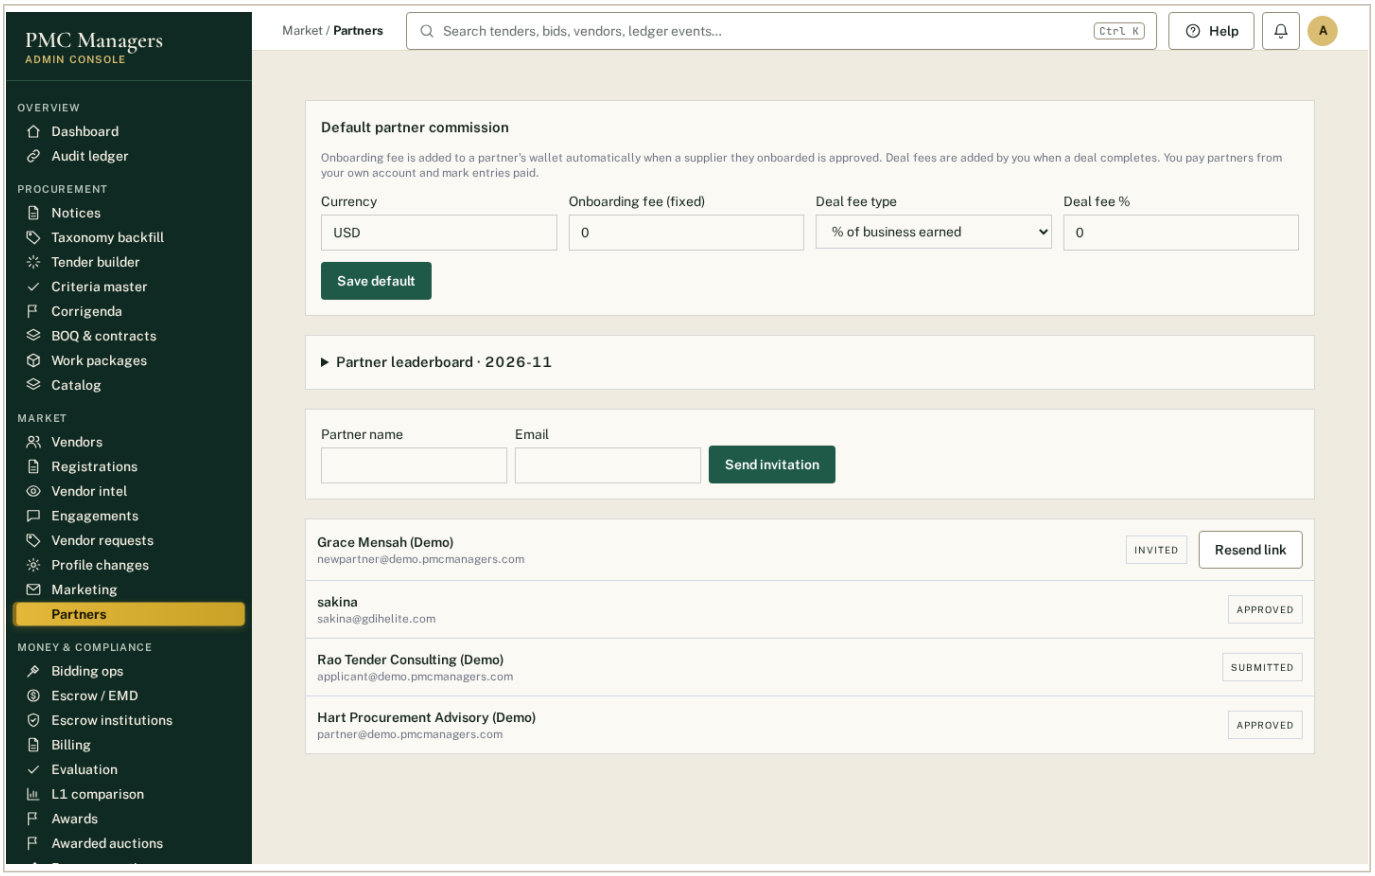

New supplier registrations waiting for KYC review. Approve, ask for clarification or reject with a reason.

**Main actions**

- Review documents
- Approve / request changes / reject

# Partners

Screen: `/admin/e/partners`

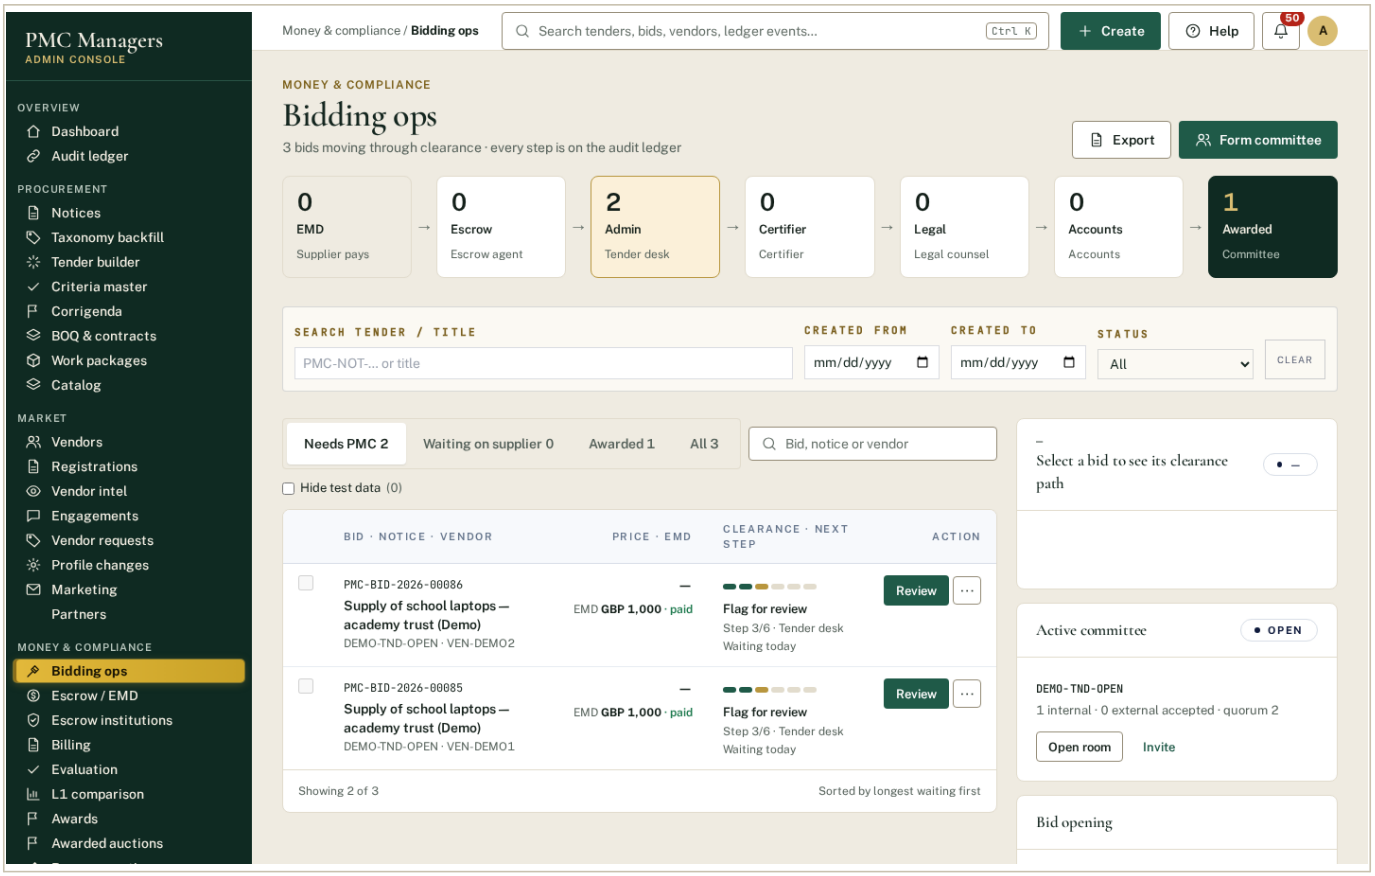

Partners who onboard suppliers and earn commission. Unfinished profiles show 'N of 4 sections complete'. Edit details opens the full 5-section form; resend the invite link; approve.

**Main actions**

- Invite a partner
- Edit details
- Resend link
- Approve

# Bidding ops

Screen: `/admin/e/bidding`

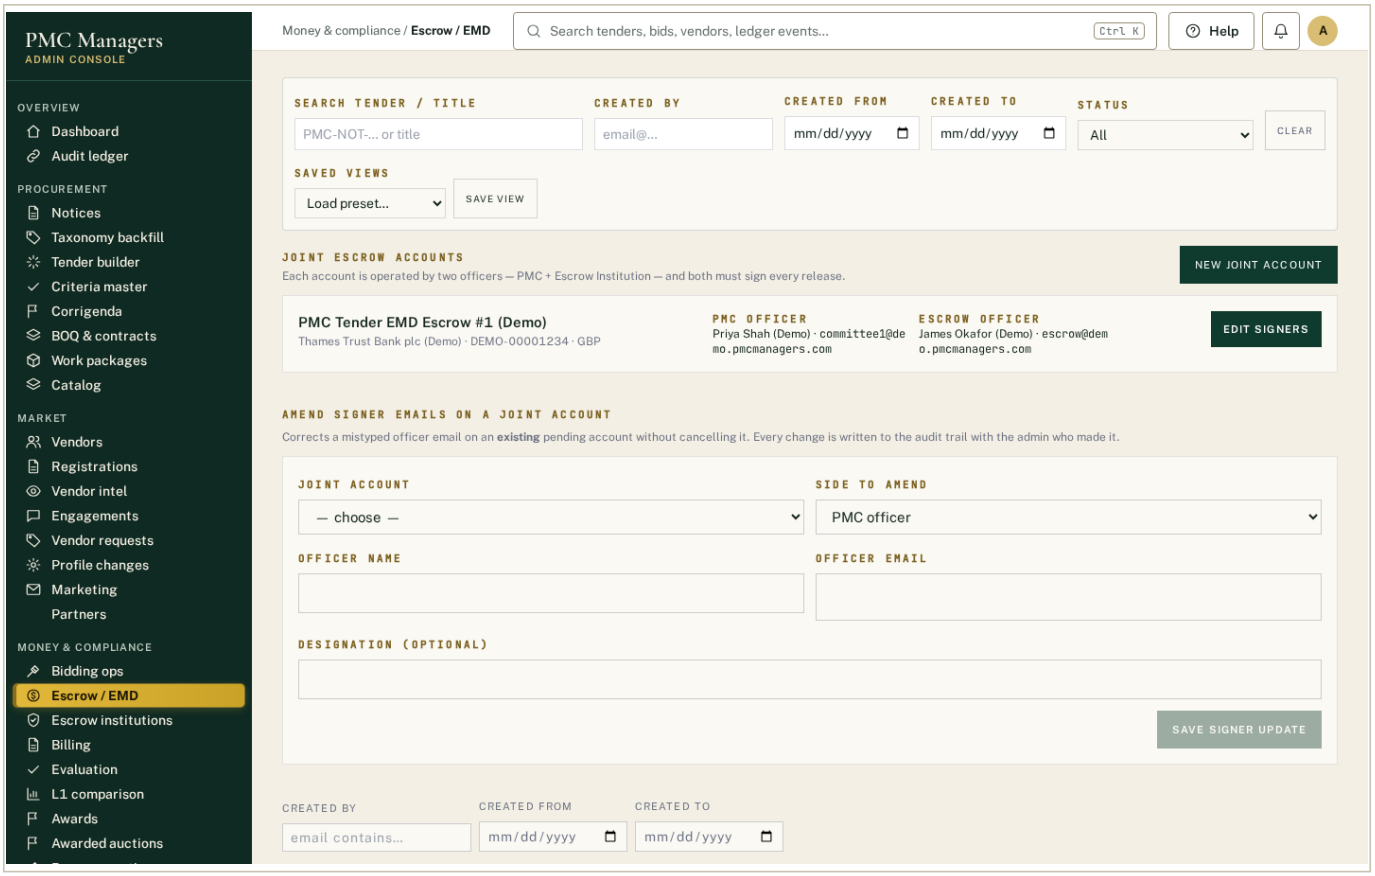

Runs the bid opening. Each tender with a committee shows the opening card: who has signed, blockers, technical opening, the system qualification check with AI proof findings and committee accept/reject, price opening, the automatic L1 ranking and 'Award to L1'.

**Main actions**

- Committee members approve opening
- Review proofs (accept / reject with comment)
- Raise / resolve a doubt
- Download proof check report
- Award to L1

# Escrow / EMD

Screen: `/admin/e/escrow`

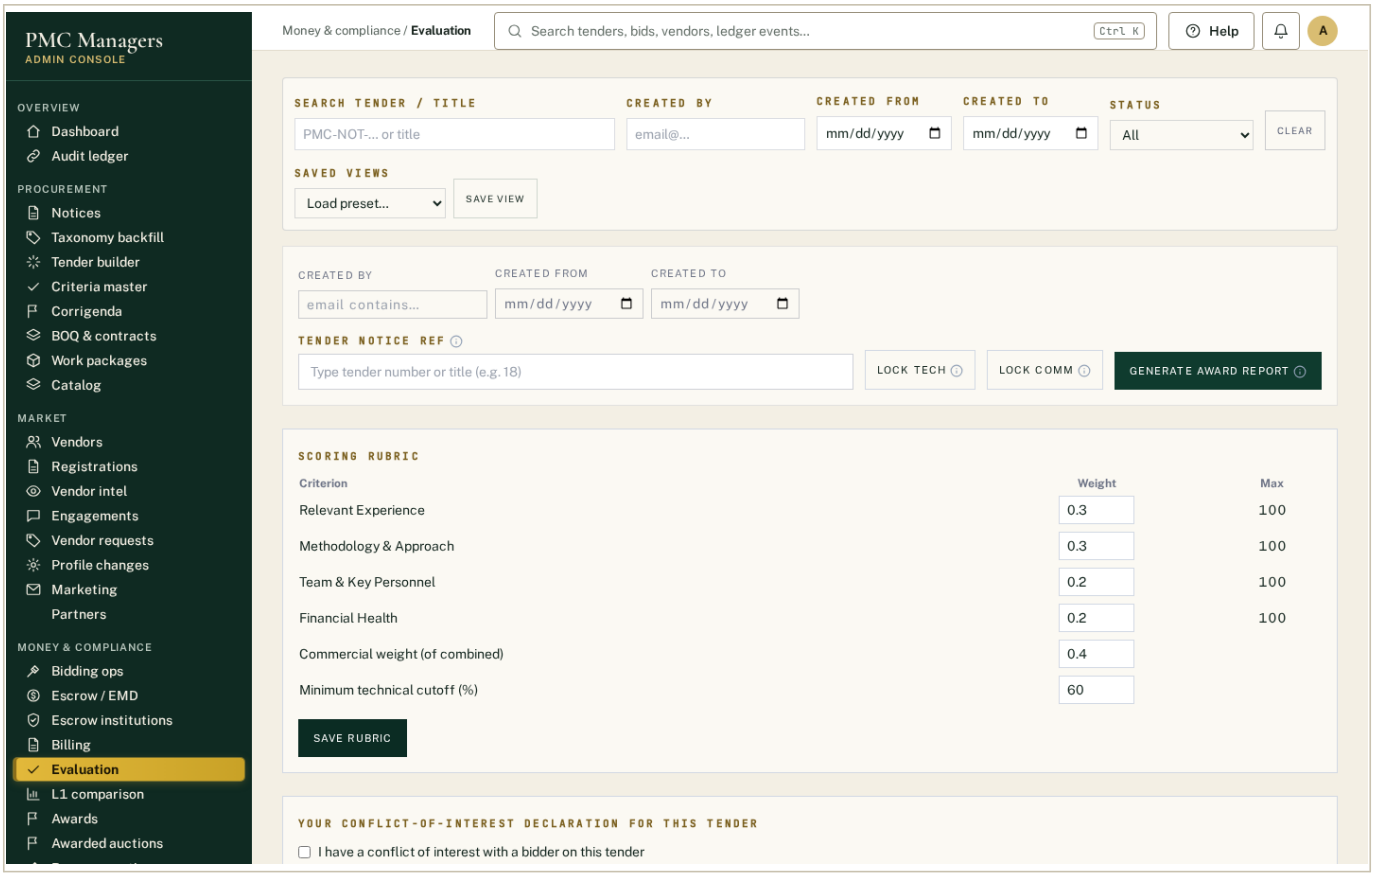

Bid deposits (EMD) and award payments held in escrow, with dual-signed releases and consortium payment instructions.

