What we are

PMC Managers is a cloud platform that modernises how organisations run tenders. Instead of email threads, PDFs and spreadsheets, every notice, bid, payment and signature happens in one place — and everything is recorded on an audit trail that regulators, boards and auditors can trust. Operated by THE PMC MANAGERS LTD (UK, Co. No. 17031540).

AT A GLANCE

- Public notice board + vendor portal + staff + admin — one platform
- Joint-signature EMD escrow with dual-sign releases
- Live reverse auctions with anti-sniping
- DocuSign-based award letters and contracts
- Full audit ledger — every action, every user, exportable
- Multi-tenant, multi-country, multi-currency from day one

What we do

We run the end-to-end procurement workflow: publish the tender, collect vendor registrations, accept bids with sealed envelopes, hold the earnest money in joint escrow accounts, run reverse auctions where appropriate, and sign the award letter with DocuSign — all without leaving the platform.

Who we help

Public authorities, state-owned enterprises, large private buyers, and the vendors who sell to them. The platform scales from a single department running 20 tenders a year to a national procurement authority running thousands.

What is different

The audit ledger. Every click is permanently recorded. Buyers prove compliance in minutes, not weeks. Vendors see exactly where their bid is in the review pipeline. Auditors export the trail with a single click.

Where we are today

The platform is live end-to-end with four role surfaces — public notice board, vendor portal, staff portal, and admin console. Reverse auctions, EMD escrow and DocuSign-based award signing all work in production. We ship improvements on a roughly weekly cadence.

How to engage

Buyers can request a demo and pilot. Vendors can register for free and start receiving matched tender alerts. Partners (banks, accounting firms, ERP integrators) can co-sell or integrate via our APIs. See the contact details below.