**Main actions**

- Confirm EMD received
- Release with two signatures
- Record consortium member payouts and bank references

# Evaluation

Screen: `/admin/e/evaluation`

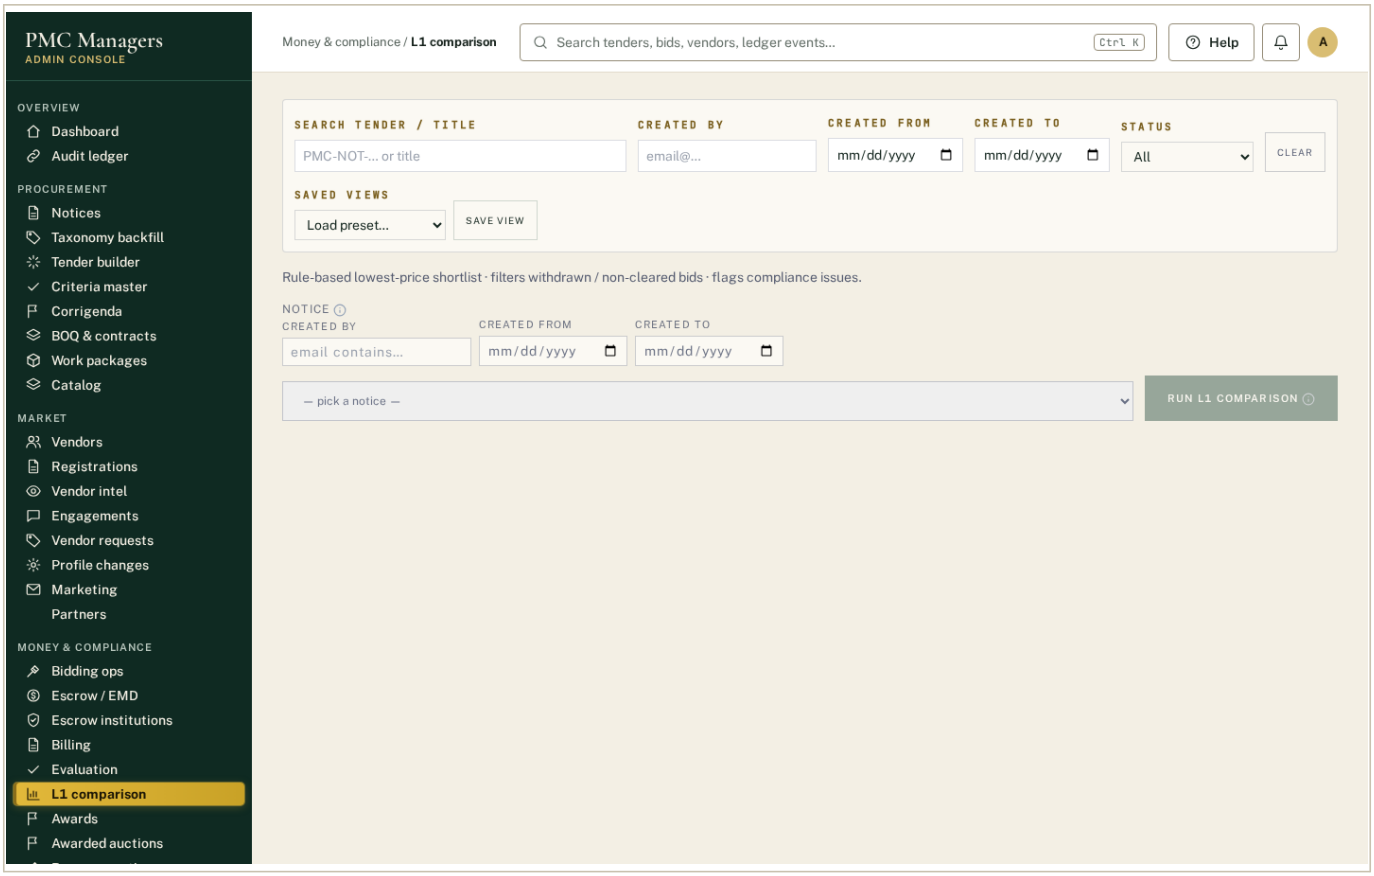

Committee scoring rubric and the Award recommendation report, which follows the tender's rule (L1 or weighted).

**Main actions**

- Score bids
- Open the award recommendation report

# L1 comparison

Screen: `/admin/e/l1-award`

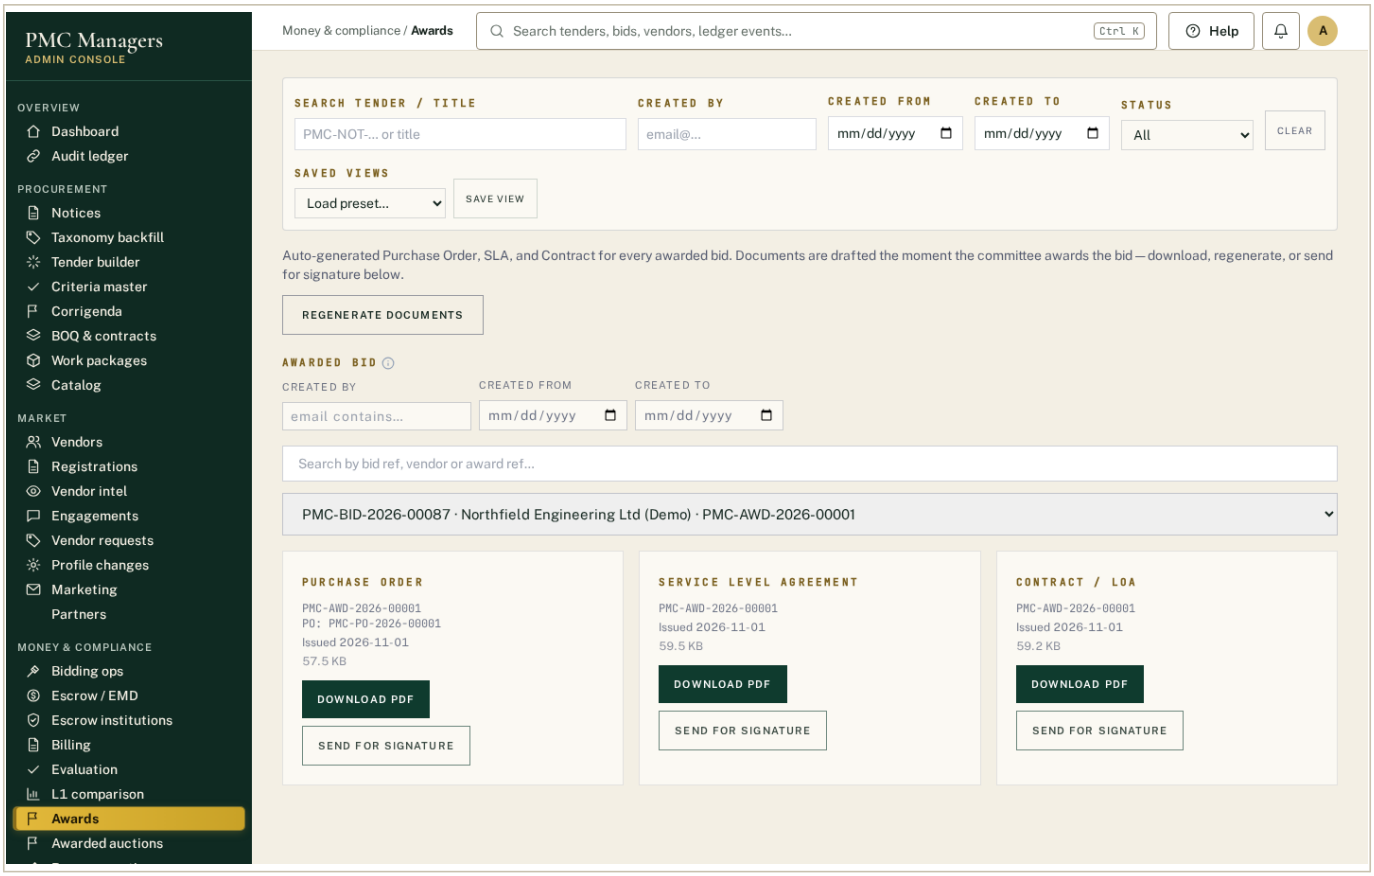

Ranks qualified bids by price (L1, L2, L3) with compliance flags. Runs automatically after price opening and can be re-run here.

**Main actions**

- Run L1 for a tender
- Check compliance flags

# Awards

Screen: `/admin/e/awards`

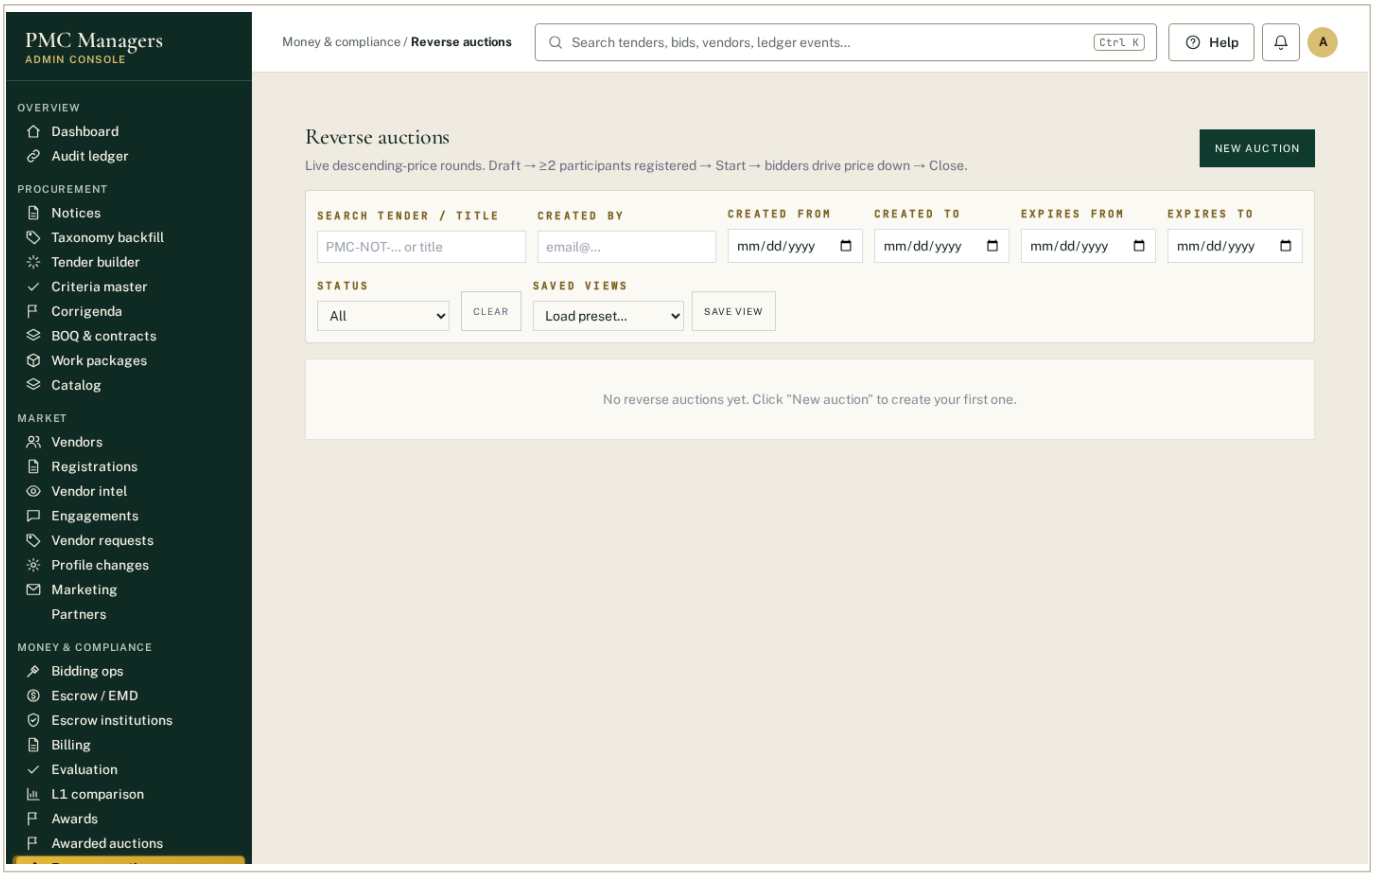

Awarded bids with award letters, contracts and signatures.

**Main actions**

- Open award letter / contract
- Track signatures

# Reverse auctions

Screen: `/admin/e/auctions`

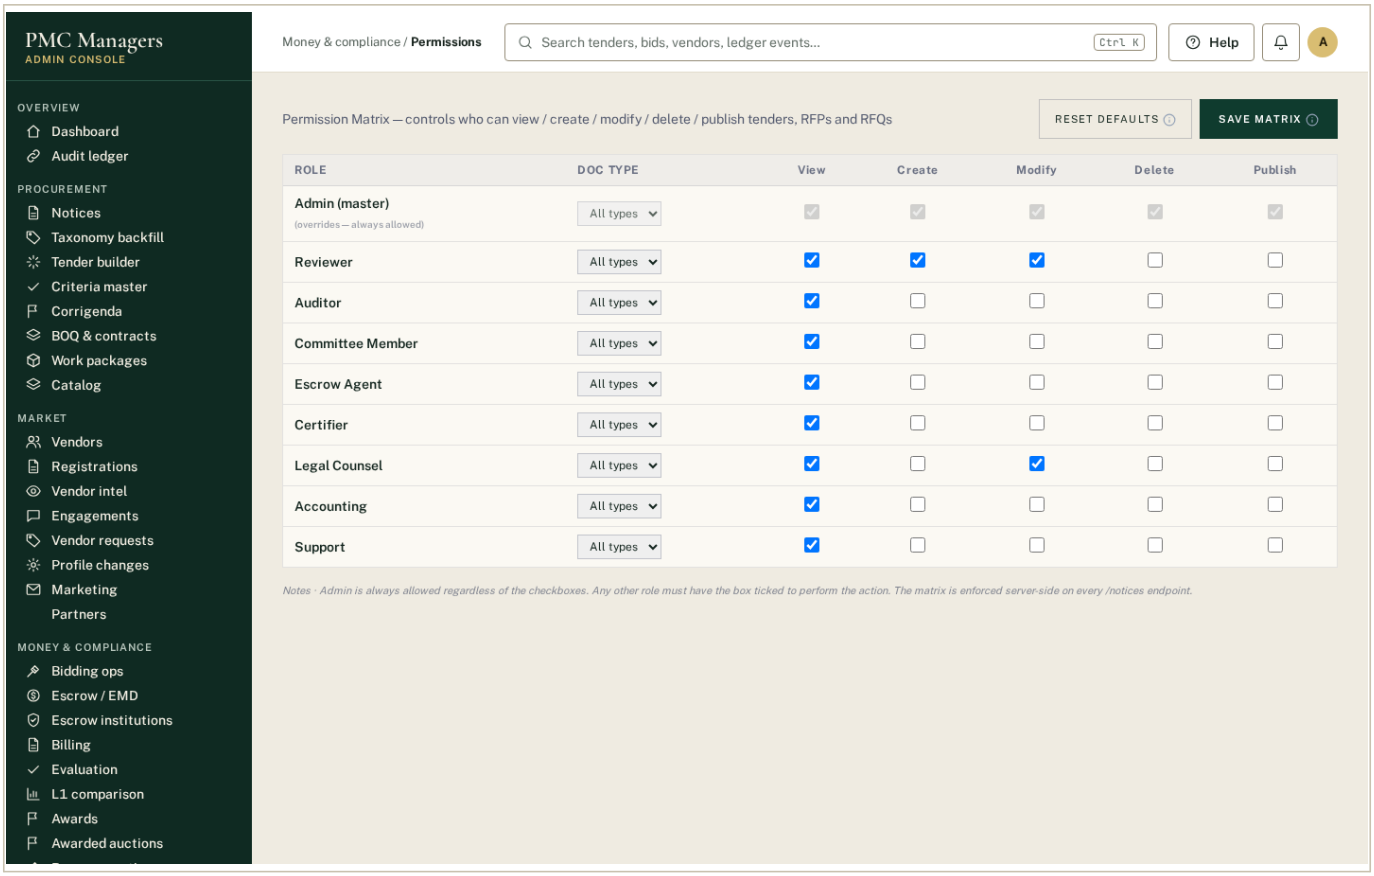

Live reverse auctions where invited suppliers bid prices down within a time window.

**Main actions**

- Create an auction
- Invite suppliers
- Watch live bids

# Permissions

Screen: `/admin/e/permissions`

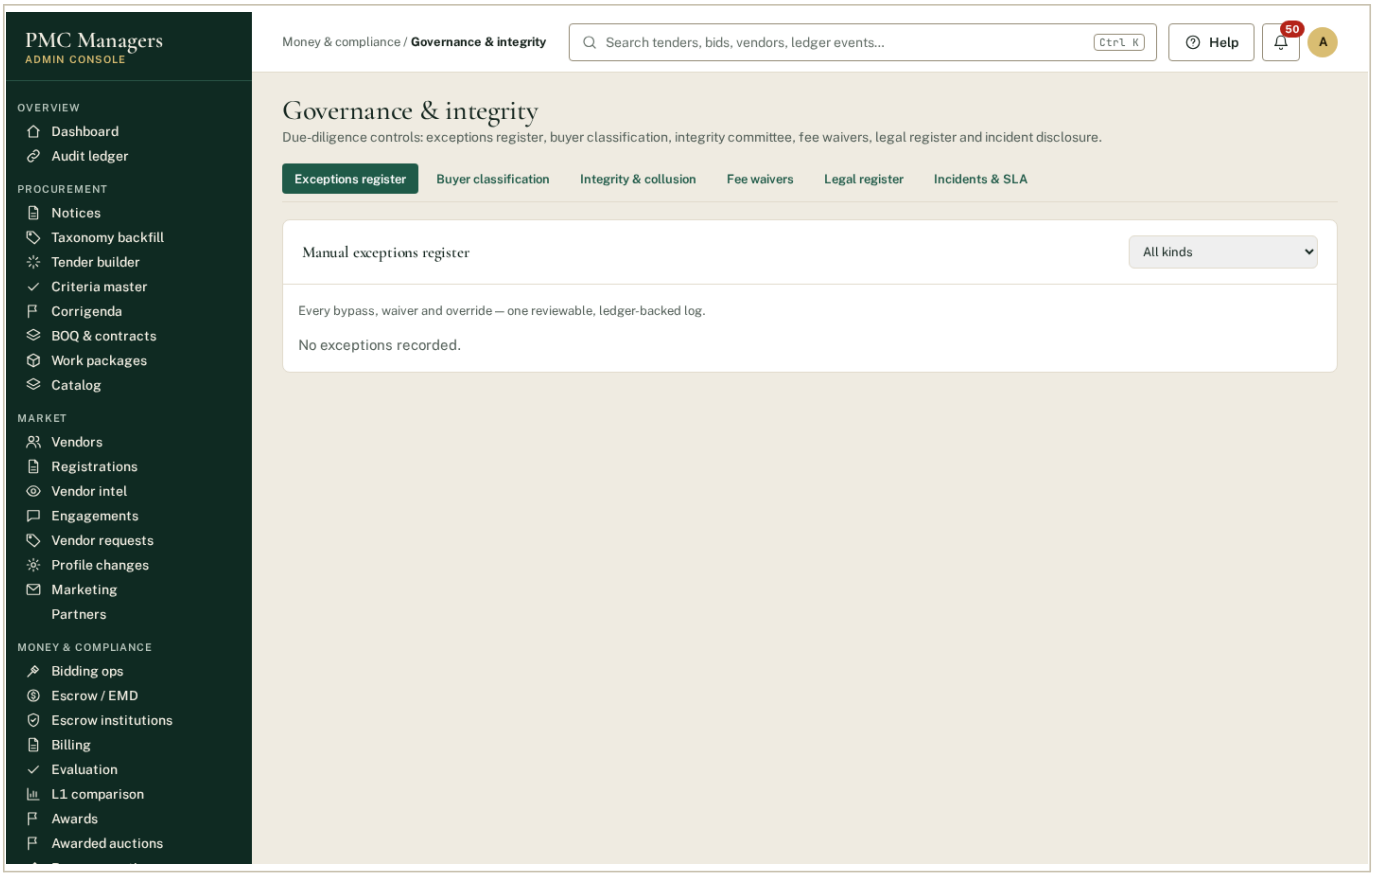

Who can do what. Roles and the approval matrix that decides each bid's sign-off order.

**Main actions**

- Edit role permissions
- Reset to defaults

# Governance & integrity

Screen: `/admin/e/governance`

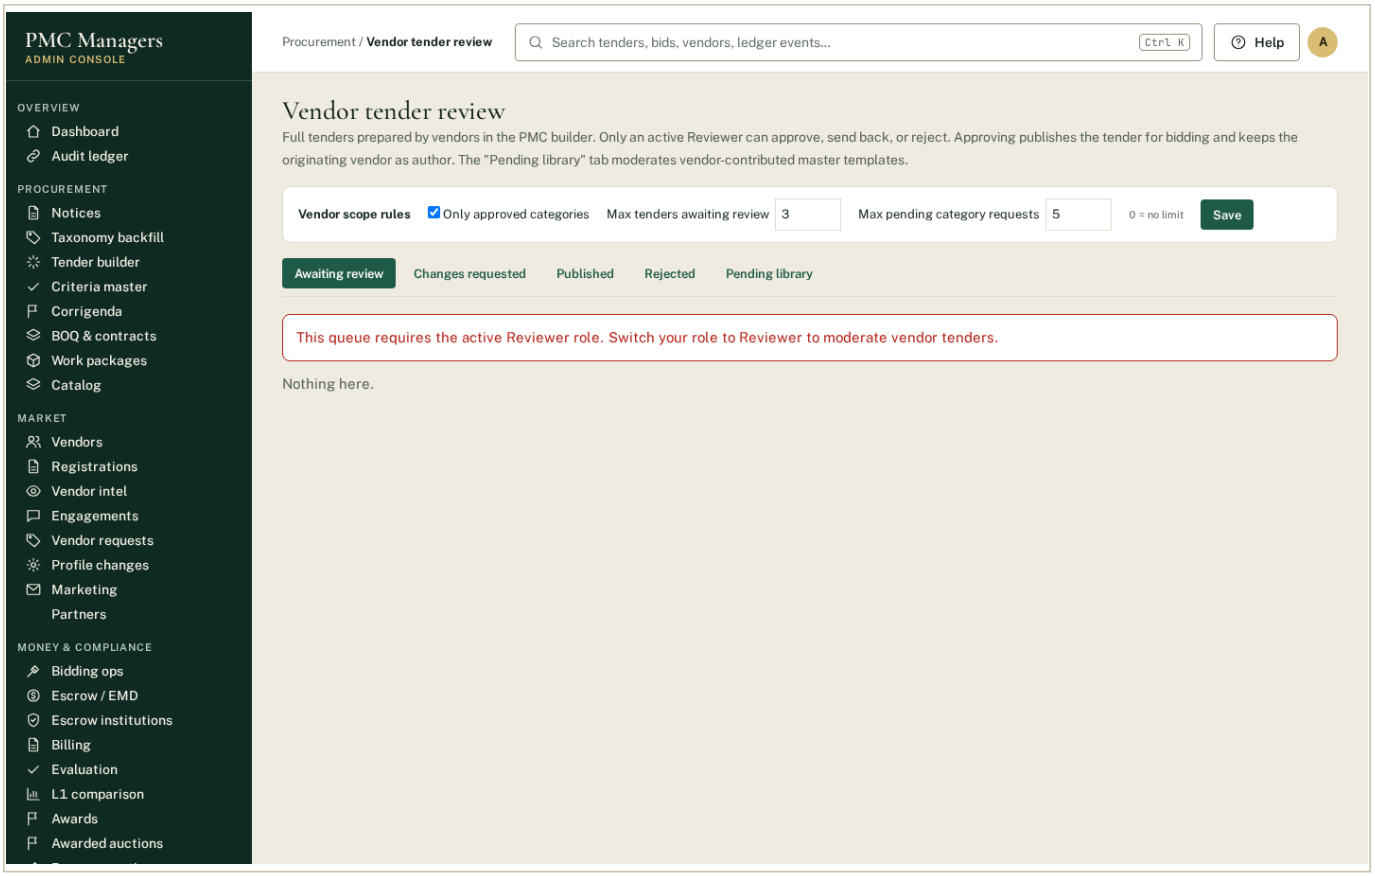

Committees, conflict-of-interest declarations and integrity checks.

**Main actions**

- Form a committee
- Review declarations

# Tender review

Screen: `/admin/e/tender-review`

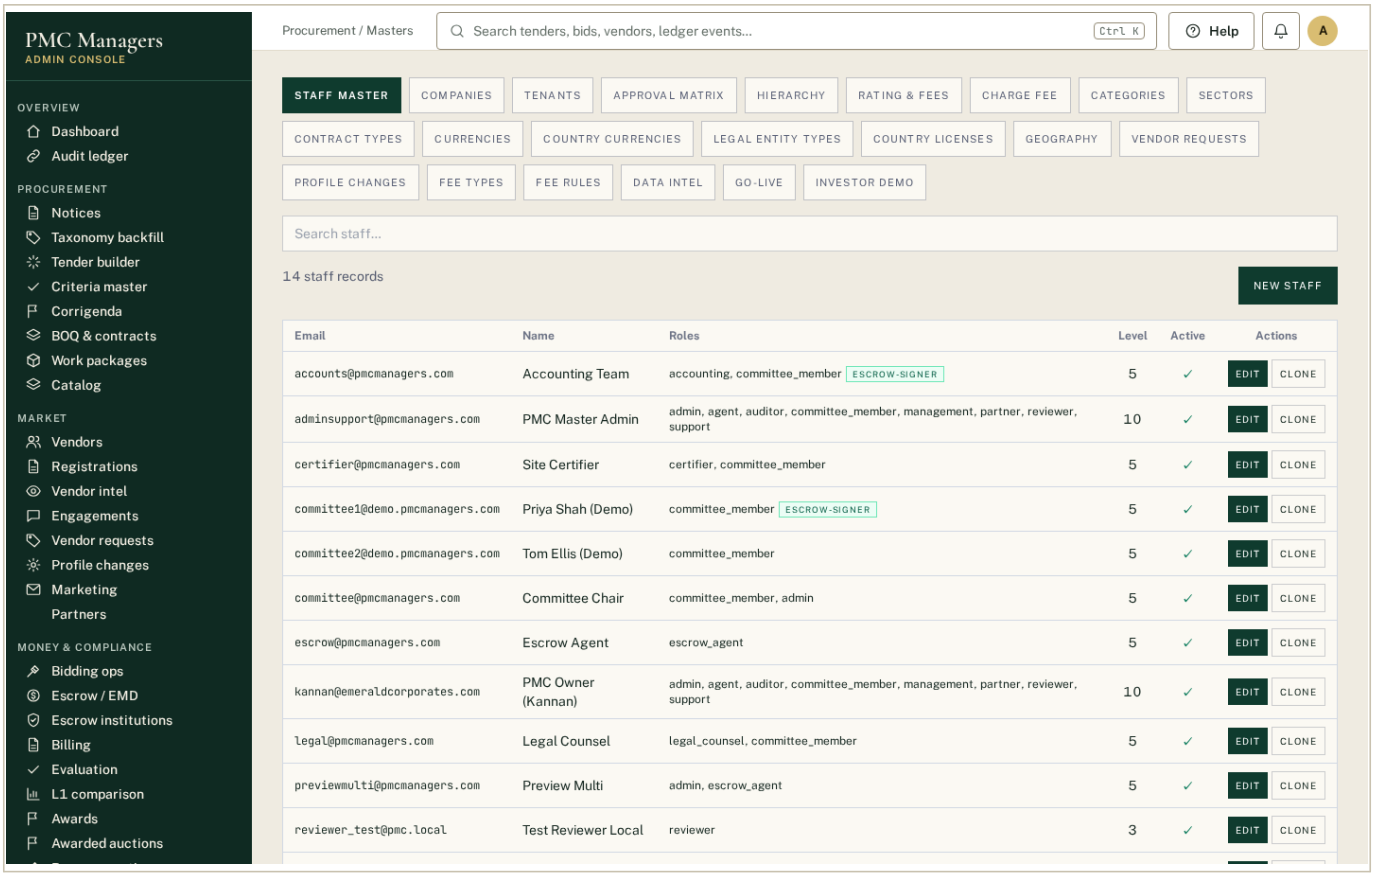

Reviewers approve tenders prepared by suppliers before they can be published.

**Main actions**

• Approve or send back a supplier-prepared tender

# Masters

Screen: `/admin/e/masters`

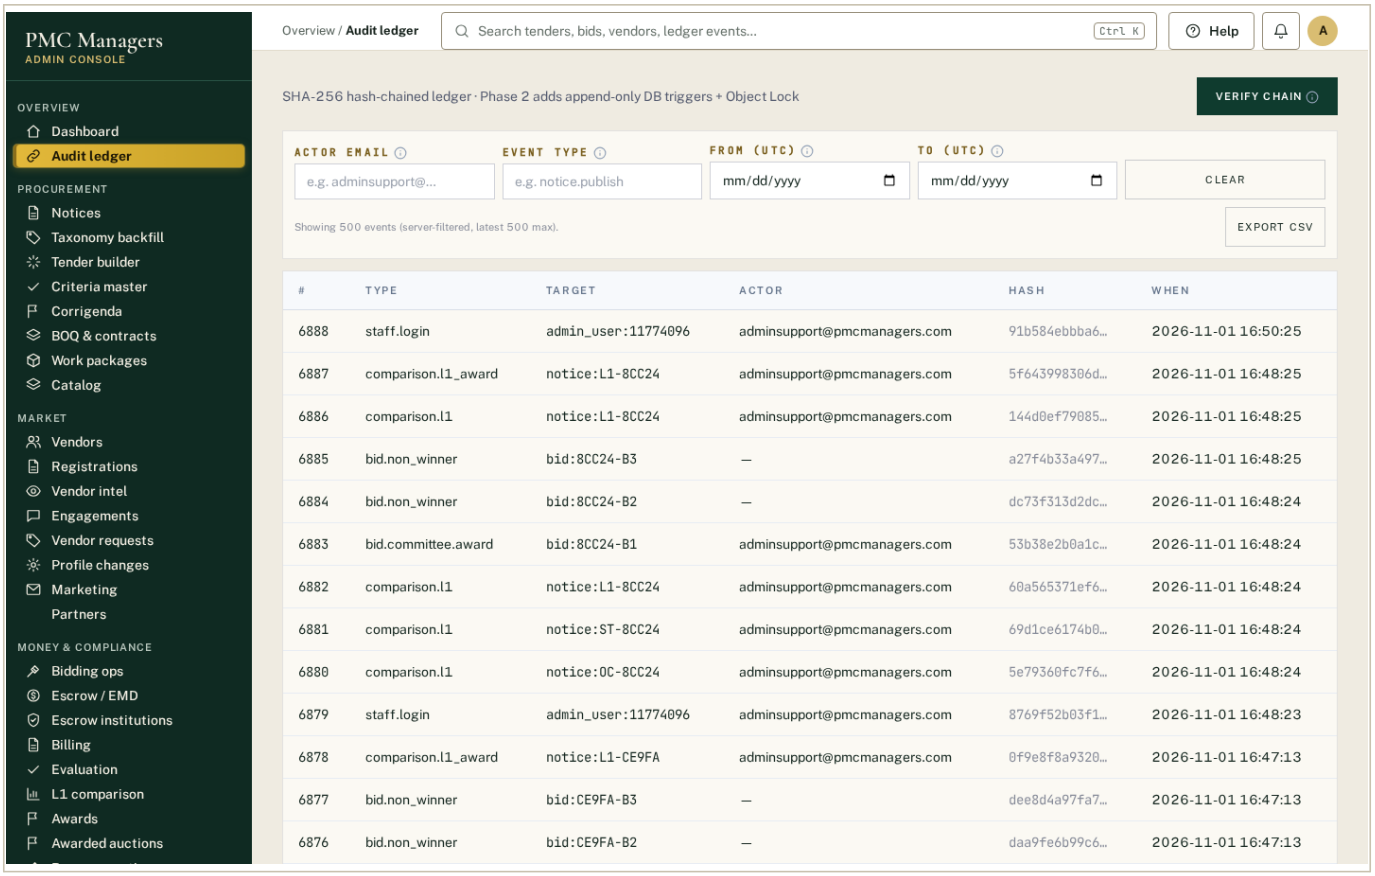

Reference data: staff accounts, categories, countries, currencies and other lists used across the platform.

**Main actions**

- Add staff
- Edit categories

# Audit ledger

Screen: `/admin/e/audit`

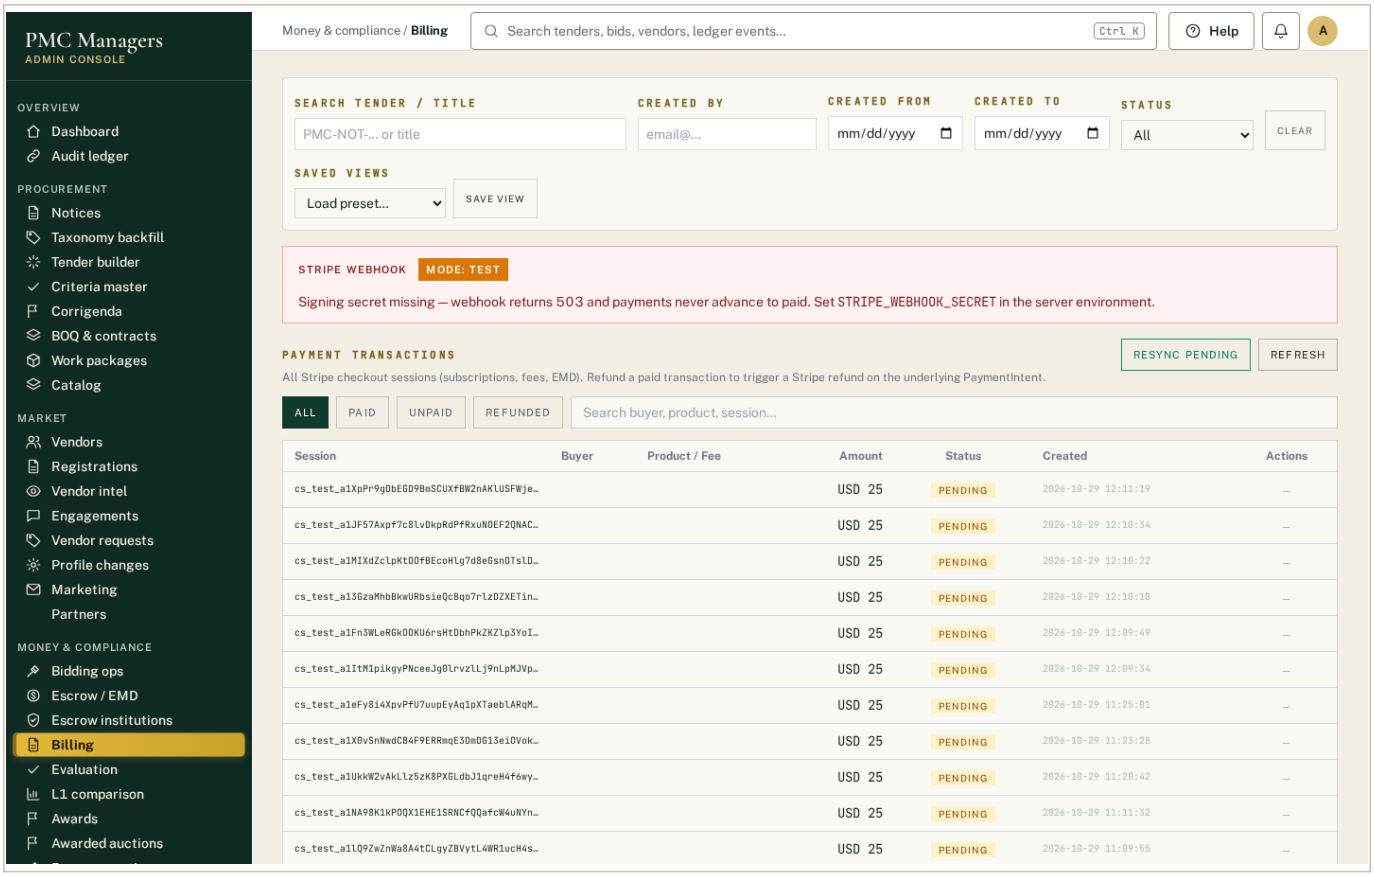

Every action is recorded in a tamper-evident chain. Verify chain re-checks every link.

**Main actions**

- Search events
- Verify chain
- Export

# Billing

Screen: `/admin/e/billing`

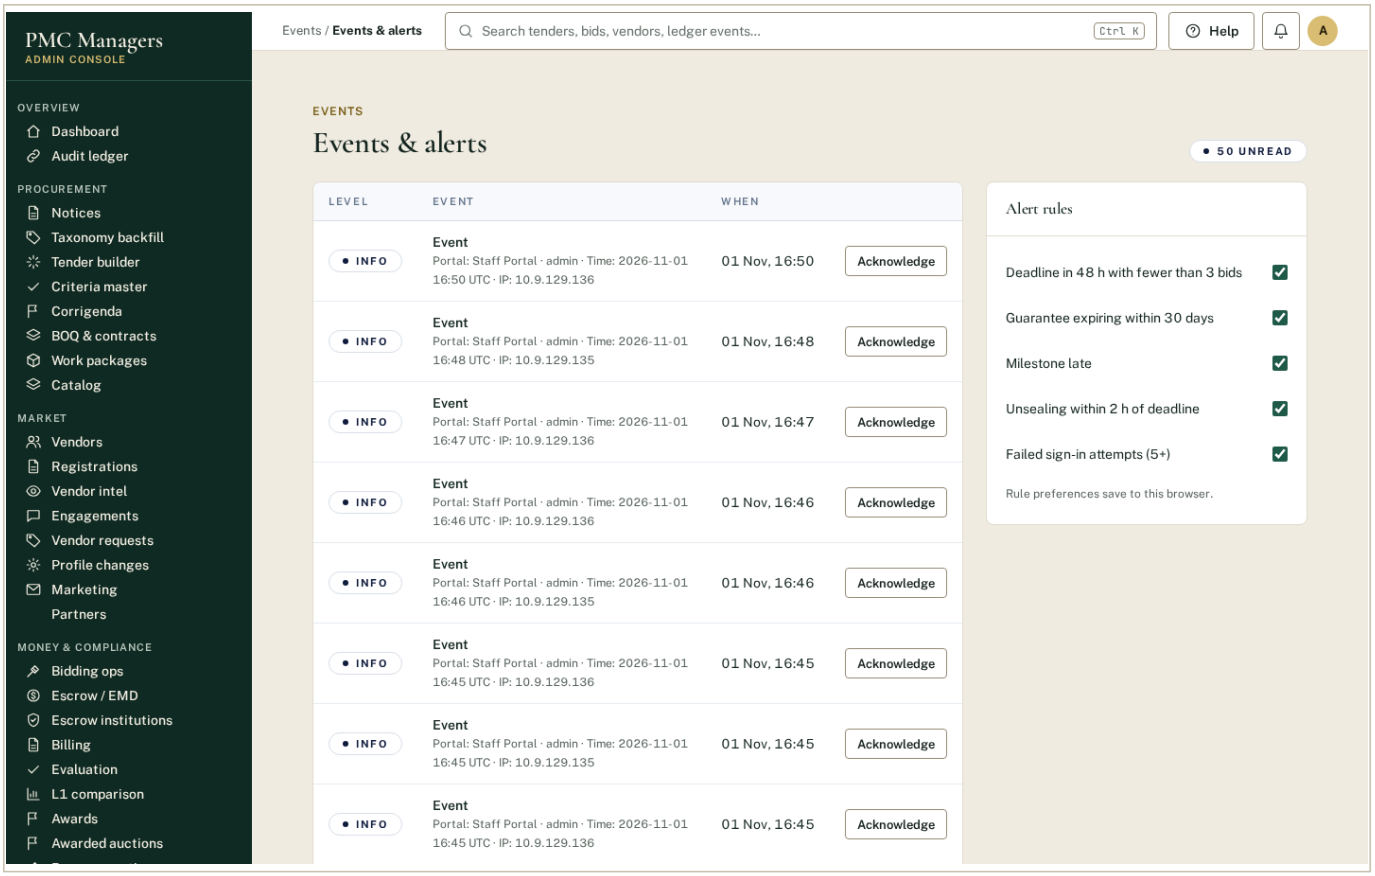

Hosting fees, subscriptions and invoices.

**Main actions**

- View invoices
- Check payment status

# Events & alerts

Screen: `/admin/e/events`

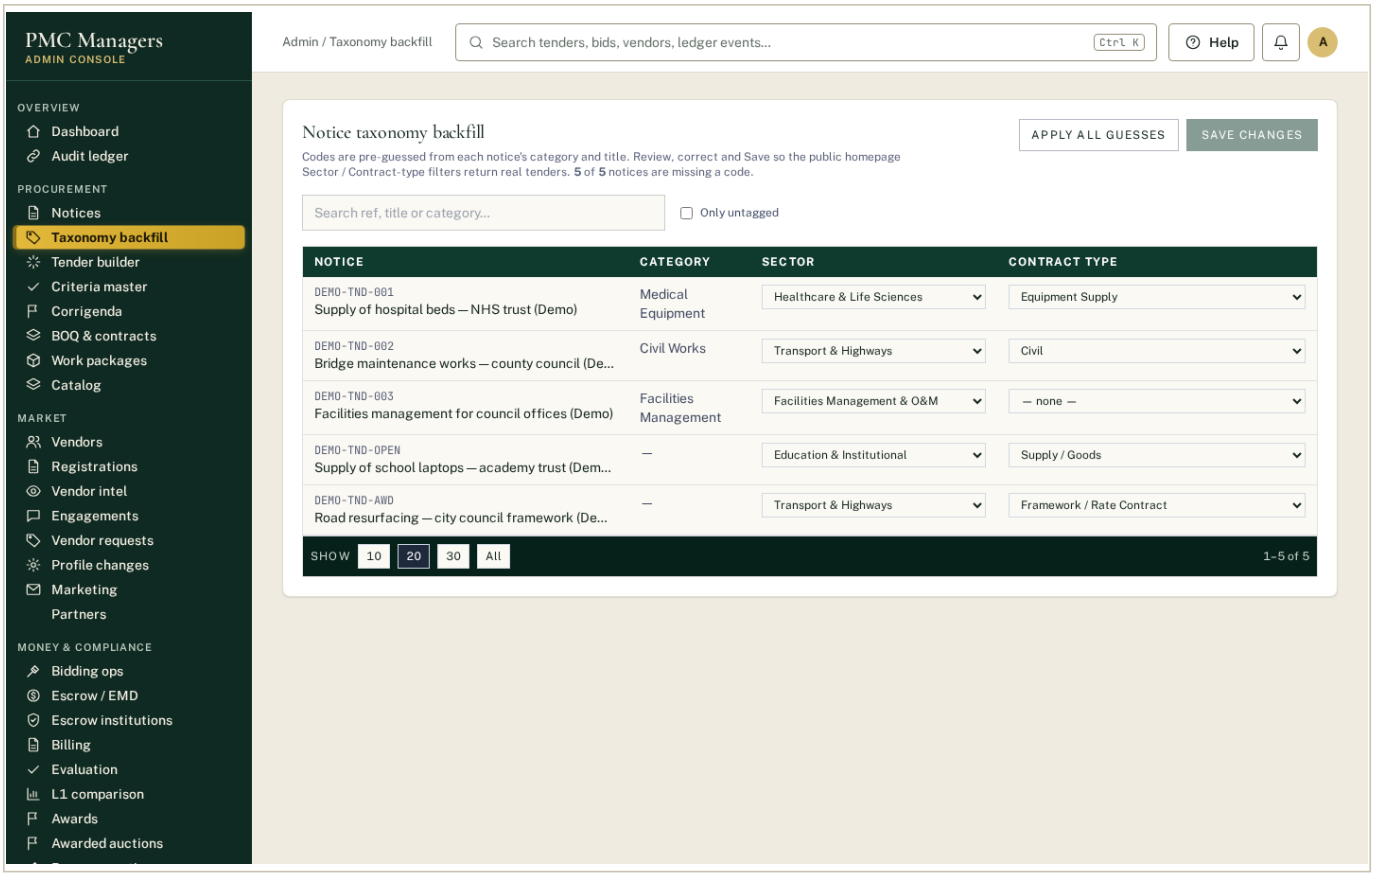

System events and alerts, including scheduled jobs and email delivery.

**Main actions**

- Review alerts

# Taxonomy backfill

Screen: `/admin/e/taxonomy-backfill`

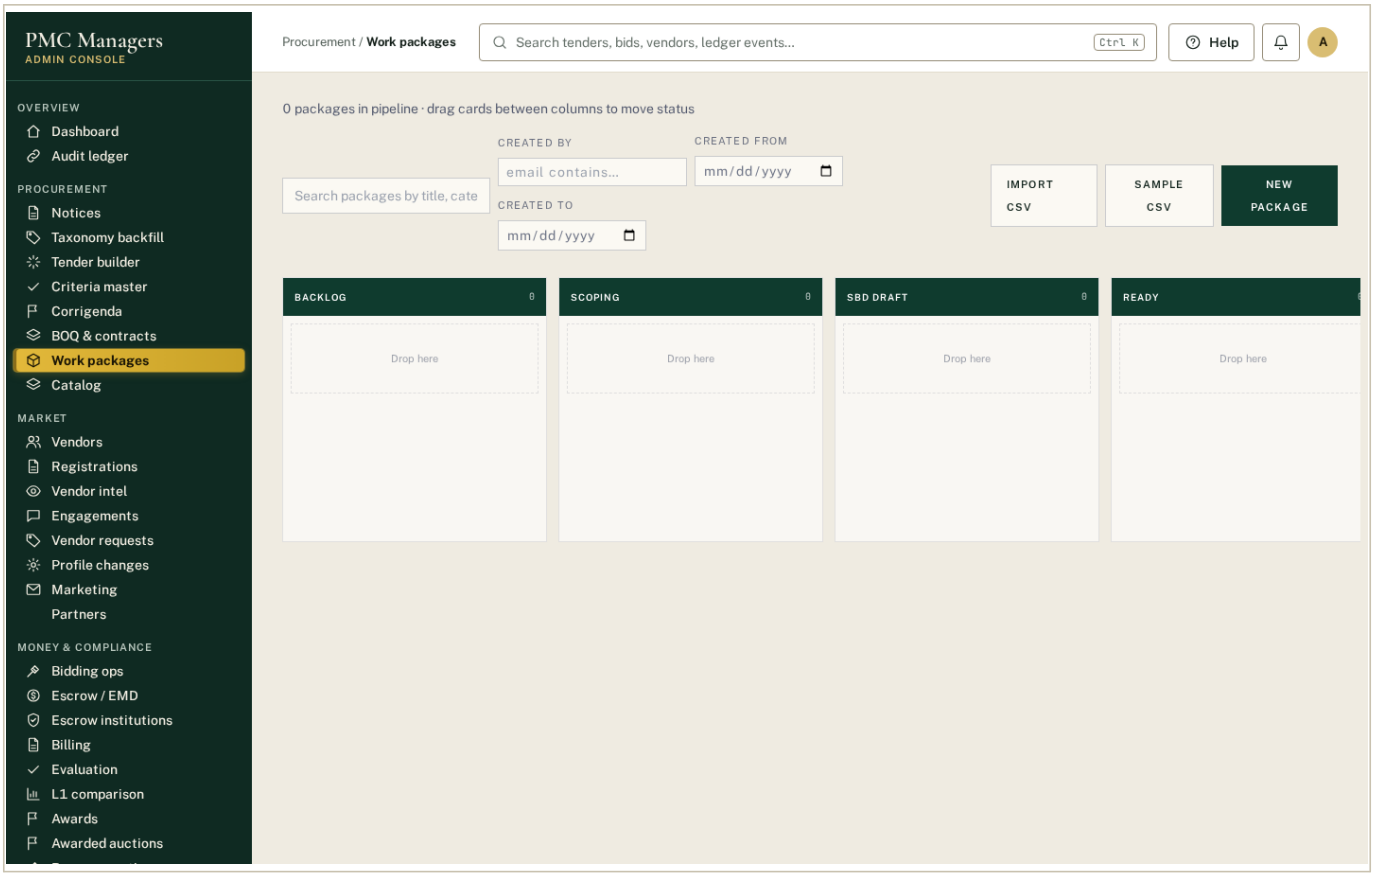

Assigns standard product/service categories (UNSPSC) to older tenders and suppliers so matching and search work everywhere.

**Main actions**

- Run a backfill
- Review suggested categories

# Work packages

Screen: `/admin/e/work-packages`

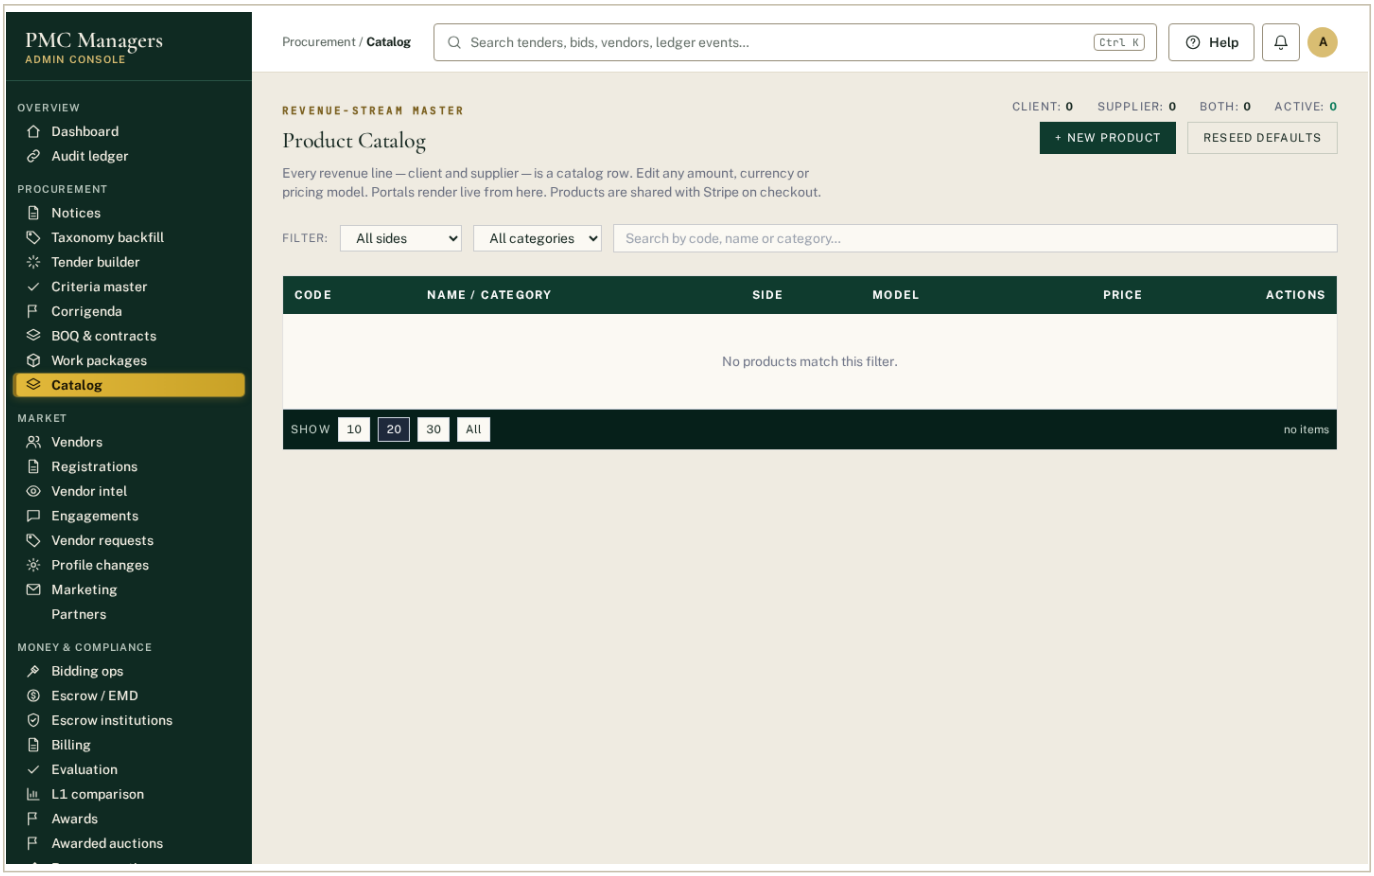

Splits large programmes into packages that can each be tendered separately.

**Main actions**

- Create a package
- Link it to a tender

# Catalog

Screen: `/admin/e/catalog`

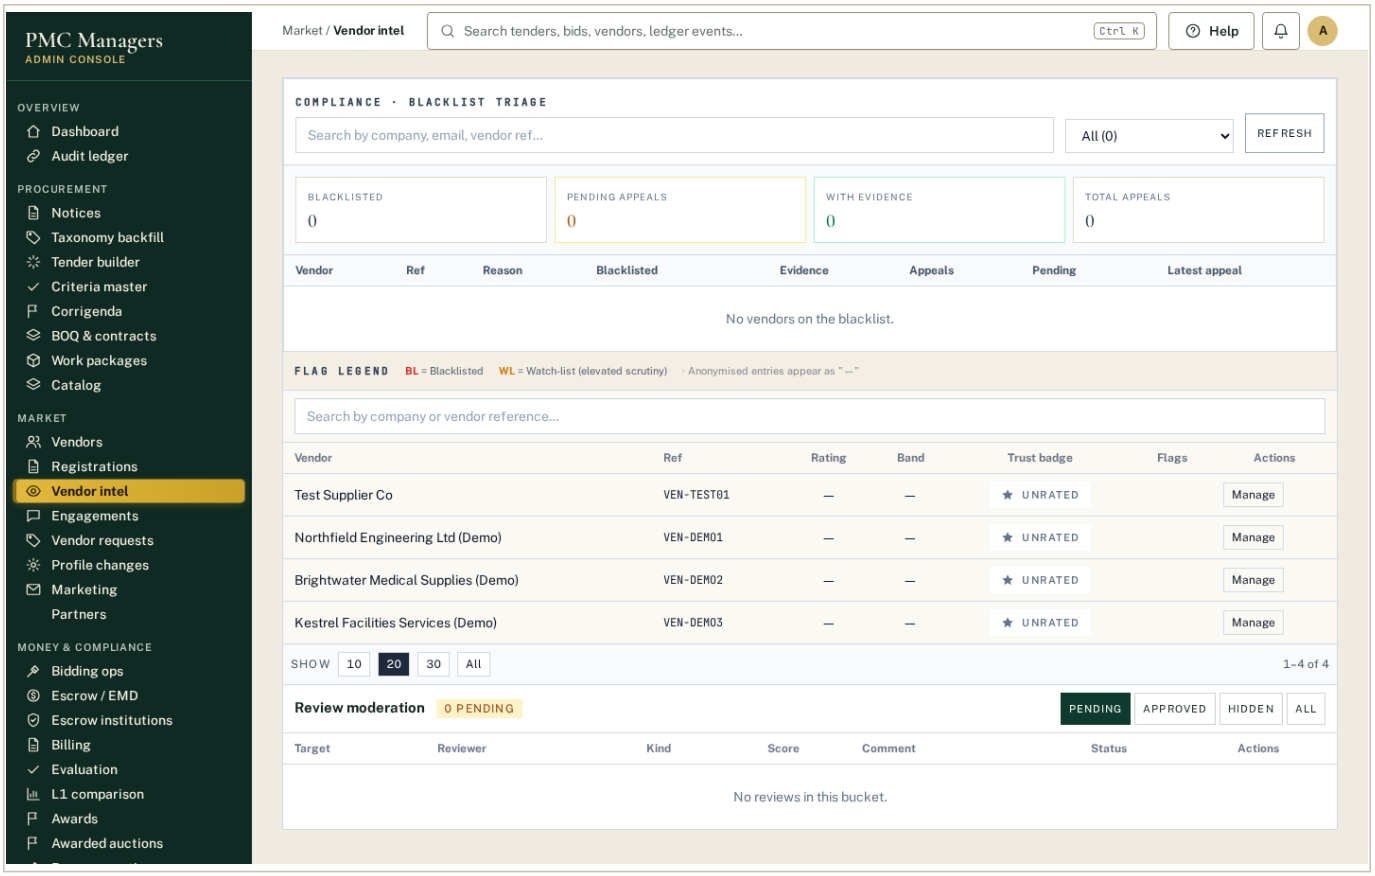

Product and service catalogue used for quick quotes and BOQ lines.

**Main actions**

- Add catalogue items
- Edit prices

# Vendor intel

Screen: `/admin/e/vendor-intel`

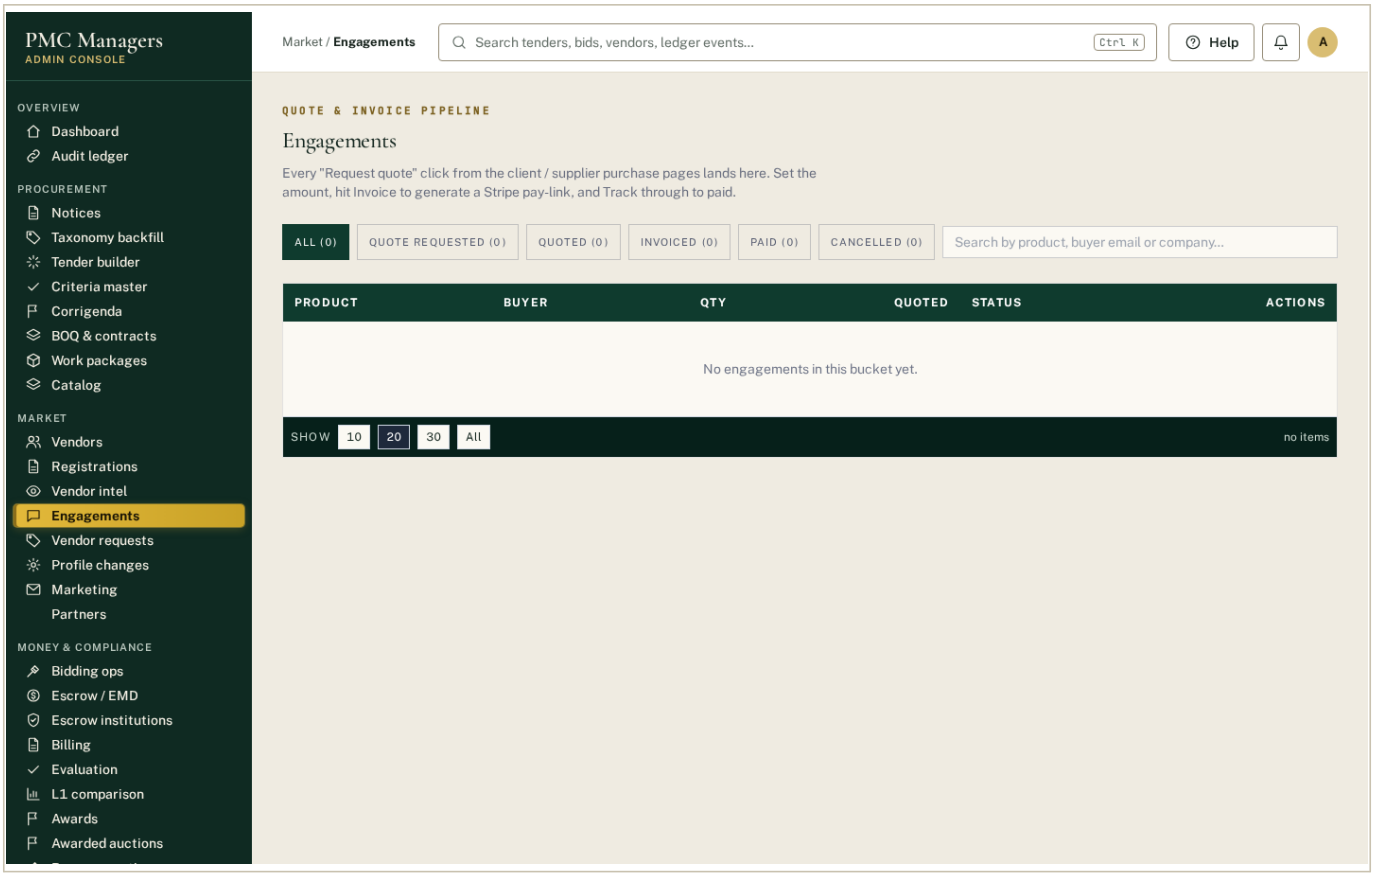

Supplier risk and performance signals: reviews, appeals, debarment checks and history.

**Main actions**

- Review a supplier's signals
- Handle an appeal

# Engagements

Screen: `/admin/e/engagements`

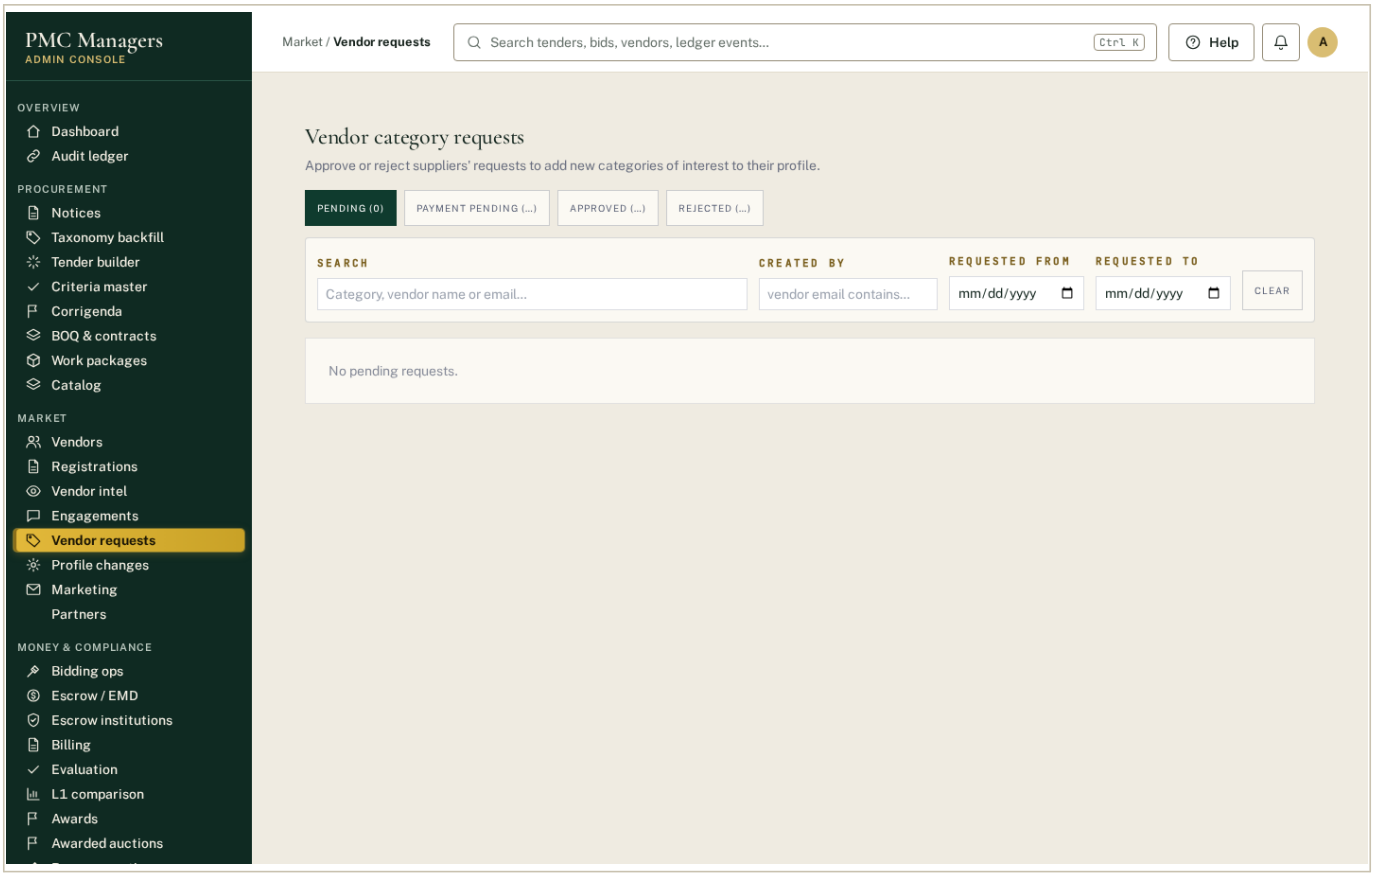

Service engagements and quote requests between buyers and suppliers.

**Main actions**

- Track an engagement

# Vendor requests

Screen: `/admin/e/vendor-requests`

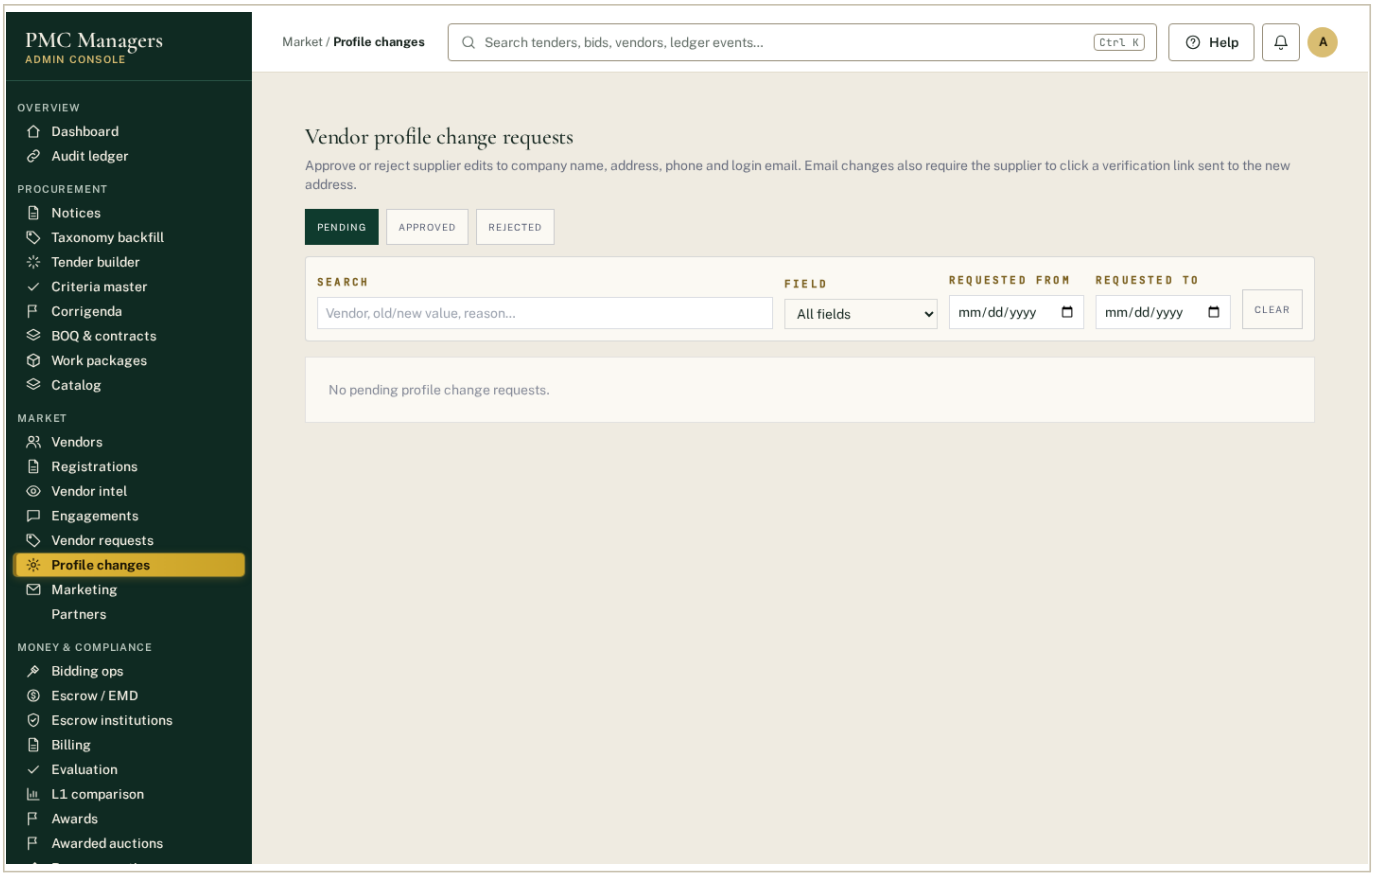

Requests raised by suppliers (category additions, help, corrections) waiting for PMC action.

**Main actions**

- Respond to a request

# Profile changes

Screen: `/admin/e/profile-changes`

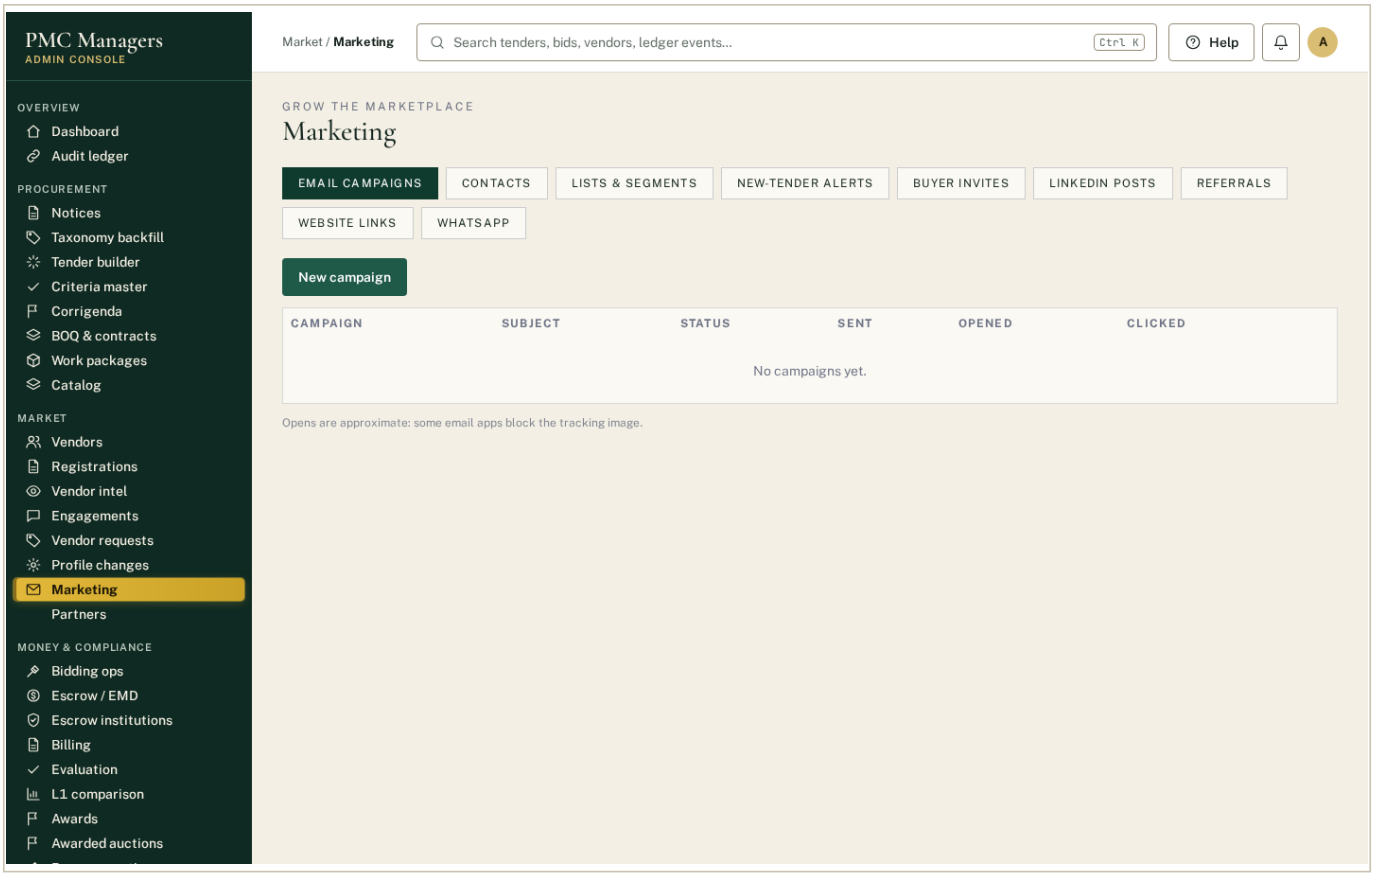

Supplier profile changes (bank, address, directors) that need approval before they take effect.

**Main actions**

• Approve or reject a change

# Marketing

Screen: `/admin/e/marketing`

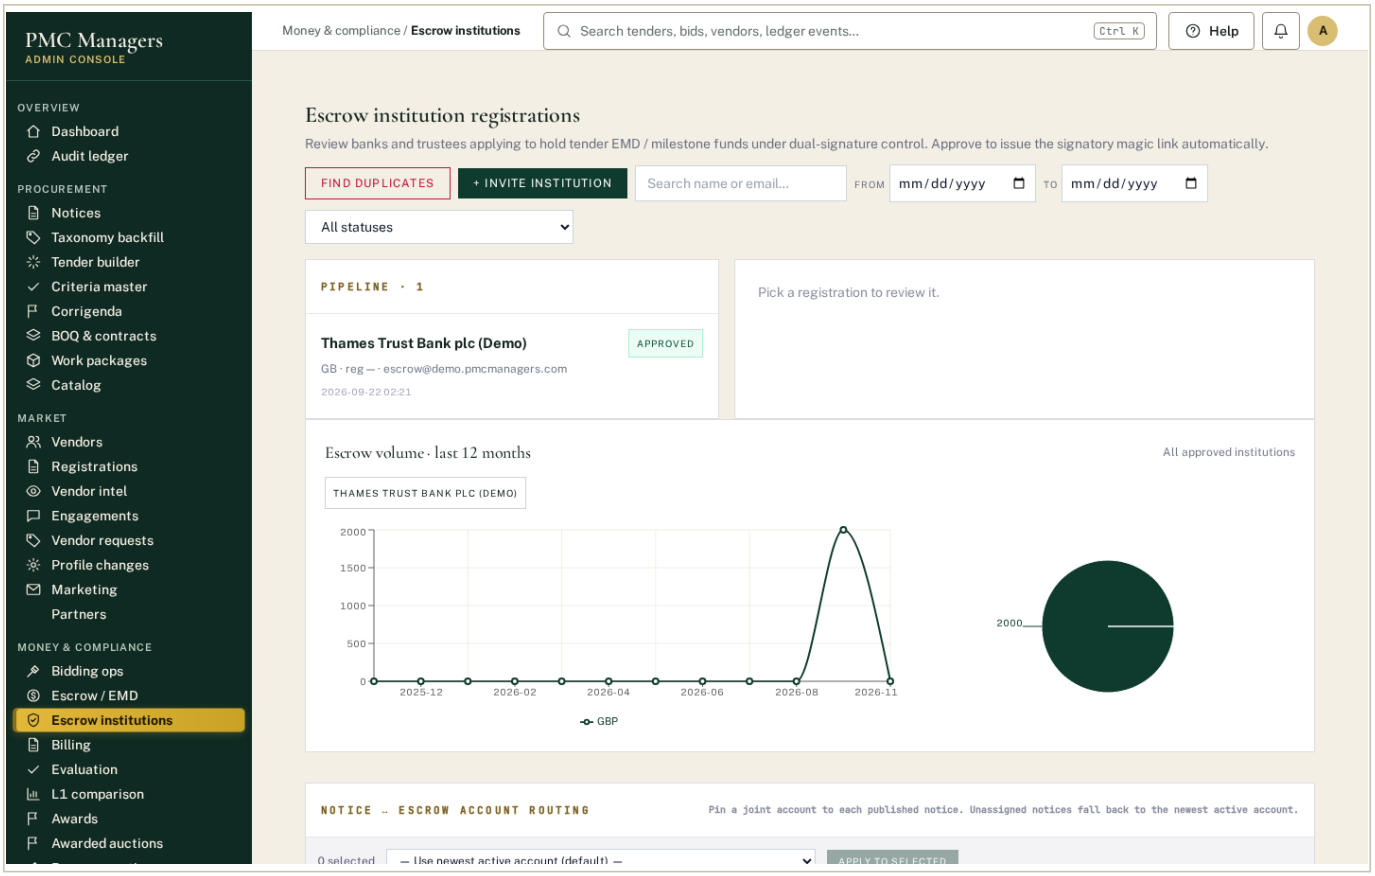

Campaigns, digests and WhatsApp/email outreach to suppliers.

**Main actions**

- Send a campaign
- View the WhatsApp inbox

# Escrow institutions

Screen: `/admin/e/escrow-institutions`

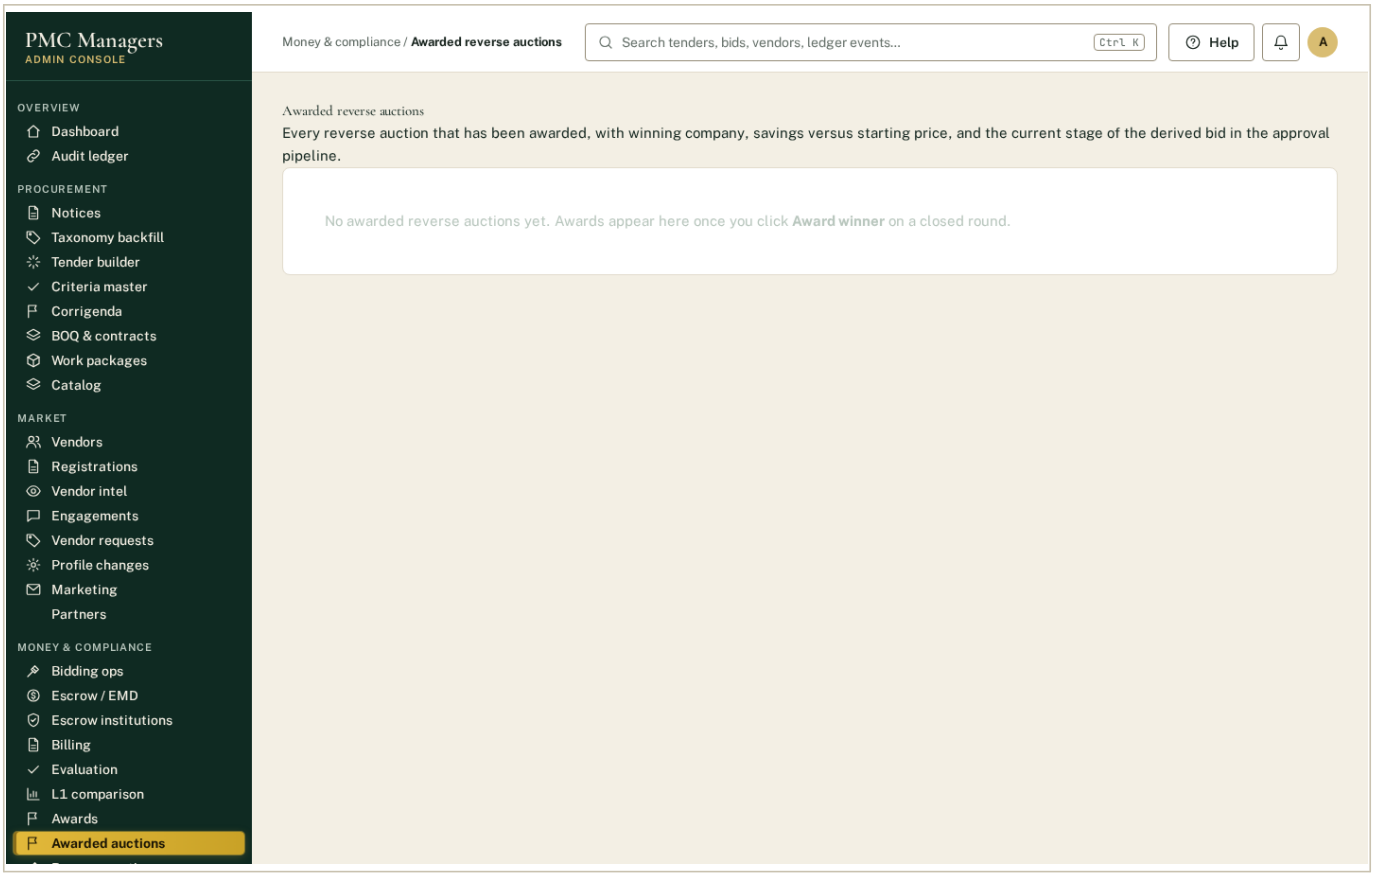

Banks and escrow providers onboarded to hold EMDs and award payments.

**Main actions**

- Approve an institution
- View accounts

# Awarded auctions

Screen: `/admin/e/awarded-auctions`

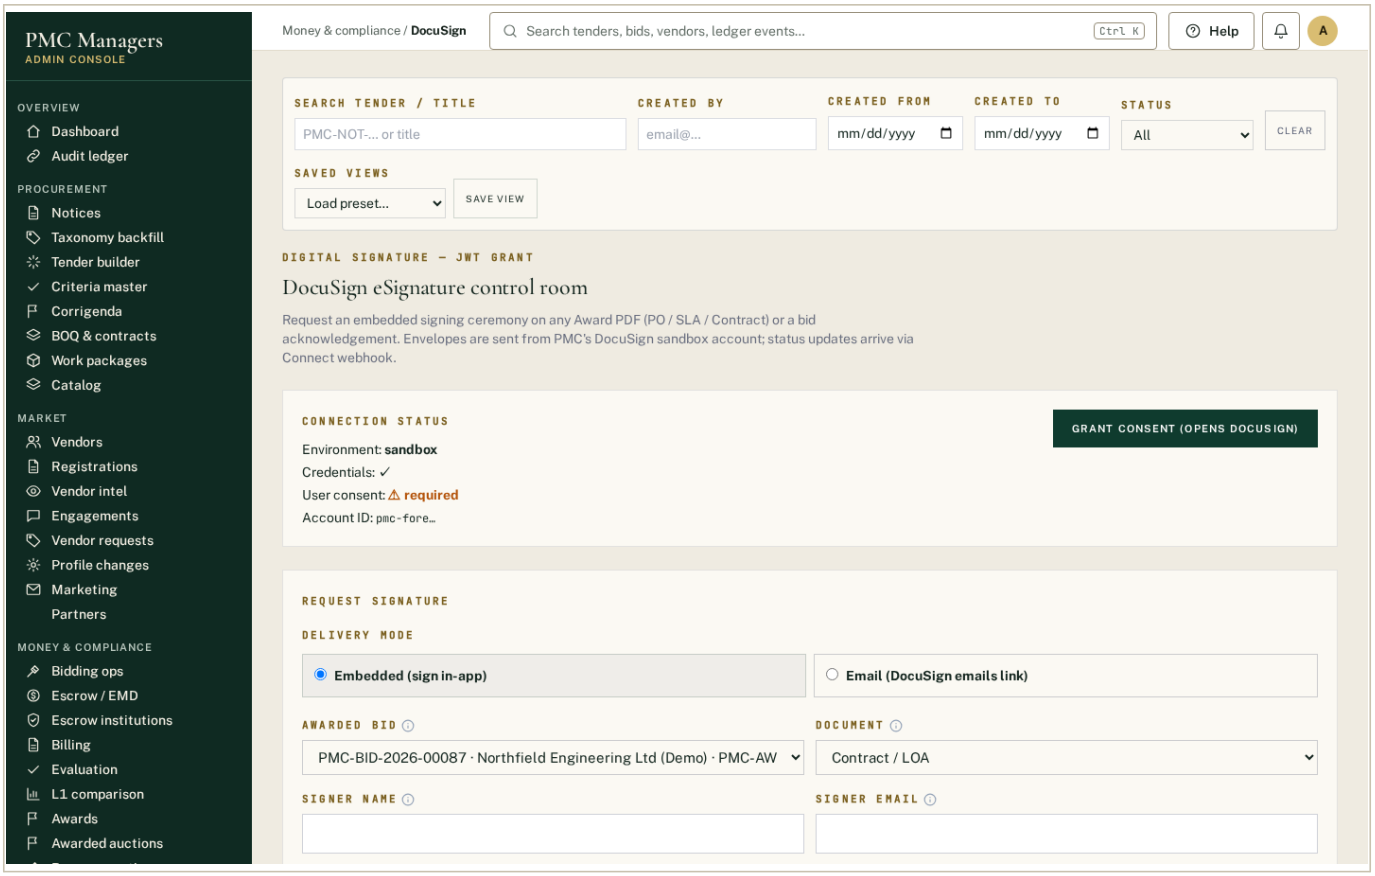

Results of completed reverse auctions and the resulting awards.

**Main actions**

- Open an awarded auction

# DocuSign

Screen: `/admin/e/docusign`

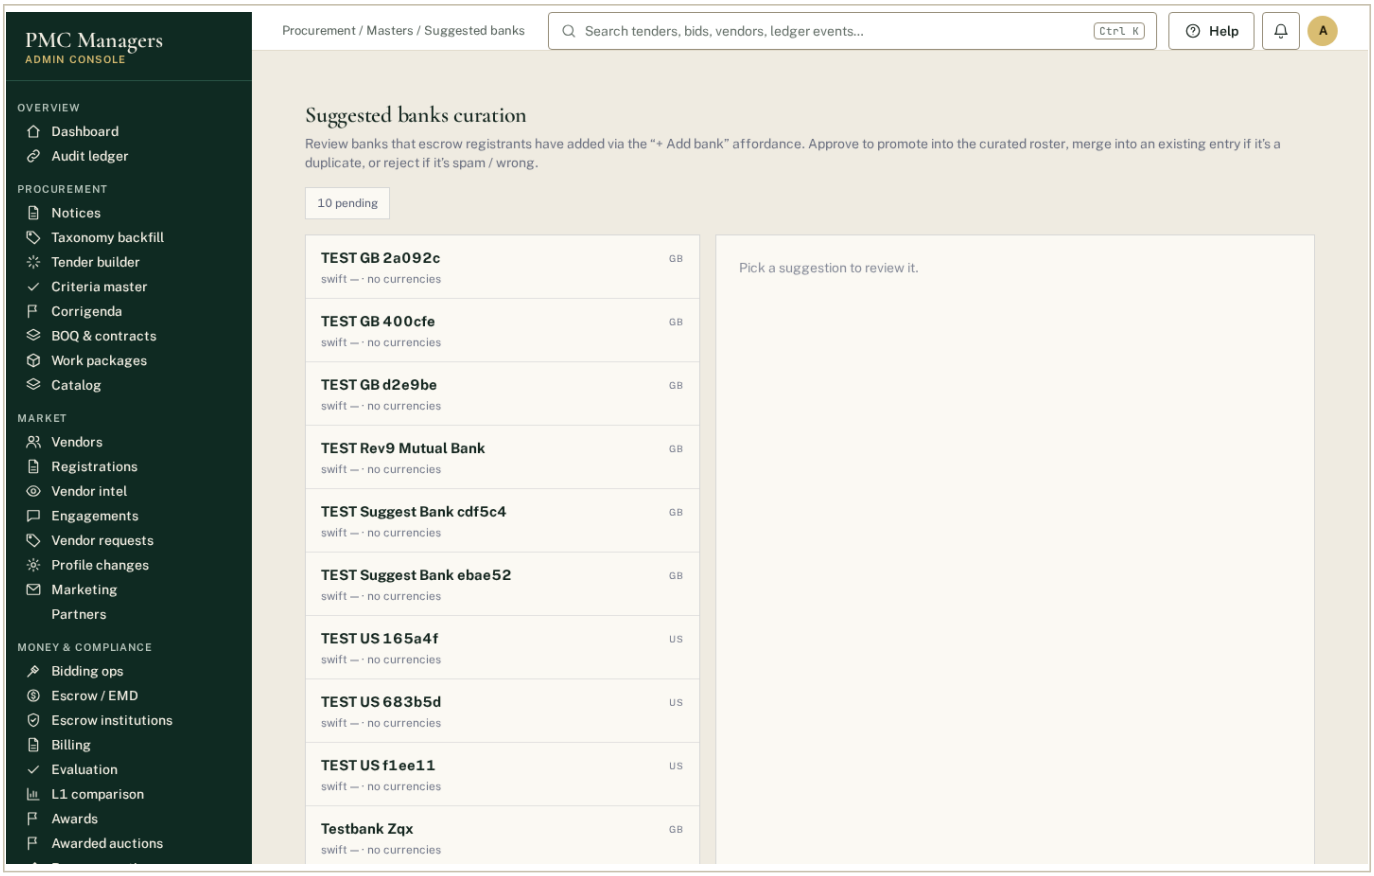

Electronic signature envelopes for award letters and contracts.

**Main actions**

- Track envelope status

# Suggested banks

Screen: `/admin/e/suggested-banks`

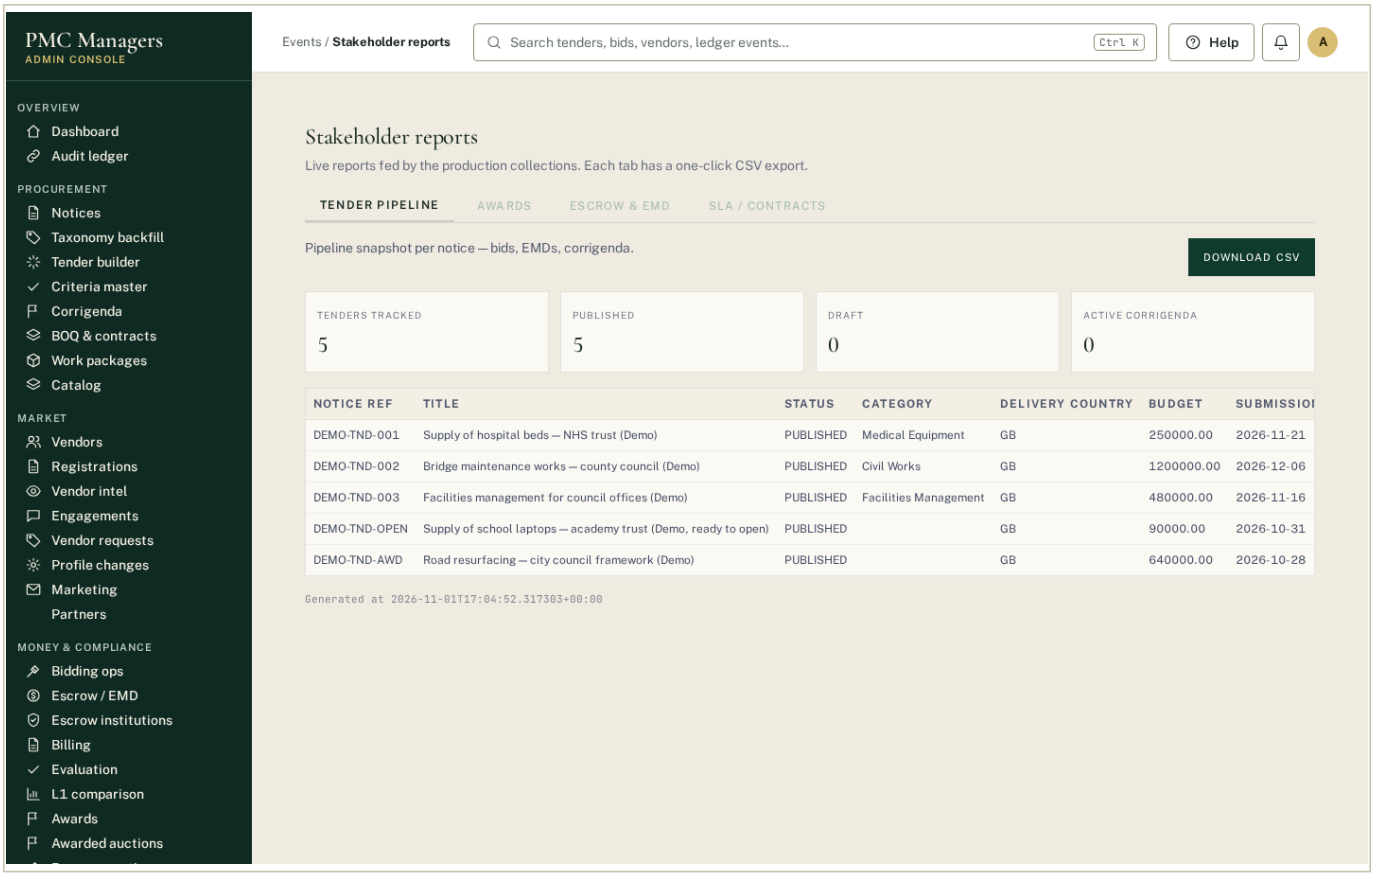

Banks suggested by users to be added as escrow institutions.

**Main actions**

- Review a suggestion

# Stakeholder reports

Screen: `/admin/e/stakeholder-reports`

Board and sponsor reports: tender volumes, savings, timelines and compliance.

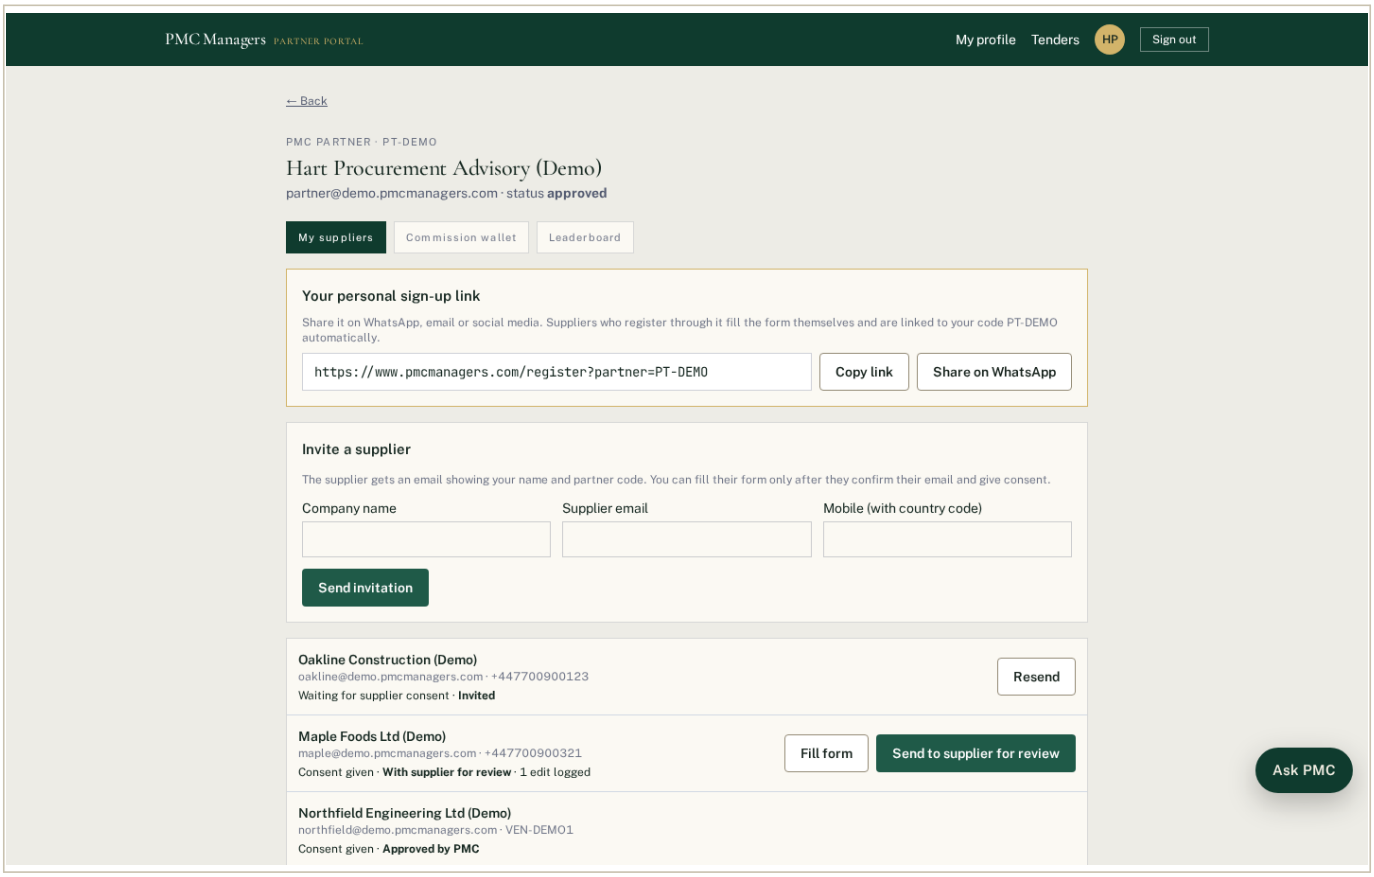

**Main actions**

- Generate a report
- Download PDF

# 7 · Partner portal — screen tour

## Partner profile

Screen: `/partner/me`

Partners complete four sections (profile, banking, documents, agreement) with a progress bar; the form opens where they left off. After approval they onboard suppliers and see commission.

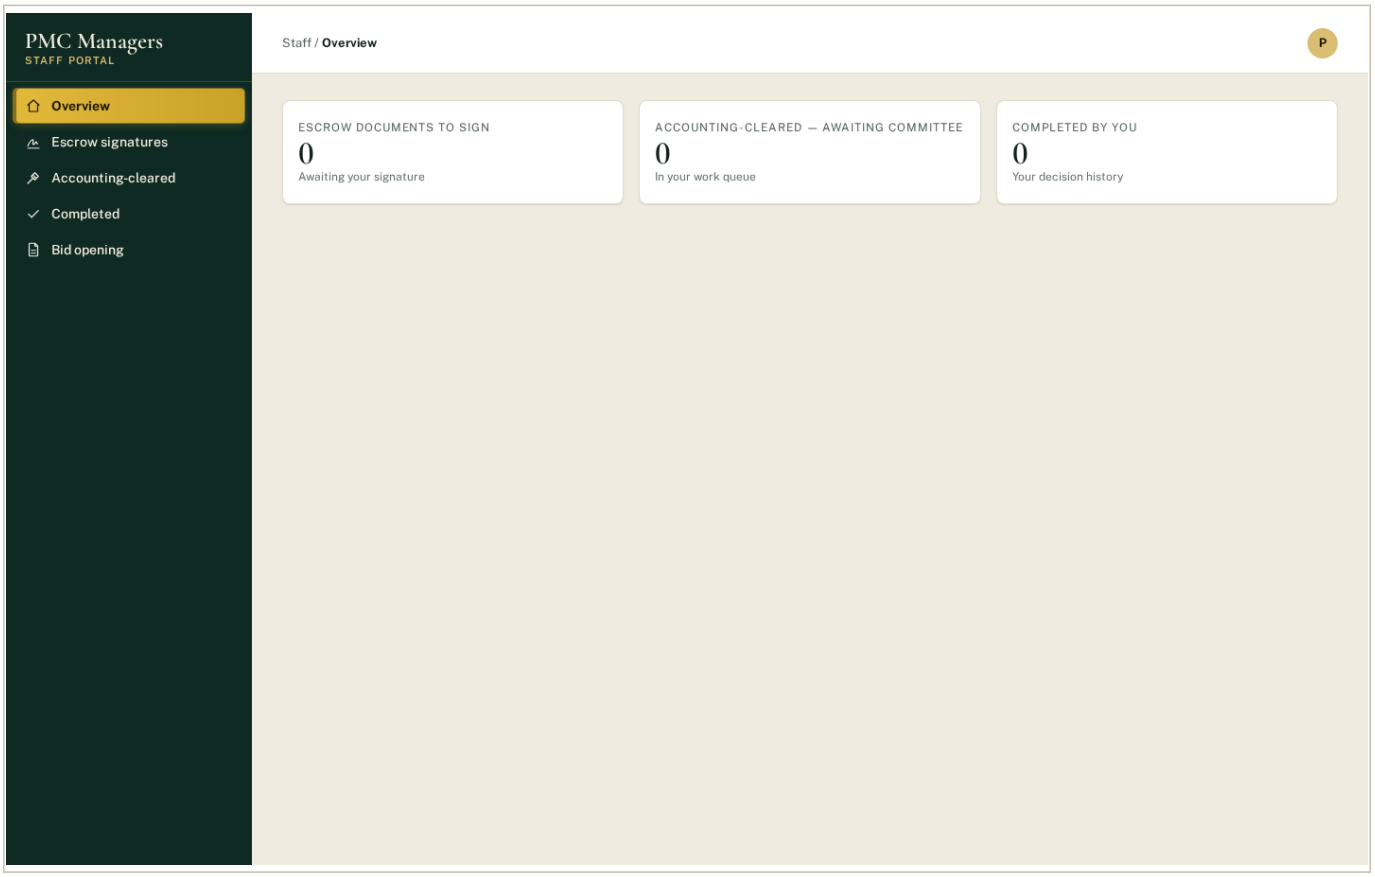

**Main actions**

- Complete each section
- Sign the agreement
- Submit for approval

# 8 · Staff portal — screen tour

## Staff portal (committee)

Screen: `/staff`

Committee members and other staff see their tasks: tenders to open, proofs to review, bids to sign off and award.

**Main actions**

- Approve an opening
- Accept / reject proofs
- Award

# 9 · Deep-dive: Tender builder & AI DPR

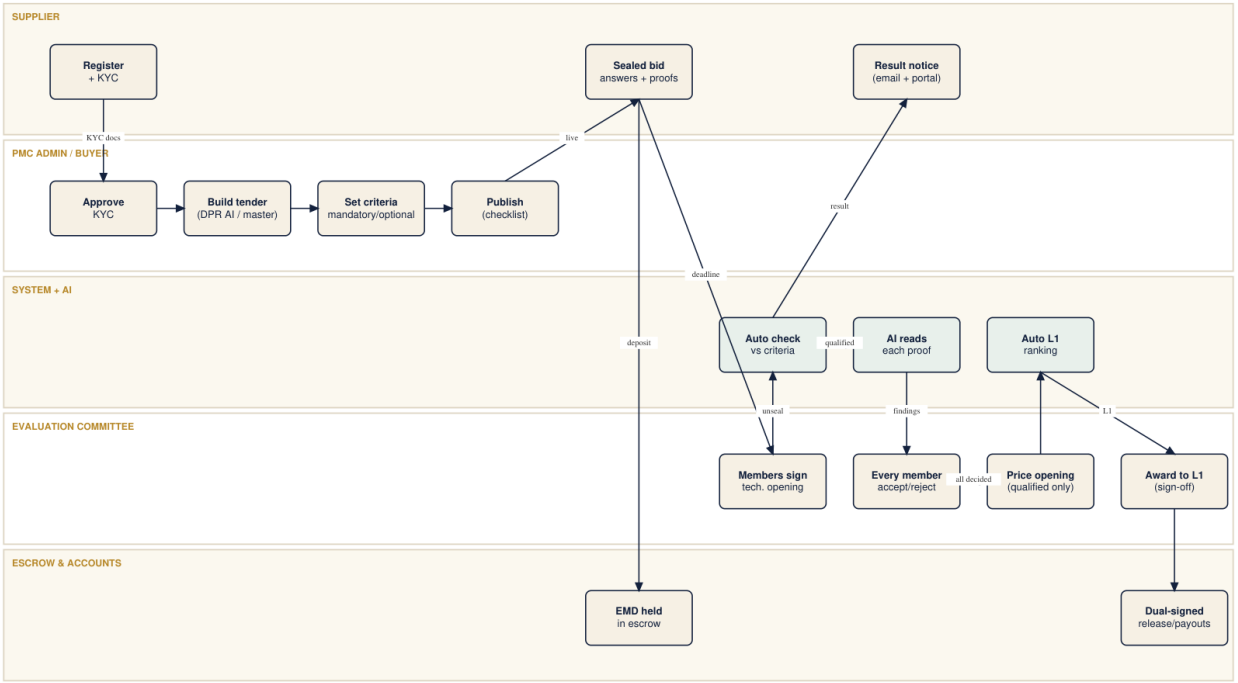

1. Tender builder › AI generate from DPR: pick country, a master template (or 'build a brand-new master'), upload up to 3 DPRs (PDF/DOCX/TXT, max 100 MB each).
2. Analyze runs in the background; each file shows progress, extracted headings and missing categories.
3. Create AI-drafted tenders, review every section, then use Criteria and Create notice.

If upload fails with 'status code 413' on AWS, the backend bundle was deployed without the .platform/nginx upload-size setting — redeploy the full backend ZIP (see chapter 13).

# 10 · Deep-dive: Criteria, sealed bids, opening & AI proof review

1. Criteria come from the Criteria master or saved sets, AI-read from the tender document, or one-off. Each is pass/fail or scored, Mandatory or optional, with proof required or not.
2. Rule: a bid qualifies if it meets every mandatory criterion and at least N of the optional ones (blank = all).
3. Publish needs: main document, future deadline, at least one must-pass criterion (checklist on the draft row). Live tenders without bids can still change criteria.
4. Suppliers must answer mandatory items with proofs; everything is sealed on submit.
5. After the deadline every committee member signs the technical opening; the system checks every bid and emails result notices.
6. AI reads each must-pass proof of qualified bids: Matches / Does not match / Unclear + figure found.
7. Every member accepts or rejects each proof (comment to reject). Mandatory rejection disqualifies; optional rejection disqualifies only below the minimum.
8. Doubts can be raised and resolved with notes. Download the proof check report (PDF) for the file.

**PMC tender lifecycle — process flow**

• Lanes show who acts. Green boxes are automatic (system or AI). Bids stay sealed until the committee signs each opening.

• A bid qualifies if it meets every mandatory criterion and at least the minimum number of optional criteria; the AI only flags proofs, the committee decides (all must accept).

• Price opening is blocked until every proof is decided; L1 runs automatically; award needs certifier, legal and accounting clearance.

PMC Managers · PMC tender lifecycle — process flow

Page 1

# 11 · Deep-dive: Price opening, L1, award & escrow

1. Price opening is blocked until every proof is decided; only qualified bids' prices open.
2. L1 ranking runs automatically and shows on the opening card.
3. Award to L1 (committee member, one click + note) requires certifier, legal and accounting clearance on the L1 bid. Weighted tenders use the Award recommendation report.
4. On award: award letter and contract are generated; the winner is emailed 'Congratulations — your bid is awarded'; every other bidder is emailed that the tender went to another supplier, with their EMD refund date.
5. Escrow releases need two signatures; consortium awards create per-member payment instructions with bank references and a downloadable payout report.

# 12 · Partners, reminders & tracking

1. Admin invites a partner; partner completes Profile, Banking, Documents, Agreement (progress bar 'N of 4').
2. Reminder emails go 3 and 7 days after joining if unfinished (daily 09:00 London).
3. Every tender shows a progress line (Criteria → Bids → Opening → Proof review → Price → L1 → Award) on Notices and on the dashboard.

# 13 · Deployment runbook (AWS S3 + CloudFront + Elastic Beanstalk)

1. Download the latest pmc-backend-vXX.zip and pmc-frontend-vXX-prod-build.zip.
2. Backend: Elastic Beanstalk › Upload and deploy the backend ZIP as-is (it contains .ebextensions and .platform/nginx — do not re-zip).
3. Check environment health is Green and /health returns 200.
4. Frontend: empty the S3 site bucket, upload the contents of the frontend ZIP, then CloudFront › Invalidations › /*.
5. Check production secrets (email, AI key, cron secret) are set; scheduled jobs on AWS need an EventBridge rule calling each /api/v1/cron/... endpoint with the Bearer secret.

# 14 · Troubleshooting playbook

| Symptom | Likely cause | Fix |
|---|---|---|
| Upload fails: status code 413 | Web server body limit on AWS | Redeploy full backend ZIP with .platform |
| AWS health 'Degraded' | Failing health checks or 5xx | EB › Health › causes; check /health and logs |
| Old screens after deploy | CloudFront cache | Invalidate /* |
| Emails not arriving | Email key missing/invalid | Update the email secret and redeploy |
| Price opening blocked | Proof review or doubt pending | Decide every proof / resolve doubts |
| Award to L1 refused | L1 bid not cleared | Complete certifier, legal, accounting clearances |
| Supplier can't submit | Mandatory criterion or proof missing | Answer all mandatory items |

# 15 · Sample workflow — one tender end to end

1. Admin drafts 'Hospital beds supply' from a DPR and adds 3 mandatory + 2 optional criteria (at least 1 optional), L1.
2. Checklist all ticked → Publish.
3. Three suppliers bid; one misses a mandatory proof and cannot submit until fixed.
4. Deadline passes; committee signs; 2 bids qualify, 1 fails (turnover below 500,000) and is notified.
5. AI flags a mismatch on one proof; one member rejects with a comment → that bid is disqualified.
6. Price opening; L1 = remaining bid; clearances done; Award to L1; letters and emails go out; EMDs of others scheduled for refund.

# 16 · API reference index

849 endpoints, grouped by module. All are under /api; changes need sign-in and the CSRF header.

## admin-auth (4)

```
GET /api/v1/admin/auth/me
POST /api/v1/admin/auth/change-password
POST /api/v1/admin/auth/login

• v56s (2026-06-25) — Go-Live switch, public board filters, taxonomy persistence + clearance deliverables
• v56s Open-Five closeout (25 Jun 2026)
• Public placeholder-data cleanup — go-live readiness (26 Jun 2026)

# 19 · Glossary

| Term | Meaning |
|---|---|
| DPR | Detailed project report used to draft a tender |
| EMD | Earnest money deposit held in escrow with a bid |
| L1 | Lowest compliant price among qualified bids |
| Mandatory criterion | Must be met by every bidder |
| Optional criterion | Counts toward the minimum number the tender sets |
| Proof review | AI finding + unanimous committee decision on each proof |
| Corrigendum | Formal change to a live tender sent to every bidder |
| Consortium | Registered suppliers bidding together |
| Sealed bid | Encrypted until the committee signs the opening |
